

1

00:00:00,000 --> 00:00:07,000

Mr. Frank Scully has been called Mr. Flan Sasser and of course his initials are F.S.

2

00:00:07,000 --> 00:00:10,500

Flan Sasser, Frank Scully. I guess he's entitled to that title.

3

00:00:10,500 --> 00:00:16,100

Now, Carti is because he was one of the first along with Major Keyhole to bring the knowledge

4

00:00:16,100 --> 00:00:21,700

in book form to the public that Flan Sasser's record report on the Arnold incident and others.

5

00:00:21,700 --> 00:00:26,700

And yet we have with us today a man who perhaps has been more instrumental because he has

6

00:00:26,700 --> 00:00:32,700

brought tangible evidence, the nature of photographs and other things to the people of the world.

7

00:00:32,700 --> 00:00:40,700

He is the man who I think very highly of, a man who I have worked with and who I respect very much.

8

00:00:40,700 --> 00:00:46,700

I would like at this time to introduce my very good friend and colleague, co-author of

9

00:00:46,700 --> 00:00:59,700

The Time Thoughts of Landed, Mr. George Adams. Thank you very much, George. We're all George.

10

00:00:59,700 --> 00:01:05,700

And I might be glad to be here at this time. Since last year I just appointed most of you people

11

00:01:05,700 --> 00:01:13,700

on the economy in New York City at the time. But before going on with what I'm about to say,

12

00:01:13,700 --> 00:01:18,700

I want to also mention something here that should have been mentioned long before this.

13

00:01:18,700 --> 00:01:23,700

And that is that this is the birthday of George Van Dassel.

14

00:01:23,700 --> 00:01:37,700

Well, you have very old sort of things about the flying saucers, their purposes and many other things.

15

00:01:37,700 --> 00:01:45,700

I want to bring this down to a little scientific phase that you may fully understand what is taking place.

16

00:01:45,700 --> 00:01:55,700

We find here today that much confusion goes on in the regards to how these people can travel as they are traveling

17

00:01:55,700 --> 00:02:03,700

or have been reported to be moving through space, making such a terrific turns and so many other things.

18

00:02:03,700 --> 00:02:13,700

Also, do they look like us? So let us go into a few of analysis little bit and we'll soon find out just about what we might expect

19

00:02:13,700 --> 00:02:20,700

of other people on other planets. You have never read a book and probably you never were a read one,

20

00:02:20,700 --> 00:02:29,700

where it would tell you that our earth has been created by a hokey pokey idea or that it's been created somewhere else

21

00:02:29,700 --> 00:02:35,700

and finally thrown into a present position on which we find ourselves.

22

00:02:35,700 --> 00:02:43,700

Instead, you will find that our earth has been created out of space or within space.

23

00:02:43,700 --> 00:02:51,700

Naturally, if it is created within space, then space itself must have the elements of which this earth could be made up of.

24

00:02:51,700 --> 00:03:00,700

We have the evidence that space do have such elements of which bodies can be made up because your lightning time,

25

00:03:00,700 --> 00:03:07,700

when the lightning bolt strikes, it's a pretty solid piece of matter. If it hits you in the head, you know.

26

00:03:07,700 --> 00:03:14,700

We find that that bolt is made simultaneously in space by two lines of forces,

27

00:03:14,700 --> 00:03:21,700

known as magnetic lines or electrical lines of force, crossing each other just like two hot wires with,

28

00:03:21,700 --> 00:03:28,700

producing enough heat in that contact to actually solidify all matter surrounding that territory

29

00:03:28,700 --> 00:03:33,700

and therefore bringing it down as a bolt is known as a lightning bolt.

30

00:03:33,700 --> 00:03:40,700

Yet we may look out into space for a moment and we find there is nothing between us and the sky.

31

00:03:40,700 --> 00:03:49,700

But did you ever sit in the room at your mother or yourself have cleaned the room up so well that you couldn't find any dust on any deferment chains?

32

00:03:49,700 --> 00:03:52,700

Yes, you probably said in such a room many times.

33

00:03:52,700 --> 00:04:01,700

And all of a sudden you find a game of life coming through from the sunlight and showing you the dust that is flying in that room.

34

00:04:01,700 --> 00:04:04,700

That's not what you can think just space life.

35

00:04:04,700 --> 00:04:11,700

And since a mother earth has been made up or been born within space or the elements of space,

36

00:04:11,700 --> 00:04:20,700

it must be denoted that everything that a mother earth has produced upon its body, knowing its mother nature,

37

00:04:20,700 --> 00:04:27,700

that it must have been there previously before it became a ball known as earth.

38

00:04:27,700 --> 00:04:32,700

So in a minute form of these elements that one time had been free space,

39

00:04:32,700 --> 00:04:41,700

we find that the germ for the worm and the pattern for a human being as well as we might say,

40

00:04:41,700 --> 00:04:47,700

the seed for a blade of grass has already been in space.

41

00:04:47,700 --> 00:04:54,700

And it took that combination to come together as it did and as it did come together,

42

00:04:54,700 --> 00:04:58,700

made this ball of earth as we today know to us.

43

00:04:58,700 --> 00:05:01,700

And we do know the elements of which it is made up.

44

00:05:01,700 --> 00:05:09,700

Therefore, knowing that, we segregate the system in which our planet is now living.

45

00:05:09,700 --> 00:05:19,700

And from the rest of space and within the system we find planet Venus, planet Mars, Jupiter and all others are also living.

46

00:05:19,700 --> 00:05:27,700

Within that one system, they were two born of that same system and that's them they naturally are going to have

47

00:05:27,700 --> 00:05:33,700

the same combination in chemical composition as our earth today has.

48

00:05:33,700 --> 00:05:37,700

And therefore, it is to reproduce as it has.

49

00:05:37,700 --> 00:05:47,700

We find that we reproduce the same kind of form in every detail like that of grass, birds, animals, humans and so on the line,

50

00:05:47,700 --> 00:05:50,700

just as the earth itself.

51

00:05:50,700 --> 00:05:56,700

But we can take it and go into chemistry and once we combine certain chemical in a certain way,

52

00:05:56,700 --> 00:05:58,700

it will reproduce certain things.

53

00:05:58,700 --> 00:06:03,700

And if it's repeated, it could be repeated thousands of times, still reproduce the same thing.

54

00:06:03,700 --> 00:06:11,700

So we then must admit that chemistry teaches anything at all, then it must be admitted that other planets would have reproduced the same thing

55

00:06:11,700 --> 00:06:14,700

we have reproduced upon all worlds.

56

00:06:14,700 --> 00:06:21,700

And of course, if you go through your religious side, you will find that it does speak worlds upon worlds.

57

00:06:21,700 --> 00:06:28,700

And it doesn't say anything about them being in the different dangers in our world here on which we live.

58

00:06:28,700 --> 00:06:38,700

Now in reference to the speed, we go to the speed question, we find that the earth at the moment is moving around 18 and a half miles per second.

59

00:06:38,700 --> 00:06:43,700

None of us know that we are moving at all, we're just distilled.

60

00:06:43,700 --> 00:06:50,700

And naturally, no one would even suspect that moving the way we feel the situation and yet we are moving.

61

00:06:50,700 --> 00:06:58,700

All because that while the earth is moving, it produces what is in their dynamics knowing an airflow.

62

00:06:58,700 --> 00:07:05,700

That airflow is known to us on earth as an atmosphere within which we live.

63

00:07:05,700 --> 00:07:09,700

The fringe of it is somewhere 200 or so miles away from the earth.

64

00:07:09,700 --> 00:07:16,700

Naturally, that's why the friction would be known if we were living out there, but not here.

65

00:07:16,700 --> 00:07:22,700

To convey the idea to you a little bit more, let us say that we put a man on a yolk of an egg.

66

00:07:22,700 --> 00:07:26,700

And then he's drowned, so to speak, by the quake of an egg.

67

00:07:26,700 --> 00:07:29,700

And then the shell is the protection of him.

68

00:07:29,700 --> 00:07:34,700

If he was thrown then, the whole egg was thrown through space, you wouldn't even know it.

69

00:07:34,700 --> 00:07:44,700

Because the fringe of the egg, or so-called the shell, would take the brunt of resistance and not the yolk, not the man sitting on the yolk.

70

00:07:44,700 --> 00:07:47,700

Well, that's about the way we are living on the earth.

71

00:07:47,700 --> 00:07:55,700

And these people have actually learned how to produce the same condition around a man-made ship.

72

00:07:55,700 --> 00:08:00,700

In other words, they have studied their planets, which we should have studied ours the same way,

73

00:08:00,700 --> 00:08:06,700

have learned that the Earth world is behind, no wings are nothing of the kind,

74

00:08:06,700 --> 00:08:11,700

yet it travels through space at 18 and a half miles per second.

75

00:08:11,700 --> 00:08:20,700

And they have studied that and have learned that, and then trying to duplicate that by a man-made so-called satellite known to us today as a spaceship,

76

00:08:20,700 --> 00:08:23,700

which they have finally succeeded in doing.

77

00:08:23,700 --> 00:08:32,700

So when they now move through space from planet to planet, they are actually moving in a sea of their own atmosphere or gravity,

78

00:08:32,700 --> 00:08:41,700

which they produce by utilizing the natural forces known as magnetic forces or static electricity in the early days.

79

00:08:41,700 --> 00:08:55,700

We find that in a book called Astronomy, written by Arthur Harding in 1936, we are told on page 72 there that everything, the smallest body in space,

80

00:08:55,700 --> 00:09:01,700

including the large body, is actually controlled by what we termed to be gravity.

81

00:09:01,700 --> 00:09:05,700

Yet gravity is produced by motion in no other way.

82

00:09:05,700 --> 00:09:16,700

For instance, if you had an airplane traveling, it's a gravitational condition created by its movement, known in the aerodynamics, as an airflow.

83

00:09:16,700 --> 00:09:19,700

That keeps the plane up there and moving, keeps it from falling.

84

00:09:19,700 --> 00:09:23,700

Yet if that plane stops moving, it will fall to Earth.

85

00:09:23,700 --> 00:09:37,700

The same would be true if we would stop rotating as we are now doing, we would find that we'd die in an instant almost due to the lack of air that would be lost by the stillness of the Earth.

86

00:09:37,700 --> 00:09:43,700

It's only the movement of the Earth that reduces the air we now know as atmosphere.

87

00:09:43,700 --> 00:09:48,700

So we can see the relationship between the Earth and the ship.

88

00:09:48,700 --> 00:09:51,700

The ship's the same way. They have learned that.

89

00:09:51,700 --> 00:10:01,700

Being able to utilize the natural energy, which we are not too far from, in the way of research, ready to account to it, so to speak, and once we do, we do.

90

00:10:01,700 --> 00:10:03,700

We can do the same thing.

91

00:10:03,700 --> 00:10:10,700

There is really no myth in it. There is nothing mysterious about it anymore than it was thought to do when it was brought out.

92

00:10:10,700 --> 00:10:13,700

Once it's brought out, it's a simple math.

93

00:10:13,700 --> 00:10:15,700

The same thing is in this field.

94

00:10:15,700 --> 00:10:30,700

Once we have come to the same power that propels our planet, in all of the planets throughout the universe, we can build a shift-end and go on and on and produce the desired atmosphere around the ship thereby.

95

00:10:30,700 --> 00:10:41,700

We can make any and every kind of a turn to do the desire, not even know it anymore than we know now that we're moving at 18.5 miles per second while sitting up on the top of this Earth.

96

00:10:41,700 --> 00:10:46,700

You might say then that the Earth itself is nothing but a big spaceship.

97

00:10:46,700 --> 00:10:57,700

The only difference between the Earth and a spaceship such as the Flying Saucer is called is that the Earth is riding on its orbit, so-called on the rail.

98

00:10:57,700 --> 00:11:05,700

While the spaceship is being able to maneuver to our space from planet to planet, from system to system, that's the only difference.

99

00:11:05,700 --> 00:11:14,700

And man has got the potentials within him to unfold in those channels, and his limits are no such a thing.

100

00:11:14,700 --> 00:11:21,700

He can go on unfolding. The longest he complies with the laws of a divine state or that of nature.

101

00:11:21,700 --> 00:11:30,700

If he complies with that, he can learn any and everything and all the laws that are covering the worlds upon worlds besides our own.

102

00:11:30,700 --> 00:11:37,700

So the mystery really is not a mystery whatever. I've been on the ships many times since the first contact.

103

00:11:37,700 --> 00:11:42,700

I've been in them and flown in them and made many contacts. I know what I talk about.

104

00:11:42,700 --> 00:11:48,700

I walk into a ship just the same as I walk into any airplane of our own. I find no difference whatever.

105

00:11:48,700 --> 00:11:56,700

I don't even know that I'm moving. In fact, I notice movement in the airplane, but I do not notice any movement as far as those ships are concerned.

106

00:11:56,700 --> 00:12:08,700

Because our airplanes, our whole system is using what is turned to be a brute force while we and the ships are using what is known to be natural, non-resisting force.

107

00:12:08,700 --> 00:12:14,700

You might say the way they operate, for instance, they hook on to this power which they have done.

108

00:12:14,700 --> 00:12:20,700

They operate at 10% of that accumulated power, which is 100% cumulation.

109

00:12:20,700 --> 00:12:36,700

They utilize 90% of the power for self-protection, so to speak. In other words, they radiate from the skin of the ship, this force in the neck of the field, and repel anything that might come, such as an meteorite and many other things,

110

00:12:36,700 --> 00:12:45,700

such that they repel that, and they keep on moving. They produce a condition around the ship, something like this. Everyone should be able to see how that's done.

111

00:12:45,700 --> 00:12:55,700

And that is, you have a still pool of water. You throw a pebble into the still pool of water, and what do you find? The primal force when into action where the pebble drops.

112

00:12:55,700 --> 00:13:05,700

From there on, you see a wavelet after wavelet going out towards the shore. Each wavelet, if it goes out towards that shore, gets milder and milder.

113

00:13:05,700 --> 00:13:16,700

But the first one produced by the primal wave is actually equal to that of that primal stage. So the ship does the same thing.

114

00:13:16,700 --> 00:13:27,700

It goes into action, produces this radiation from its body outwardly. It can extend it for 250 or 2500 miles, or any distance, depending on the amount of power it is using.

115

00:13:27,700 --> 00:13:38,700

And it produces a wavelet after wavelet just like that, and supposing that you get by air bullet into it while they're traveling, you probably penetrate the first, second, third wavelet.

116

00:13:38,700 --> 00:13:48,700

But by the time you get down to that first wavelet from the skin, or the second wavelet from the skin, you're already exhausted. You're forced. And you could not touch that ship.

117

00:13:48,700 --> 00:14:02,700

Take for instance the rocket system we're talking about going down in outer space. If we are to travel at 25,000 miles per hour, by the time we get down to, get to the moon, we're going to be sandpapered to a tissue stage.

118

00:14:02,700 --> 00:14:13,700

And we'll never make it. On the other hand, if we use this force here, we can get up there and back again without any harm, whatever, and never even know that we have left the earth.

119

00:14:13,700 --> 00:14:27,700

That's how smooth the writing would be. Because if we pressurize the ship at our pressure stage at 14.7, which is three-level pressure, the first wavelet radiating from the body of the ship is also 14.7.

120

00:14:27,700 --> 00:14:38,700

In other words, the ship traveling at 50,000 miles per second, you could still get out and sit on top of it and never know that you're moving, nothing to blow you off.

121

00:14:38,700 --> 00:14:51,700

All because you are enveloped in that first flare or the first wavelet in line with the pressure that is in the ship. We can see many things, how those things are operating, how they're done.

122

00:14:51,700 --> 00:15:03,700

And they're not hard to see once you expand your mind just a little bit further. Now I have heard many talks this morning, and I've heard none of them tell you anything about the things that have taken place last year.

123

00:15:03,700 --> 00:15:21,700

Everybody seemed to kind of say to you, well, have the biggest year at such and such a time, and so forth. But the truth lies right here that the greatest amount of sauce has ever seen in our time was last year, except the papers did not carry them.

124

00:15:22,700 --> 00:15:32,700

But it was last year. Last year we had 82 personal contacts, like you and I talking to each other, throughout the world. 82.

125

00:15:32,700 --> 00:15:35,700

Four of them in the United States, the rest of them throughout the world.

126

00:15:35,700 --> 00:15:51,700

France alone had seven contacts in the course of six weeks prior to Monde de France coming into power. I'm wondering sometimes if Monde de France wasn't really taught how to get into that stage when he was not known before he had become the man of the hour.

127

00:15:51,700 --> 00:16:05,700

All right, we find that because I have papers from France. I get mailed from all parts of the world, and I have papers from France telling me that there's not a diplomat in France that doesn't know something about space people.

128

00:16:05,700 --> 00:16:17,700

We also find that there's a big landing took place in Rome or near the barricade. We also find that there's been landing made in Brazil, New Zealand, in different places.

129

00:16:17,700 --> 00:16:29,700

Take for instance, the one in Brazil. Well, there were surveyors out there, and it was surveying in the jungles of Brazil when the ship landed with five men and two women walked out of it and they talked to.

130

00:16:29,700 --> 00:16:44,700

We didn't get none of that. I have a letter right in my pocket, something that I must admit to you, that we have confused it completely. And it is, here's a letter that comes from Norway telling about those two sisters.

131

00:16:45,700 --> 00:16:53,700

It was sent to me only to confirm the idea whether that contact there was anything like mine to help the sisters out.

132

00:16:53,700 --> 00:17:07,700

And here we've been told that Philippine and Billy Ferris had, it is supposed to admit it, that he was the one that met the girls and that he's the one they talked to, that he lands his helicopster there.

133

00:17:07,700 --> 00:17:20,700

Yet here I have a letter here that tells that this Billy Ferris in Stuttgart, Germany finally

called the press and told the press that that was a darn lie and it's written that way here.

134

00:17:20,700 --> 00:17:27,700

That's a darn lie that he never landed on a part of the country and he had never talked to any very thinking women.

135

00:17:27,700 --> 00:17:36,700

Yet that's the kind of news we get, we don't get as straight as we should get it. We find this lot of stuff going on, ever so much.

136

00:17:36,700 --> 00:17:45,700

Contacts have been made on a large scale this last year, lot more than ever before and they are being made steadily all over the world.

137

00:17:45,700 --> 00:17:54,700

Except that our press does not carry it, but other papers do carry it, although the same things can be found everywhere all over the world.

138

00:17:54,700 --> 00:18:04,700

I do not know what the influence really are, I don't really know, because to me this is more realistic and more precious than anything on the face of the earth.

139

00:18:04,700 --> 00:18:13,700

I will say that as far as bringing what truth we have, none of us are perfect, but what truth we do have, we should get it as it is given.

140

00:18:13,700 --> 00:18:31,700

It does belong to the world and not any particular group. I don't care who it is, yet I do know, and I may say this, that if I am informed correctly, you shall find in the next two months information coming out from the general public of the nation,

141

00:18:31,700 --> 00:18:43,700

probably throughout the world, that there is a special group that is actually interested in this so much that it will do anything, go to any end, to stop the truth from coming forward.

142

00:18:43,700 --> 00:18:52,700

And I have that kind of an information and I do not know whether it will come out in the next two months or not, but it looks like it may come out.

143

00:18:52,700 --> 00:19:10,700

But I also know, because I have to send a questionnaire to these sources when they ask for it, and I have given them what I know to be true and what I didn't know I cannot answer for, because no man can know all the truth and no man will ever know all the truth,

144

00:19:10,700 --> 00:19:15,700

but all the men can combine and make the truth as they see it.

145

00:19:15,700 --> 00:19:30,700

I would hate to live in a world of one opinion. I would be married at work, but I do know that there are three great branches in this world that are now working in favor of the source of truth coming out.

146

00:19:30,700 --> 00:19:43,700

And I do not know whether it's going to come out in the next two weeks, next three months or what, but I'll show you one thing that if it works and continues to work as it is now, this will no longer be a myth.

147

00:19:43,700 --> 00:19:54,700

But don't bank on any official statement coming from any governmental agency of the world. Don't bank on that, because that would not do too much good anyway.

148

00:19:54,700 --> 00:20:01,700

Because at the present time, the thing is jacked up, might be said, altogether to a hostile angle, regardless.

149

00:20:01,700 --> 00:20:12,700

And so it's got to come from a far better source than that, before the world can settle down and accept these people on the basis that they themselves would like to be accepted.

150

00:20:12,700 --> 00:20:28,700

One thing is definite, and that is, just last week or so, I was going to Borrego Valley. I have witnessed that effect in Borrego that between 100 and 200 ships have been seen, 10 minutes or 12th, on March the 1st.

151

00:20:28,700 --> 00:20:36,700

As we were going to Borrego, we saw them, something like these clouds you've been watching. You better watch those clouds, because you never can tell what they are.

152

00:20:36,700 --> 00:20:47,700

They may appear just like that, but they keep on clicking off and on, especially in intensity of illumination. You better start putting your glasses up there and actually examining them.

153

00:20:47,700 --> 00:20:56,700

Because that's the way we spot that one at that time, which is a really pluck of them there. So they are really moving in faster than ever before.

154

00:20:56,700 --> 00:21:07,700

They're not here to threaten us in any shape or form. They're not here, like when Mr. Dr. Williamson says, to say to go to Goodyear and let the baddie-baddie go to Ziggins.

155

00:21:07,700 --> 00:21:24,700

Not at all. But what they are here most before and are coming for is this. We do know for a fact that if you study about a little bit, that Admiral Byrd went to Little America prior to war, World War II, when he came back he gave a report.

156

00:21:24,700 --> 00:21:33,700

And he said that it was nothing but ice and snow. He left the scamp there only to return later, and after he returned it he couldn't find the scamp.

157

00:21:33,700 --> 00:21:44,700

It was snowed in and iced in. Yes, in 1946 he went to Little America and what report he brought back? He brought back the report.

158

00:21:44,700 --> 00:21:51,700

That ice and snow has been touring rivers, lakes and been farming and even vegetation here and there to get a show.

159

00:21:51,700 --> 00:22:02,700

Which only proves one thing, that the earth has shifted or that condition of a climatic change would have not taken place. The earth has actually shifted to some degree.

160

00:22:02,700 --> 00:22:14,700

Now to what degree I couldn't tell you, although I believe that we have instruments good enough to detect the ship as to how far it's gone and how much farther it may go.

161

00:22:14,700 --> 00:22:23,700

Now an atomic bomb may help, may not, that I couldn't say whether it would or it wouldn't. It's not doing us any good the way it is, that's true.

162

00:22:23,700 --> 00:22:30,700

But what if it would help the earth to tilt faster or not, I could not say. But it is shifting, there's no question.

163

00:22:30,700 --> 00:22:41,700

Scientists know that. In fact, it's not long ago when some of their papers did carry out claim that there was a shift taking place to quite an extent.

164

00:22:41,700 --> 00:22:47,700

Even that was true, then we're about on a verge of catastrophe, but I don't quite believe that it was that far gone.

165

00:22:47,700 --> 00:22:53,700

Although if it keeps on shifting, it's only a fulfillment then of a cycle.

166

00:22:53,700 --> 00:23:05,700

It isn't shifting to destroy us because we ourselves may be bad or good or indifferent. It is a cycle ending and that's another thing why the space beings are observing today.

167

00:23:05,700 --> 00:23:12,700

That's a major thing. We find that this shift naturally will change conditions in space.

168

00:23:12,700 --> 00:23:19,700

Take two mites like here, in the present position, will have a certain effect, reverse them and they'll have another type of effect.

169

00:23:19,700 --> 00:23:28,700

And that effect would be no one actually in space as far as space is concerned, especially the system within which these bodies are found.

170

00:23:28,700 --> 00:23:35,700

And that is one big thing they are concerned with and nothing more than that. Let me assure you that.

171

00:23:35,700 --> 00:23:43,700

Sure, they can teach us, they can help us out of our dilemma in many ways if we care to be held.

172

00:23:43,700 --> 00:23:49,700

They can set the table, but it'd be up to us to eat. If that's all they can do, they can't do any more.

173

00:23:49,700 --> 00:23:54,700

So we must admit here that they're not here to conquer us.

174

00:23:54,700 --> 00:23:59,700

In fact, I believe they have a nest on their hands that they did. So why bother when they haven't got it now?

175

00:23:59,700 --> 00:24:09,700

So the question comes then, if they're here, they're only here with one purpose and that is to observe us as far as the planet itself is concerned.

176

00:24:09,700 --> 00:24:21,700

Moving, shifting as it does. This has taken place before. We have no actual history on the thing in a way like we have history on other things and reference to blood and so forth.

177

00:24:21,700 --> 00:24:25,700

But we do have a history to this degree, at least norms are not good if any one of those days.

178

00:24:25,700 --> 00:24:33,700

Because we do have history where the earth hasn't flooded. That is not all of it, but quarter part of it each time.

179

00:24:33,700 --> 00:24:43,700

And if it's true that a 26,000 year cycle is ending, if some time is speculating, then we can expect most anything anytime, but just when no one can say.

180

00:24:43,700 --> 00:24:54,700

Although there is indication of various offsets in this world that I've not been knowing before, but that's again, is but a natural cycle condition that is being brought about.

181

00:24:54,700 --> 00:24:59,700

And so any of you that think yourself terribly bad, don't feel that about it because you're not being punished for that.

182

00:24:59,700 --> 00:25:03,700

If you think that way, it's just a cycle that must take place.

183

00:25:03,700 --> 00:25:09,700

Just the same thing, we could add a lot of rain today as it's in drop cycle instead of we've got sunshine.

184

00:25:09,700 --> 00:25:14,700

So you can see that nature will take care of the whole thing if we're only ourselves.

185

00:25:14,700 --> 00:25:19,700

Work with it a little bit, which these people on different planets seem to have done.

186

00:25:19,700 --> 00:25:22,700

And as a result, they're further ahead of us in many ways.

187

00:25:22,700 --> 00:25:28,700

True, a man doesn't rise by a bread alone, or he lives by bread alone.

188

00:25:28,700 --> 00:25:36,700

He rises by the breath, he leaves for a breathe, and that's the spiritual part of that man, and he should continue to be so.

189

00:25:36,700 --> 00:25:50,700

He should admit that part, but really frankly speaking, all the different peers that have been promoted in all these past few years in reference to the blind sources have no foundation whatsoever.

190

00:25:50,700 --> 00:25:52,700

None far or whatever.

191

00:25:52,700 --> 00:26:00,700

And let me say here to you definitely, the conflict I have made was not made by a mental process.

192

00:26:00,700 --> 00:26:07,700

Let me affirm that to you, it was made on the same basis that I speak to you and you speak to me.

193

00:26:07,700 --> 00:26:17,700

Now, the first one was made by a mental exchange since he wouldn't talk English or any other language, and I didn't understand his.

194

00:26:17,700 --> 00:26:21,700

But later on on the other context, we did talk language.

195

00:26:21,700 --> 00:26:24,700

I say few words Polish, and he spoke Polish as well.

196

00:26:24,700 --> 00:26:27,700

The language doesn't seem to be the trouble at all.

197

00:26:27,700 --> 00:26:39,700

And I found that through the last year that the context that were made by others the same way, first context to be of that type, other context are finally in actual language of your world.

198

00:26:39,700 --> 00:26:41,700

How do they learn? Very simple.

199

00:26:41,700 --> 00:26:43,700

I'll tell you what I've seen in the shift.

200

00:26:43,700 --> 00:26:49,700

I've seen at screens something like you have on TV, except maybe about 20 times a bit.

201

00:26:49,700 --> 00:26:56,700

And let us say it this way, to give you some idea how they have learned our language, besides monotonizing our radio.

202

00:26:56,700 --> 00:27:08,700

And that is, if I were to ask you to bring a chair from there to here, well, I have to have the picture in my mind as to what I want to say and what I wanted you to do.

203

00:27:08,700 --> 00:27:11,700

So they catch the picture.

204

00:27:11,700 --> 00:27:15,700

Then I say the word, and it catch the word, the sound of my voice.

205

00:27:15,700 --> 00:27:17,700

And they catch it both to those on the screen.

206

00:27:17,700 --> 00:27:22,700

Then they see you move, taken up the chair, carrying it over, and they follow that up.

207

00:27:22,700 --> 00:27:28,700

And that way to keep repeating it, repeating it till they have learned just what that sound meant.

208

00:27:28,700 --> 00:27:30,700

That's how simple it is.

209

00:27:30,700 --> 00:27:34,700

And we are, I understand, coming into that simplicity ourselves recently.

210

00:27:34,700 --> 00:27:36,700

So it's really not hard to understand.

211

00:27:36,700 --> 00:27:42,700

Besides being mentally developed as they are, which is actually a potential of every human being,

212

00:27:42,700 --> 00:27:47,700

that their leaptickey question is not a mystery, let it be known that way.

213

00:27:47,700 --> 00:27:52,700

How many times had you had a hunch, you called it a hunch, how many times have you walked up to an animal?

214

00:27:52,700 --> 00:27:58,700

And you didn't say not yet the animal already knew what you're going to do, what are you going to pet him, or are you going to kick him?

215

00:27:58,700 --> 00:28:04,700

How many times have you walked up to a door and gone and out counted and already had the answer, but you didn't really trust it.

216

00:28:04,700 --> 00:28:07,700

So you took the chance and finally got it verbally.

217

00:28:07,700 --> 00:28:09,700

And so many other things.

218

00:28:09,700 --> 00:28:13,700

That's what it is. It's not hard to develop. It's called mental therapy.

219

00:28:13,700 --> 00:28:20,700

In fact, there's many, many other types of names are given to it, but it's simple, born with every human being when he's born on dessert.

220

00:28:20,700 --> 00:28:25,700

That's part of his real self, really speaking to the physical part of himself.

221

00:28:25,700 --> 00:28:28,700

So those are the things that are used, and they have to develop those things.

222

00:28:28,700 --> 00:28:32,700

They are nothing mythical, religious, or anything else.

223

00:28:32,700 --> 00:28:37,700

In fact, you might say religious, and that's scientific, is nothing but one the same unit.

224

00:28:37,700 --> 00:28:42,700

One works in the abstract field, the other one works in the concrete field, so to speak.

225

00:28:42,700 --> 00:28:46,700

But neither one, for instance, can be indefended of the other, for an example.

226

00:28:46,700 --> 00:28:53,700

If I'm an artist, I surely must have the picture in my mind first before I can paint it on a canvas.

227

00:28:53,700 --> 00:29:00,700

So if I were to tell you what sort of a picture I'm going to paint, but once I painted on a canvas, well, there it is.

228

00:29:00,700 --> 00:29:04,700

Now you know what I was talking about. You see the picture there in a concrete form.

229

00:29:04,700 --> 00:29:10,700

All right, but I have to have that pattern of an invisible state in my mind to begin with.

230

00:29:10,700 --> 00:29:13,700

And that's all mental pictures really are.

231

00:29:13,700 --> 00:29:21,700

So you may destroy the concrete one many times, but you cannot destroy the mental picture that I first received from which the concrete one came.

232

00:29:21,700 --> 00:29:26,700

But that's not what you might say mental philanthropy in general actually is.

233

00:29:26,700 --> 00:29:32,700

It's simple, there's nothing to it, except that we don't give as much time to it as we do to the other.

234

00:29:32,700 --> 00:29:38,700

We don't trust ourselves in other words. Let me show you while I'm at this base here what the whole

thing is about.

235

00:29:38,700 --> 00:29:46,700

For instance, I can take all you people right now, put you all in one room on a sensitive floor, very sensitive.

236

00:29:46,700 --> 00:29:54,700

I take like that with producer Santa of a tundra, and I'll pass a shadow on that floor, working on that floor.

237

00:29:54,700 --> 00:30:00,700

And the eyes will acknowledge that shadow and say I saw the shadow of an angler down or a woman.

238

00:30:00,700 --> 00:30:04,700

But the ears immediately, the hearing, would say now eyes don't fool me.

239

00:30:04,700 --> 00:30:12,700

Don't tell me you saw somebody walking across that floor, because if you did, I'd have heard that as sound as it would have made as it walked across that floor.

240

00:30:12,700 --> 00:30:17,700

That floor is very sensitive. So there's your ears condemning the sight.

241

00:30:17,700 --> 00:30:25,700

On the other hand, I'll produce a sound on the floor of a footprint or somebody walking across that floor, and the eyes don't see nothing.

242

00:30:25,700 --> 00:30:32,700

So the eyes will condemn the ears and say now listen, ears, if anybody crossed that floor, I'd have saw him.

243

00:30:32,700 --> 00:30:38,700

But the ears say, but I heard somebody walk across there, but the eyes say no, you didn't, because if they did, I'd have saw him.

244

00:30:38,700 --> 00:30:42,700

See what a confused state we're in really? It's no wonder we're in a mess.

245

00:30:42,700 --> 00:30:49,700

We coordinate those senses of ours a little bit better so they respect each other, and when they do, they respect all other mankind.

246

00:30:49,700 --> 00:30:58,700

For a man that has no respect for his own self, and he doesn't in that case, he's divided, he's confused, he surely cannot be expected to respect his fellow being.

247

00:30:58,700 --> 00:31:13,700

I think when I speak mandol, I selfish and all things, there's one father who should know about ourselves and begin to coordinate and get ourselves to some state of certainty, rather than the confused state of division that constantly keeps questioning ourselves and gets us confused.

248

00:31:13,700 --> 00:31:16,700

The more the question, the more confused we become.

249

00:31:16,700 --> 00:31:24,700

So you can see the whole program is based on scientific and spiritual, if you want to call it, combination as a unit.

250

00:31:24,700 --> 00:31:31,700

There is no strangers in this setup. I would like to say something like this in conclusion, and that is this.

251

00:31:31,700 --> 00:31:39,700

The Catholic sisters go up the Mount Paloma, the sister Sophia is not supposed to answer them in forming her own opinion.

252

00:31:39,700 --> 00:31:46,700

So he's appearing down to me, and they say, well, I'm science-afia. I say, some may be, but not major science.

253

00:31:46,700 --> 00:31:53,700

They're, well, what do you mean by that? I say, sign this works with God, while a preacher talks about God.

254

00:31:53,700 --> 00:32:00,700

And so I mean that. I said, well, supposing that you go and buy a beautiful painting of some master artist.

255

00:32:00,700 --> 00:32:05,700

You bought that painting, and you didn't see the master artist himself as a person.

256

00:32:05,700 --> 00:32:10,700

You took that picture home, the more you studied the picture, the more you seem to understand the mind that made it.

257

00:32:10,700 --> 00:32:20,700

Well, a true sign works with nature, a nature with God's own creation, and the more you work with nature, the more you understand the mind that created it.

258

00:32:20,700 --> 00:32:25,700

Well, a preacher doesn't do that, so he only talks about it.

259

00:32:25,700 --> 00:32:30,700

And the sisters, as you might think, that she might have rejected it, but it was not so.

260

00:32:30,700 --> 00:32:41,700

She says, isn't that beautiful? In other words, people that do some thinking are really realizing that the con, that it takes the two to make the world as a whole.

261

00:32:41,700 --> 00:32:49,700

You've got to have the two. And just the same thing that you probably have heard this story one time or another, where Jimmy been taught the Bible for years.

262

00:32:49,700 --> 00:32:58,700

And all of a sudden his mother's having a dinner and cooking a dinner, and he says, mommy, would you stop for a moment?

263

00:32:58,700 --> 00:33:01,700

Yes? What did you want?

264

00:33:01,700 --> 00:33:08,700

Didn't you tell me somewhere in the early part of the teaching from the Bible that we came from the dust?

265

00:33:08,700 --> 00:33:10,700

She said, why yes, Billy, I did.

266

00:33:10,700 --> 00:33:12,700

Oh, why do you ask at this time?

267

00:33:12,700 --> 00:33:17,700

Well, I've been looking under that bed of ours. There's either somebody coming or going.

268

00:33:18,700 --> 00:33:22,700

Well, in other words, if we came, we've got to go. So what's the difference?

269

00:33:22,700 --> 00:33:26,700

There got to be two sides to everything, and the two sides usually work in the one unit.

270

00:33:26,700 --> 00:33:34,700

So my friends, the whole thing is more realistic, and it's worldly, doesn't belong to any particular clique, or anything like that.

271

00:33:34,700 --> 00:33:39,700

It's on a worldly basis. We are today at a crossroads.

272

00:33:39,700 --> 00:33:46,700

We can either go the straight way and go on to glory far greater world than we have ever known, or our children would ever know.

273

00:33:46,700 --> 00:33:54,700

But we can also pick the other cars and annihilate a civilization as other civilizations have been annihilated.

274

00:33:54,700 --> 00:33:59,700

But to follow this up, we must follow it up on a concrete basis.

275

00:33:59,700 --> 00:34:04,700

We must not fly off in the clouds because clouds do dissolve, and you might take a good tumble.

276

00:34:04,700 --> 00:34:12,700

Stay on the ground, be yourself, be normal. That's all that's asked of you. Be natural, and we'll get far.

277

00:34:12,700 --> 00:34:20,700

And we have to pick together if we're going to be the means by which the world itself will finally know the truth.

278

00:34:20,700 --> 00:34:27,700

We cannot keep dividing this and expect the people of the world to understand the whole thing and cooperate.

279

00:34:27,700 --> 00:34:42,700

We cannot do that. We must have real common understanding where everybody, regardless of belief, or state of development, can grasp and understand, and thereby become in great health.

280

00:34:42,700 --> 00:34:51,700

So thank you all, and all who are listening to me, and at the same time do not forget that this is George's birthday.

281

00:34:51,700 --> 00:34:53,700

So thank you again.

282

00:34:57,700 --> 00:34:59,700

Thank you.
