

1

00:00:00,000 --> 00:00:09,520

Dr. Williamson, as an anthropologist, could you tell us how you became interested in finding

2

00:00:09,520 --> 00:00:13,320

fosters wild, who is doing words in anthropology?

3

00:00:13,320 --> 00:00:20,400

Well, it's quite a long story, but it covers quite a long period too.

4

00:00:20,400 --> 00:00:28,000

And I might say that it really began while I was working in Arizona, preparing to do some

5

00:00:28,000 --> 00:00:32,520

research in Mexico amongst the Indian tribes down there.

6

00:00:32,520 --> 00:00:39,600

I went down into Mexico and worked for some time, but my health became quite bad down

7

00:00:39,600 --> 00:00:45,680

there and my doctor advised that I go to more northern climate for some time.

8

00:00:45,680 --> 00:00:52,800

I decided that I would work with the Chippewa Indians and also some of the Tsu-Ling tribes

9

00:00:52,800 --> 00:00:53,800

in the North Dakota.

10

00:00:53,800 --> 00:01:01,440

After I aligned, I began to collect legends which I felt would make a fine children's

11

00:01:01,440 --> 00:01:02,440

book.

12

00:01:02,440 --> 00:01:06,440

Many of these legends would be very interesting to children.

13

00:01:06,440 --> 00:01:16,040

Many of these stories and so-called myths of these ancient people include a great deal

14

00:01:16,040 --> 00:01:21,040

of phenomena which might be regarded as foster phenomena.

15

00:01:21,040 --> 00:01:29,480

For instance, the Chippewa Indians of Canada and the northern part of the United States

16

00:01:29,480 --> 00:01:34,480

speak of the Jin Gwyn, which translated means earth-rumors.

17

00:01:34,480 --> 00:01:44,680

And they also speak of flying wheels or flying boats during the Palo so that also we find

18

00:01:44,680 --> 00:01:53,640

amongst the Navajo Indians and the Pai Indians of the south-west, legends of the Halusus,

19

00:01:53,640 --> 00:01:59,800

the little people, and they are supposed to have flown over this country many hundreds

20

00:01:59,800 --> 00:02:06,960

of years ago according to these Indian legends in what the Indians call flying boats.

21

00:02:06,960 --> 00:02:14,120

I became interested in this because there seemed to be so much of this type of story amongst

22

00:02:14,120 --> 00:02:19,200

our American Indians, not only the tribes I mentioned but practically every tribe in

23

00:02:19,200 --> 00:02:20,200

the United States.

24

00:02:20,200 --> 00:02:25,200

Also, I found that primitive people all over the world have stories.

25

00:02:25,200 --> 00:02:31,200

We find stories in India, on flying boats also.

26

00:02:31,200 --> 00:02:37,560

About this time, I happened to pick up Donald Keyho's book, which was one of the first books

27

00:02:37,560 --> 00:02:43,680

out on the sources, the title of which was The Flying Saucers Areal.

28

00:02:43,720 --> 00:02:51,240

I was very impressed with Mr. Keyho's book and the idea that the Saucers were interplanetary

29

00:02:51,240 --> 00:02:54,760

first figures itself to me.

30

00:02:54,760 --> 00:03:03,760

However, I could say here that I always felt that other planets besides earth could be inhabited.

31

00:03:03,760 --> 00:03:11,680

In my study, the anthropology even seemed very illogical to think that the earth would

32

00:03:11,680 --> 00:03:17,160

be the only planet out of billions upon billions of earths that would be the only place where

33

00:03:17,160 --> 00:03:19,160

a man might be found.

34

00:03:19,160 --> 00:03:25,920

However, I never gave the Saucers a moment and much thought until I ran across it in these

35

00:03:25,920 --> 00:03:26,920

legends.

36

00:03:26,920 --> 00:03:33,920

Until I read Mr. Keyho's book, I then began to accumulate more legends of this type.

37

00:03:33,920 --> 00:03:37,920

Before that, I was not just collecting Saucer legends.

38

00:03:37,920 --> 00:03:40,920

When I looked into it, why are they facts?

39

00:03:40,920 --> 00:03:43,920

The fly disorders were really astounding.

40

00:03:43,920 --> 00:03:50,920

I got back to Arizona where I had my home and met my wife.

41

00:03:50,920 --> 00:03:56,920

She had been staying in Arizona doing independent research along anthropological lines.

42

00:03:56,920 --> 00:04:06,920

When I arrived home in March of 52, why we compared note and she had also found a great

43

00:04:06,920 --> 00:04:10,920

source of material which compared with my own.

44

00:04:10,920 --> 00:04:16,920

So then we really became interested in the Saucer phenomena in earnest.

45

00:04:16,920 --> 00:04:22,920

And even that other people who are also interested in starting the flying Saucers?

46

00:04:22,920 --> 00:04:23,920

Oh yes.

47

00:04:23,920 --> 00:04:29,920

There are friends of ours who were very close to us in Northern Arizona.

48

00:04:29,920 --> 00:04:36,920

He is not professional in anthropology but he is very, very interested in the archaeology

49

00:04:36,920 --> 00:04:44,920

of our state and he is also interested in many ancient things and in collections.

50

00:04:44,920 --> 00:04:53,920

He happened to come down one evening to our home to visit and we brought out many of my

51

00:04:53,920 --> 00:05:00,920

records that I had been making in the Northern part of the United States and I read some of my legends.

52

00:05:00,920 --> 00:05:03,920

This reception got around the Saucers.

53

00:05:03,920 --> 00:05:05,920

It was inevitable that it would.

54

00:05:05,920 --> 00:05:13,920

And we suggested the different pros and cons, the possibility that they might be from Russia

55

00:05:13,920 --> 00:05:19,920

or from Spain or they might be a secret to development of the United States.

56

00:05:19,920 --> 00:05:27,920

Or that they might be a number of things that have already been discussed by different scientists.

57

00:05:27,920 --> 00:05:32,920

And the idea that they might be in a planetary was also discussed.

58

00:05:32,920 --> 00:05:41,920

And I asked my friend if these Saucers are being controlled by intelligent beings,

59

00:05:41,920 --> 00:05:46,920

they must be more intelligent than we are since they have conductors and spaceships.

60

00:05:46,920 --> 00:05:49,920

And we don't have any such thing as yet.

61

00:05:49,920 --> 00:05:57,920

And that's why they must also be able to speak English perhaps,

62

00:05:57,920 --> 00:06:01,920

which is very easily explained from an anthropological standpoint.

63

00:06:01,920 --> 00:06:06,920

If they have been coming to Earth for a long time, which it looks like they have,

64

00:06:06,920 --> 00:06:12,920

would he or she now be able to speak the language and perhaps these many languages avert

65

00:06:12,920 --> 00:06:16,920

and also to more our code systems?

66

00:06:16,920 --> 00:06:24,920

So I suggest to be having the possibility that we might get a hold of an amateur or handmade operator

67

00:06:24,920 --> 00:06:31,920

and send out most codes and try for something.

68

00:06:31,920 --> 00:06:35,920

We really didn't have any hopes that we would succeed

69

00:06:35,920 --> 00:06:41,920

because if they were out there in ships, probably they wouldn't be interested in contacting us.

70

00:06:41,920 --> 00:06:44,920

Anyway, we wouldn't receive any answers.

71

00:06:44,920 --> 00:06:47,920

But we thought we'd try it.

72

00:06:47,920 --> 00:06:54,920

You felt as if, for instance, perhaps it would be interesting only in contacting civil leaders

73

00:06:54,920 --> 00:06:58,920

or the presidents of the country or great scientists?

74

00:06:58,920 --> 00:07:05,920

Well, yes, it didn't seem likely that there would be any reason for them to contact us.

75

00:07:05,920 --> 00:07:11,920

That's how easily they would contact the heads of government and civil law leaders,

76

00:07:11,920 --> 00:07:15,920

men in science and industry.

77

00:07:15,920 --> 00:07:21,920

But you were successful in actually contacting spacecraft by radio.

78

00:07:21,920 --> 00:07:24,920

Yes, not at first, however.

79

00:07:24,920 --> 00:07:32,920

I might say that after that evening of talking in Arizona, my son went home

80

00:07:32,920 --> 00:07:40,920

and he contacted the friend of his and asked him if he would be interested in trying.

81

00:07:40,920 --> 00:07:50,920

Some time later, this radio man admitted that he had been interested in contacting other planets,

82

00:07:50,920 --> 00:07:55,920

not so much sources, but other planets for several years.

83

00:07:55,920 --> 00:08:03,920

The Federal Communications Commission several years ago when Mars came very close to Earth as it does,

84

00:08:03,920 --> 00:08:07,920

there's a period there where it comes closer.

85

00:08:07,920 --> 00:08:17,920

Somehow, on the hour, for five minutes, they had complete radio silence to see if any messages would come in from Mars.

86

00:08:17,920 --> 00:08:23,920

They had many different things and had recorded these messages, which they have never been able to decode

87

00:08:23,920 --> 00:08:30,920

in a series of dozen messages, but not in any system that we know.

88

00:08:30,920 --> 00:08:36,920

And these records are in the global stands in Washington at this time.

89

00:08:36,920 --> 00:08:40,920

Well, these stories, this is to the end of the radio man.

90

00:08:40,920 --> 00:08:52,920

And he had also heard of other hands who had been receiving space signals that they thought were coming from other planets or from spacecraft.

91

00:08:52,920 --> 00:08:55,920

I see, well that's a very interesting story.

92

00:08:55,920 --> 00:09:03,920

Tell me now, how would you be in transmitting? How would you roll about calling a spacecraft from Mars, let's say?

93

00:09:03,920 --> 00:09:07,920

Well, I'm not sure the following has presented itself.

94

00:09:07,920 --> 00:09:12,920

Just exactly what would we say? What would we do?

95

00:09:12,920 --> 00:09:27,920

And I might add that I cannot mention this radio man's name at this time because he did not hear his call letters in contacting these craft.

96

00:09:27,920 --> 00:09:38,920

He didn't want any other operator that he could send any to know, but he was trying, perhaps, for his prestige in his own town or something.

97

00:09:38,920 --> 00:09:46,920

I don't know, but he just wanted to do the work without that being run out at that time.

98

00:09:46,920 --> 00:09:57,920

So we decided that we would send out a message without call letters that would be Earth calling any interested spacecraft.

99

00:09:57,920 --> 00:10:01,920

Now those were not the exact words, but that was the gist of it.

100

00:10:01,920 --> 00:10:08,920

And he tried that for a week or two without having any success whatsoever.

101

00:10:08,920 --> 00:10:18,920

And then finally, it was on August 22nd, 1952 in the evening, that a very loud signal came in.

102

00:10:18,920 --> 00:10:26,920

Now I'm not a radio man myself and I don't know the terminology very well, but I'll try to explain it the best way that I can.

103

00:10:26,920 --> 00:10:33,920

A very loud signal came in and the radio man said that it blocked his set.

104

00:10:33,920 --> 00:10:39,920

The way he explained it, that it blocked the entire set and was very loud.

105

00:10:39,920 --> 00:10:45,920

By far the most powerful signal he had ever received on that set that he had.

106

00:10:45,920 --> 00:10:57,920

As we mentioned, it came in, he took them down, but he felt that his friends were helping him, a little family joke.

107

00:10:57,920 --> 00:11:01,920

But he went along with it, and took the message down.

108

00:11:01,920 --> 00:11:07,920

Well when we further turned to it, we felt that he was joking up a little bit.

109

00:11:07,920 --> 00:11:09,920

So it was both ways, you see.

110

00:11:09,920 --> 00:11:11,920

And he went along with it.

111

00:11:11,920 --> 00:11:12,920

Yes.

112

00:11:12,920 --> 00:11:23,920

And my other friend that I already mentioned that I had talked with in Arizona called me one day and told me he said we have had success.

113

00:11:23,920 --> 00:11:32,920

And he said that the radio man is quite impressed, but he's not too sure yet of where he's getting the signals from.

114

00:11:32,920 --> 00:11:40,920

I told my friend to tell the radio man to check by all means because it was true, we wanted it.

115

00:11:40,920 --> 00:11:46,920

We wanted it very much, but it was pretty much while we wanted to know.

116

00:11:46,920 --> 00:11:54,920

And it was someone's way to joke on us, perhaps someone that operated at whose is calling out, or is calling any spacecraft.

117

00:11:54,920 --> 00:11:59,920

And they just thought that they would come in and have a little fun.

118

00:11:59,920 --> 00:12:02,920

So we went in the north, it really was Jordan.

119

00:12:02,920 --> 00:12:11,920

Well I wonder how quick a person be sure of them that he did actually contact the spacecraft during extraterrestrial being.

120

00:12:11,920 --> 00:12:17,920

Well, I had a radio man, he had several ways of checking on it.

121

00:12:17,920 --> 00:12:26,920

One night there were 67 people, friends and relatives, and he had a hand-knower outside his home in

the backyard.

122

00:12:26,920 --> 00:12:33,920

And without even telling his wife, his back was to this group, because he said he knew someone was born.

123

00:12:33,920 --> 00:12:39,920

And he was on 40 meter band, transmitting.

124

00:12:39,920 --> 00:12:44,920

And he asked a question, and immediately received an answer.

125

00:12:44,920 --> 00:12:54,920

Then very quickly he switched to 160 meter band and had another question, and an answer immediately came in.

126

00:12:54,920 --> 00:13:00,920

Now a lot of people in there, after he had time to think this over completely,

127

00:13:00,920 --> 00:13:13,920

he told us that he had done this, and he said that that was true to him, that no one on Earth

anyway, was joking, or sending him a hoax.

128

00:13:13,920 --> 00:13:18,920

Well certainly none of our operators would be able to switch over to another frequency.

129

00:13:18,920 --> 00:13:21,920

And you're a questioner master, geographically.

130

00:13:21,920 --> 00:13:33,920

No, as a radio man said, even if he had told the operator on the other end that he was going to switch from 40 to 160 meter band,

131

00:13:33,920 --> 00:13:45,920

before the operator would have found him on 160, the question would have been asked, and of course naturally, if they hadn't heard the question they couldn't have answered.

132

00:13:45,920 --> 00:13:52,920

Well do you think that it might be possible that these people have some abilities in telepathy?

133

00:13:52,920 --> 00:13:56,920

Well yes, that was our first thought.

134

00:13:56,920 --> 00:14:01,920

The radio man, I asked him, how can it be possible then?

135

00:14:01,920 --> 00:14:03,920

Is there any way it could be?

136

00:14:03,920 --> 00:14:10,920

He said, well there are only two possibilities that suggest themselves to me.

137

00:14:10,920 --> 00:14:12,920

One, telepathy.

138

00:14:12,920 --> 00:14:18,920

Two, these people being more intelligent than we are,

139

00:14:18,920 --> 00:14:32,920

possibly have a radio which covers a very wide frequency, I guess you'd call it, or covers all of these bands, so they do not need to tune from one to another.

140

00:14:32,920 --> 00:14:44,920

Did you have any actual evidence, indisputable evidence as far as you are concerned, that these people are proficient in telepathy?

141

00:14:44,920 --> 00:14:56,920

Yes, all of them, they gave us some invisible signs in the heavens, but I learned from that question first, one evening,

142

00:14:56,920 --> 00:15:04,920

of course I might say that the logical thing would be to discontinue the radio as soon as possible, that was only an introduction,

143

00:15:04,920 --> 00:15:12,920

proving to us the existence of these people in these craft, proving that the Flaring Saucers really are.

144

00:15:12,920 --> 00:15:20,920

The next thing would be to try to arrange for a landing or a face-to-face, a personal contact.

145

00:15:20,920 --> 00:15:30,920

We felt that since they had been good enough to answer our call and contact us, then possibly they were interested in the landing.

146

00:15:30,920 --> 00:15:44,920

Still we do not understand why they would only come to us, and not others, who would be more in a foreign to spread this information, that we made arrangements for a landing.

147

00:15:44,920 --> 00:15:56,920

After we had made these arrangements and had finished our contacts for the indies, we sat down to a cup of coffee, and there were six or seven people present at the time,

148

00:15:56,920 --> 00:16:06,920

and we were not trying to experiment in telepathy, I must state that it was really accidental the way that it all happened.

149

00:16:07,920 --> 00:16:17,920

Without even thinking about it, we were certainly not able to stop. Six or seven of us thinking on the same thought.

150

00:16:17,920 --> 00:16:31,920

The radio man's father-in-law had just come from Kansas City, and he's quite elderly, and not in very good health at this time.

151

00:16:32,920 --> 00:16:43,920

The radio man's wife was worried about her father. She felt that he would go with us because he thought we were going on a picnic.

152

00:16:43,920 --> 00:16:52,920

Why the shock of seeing this hit might affect him, or perhaps they wouldn't even land because another party was present.

153

00:16:53,920 --> 00:17:01,920

And if he met you, the old gentleman would feel very bad because he felt that he did not want it because of his age.

154

00:17:01,920 --> 00:17:07,920

So she really didn't know what to do about it, and was quite concerned over it.

155

00:17:07,920 --> 00:17:14,920

So this is having a big sat around there drinking coffee, taking a minute around how it was all these problems.

156

00:17:15,920 --> 00:17:29,920

Well, after about 40 minutes, and I might add that our set was still on, we were still on the frequency that we had been receiving messages, although the transmission key was off.

157

00:17:29,920 --> 00:17:38,920

And he had not sent out anything over the wire, asking what to do on this problem.

158

00:17:39,920 --> 00:17:42,920

You were merely sitting around concentrating on this problem?

159

00:17:42,920 --> 00:17:47,920

Yes, nothing had been sent out, asking what to do about the father.

160

00:17:47,920 --> 00:18:03,920

When suddenly, this very loud signal came in again, saying, and now about the father, and gave a complete diagnosis of the father's case,

161

00:18:03,920 --> 00:18:09,920

which was verified one or two days later by a doctor that they took him to,

162

00:18:09,920 --> 00:18:19,920

and gave all the messages about what to do for the father, and how this handled it for him.

163

00:18:19,920 --> 00:18:21,920

That is most amazing.

164

00:18:21,920 --> 00:18:22,920

Yes, it is.

165

00:18:22,920 --> 00:18:26,920

Unless you had gone through it, it is very difficult to believe.

166

00:18:26,920 --> 00:18:36,920

Then it is established beyond a doubt that they can hear people talking in their homes without being there, and they can read this thought.

167

00:18:36,920 --> 00:18:38,920

Yes, undoubtedly.

168

00:18:38,920 --> 00:18:45,920

Imagine many of us would be ashamed of ourselves only for waiting for that knowledge.

169

00:18:45,920 --> 00:18:51,920

Can you tell us a little something of the science in the sky which you mentioned?

170

00:18:51,920 --> 00:18:59,920

Yes, I feel that that is one of the most important things in this entire happening,

171

00:18:59,920 --> 00:19:13,920

because it shows that the other side, or these people in these soldiers, were interested also in proving to us all the authenticity of our contact,

172

00:19:13,920 --> 00:19:18,920

and to let us know exactly who we were in contact with.

173

00:19:18,920 --> 00:19:23,920

One night on the radio, the radio man asked,

174

00:19:23,920 --> 00:19:27,920

can you give us a sign to moral?

175

00:19:27,920 --> 00:19:35,920

Immediately, the answer came in, and I will read it exactly as we received it on the transcription.

176

00:19:35,920 --> 00:19:37,920

Yes, yes.

177

00:19:37,920 --> 00:19:47,920

Maybe if you can get a glass, can you buy solace at high time?

178

00:19:47,920 --> 00:19:52,920

Then, where they mentioned the word solace, does that refer to our son?

179

00:19:52,920 --> 00:19:59,920

Yes, and if we were thinking of the way we would read it, it would be yes, yes.

180

00:19:59,920 --> 00:20:05,920

Maybe if you can get a telescope, can you be by his son at noon?

181

00:20:05,920 --> 00:20:07,920

Well, that's interesting.

182

00:20:07,920 --> 00:20:10,920

Did you miss observations the next day?

183

00:20:10,920 --> 00:20:12,920

Yes, I did.

184

00:20:12,920 --> 00:20:18,920

Well, Linovitz had a telescope, and we didn't know quite what to do,

185

00:20:18,920 --> 00:20:26,920

but the next day, he was in all of the papers, and you might have seen it,

186

00:20:26,920 --> 00:20:34,920

Bob Wilson observed very large sunspots on the sun at noon,

187

00:20:34,920 --> 00:20:39,920

and it was odd because it was in a period of declining sunspot activity,

188

00:20:39,920 --> 00:20:47,920

and by the next day, these large sunspots were gone, were used in the month or so.

189

00:20:47,920 --> 00:20:56,920

And also, at noon, a large fleet of saucers were observed over human areas over,

190

00:20:56,920 --> 00:21:08,920

and there was a jet plane in connection with it that crashed, and the cause of this was unknown.

191

00:21:08,920 --> 00:21:11,920

Well, this is really interesting.

192

00:21:11,920 --> 00:21:17,920

Well, I do know of the scientists myself that sunspots often last at least 30 days.

193

00:21:17,920 --> 00:21:19,920

Yes.

194

00:21:19,920 --> 00:21:25,920

Then perhaps they didn't take their spacecraft close to the star.

195

00:21:25,920 --> 00:21:28,920

Yes, that is possible.

196

00:21:28,920 --> 00:21:38,920

Did you receive any information in these radio contacts which would tell you what planets the people were from that you contacted?

197

00:21:38,920 --> 00:21:44,920

One of the most interesting, and first of all, I'll mention our own planet Earth.

198

00:21:44,920 --> 00:21:47,920

As the messages came in, they would say,

199

00:21:47,920 --> 00:21:56,920

Collins, Saras, and they spelled it F-A-R-A-S, or OS,

200

00:21:56,920 --> 00:22:01,920

and we finally told them to the fact that they were calling us,

201

00:22:01,920 --> 00:22:06,920

and that was at least one of their words for this Earth.

202

00:22:06,920 --> 00:22:11,920

I did a little research on that. I had never had any hopes that I would find that word,

203

00:22:11,920 --> 00:22:17,920

but I wanted to know why they would use that in contact years.

204

00:22:17,920 --> 00:22:27,920

And I found in the ancient Tel-Dian language that this word means repetition, or repetition of cataclysm.

205

00:22:27,920 --> 00:22:33,920

And so you can then receive why they would give our Earth that name,

206

00:22:33,920 --> 00:22:40,920

because they have had many catastrophes in the past, continental catastrophes on Earth.

207

00:22:40,920 --> 00:22:50,920

Also, they used the word, when speaking of Mars, M-A-S-A-R, or Marsaur.

208

00:22:50,920 --> 00:22:58,920

I have never found where the word originated, perhaps it is one of their own words.

209

00:22:58,920 --> 00:23:05,920

We know that we have been in contact, at least with the current,

210

00:23:05,920 --> 00:23:16,920

and I have too, that so many people feel that they must have a very unusual equipment to be able to contact another planet.

211

00:23:16,920 --> 00:23:23,920

There was a moving, reasonably, event-type of Mars, which involved a very complicated hydrogen valve

212

00:23:23,920 --> 00:23:27,920

and extended equipment to be able to do this type of work.

213

00:23:27,920 --> 00:23:37,920

However, I believe that our messages from this handshake were relayed from these ships and then on to the planets.

214

00:23:37,920 --> 00:23:41,920

Of course, they would have the knowledge to be able to do this.

215

00:23:41,920 --> 00:23:51,920

They started contacting Mars directly, not only the ships that we have contacted Mars directly,

216

00:23:51,920 --> 00:24:01,920

also we have had contact with Jupiter, which has been relayed from Mars and from there on to a ship and to our station.

217

00:24:01,920 --> 00:24:10,920

Also, we have had contact with Saturn, and we have had contact not directly with Venus,

218

00:24:10,920 --> 00:24:17,920

but we have had mention of it, and yes, one ship was sending another ship from Venus,

219

00:24:17,920 --> 00:24:24,920

and we have also had, and I think this is one of the most amazing things,

220

00:24:24,920 --> 00:24:32,920

we have had contact with ships from several other solar systems besides the home.

221

00:24:32,920 --> 00:24:43,920

This is really amazing, it's getting to the point now where the story of the sausage is perhaps the most important story that has ever come to this earth.

222

00:24:43,920 --> 00:24:57,920

Yes, I think it is because perhaps these people with greater intelligence have the answers that mankind has been searching for for centuries.

223

00:24:57,920 --> 00:25:04,920

Perhaps you could give us a little light on the question that I sure bother most people,

224

00:25:04,920 --> 00:25:10,920

to give you any indication why they have come here and such large numbers at this time.

225

00:25:10,920 --> 00:25:20,920

Yes, while I might add this, that the messages were very friendly and were given the wordings,

226

00:25:20,920 --> 00:25:30,920

and the nature of the messages would make you immediately think of the very money father giving his guys to his child.

227

00:25:30,920 --> 00:25:40,920

There was none of the note of an authoritarian nature, or one of the giving orders,

228

00:25:40,920 --> 00:25:50,920

and while they were not suddenly getting there very firm also, and almost some of the staff of our radio messages,

229

00:25:50,920 --> 00:25:58,920

there was the indication that they have been alerted because of our time with external matters,

230

00:25:58,920 --> 00:26:08,920

and although they have been coming here for many hundreds of years, and in some cases it lessens if they have been coming for several thousand years.

231

00:26:08,920 --> 00:26:18,920

Two years, but they have not wanted to interfere before in the progress that man is making on this planet earth here.

232

00:26:18,920 --> 00:26:32,920

But recently, because of the atomic experiments, they have shown themselves more, and are really very concerned over this work.

233

00:26:32,920 --> 00:26:41,920

Well, has they made any mention as to why they are so concerned about our atomic bomb explosions?

234

00:26:41,920 --> 00:26:45,920

Is there any danger that we are in?

235

00:26:45,920 --> 00:26:57,920

Well, in our radio messages almost immediately from the beginning, and they told us and repeated it many many times,

236

00:26:57,920 --> 00:27:05,920

that our earth is off his orbit at this time somewhat, and is also lifting.

237

00:27:05,920 --> 00:27:11,920

To back this up, I might mention what we have discovered here on earth ourselves.

238

00:27:11,920 --> 00:27:23,920

About a year or two ago, there was considerable mention of the great pile up of ice at the North

and the South poles.

239

00:27:23,920 --> 00:27:36,920

And we were thinking of redistributing this ice and to alleviate this problem of using atomic bombs to loosen it.

240

00:27:36,920 --> 00:27:42,920

And the planet was getting in our state of top heavy at that time.

241

00:27:42,920 --> 00:27:48,920

We also, to back this thing up, we know of the strange weather that we have had all over the world.

242

00:27:48,920 --> 00:27:54,920

We have had drought in places where there has always been abundant rain.

243

00:27:54,920 --> 00:27:57,920

We have had a terrific amount of rainfall.

244

00:27:57,920 --> 00:28:01,920

I know this from my own state of the art and bone of that.

245

00:28:01,920 --> 00:28:10,920

Over the past seven years, we have had very little rain and the water level has gone down considerably,

246

00:28:10,920 --> 00:28:15,920

and people were getting very concerned over this, the rancors and so on.

247

00:28:15,920 --> 00:28:26,920

But this last year we have had a great abundance of rain, and we are continuing to get a great abundance of moisture in Arizona.

248

00:28:26,920 --> 00:28:31,920

That is a true hour over these strange weather conditions throughout the world.

249

00:28:31,920 --> 00:28:41,920

Also, you can hardly pick up a daily newspaper without reading about earthquakes or many volcanic eruptions throughout the world.

250

00:28:41,920 --> 00:28:55,920

Tidal waves and so on, which all go in to back up the statement that these people have made on their radio contacts about the present conditions on earth.

251

00:28:56,920 --> 00:29:06,920

Well, then our atomic bomb explosions must have been putting our earth as a planet into some, what, of an unstable condition.

252

00:29:06,920 --> 00:29:16,920

And then these face travelers are not here just for a vacation, but there is a serious situation that exists here.

253

00:29:16,920 --> 00:29:26,920

Yes, they have told us that a very poor condition exists on earth kind of earth at this time.

254

00:29:26,920 --> 00:29:43,920

Now we know that they have told us that they are here to aid us to help us, but also that if anything happens to earth,

255

00:29:44,920 --> 00:29:49,920

it may very seriously damage the other planets in our system.

256

00:29:49,920 --> 00:30:01,920

As we know, each planet is in a state of balance in connection with the other planets, its neighbors.

257

00:30:01,920 --> 00:30:16,920

And in so likely that if great disasters occur in earth, even perhaps the planet is tiling, that it might damage our life, another world also.

258

00:30:17,920 --> 00:30:20,920

Well, that really is a serious situation.

259

00:30:21,920 --> 00:30:33,920

On my head, I have noticed myself that we have had an increase in the size and number of sunspots, usually the day after each of the atomic explosions.

260

00:30:34,920 --> 00:30:50,920

And from our past studies, and 200 years back, we know that a large sunspot number always gives us a reason why or another here, usually in the way of Johnson or Quartz and volcanic activity, the way you mentioned.

261

00:30:51,920 --> 00:30:55,920

So that seems to give us a really much reason why they are here.

262

00:30:55,920 --> 00:31:04,920

Didn't you at all tend to have any somewhat detailed information from them as to what advances they

are making in science?

263

00:31:04,920 --> 00:31:17,920

Yes, and I remember following this, I was very interested of course, and very excited about the possibility of contacting members of some of their planets.

264

00:31:17,920 --> 00:31:26,920

And I was most interested in what type of culture, and whether there is something out there, a sociological background.

265

00:31:26,920 --> 00:31:40,920

And we asked the question, had they made any great advancements in medical science, we know now that we are trying to conquer cancer, air and polio and so on.

266

00:31:41,920 --> 00:31:53,920

And it would be a wonderful thing if we could receive information from these people, because they would only require cannabis, and perhaps they had covered these diseases.

267

00:31:53,920 --> 00:31:58,920

So we asked that question and they answered, no.

268

00:31:59,920 --> 00:32:08,920

We were puzzled and asked, well you have a blood and body head of us in other things, why haven't you advanced in medical science?

269

00:32:08,920 --> 00:32:14,920

And they came in and said, well that is very simple, no disease.

270

00:32:14,920 --> 00:32:17,920

And this is synchromated.

271

00:32:18,920 --> 00:32:30,920

Yes, it is the fact that there are spacecraft in our atmosphere at this time, it is really astounding in itself, but not literally.

272

00:32:30,920 --> 00:32:35,920

So astounding as the message that these people have to raise.

273

00:32:35,920 --> 00:32:40,920

And it is a wonderful message for men on this planet.

274

00:32:41,920 --> 00:32:51,920

Could you give us an estimate on approximately how many years they are ahead of us in advancements

in culture and science and so on?

275

00:32:51,920 --> 00:32:59,920

And yesterday it just so happened that we did ask that, and they came back with this reply.

276

00:32:59,920 --> 00:33:10,920

We do not think of time as you do, and do not reckon in days, months, and years as you people on Earth do.

277

00:33:10,920 --> 00:33:23,920

But considering your use of years, Mars would be approximately 30,000 years in advancement of Earth,

278

00:33:23,920 --> 00:33:30,920

and Venus would be about 50,000 years ahead of Earth in progress.

279

00:33:30,920 --> 00:33:41,920

And the other planets, the other planets going from Jupiter, Saturn, and so on would be even in greater advancements.

280

00:33:41,920 --> 00:33:54,920

And there is indication that men, our solar systems are very far in advancement and back, getting up so that they are putting caddy in the cult.

281

00:33:54,920 --> 00:33:59,920

It would be millions and millions of years ahead of us.

282

00:33:59,920 --> 00:34:10,920

And this is really amazing, and as far as we have thought we have advanced, it now begins to appear as if we are on the bottom of the scale of the fast.

283

00:34:11,920 --> 00:34:24,920

As far as our own solar system, and from what we have received in these radio messages, the planet Earth at one time was advanced.

284

00:34:24,920 --> 00:34:32,920

We have mentioned this at times, or the golden age on Earth, there is much more that is made to that.

285

00:34:32,920 --> 00:34:34,920

We find that in anthropology.

286

00:34:35,920 --> 00:34:45,920

And religions go that minute at that time were able to speak with angels, and they were very close to their Creator.

287

00:34:45,920 --> 00:34:57,920

But now, there is very indication that the planet Earth is right on the bottom, as far as other planets in our own system are concerned.
