

1

00:00:00,000 --> 00:00:25,000

Good evening. I'm David Shonebrod. We're gathered together tonight to hear an extraordinary

2

00:00:25,000 --> 00:00:30,800

story. One of the most fascinating stories in the history of man. Whether it is true or

3

00:00:30,800 --> 00:00:36,480

false is something that you will judge after you've heard the story and a discussion of it by a panel

4

00:00:36,480 --> 00:00:42,720

of scientists and science editors. The story will be told by the two people who have lived it. First,

5

00:00:42,720 --> 00:00:51,320

Mr. Barney Hill and his wife, Betty Hill. Barney and Betty Hill are two of many Americans who

6

00:00:51,320 --> 00:00:57,280

claim to have seen an unidentified flying object and two or perhaps a hundred who claim to have been

7

00:00:57,280 --> 00:01:06,760

aboard a flying saucer. Their story was written up for them by John Fuller, author, columnist, who in

8

00:01:06,760 --> 00:01:13,560

this new book, *The Interrupted Journey, Two Lost Hours, Abort a Flying Saucer*, tells not only their

9

00:01:13,560 --> 00:01:20,200

story but their therapy and the revelation to themselves by themselves under hypnosis of their

10

00:01:20,240 --> 00:01:25,920

extraordinary experience. And this will then be examined and discussed by a panel of experts.

11

00:01:25,920 --> 00:01:32,520

Let's now meet our experts. Dr. Leo Sprinkel, counselor and assistant professor of psychology at

12

00:01:32,520 --> 00:01:38,440

the University of Wyoming. Mr. Edward Edelson, science editor of the *World Journal Tribune* of

13

00:01:38,440 --> 00:01:45,200

New York. Professor James McDonald, an atmospheric physics professor at the University of Arizona.

14

00:01:46,000 --> 00:01:54,640

Mr. Leon Jariff, science editor of Time Magazine. And Carl Sagan, professor at Harvard University and

15

00:01:54,640 --> 00:02:01,840

also at the Smithsonian Astrophysical Observatory. Now, Mr. and Mrs. Hill, for your story. I believe it

16

00:02:01,840 --> 00:02:09,360

began on the night of the 19th of September 1961 as you were driving home from a vacation in Canada

17

00:02:09,680 --> 00:02:15,040

and something happened near Lancaster, New Hampshire. Which one of you was the first to see this

18

00:02:15,040 --> 00:02:20,960

something happen? Betty was the first one. Yes. Betty, could you start the story then? Yes. We were driving

19

00:02:20,960 --> 00:02:29,520

along on route three and it was a very clear night and the moon was very almost full and very bright

20

00:02:30,560 --> 00:02:36,960

and the stars were very, the sky was very clear. We can see the stars easily. When suddenly,

21

00:02:37,520 --> 00:02:44,560

near the moon, I noticed a new star which was much larger and brighter than the other stars from the

22

00:02:44,560 --> 00:02:51,760

sky. And I called Betty's attention to this. Then suddenly we noticed it started to move

23

00:02:52,640 --> 00:02:58,240

and it went across the face of the moon. We stopped the car and got out to look at this

24

00:02:58,240 --> 00:03:04,240

because we thought it was the satellite. And while we were observing it, it made a turn

25

00:03:04,800 --> 00:03:11,840

and started to come in in our direction. And at this point, we changed our minds thinking that it

26

00:03:11,840 --> 00:03:20,320

must be a plane. We were driving along and as it came in close, I began to realize that it was not

27

00:03:20,320 --> 00:03:27,680

a satellite or a plane, that it was something that I had never seen before. Now this was based on its

28

00:03:28,640 --> 00:03:37,040

manoeuvrability, the way it was flying. It was sort of, it had a very erratic flight in the sky

29

00:03:37,840 --> 00:03:43,600

and as it came in closer to us, it was sort of riding along on the ridge of the mountains.

30

00:03:44,720 --> 00:03:51,520

And then when we got in the area of Indian Head, it suddenly swung out over the highway

31

00:03:51,600 --> 00:03:58,880

in front of our car. At this time, I could see a row of windows around the edge and a red light

32

00:03:58,880 --> 00:04:05,840

on each side. And it was at this point that Bonnie stopped the car and he decided to get out,

33

00:04:05,840 --> 00:04:12,240

to get a good look at it and to identify it. So I got out of the car and took the pair of

34

00:04:12,240 --> 00:04:18,880

binoculars, 7x50 crescent binoculars and stepped away. And as I raised the binoculars looking over

35

00:04:18,880 --> 00:04:24,720

the roof of the car from my position on the ground, the object shifted across the highway,

36

00:04:24,720 --> 00:04:29,760

where now in making the shift, it also had a descent motion that brought it to what I roughly

37

00:04:29,760 --> 00:04:36,480

estimated as about 100 feet in the air. And then I began walking across the highway into the field.

38

00:04:37,120 --> 00:04:43,280

I walked quite a distance in the field and I saw what I thought were figures standing by this huge

39

00:04:43,280 --> 00:04:47,920

plate glass looking back at me. I couldn't believe it. I dashed back to the car screaming to Betty

40

00:04:47,920 --> 00:04:54,160

that, oh my gosh, I said something is going to capture us is what I said. There was a series of

41

00:04:54,160 --> 00:04:59,760

beeps and then later there was another series of beeps. Betty asked me if I now believed in

42

00:04:59,760 --> 00:05:05,120

flying saucers and I told her don't be ridiculous. Of course not. We continued then to proceed on

43

00:05:05,120 --> 00:05:12,800

to Fort Smith and we arrived. We both felt very uncomfortable and clean. I don't think I mentioned

44

00:05:12,800 --> 00:05:18,880

to Betty how I felt, but I felt clammy as if I had fallen into something very, very filthy.

45

00:05:18,880 --> 00:05:24,240

What time did you come home? I understand there was a time factor that you were surprised that

46

00:05:24,240 --> 00:05:29,280

you had come home so late. Well actually at the time, no, I wasn't surprised that we had arrived

47

00:05:29,280 --> 00:05:34,480

home later than really what we would have expected because we didn't put any particular

48

00:05:34,480 --> 00:05:41,440

importance on our arrival time except that we knew it was around 4.30. We should have arrived

49

00:05:41,520 --> 00:05:46,320

home at four hours. We arrived home in about five and a half to six hours. What were these

50

00:05:46,320 --> 00:05:52,480

objects on the back of your car that bothered you so much? Well, when I went out to look at the car

51

00:05:52,480 --> 00:05:59,200

to check it with the compass as this physicist had suggested, I found some round highly polished

52

00:05:59,200 --> 00:06:07,520

spots on the trunk of the car. When I put the compass near them, it just reacted erratically.

53

00:06:08,480 --> 00:06:13,600

In spun around? Yes. And then when I moved to Hawaii, the compass reacted normal. We had been

54

00:06:13,600 --> 00:06:18,160

asked if others had seen these spots and there are. There was a sergeant living in our apartment

55

00:06:18,160 --> 00:06:22,320

building at the time. He and his wife, they knew we had been on vacation so they came down and

56

00:06:22,320 --> 00:06:27,040

I told them she had gone out and she was quite upset about what she had seen and was trying to

57

00:06:27,040 --> 00:06:31,200

get me to go out and I wouldn't. So they went out and took a look and they came in quite excited

58

00:06:31,920 --> 00:06:37,200

insisting that I go out and look on the trunk of Betty's car. So when I went out, I also too

59

00:06:37,200 --> 00:06:42,800

saw these large shiny spots and I didn't put any or well it wasn't important. They were just shiny

60

00:06:42,800 --> 00:06:47,600

spots. I didn't know how they got there, but I didn't try to even understand how they were there.

61

00:06:47,600 --> 00:06:53,760

What next? During the same period of time, well about 10 days after the fighting itself,

62

00:06:54,320 --> 00:07:00,240

I had a series of dreams that lasted for about five nights and these were somewhat

63

00:07:00,240 --> 00:07:07,360

upsetting and puzzling to me. At first, I thought of them only as bad dreams, but then when the

64

00:07:07,360 --> 00:07:14,080

scientists noticed that there was this period of time, then I began to wonder if my dreams might

65

00:07:14,080 --> 00:07:19,440

have been my way of trying to recall what had happened. What could you tell us now about what was

66

00:07:19,440 --> 00:07:29,280

in those dreams? Well, the dreams, well briefly, in my dreams, we were driving along, we were stopped

67

00:07:29,280 --> 00:07:34,640

by a group of men in the highway, taken out of the car, taken aboard the UFO,

68

00:07:36,880 --> 00:07:42,800

underwent physical examination and then were relieved. These were the dreams that I had.

69

00:07:43,840 --> 00:07:53,840

How long after your mysterious experience in Lancaster and the mountains did you go to see Dr.

70

00:07:54,800 --> 00:08:00,400

Sider? This would have been in the latter part of 1963. The sighting was in September 1961.

71

00:08:02,400 --> 00:08:09,520

More than two years, perhaps. Yes. Revealed to you, what story did you learn about your experience

72

00:08:09,520 --> 00:08:15,680

under hypnosis? Well, they were the beeping fans and then I apparently went into some kind of

73

00:08:16,480 --> 00:08:23,520

days, some kind of condition like this, and we're driving along and Bonnie suddenly made

74

00:08:24,480 --> 00:08:30,320

a left-hand turn off the highway and we ran around the curb and there was a group of men

75

00:08:30,320 --> 00:08:36,160

standing in the highway. And under hypnosis, my first thought was there must be an automobile

76

00:08:36,160 --> 00:08:44,640

accident. And then the car amount had died and Bonnie was trying to stop the car. He wasn't able to,

77

00:08:45,200 --> 00:08:53,040

and these men were coming closer and they divided and at this moment I panicked. I became very frightened

78

00:08:53,760 --> 00:08:59,920

and I tried to open the car door thinking I would get out, run and hide in the woods until they were

79

00:08:59,920 --> 00:09:08,720

gone. Just as I opened the door, they stepped over where I was. And could you remember under hypnosis

80

00:09:08,720 --> 00:09:17,520

what these men looked like? Not at that moment. Then they took me out of the car and I went into

81

00:09:17,600 --> 00:09:24,560

sort of another deeper days of some sort. By the trance. Yes. And then I was, more or less,

82

00:09:24,560 --> 00:09:32,640

pulled myself out of this or at least partially. And I found myself walking in the woods with a man

83

00:09:32,640 --> 00:09:40,080

on the side of me and some in front, some behind me. And then in the back of me was Bonnie and he

84

00:09:40,080 --> 00:09:46,800

was like sleepwalking and there were these two men holding, more or less holding him up. We walked

85

00:09:46,800 --> 00:09:51,520

through this long path in the woods and then we came to the craft that was sitting on the ground.

86

00:09:52,320 --> 00:09:58,000

We went up the ramp and... You might ask, the ramp was never mentioned in Betty's dreams, but we

87

00:09:58,000 --> 00:10:04,080

seen, both seemed to share the idea that we had been going up a ramp. It was not in Betty's dreams,

88

00:10:04,080 --> 00:10:10,000

but it was the word that came out on hypnosis. Yes. Yes. So we went up ramp into this car as it

89

00:10:10,080 --> 00:10:18,320

curved and they took me into the first room and they took Bonnie into the second room. And while

90

00:10:18,320 --> 00:10:29,600

I was in there, they did what we call physical examination. The first thing they did was they

91

00:10:29,600 --> 00:10:38,720

examined my eye. Apparently they were looking at my skin and they seem to be making a lot of comments

92

00:10:38,720 --> 00:10:45,280

in themselves. My sister was quite excited about this. And they brought over what I called, I'd

93

00:10:45,280 --> 00:10:51,600

never seen one, so I don't know, but I call it a microscope with a camera attached. Then after

94

00:10:51,600 --> 00:11:02,960

that they just took hair samples on my fingernails. They checked my eyes, hair, my ears, nose and things

95

00:11:03,040 --> 00:11:09,760

like this. And they looked over my hands and my feet, particularly my feet quite thoroughly.

96

00:11:10,880 --> 00:11:16,720

Then they said they were going to test my nervous system and they brought over some kind of a machine

97

00:11:17,440 --> 00:11:26,880

which they touched. Were you fully dressed? No. They took off my dress and my shoes. And then

98

00:11:26,880 --> 00:11:32,880

doing this, what they call the checking of my nervous system, I had a slip on and they pulled

99

00:11:32,880 --> 00:11:45,280

my slip off and did this testing. And then the next one was the examiner had a needle and I became

100

00:11:45,280 --> 00:11:50,400

aware that he was going to... Did you have a needle? Yes. I didn't know if he had been injection or what

101

00:11:50,400 --> 00:11:56,960

it was. And I begged him not to use the needle because it would hurt. And he started to insert it

102

00:11:56,960 --> 00:12:03,840

into my navel. A long needle? It was a long needle. I don't know how... This long? It was, I think I'm

103

00:12:03,840 --> 00:12:10,320

going to get most of it. I said four to six inches. But I became badly frightened when I saw the needle.

104

00:12:10,880 --> 00:12:17,040

And then when I found out I planned to put it into my navel, I became very frightened and I begged

105

00:12:17,040 --> 00:12:22,960

him not to do it. And the leader said it wouldn't hurt and they started to put it in and it did.

106

00:12:22,960 --> 00:12:28,720

Why were they doing it? Well, he said it was a pregnancy test. And I said, well, it was no

107

00:12:28,720 --> 00:12:36,080

pregnancy test here. And they seem to be very surprised that I had any pain from this. And the

108

00:12:36,080 --> 00:12:40,640

leader put his hand up over my eyes and the pain went away. But they stopped the test. There was

109

00:12:40,640 --> 00:12:45,520

one man whom you called the leader? That was what I called the leader and what I called the examiner.

110

00:12:46,320 --> 00:12:53,600

What language did you speak to? I spoke in English. And I don't know what language they spoke in,

111

00:12:53,600 --> 00:13:02,160

but I understood them in English. By word or sound or thought transference? I don't know. You don't

112

00:13:02,160 --> 00:13:11,040

know. No, but I didn't notice it seemed to me. I actually heard sounds. I cannot say it was English.

113

00:13:11,040 --> 00:13:16,640

What happened when the examination was finished? Well, then I was standing there waiting to go

114

00:13:16,640 --> 00:13:22,160

back to the cow because all during this time they reassured us that as soon as the test were over,

115

00:13:22,160 --> 00:13:29,200

it would go back to the cow. And so I was standing there waiting and they said that Bonnie's examination

116

00:13:29,200 --> 00:13:35,600

was taking longer and that I would have to wait for him. And then there was always excitement.

117

00:13:36,320 --> 00:13:44,400

And this man came into the room without tugging at my teeth. And I questioned them about this. And

118

00:13:44,400 --> 00:13:50,320

this is why they shared their surprise that Bonnie's teeth were removable and mine were not.

119

00:13:50,320 --> 00:13:56,480

Well, your experience as well, Betty, was in the room being examined by these man-like beings.

120

00:13:56,480 --> 00:14:01,520

And I'd like to emphasize before I go into that is that this was brought out under hypnosis because

121

00:14:01,600 --> 00:14:08,000

I am still a bit reluctant in this area. I think it is important to reemphasize that the story you

122

00:14:08,000 --> 00:14:12,400

have just told is one that you were not consciously aware of. Never had to. Which was brought out of

123

00:14:12,400 --> 00:14:19,600

you by your psychiatrist, Dr. Baden Simon, under hypnosis. Yes. And it seems as if I was carried

124

00:14:19,600 --> 00:14:25,680

up the ramp, my feet were banging against the ground as these small men I described came up to me and

125

00:14:26,560 --> 00:14:31,440

carried me from the car and through the woods and up this ramp and into this room where I opened

126

00:14:31,440 --> 00:14:36,640

my eyes I saw a table. Betty described the table as being adequate for her to lie on the one that's

127

00:14:36,640 --> 00:14:43,920

the room where she was in. And at this time I do not know where Betty is. And apparently I am more

128

00:14:43,920 --> 00:14:49,760

concerned for my own welfare to be concerned about Betty. But the table that I described was small.

129

00:14:50,320 --> 00:14:56,480

And obviously the difference in our heights could be the answer. Well, how tall were these men?

130

00:14:57,200 --> 00:15:01,120

I estimate, well I said they were about as tall as Betty, but this would mean that they

131

00:15:01,120 --> 00:15:07,040

were about five feet above four and a half to five feet. Five feet. Yes. And I'm five feet eight.

132

00:15:07,040 --> 00:15:12,160

So that the three inches difference was quite a difference. And I said that the table was too

133

00:15:12,160 --> 00:15:19,120

small. Where I too was given an examination. I'm very conscious about my teeth. I was very upset

134

00:15:19,120 --> 00:15:23,600

about I only got as far as saying something went into my mouth and I did not bother the

135

00:15:23,680 --> 00:15:28,240

dollard doctor and he did not press this as to what was happening. But I can only think now

136

00:15:28,240 --> 00:15:32,480

that this would have been when my teeth would have been extracted and pulled out.

137

00:15:32,480 --> 00:15:36,240

Pulled out. Yeah, I should have said pulled out because they had dentures. Yes. And so they

138

00:15:36,240 --> 00:15:43,200

weren't extracted. They had been. But I go in the point, explain that the kind of examination that

139

00:15:43,200 --> 00:15:48,080

I had been given is the scraping of the skin and I had been turned over. They were interested in

140

00:15:48,080 --> 00:15:54,480

body openings and a cup like object was placed against my genitals. And I was reluctant to talk

141

00:15:54,480 --> 00:16:00,800

about that until Mr. Fuller was able to order from me by saying lower abdomen. And this would have

142

00:16:00,800 --> 00:16:07,920

been the extended examination. What do you believe now, buddy? All right. That's Betty first. All right, Betty.

143

00:16:10,320 --> 00:16:17,040

I believe we were really captured. I mean, if we were not captured, there was still face to the

144

00:16:17,120 --> 00:16:22,000

problem of what happened during these two hours of amnesia. Well, this is what I'm forced in a

145

00:16:22,000 --> 00:16:28,960

sense to believe that something happened that night. I can't say definite as to what definitely

146

00:16:28,960 --> 00:16:33,920

happened. But apparently if the hypnosis, which we were led to believe would be the means of opening

147

00:16:33,920 --> 00:16:39,360

up the amnesia, if this is not the facts, then what are the facts? I'm well, I think we're going to

148

00:16:39,360 --> 00:16:45,280

discuss that with a group of very knowledgeable people in just a moment from now. We're back with

149

00:16:45,360 --> 00:16:50,960

Barney and Betty Hill and about to begin discussion of their extraordinary case. But before we go to

150

00:16:50,960 --> 00:16:55,520

the panel, I think we ought to look at some sketches that they made. You may remember they said that

151

00:16:55,520 --> 00:17:00,240

when they got home from their experience, they both drew sketches of what they had seen. And then

152

00:17:00,240 --> 00:17:05,040

later on the hypnosis, they drew more sketches. Could you identify these and tell us what they are?

153

00:17:05,040 --> 00:17:09,360

This is one that Barney drew of the abduction spot itself.

154

00:17:10,080 --> 00:17:13,760

Oh, the abduction took place. Yes. This is how he remembered this.

155

00:17:14,720 --> 00:17:21,680

A car, a roadblock and the disc. Yes. Right. This is one that Betty drew and similar to the one I

156

00:17:21,680 --> 00:17:26,960

drew in the two red balls on the side of the indicates the red lights. That's what you saw

157

00:17:27,920 --> 00:17:34,000

that night. This is what it's all about. Yes. Now the next picture is what I tried to describe

158

00:17:34,000 --> 00:17:38,720

when I was standing in the field. And as the lights had parted away from the craft itself and the

159

00:17:38,720 --> 00:17:45,200

figures standing there looking back at me. Now the next sketch is what is one I sketched while

160

00:17:45,200 --> 00:17:52,400

under hypnosis. And I was trying to explain to Dr. Simon what the persons that I was involved with

161

00:17:52,400 --> 00:17:58,080

looked like. And this is what I drew in deep trance. I was trying to emphasize the eyes. And this is

162

00:17:58,080 --> 00:18:04,080

what was so outstanding that the eyes seem to go around the side of the face this way. And the cap

163

00:18:04,080 --> 00:18:11,280

was my attempt at drawing a military cap. They had a military cap and some sort of a scarf scribble

164

00:18:11,280 --> 00:18:17,680

around the neck. Yes. The figure doesn't seem to have a mouth. No, it doesn't. This is a map that

165

00:18:17,680 --> 00:18:23,200

Betty drew. And you can't have briefly tell about that Betty. On board the craft I asked them where

166

00:18:23,200 --> 00:18:29,520

they came from. And the leader went over and showed me this map. He didn't explain where he was

167

00:18:30,240 --> 00:18:38,880

where he was on the map. But he did explain that the lines he got in trade routes and places where

168

00:18:38,880 --> 00:18:46,240

they weren't regularly. And then expeditions. Now this is a another map that we have here that shows

169

00:18:46,240 --> 00:18:52,720

the constellation of Pegasus. Yes. This was printed in the New York Times one year after Betty had

170

00:18:52,720 --> 00:18:58,800

drawn her map in which the Russians were reporting that they thought there were radio signals

171

00:18:58,800 --> 00:19:06,160

emanating from this section in the sky. She then compared the sketch she had drawn with the map that

172

00:19:06,160 --> 00:19:10,880

was published in the New York Times. And she thought that there was a great similarity between the two.

173

00:19:10,880 --> 00:19:16,720

Now what is this coming up now? That seems to be another attempt to sketch these humanoid creatures.

174

00:19:16,720 --> 00:19:22,720

That's correct. This was after I had undergone the session of regressive hypnosis and now trying to

175

00:19:22,720 --> 00:19:27,520

draw for the doctor's benefit what I thought the creatures looked like. And again there's the heavy

176

00:19:27,600 --> 00:19:33,920

emphasis on the eyes the two slits representing nostrils and my attempt to show the slit line for

177

00:19:33,920 --> 00:19:38,960

the mouth and when the mouth was potted that is what I'm trying to show in the sketch. That was

178

00:19:38,960 --> 00:19:44,080

what I thought was a membrane inside that seemed to flutter rather than the same lip muscles that

179

00:19:44,080 --> 00:19:49,680

we have. We have the nostrils without a nose. Yes that's correct. All right I think that the panel

180

00:19:49,680 --> 00:19:55,200

has been very patient I'm sure very interested in everything has been said and perhaps we might

181

00:19:55,200 --> 00:20:02,240

ask who would like to start the questioning Dr. Sagan of Harvard University and I think also

182

00:20:02,240 --> 00:20:09,440

the Smithsonian Astrophysical Observatory at Harvard. All right Dr. Sagan. Well I'd like to

183

00:20:09,440 --> 00:20:16,640

begin the questioning if I may with with one general line of inquiry. Our present understanding of the

184

00:20:16,640 --> 00:20:23,920

evolution of life on earth is that it's a slow process of evolution by natural selection that

185

00:20:24,000 --> 00:20:31,440

human beings are the product of several billions of years of random mutation accidental effects

186

00:20:32,080 --> 00:20:36,720

leading up to what we are now. If events were even slightly different in the previous history of the

187

00:20:36,720 --> 00:20:41,040

earth we think that we would not wind up with things that are closely human beings but with

188

00:20:41,040 --> 00:20:46,880

something else. Now other planets certainly have environments quite different from those on the

189

00:20:46,880 --> 00:20:52,320

earth and therefore we would expect that beings that evolved there would have even greater

differences

190

00:20:53,120 --> 00:20:58,400

and would not look closely like human beings and that's why I was interested to see that the

191

00:20:58,400 --> 00:21:05,840

characterization of the inhabitants of the supposed extraterrestrial space here who were

192

00:21:06,480 --> 00:21:14,640

with a few minor differences very closely human head to eyes something like a nose mouth hands feet

193

00:21:14,640 --> 00:21:19,120

and so on this this seemed to me to have an intrinsic implausibility about it seemed to me

194

00:21:19,200 --> 00:21:26,320

that much more likely that this was putting projecting human experience on to perhaps something else

195

00:21:26,320 --> 00:21:33,360

one question I'd like to ask is fingers how many fingers did you notice any about the Sagan

196

00:21:34,160 --> 00:21:38,080

didn't notice anything how about ear lobes I didn't notice ears how about Mrs.

197

00:21:38,720 --> 00:21:45,280

may I just briefly inject something here we were on another discussion and after very quietly more

198

00:21:45,280 --> 00:21:51,280

less very relaxed discussing for about two and a half hours the scientists question is very closely

199

00:21:51,280 --> 00:21:58,960

about the absence of our seeing or noticing hands so the announcer put a paper over my hand and asked

200

00:21:58,960 --> 00:22:04,320

the scientist what about my hands had he noticed anything was I wearing a ring or not and he had

201

00:22:04,320 --> 00:22:09,360

to admit he hadn't noticed them this would have been a much more relaxed situation right well

202

00:22:09,360 --> 00:22:14,320

but the point is that you did notice some details and I was interested in whether you had noticed

203

00:22:14,320 --> 00:22:22,880

some other details yes no I had not nobody ready no I didn't yes I think I think the thing that

204

00:22:22,880 --> 00:22:28,880

does strikes me most is the fact that not only did these creatures breathe the earth's atmosphere

205

00:22:28,880 --> 00:22:33,360

with no difficulty but you were able to breathe the spacecraft's atmosphere with no difficulty

206

00:22:34,000 --> 00:22:39,200

is that a question no it's a comment well that's all I can say is did you notice any respirators

207

00:22:39,200 --> 00:22:46,480

or anything not from my position no we are job of science editor of time magazine I think

208

00:22:46,480 --> 00:22:54,480

has a question or comment yes as I understand it the only tangible evidence of the visit of this

209

00:22:54,480 --> 00:23:03,520

ship and their experience with it is the appearance of the bright shiny spots on the trunk of your

210

00:23:03,520 --> 00:23:10,880

car is that correct that would have been one of the tangible evidence one that I hadn't found to

211

00:23:10,880 --> 00:23:17,440

be important is that when I arrived in ports with that morning my shoes were badly scuffed and this

212

00:23:17,440 --> 00:23:24,320

well it's my opinion rather my word there's no proof to it the reason I asked I am aware of the

213

00:23:24,320 --> 00:23:29,520

scuff marks on your shoes but that's what happened in any earthly experience this is correct the

214

00:23:29,520 --> 00:23:37,680

point that I wonder about is the failure either of of mrs hill to call the attention of these spots

215

00:23:37,680 --> 00:23:44,000

to mr webb of the Hayden planetarium who was there a couple of these later or perhaps you had

216

00:23:44,000 --> 00:23:50,560

mentioned them but then mr webb neglected to look at them and since this is the only tangible evidence

217

00:23:50,560 --> 00:23:57,520

we wonder why someone didn't think of this we discussed the spots with baltow webb and with

218

00:23:57,520 --> 00:24:05,520

mr holman and mr jackson but we had spent hours discussing this and then it was just

219

00:24:06,800 --> 00:24:11,600

oversight on their part and leaving when they left for us we just forgot to show them to

220

00:24:11,600 --> 00:24:17,680

know if I ever did no one put that question to mr webb maybe john who was talking yes I did and

221

00:24:17,680 --> 00:24:25,440

walder webb simply throws up his hand and discussed at his own failure as an investigator I am convinced

222

00:24:25,440 --> 00:24:31,040

in my own mind that nothing was hidden that it was simply a very serious oversight and he agrees

223

00:24:31,040 --> 00:24:37,920

that it was ed edelson of world journal tribune although spots still there and if not we're what

224

00:24:37,920 --> 00:24:44,640

happened to them the spots gradually wore away over the winter months and we don't have the

225

00:24:44,640 --> 00:24:50,480

chair now professor mcdonald of the university of arizona while we're on the spots there was a

226

00:24:50,480 --> 00:24:55,600

point that probably ought to be made and then a question that ought to be asked the reason you

227

00:24:55,600 --> 00:25:01,120

originally got the compass out to look at those was that as someone had suggested that this would be

228

00:25:01,120 --> 00:25:07,360

a means of testing for radiation I I it's not clear to me how that would ever have detected the

229

00:25:07,360 --> 00:25:13,360

irradiation of the car I think that is just an observation that should be made are you saying

230

00:25:13,360 --> 00:25:18,320

that if it were irradiated that the compass would not in any case behave this way yeah and in the

231

00:25:18,320 --> 00:25:24,080

first instance I'm saying that irradiation could not be detected with a mad compass but so that's

232

00:25:24,080 --> 00:25:29,120

just a side comment but you did the experiment nevertheless and so we have the results of the

233

00:25:29,120 --> 00:25:36,960

experiment and it's quite disconcerting because with anything other than a or a current rapidly

234

00:25:37,600 --> 00:25:43,520

changing dipole moment of some mysterious kind in the trunk of the car there is no easy way to

235

00:25:43,520 --> 00:25:49,360

understand the mechanism to cause the compass needle to spin well those beeping sounds the only

236

00:25:49,360 --> 00:25:55,920

noise you heard is this apparently huge aircraft approached yes these would be this was the only

237

00:25:55,920 --> 00:26:03,040

sound we heard and by the you didn't hear any sound but it wasn't at the aircraft approach it was

238

00:26:03,040 --> 00:26:08,480

after I had dashed back to the car and screamed to Betty Betty that something was going to capture us

239

00:26:08,560 --> 00:26:14,160

then there was a series of beeps now I do recall touching the steering column because it was a

240

00:26:14,160 --> 00:26:19,920

very subtle vibration and the last I remembered is Betty was feeling around on the panel of the

241

00:26:19,920 --> 00:26:24,720

car the dashboard itself and then later there was another series of beeps and again we remarked what's

242

00:26:24,720 --> 00:26:32,080

that and Betty then asked if I believed in flying saucers and I said no um certainly not a psychologist

243

00:26:32,080 --> 00:26:40,080

but some aspects of the story that mrs hill told particularly the the needle incident seemed to

244

00:26:40,080 --> 00:26:49,760

me recognizable from having read Freud and I wonder mr shunbrown if that money chance had been talked over

245

00:26:50,720 --> 00:26:56,320

between you and dr simon yes I would rather not put that into context but it has been however I

246

00:26:56,320 --> 00:27:01,840

think that mr fuller had discussed that with dr simon I discussed it with Betty herself too and

247

00:27:01,840 --> 00:27:08,000

and Betty is a as a qualified state social worker is aware of the dream symbolism and that sort of

248

00:27:08,000 --> 00:27:14,960

thing and it is something that she cannot explain one way or the other I don't think that it should

249

00:27:14,960 --> 00:27:22,560

be discussed publicly I do say that that facet of it has been completely and thoroughly explored

250

00:27:23,120 --> 00:27:29,120

and Betty is fully aware of it as anybody else may I add something there's something that I've

251

00:27:29,120 --> 00:27:36,400

discovered since the hypnosis and I don't know is this would apply to adults but in hospitals when

252

00:27:36,400 --> 00:27:44,240

it's necessary to obtain a blood sample from a small infant it is done through the navel I think

253

00:27:44,240 --> 00:27:50,560

that you might correct me if this is wrong at least point out to one fact that you said it was a

254

00:27:50,560 --> 00:27:56,160

very large needle larger than anything that you have seen for a long time it had been plunged into

255

00:27:56,160 --> 00:28:03,280

your navel I can't say it was plunged in but it was they started to insert it and I had pain and I

256

00:28:03,280 --> 00:28:08,160

was under the impression they stopped but there was no blood or physical evidence of puncture

257

00:28:09,040 --> 00:28:16,720

I wasn't aware of this until 1964 well whenever it happened if it did happen you didn't detect

258

00:28:16,800 --> 00:28:25,120

any wound on your body no any other questions about this well I think that I'd like to be

259

00:28:25,120 --> 00:28:31,040

very careful about this and I've taken very careful notes in my discussion with Dr. Simon and I'd like

260

00:28:31,040 --> 00:28:36,800

to read these notes to you I want to take just a second to go over them myself and we will be back

261

00:28:36,800 --> 00:28:43,440

with Dr. Simon's testimony given to us right after this message I recently had the opportunity of

262

00:28:43,440 --> 00:28:49,360

talking to Dr. Ben Simon the psychiatrist who's treated Betty and Barney Hill and asked him whether

263

00:28:49,360 --> 00:28:54,880

he could summarize for me his findings he made it very clear that we must avoid such words as

264

00:28:54,880 --> 00:29:01,040

belief for other unscientific words and that the treatment has not been completely concluded

265

00:29:01,040 --> 00:29:06,880

and so this is a summary of the doctor's thoughts on the case of Barney and Betty Hill he said that

266

00:29:06,880 --> 00:29:13,280

from the very start he envisaged of four possibilities one is that it might be a rare psychological

267

00:29:13,280 --> 00:29:18,480

phenomenon known as philia d'hue that means both people going crazy at the same time with the same

268

00:29:18,480 --> 00:29:24,080

illusion and he excluded that immediately he said these were to him very very sane and reasonable

269

00:29:24,080 --> 00:29:29,520

and and honest people and not suffering from this quite rare psychological phenomenon of philia d'hue

270

00:29:29,520 --> 00:29:35,280

the second possibility is that this was simply a fraud and he said of course he had to go into that

271

00:29:35,360 --> 00:29:39,840

and he went into it very thoroughly and he is convinced that the way their stories came out

272

00:29:39,840 --> 00:29:46,400

in hypnosis as well as the waking period analysis convinces him that there's no case for fraud here

273

00:29:46,400 --> 00:29:52,080

at all then there was the third possibility that the story was fundamentally true as related that in

274

00:29:52,080 --> 00:29:58,000

fact they not only cited a flying object but that they were aboard a flying object a flying saucer

275

00:29:58,000 --> 00:30:03,760

and met humanoid creatures and he said that after examination he came to the conclusion that this was

276

00:30:03,760 --> 00:30:11,440

a very remote possibility and he said there were any number of evidences that that pointed in another

277

00:30:11,440 --> 00:30:17,520

direction which leads to the fourth possibility in his various hypotheses which he calls the dream

278

00:30:17,520 --> 00:30:24,720

hypothesis and that is that uh betty after the experience uh had certain dreams and that after

279

00:30:24,720 --> 00:30:31,360

a period of time the dreams became reality and the doctor pointed out that although hypnosis

280

00:30:31,360 --> 00:30:38,080

under hypnosis the patient always tells the truth it is the truth as the patient sees and knows the

281

00:30:38,080 --> 00:30:45,520

truth himself but it is not necessarily the ultimate non-personal truth and the doctor said he found

282

00:30:45,520 --> 00:30:52,080

many evidences that there was a strong stimulus from the very first experience that you had inciting

283

00:30:52,080 --> 00:30:58,000

this object a very strong stimulus towards believing the existence of the flying saucer

284

00:30:58,000 --> 00:31:05,360

and the doctor said to me i do believe that they saw an unidentified flying object and his final

285

00:31:05,360 --> 00:31:12,000

word on the subject that that there is very strong evidence of dream content and that of all of the

286

00:31:12,000 --> 00:31:19,920

hypotheses that he examined the dream hypothesis is the most likely one and that is the burden of his

287

00:31:20,560 --> 00:31:25,760

present summary before we go on to discuss the very much broader subject in which of course i think

288

00:31:25,760 --> 00:31:30,320

we're all interested about the existence of intelligence creatures outside of earth who

289

00:31:30,320 --> 00:31:34,960

have in fact an advanced technology and have been visiting earth before we go into that i think in

290

00:31:34,960 --> 00:31:41,840

all fairness i must allow john fuller of the hills to make some comment on the summary of what dr

291

00:31:41,840 --> 00:31:47,760

ben simon told me the only comment i can make is this that um i spent weeks with dr simon going

292

00:31:47,760 --> 00:31:54,240

over the tapes listening stopping going all that sort of thing naturally it's a long hard

293

00:31:54,240 --> 00:31:59,520

poll in this kind of situation and there are many vacillations and many hesitations and many

294

00:32:00,560 --> 00:32:07,040

different points of discussion to come up one problem one of the main reasons why

295

00:32:07,040 --> 00:32:14,160

dr simon had moved away from the fact of the actuality of this is because of the fact that

296

00:32:14,160 --> 00:32:19,760

he of course was not interested in the ufo story and as a scientist and i don't blame him he would

297

00:32:20,480 --> 00:32:26,560

be inclined because it is not documented anywhere in scientific history and this is the main reason

298

00:32:26,560 --> 00:32:33,920

why i think it is most important that the scientific fraternity turn toward the masses of the other

299

00:32:33,920 --> 00:32:39,600

cases which are appearing right now so that if a case like this comes up there is at least some

300

00:32:39,600 --> 00:32:46,320

some background and some foundation some substance to make a judgment one way or the other on this

301

00:32:46,320 --> 00:32:54,800

there's no doubt that there are a fair small fact of these sightings which remain unknown that

302

00:32:54,800 --> 00:33:00,560

is very different from saying that the only possible explanation of these unknowns is that

303

00:33:00,560 --> 00:33:06,480

there's space vehicles from another planet and if you look at the number of relatively obscure

304

00:33:06,480 --> 00:33:14,160

natural phenomena which have been identified misapprehended as flying saucers you see that

305

00:33:14,160 --> 00:33:18,160

nature is very complicated and i wonder if i heard well be that there are actually things in

306

00:33:18,160 --> 00:33:24,400

the atmosphere of the earth things of a biological nature things in particular involving atmospheric

307

00:33:24,400 --> 00:33:29,520

refraction which can explain the category of unknowns the mere fact that we don't know it

308

00:33:30,160 --> 00:33:35,680

means just that it doesn't mean the extraterrestrial visitation is the only possible explanation

309

00:33:35,680 --> 00:33:40,800

i just like to point out that if these are visits visitors from another planet they're going about

310

00:33:40,800 --> 00:33:47,200

this in a very illogical let's say unherrically way well that's my honor you know as dr sagan has

311

00:33:47,200 --> 00:33:53,280

pointed out that the unidentified cover are coming in various different shapes so apparently they've

312

00:33:53,280 --> 00:33:58,320

sent a whole fleet of these things here they have gone to very great expense to come long

313

00:33:58,320 --> 00:34:04,880

distances and yet somehow they don't want to open contact with us they seem to delight in deserted

314

00:34:04,960 --> 00:34:10,880

places and in hard maneuvers and i think one point dr sagan mentioned in his book is that

315

00:34:10,880 --> 00:34:15,520

astronomers have been pointing telescopes toward the sky and taking pictures many pictures of the

316

00:34:15,520 --> 00:34:22,800

night sky and there has been a singular lack of provable UFOs on those pictures even when i might

317

00:34:22,800 --> 00:34:29,760

add these uh the sky surveys have been designed to look for rapidly moving objects namely the study

318

00:34:29,840 --> 00:34:35,120

of mirrors now and i think this tends to explain the general skepticism of the astronomical community

319

00:34:35,120 --> 00:34:39,280

towards the flying saucer reports in general that doesn't mean that there aren't things up there that

320

00:34:39,280 --> 00:34:45,280

are unidentified let me reiterate again that uh unidentified doesn't mean extraterrestrial it

321

00:34:45,280 --> 00:34:51,040

means we don't understand it and i quite agree that uh that that there's something there to be found

322

00:34:51,040 --> 00:34:55,280

out i think there's probably things meteorological things geophysical and almost certainly things

323

00:34:55,280 --> 00:35:01,040

psychological well let me point out something there then to go back both to the to the hell's

324

00:35:01,040 --> 00:35:07,840

case and to your remarks dr sagan uh you suggest that a very small fraction of all the official

325

00:35:07,840 --> 00:35:13,840

official cases project blue book of the air force are unidentified i spent almost all of the summer

326

00:35:13,840 --> 00:35:19,040

a good bit of the spring about the last six months in nearly full time study of this uh this whole

327

00:35:19,040 --> 00:35:24,320

problem and then as part of that uh been up to right patterns and can't agree with either your

328

00:35:24,320 --> 00:35:30,800

remarks or the air force remarks project blue book figures when i went over case after case and i dare

329

00:35:30,800 --> 00:35:38,080

say i've looked into about 150 200 cases at right patterns and alone the discrepancies between the

330

00:35:38,080 --> 00:35:44,640

official categorizations balloons aircraft berg and so on astronomical meteorological the discrepancies

331

00:35:44,640 --> 00:35:51,280

between the official categorizations and the content of the reports was to me and no other word

332

00:35:51,280 --> 00:35:57,760

could describe this astounding document uh despite these discrepancies that you found in reports have

333

00:35:57,760 --> 00:36:05,680

you or has anyone else uh who has investigated this phenomenon um seriously ever found a single

334

00:36:05,680 --> 00:36:13,040

piece of evidence hardware hardware uh anything other than pictures or settings and not hardware

335

00:36:13,040 --> 00:36:17,200

certainly there have been many cases i could probably sit here and think of a couple of dozen

336

00:36:18,080 --> 00:36:24,080

of the instances where credible observers describe such artifacts if you will as indentations in the

337

00:36:24,080 --> 00:36:31,440

ground where a craft settled a scorched vegetation near where it is you're not but there's been a

338

00:36:31,440 --> 00:36:37,600

scientific inquiry yes there's been one case in which some people have agreed to the findings and

339

00:36:37,600 --> 00:36:42,960

some people have been skeptical and this is reported in the book by corral lorenza and chainer

340

00:36:42,960 --> 00:36:48,400

husband Ij Lorenza and our head of the aerial phenomena research organization and they received

341

00:36:48,400 --> 00:36:56,480

report from Dr. Fontes who is a physician in Brazil and the report describes a fragment

342

00:36:56,480 --> 00:37:03,280

fragments which supposedly came from a flying saucer which burst and then were analyzed. I don't

343

00:37:03,360 --> 00:37:07,840

I can't comment on the report how well it was done but according to the conclusion this would

344

00:37:07,840 --> 00:37:16,000

suggest it was a high quality aluminum, um, or magnesium. Pardon me, uh, higher quality than supposedly

345

00:37:16,000 --> 00:37:21,200

is possible in a birth laboratory but there are other people, gentlemen, please forgive me, forgive me.

346

00:37:21,200 --> 00:37:25,840

for interrupting this very exciting discussion at this moment we'll come back to it right after this

347

00:37:25,840 --> 00:37:30,720

message we're back again with professor mcdonald a professor of atmospheric physics the university

348

00:37:30,720 --> 00:37:37,200

of arizona sir you said a moment ago that the subject requires considerable examination rectification

349

00:37:37,200 --> 00:37:42,400

would you begin by telling us of how you first got interested in came to this opinion well i've

350

00:37:42,400 --> 00:37:49,520

had a uh a mild interest in this problem for perhaps a decade my field is atmospheric physics and a

351

00:37:49,520 --> 00:37:54,480

lot of the official explanations have centered around atmospheric physical phenomena optical

352

00:37:54,480 --> 00:38:01,200

effects and so on and this led me all at 1954 so to begin checking cases in the southern arizona

353

00:38:02,000 --> 00:38:08,560

area where i live and work uh let me take one case this is now almost 10 years ago the rather

354

00:38:08,560 --> 00:38:13,680

important case probably many listeners will remember when it was headline news is occurring

355

00:38:13,680 --> 00:38:22,320

level land texas the night of november second and the morning of the third 1957 it involved

356

00:38:22,320 --> 00:38:27,520

some very interesting phenomena i've interviewed some of the people who were involved in it i have

357

00:38:27,520 --> 00:38:34,400

a map here that will give us a little bit of a notion of the of the general geography here is

358

00:38:34,400 --> 00:38:40,800

level in texas a small town about 30 000 the lines are highways running in and out of level and

359

00:38:41,440 --> 00:38:48,240

from about 11 o'clock at night on the second till around one in the morning on the third a series of

360

00:38:48,240 --> 00:38:54,480

about 10 independent sightings by 10 persons a couple of them were law enforcement officers

361

00:38:54,480 --> 00:39:01,280

others were just drivers over here there were a there was a two grain combines involved in every

362

00:39:01,280 --> 00:39:06,400

one of these instances the interesting thing that happened was that the driver of the vehicle

363

00:39:06,400 --> 00:39:12,720

suddenly came upon a very large and when i say large the reported sizes were the order of 100 to

364

00:39:12,800 --> 00:39:18,720

200 feet diameter glowing sometimes reddish sometimes bluish objects hovering over fields

365

00:39:18,720 --> 00:39:26,080

or roads the first effect on the vehicle was a interference with the lights and then the ignition

366

00:39:26,080 --> 00:39:30,320

system failed excuse me doctor i noticed that you have a lot of numbers on the map if you could

367

00:39:30,320 --> 00:39:35,280

point them out these places where the sightings were yes they are 10 numbers on here i won't

368

00:39:35,280 --> 00:39:41,120

bother the names and individuals but this 10 miles is about the size of this pencil just to give you

369

00:39:41,120 --> 00:39:45,680

some scale and these are spread over a two hour period and each one of these numbers here's one

370

00:39:45,680 --> 00:39:52,560

seven they correspond to the names of the people were instances in which cars were stopped and the

371

00:39:52,560 --> 00:39:57,280

lights went out as soon as the object took off which was the characteristic pattern so the

372

00:39:57,280 --> 00:40:01,360

some of the cars were stopped for two to three minutes but then the objects rose from the ground

373

00:40:01,360 --> 00:40:05,920

sometimes with enormous accelerations then the lights came back on without any manipulation

374

00:40:05,920 --> 00:40:10,880

of the ignition key and the driver found he could immediately start his car this was common to all

375

00:40:10,960 --> 00:40:17,440

of these cases now the official explanation of this level in texas case based on the air force

376

00:40:17,440 --> 00:40:24,720

handling of the project blue book investigation was that this was ball lightning uh that that's

377

00:40:24,720 --> 00:40:31,200

what accounted supposedly for these 200 foot diameter objects plus wet ignitions and that was

378

00:40:31,200 --> 00:40:36,240

the official explanation of why the cars stopped now we all know about the fact that cars when they

379

00:40:36,240 --> 00:40:40,800

do get wet don't usually start immediately there's a bit of a problem there but this is uh this is

380

00:40:40,800 --> 00:40:46,880

a only secondary compared to what one finds when he looks as i have at the actual weather data for

381

00:40:46,880 --> 00:40:52,080

the case in question excuse me sir before we get there if it were ball lightning is it normal to

382

00:40:52,080 --> 00:40:57,840

have ball lightning of that size and would that ball lightning have the electromagnetic quality

383

00:40:57,840 --> 00:41:02,560

of stopping these engines well there are there are first of all the typical size of ball lightning

384

00:41:02,560 --> 00:41:06,080

ball lightning is a fairly rare phenomenon most of us have never seen it i have never seen it

though

385

00:41:06,080 --> 00:41:11,440

that's very much in my field the uh of flipton diameter is a typical phenomenon but the the

386

00:41:11,440 --> 00:41:18,160

cases of ball lightning uh that are on record are strictly limited to extreme thunderstorm conditions

387

00:41:18,160 --> 00:41:24,480

where you have an energy source high potential high gradient and the uh there is no i am not aware

388

00:41:24,480 --> 00:41:29,920

of any case where a vehicle was stopped by ball lightning it i could not assert that it could

389

00:41:30,880 --> 00:41:34,880

well uh then this was the question i asked i discussed this problem with a colleague at

390

00:41:34,880 --> 00:41:38,960

westinghouse who's an expert in these problems he said well maybe in the event of a really severe

391

00:41:38,960 --> 00:41:42,960

thunderstorm you could scale up ball lightning to tens of feet and maybe they made an error

392

00:41:42,960 --> 00:41:48,560

of estimate size so i looked at the map and i was quite startled uh as a person with meteorological

393

00:41:48,560 --> 00:41:53,520

training here's the map for the very time this is 12 o'clock midnight right in the middle of

394

00:41:53,520 --> 00:41:58,160

the level in texas that's a weather map this is a weather map these are the isobars i think

395

00:41:58,160 --> 00:42:03,600

perhaps many persons looking on will uh be familiar with us from weather sessions here's the gulf

396

00:42:03,600 --> 00:42:10,320

coast uh and the state of texas in is in here now i'll point with my pencil to level and texas

397

00:42:10,320 --> 00:42:16,000

which is in the panhandle and any of you who are familiar with meteorology will immediately be

398

00:42:16,000 --> 00:42:21,920

bothered by the fact that uh level and was uh being invaded by a large high pressure area pushing

399

00:42:21,920 --> 00:42:26,880

down over the great plains the nearest front was down near san angelo hundreds of miles away

400

00:42:26,880 --> 00:42:32,400

the nearest rain was about a hundred miles away uh the weather report for the nearest stations

401

00:42:32,960 --> 00:42:40,000

involved only scattered clouds and in level and uh area there were no stations at the time of the

402

00:42:40,000 --> 00:42:44,560

observation that even had any rain uh two hours later there was one station that had less than 100

403

00:42:44,560 --> 00:42:48,880

of an inch and here is the official explanation charging severe thunderstorms and wet ignitions

404

00:42:48,880 --> 00:42:55,680

utterly senseless uh and when i asked the people at right paterson they really had no very good

405

00:42:55,680 --> 00:43:01,600

answer and all i can say is that in cases of this sort uh an ad hoc explanation is almost pulled

406

00:43:01,600 --> 00:43:06,640

out of the blue i have just seen it in too many instances to be happy with this uh there there

407

00:43:06,640 --> 00:43:13,120

are many very definite things that could be done in a scientific context to pursue this problem

408

00:43:13,120 --> 00:43:19,200

and it badly needs that kind of attention in my opinion thank you very much uh professor mcdonnell

409

00:43:19,200 --> 00:43:24,800

we'll be back again in just a moment we have heard the extraordinary personal story of barney

410

00:43:24,800 --> 00:43:31,520

and betty hill and a much broader discussion of the phenomenon of ufo's by a panel of authorities

411

00:43:31,520 --> 00:43:37,760

some of whom insist there are no visitors from outer space some of whom are skeptical and some of

412

00:43:37,760 --> 00:43:44,320

whom believe that the only explanation to fit the facts is that there are extraterrestrial visitors

413

00:43:45,120 --> 00:43:51,520

well what are we to believe when the experts disagree speaking both for myself and for the

414

00:43:51,600 --> 00:43:58,000

editors of this program we would say this unidentified flying objects demand serious and

415

00:43:58,000 --> 00:44:04,800

immediate scientific attention we would recommend one an immediate study in depth by university

416

00:44:04,800 --> 00:44:13,120

teams two a pattern analysis by computer of existing data and three the establishment of a ufo

417

00:44:13,200 --> 00:44:21,600

research center staffed by competent scientists for ridicule is no longer appropriate we did not

418

00:44:21,600 --> 00:44:27,200

write the words that i have just spoken they are taken from a speech made in june of this year

419

00:44:27,200 --> 00:44:32,960

by dr j allen heineck chairman of the astronomy department of northwestern university and for

420

00:44:32,960 --> 00:44:41,040

the past 18 years science advisor to the air force study of ufo's we subscribe to his recommendations

421

00:44:41,040 --> 00:44:47,760

but we would make one important addition that the ufo research center be totally independent

422

00:44:47,760 --> 00:44:55,120

of government but that it have the authority to examine air force data this is david shonbrunn

423

00:44:55,120 --> 00:44:58,240

good night
