

1

00:00:00,000 --> 00:00:07,120

Good evening. The question of flying saucers or no flying saucers has been with us since

2

00:00:07,120 --> 00:00:15,320

a man named Dahl claimed on June 21, 1947 to have seen six large airborne discs. Sometime

3

00:00:15,320 --> 00:00:28,720

after that experienced airmen reported unidentified flying objects. From 1947 to 1962, 3,369 UFOs,

4

00:00:28,720 --> 00:00:33,880

unidentified flying objects have been reported to the United States Air Force. Controversy

5

00:00:33,880 --> 00:00:39,760

surrounds this subject. Many supersonic jets as well as balloons are reported as UFOs under

6

00:00:39,760 --> 00:00:45,160

adverse weather and sighting conditions. Man-made satellites in orbit have confused many sky

7

00:00:45,160 --> 00:00:51,400

watchers. Highly technical electronic systems track everything that moves across our skies

8

00:00:51,400 --> 00:00:58,560

without positive identification yet as a flying saucer as such. Yet reports of flying saucers

9

00:00:58,560 --> 00:01:04,400

persist. We will try to resolve this question of flying saucers with the evidence at hand.

10

00:01:04,400 --> 00:01:09,800

Our distinguished panel is made up of George Adamski, an expert on flying saucers from

11

00:01:09,800 --> 00:01:17,440

VISTA California. Dr. Norman L. Trott, president at Leslie Theological Seminary. Dr. Mark

12

00:01:17,440 --> 00:01:23,080

Harrison, chairman of the physics department at American University. Dr. B. L. Clark, astronomer

13

00:01:23,080 --> 00:01:29,840

at the U.S. Naval Observatory. We will begin our discussion in just a moment.

14

00:01:29,840 --> 00:01:35,480

This is Raymond Burr speaking for the 1964 Freedom's Roll Call. Now there's a word for

15

00:01:35,480 --> 00:01:42,280

you, freedom. What does it conjure up in your mind? The revolution, the constitution, the

16

00:01:42,280 --> 00:01:48,200

Fourth of July, two world wars? Perhaps when you think of freedom you think of working where

17

00:01:48,200 --> 00:01:54,120

you please, traveling where you want, worshipping as you like, the American way. Or maybe your

18

00:01:54,120 --> 00:01:58,720

mind leaps to the hundreds of millions living under the chains of communism, people who

19

00:01:58,720 --> 00:02:05,440

have lost their freedom. Or maybe you just never think of freedom at all. May I remind

20

00:02:05,440 --> 00:02:11,120

you that freedom is a precious thing, but it must be protected and cherished, lest it

21

00:02:11,120 --> 00:02:18,120

be lost or destroyed. I invite you to join with me in learning what we can do for freedom.

22

00:02:18,120 --> 00:02:24,280

We're asked today for a copy of Freedom's Handbook, right to Freedom's Foundation, Valley

23

00:02:24,280 --> 00:02:25,280

Forge, Pennsylvania.

24

00:02:25,280 --> 00:02:31,280

Well gentlemen, in our opening film sequence we have seen what's supposed to be a flying

25

00:02:31,280 --> 00:02:36,680

saucer. The film was taken by Mr. Adamski who makes claims of seeing flying saucers on

26

00:02:36,680 --> 00:02:41,320

a number of occasions. I think it would be best to start off with him and ask him how

27

00:02:41,320 --> 00:02:46,360

in the face of overwhelming evidence against flying saucers do you still claim, sir, that

28

00:02:46,440 --> 00:02:49,440

there is such a thing as flying saucers, the film notwithstanding?

29

00:02:49,440 --> 00:02:53,560

Well, having a personal experience at one time, I didn't believe me there because I

30

00:02:53,560 --> 00:02:59,120

brought up as amateur astronomer and what we've been taught and so forth seemed to be

31

00:02:59,120 --> 00:03:04,120

impossible, but after years of experience and so forth and coming close contact with

32

00:03:04,120 --> 00:03:09,520

them, I can't help but believe just like in the early days after all there were seven

33

00:03:09,680 --> 00:03:16,280

planets known and when the eighth one was coming in at fourth finally in the ninth one

34

00:03:16,280 --> 00:03:19,280

there was a lot of discretion due on that, that they didn't exist.

35

00:03:19,280 --> 00:03:24,280

Well, Dr. Clark, there's a mistrater working you by this line of ideas.

36

00:03:24,280 --> 00:03:29,280

Well, first of all I'd like to ask Mr. Adamski if he's familiar with Edward Rupel's views

37

00:03:29,280 --> 00:03:31,280

on this subject he was made right here.

38

00:03:31,280 --> 00:03:36,000

Rupel? Yes, I have. I got a tape recording. He came up to see me and I got a tape recording

39

00:03:36,000 --> 00:03:38,000

home of his own statements there.

40

00:03:38,480 --> 00:03:44,120

Right. Well, in his recent book on unidentified flying saucers he states that he does not

41

00:03:44,120 --> 00:03:45,480

believe in flying saucers.

42

00:03:45,480 --> 00:03:52,800

Well, naturally in the position he has placed he has to state that way but personally talking

43

00:03:52,800 --> 00:03:58,920

to him very finally, you know, he passed away in that long ago and personally they all admit

44

00:03:58,920 --> 00:04:03,840

more or less. I know a lot of them that have come to me and told me and supported me yet

45

00:04:03,840 --> 00:04:08,840

I did not use their name in my defense because well, they would just get in trouble.

46

00:04:08,840 --> 00:04:16,160

Well, many of the photographs that have been published and shown in the newspapers and

47

00:04:16,160 --> 00:04:22,360

so on could very well have been pictures of astronomical phenomena which I'm sure you're

48

00:04:22,360 --> 00:04:23,360

familiar with.

49

00:04:23,360 --> 00:04:24,360

I agree.

50

00:04:24,360 --> 00:04:27,360

One is the super meteor or bulloid.

51

00:04:27,360 --> 00:04:28,360

Oh yeah.

52

00:04:28,880 --> 00:04:35,880

I agree with you. When there is something genuine happens and it's been that way for centuries,

53

00:04:35,880 --> 00:04:41,280

there's a bunch of opportunities to bring up and bring up a lot of things that confuse

54

00:04:41,280 --> 00:04:46,280

the issue and causes the knowledge to be thrown back, drotted, then coming forward.

55

00:04:46,280 --> 00:04:49,280

I realize that and I'm aware of it.

56

00:04:49,280 --> 00:04:53,760

Mr. Adams, you claim to have seen flying saucers on a number of occasions. Why do you think

57

00:04:53,760 --> 00:04:58,320

you have seen flying saucers so frequently and the rest of us have never seen a flying

58

00:04:58,320 --> 00:04:59,320

saucer?

59

00:04:59,320 --> 00:05:01,600

Well, you can't stay in the building and see them. You've got to watch them. When you

60

00:05:01,600 --> 00:05:06,760

watch the sky like we have watched at the beginning every night and every night, you

61

00:05:06,760 --> 00:05:10,760

bound to be seeing some of the words, the average person, most of the cases doesn't

62

00:05:10,760 --> 00:05:11,760

do that.

63

00:05:11,760 --> 00:05:14,760

Were you inspired for us to know what these look like?

64

00:05:14,760 --> 00:05:19,000

Well, the scouts, what they call scouts, were carried by the mothership, the long one that

65

00:05:19,000 --> 00:05:24,240

you just saw there on the screen. Well, they're round one and they only travel from the mothership

66

00:05:24,240 --> 00:05:29,920

to earth and go back into it. And the motherships like our airplane carriers are the ones that

67

00:05:29,920 --> 00:05:35,800

carry them between the planets. Well, these here, small ones like the Carl Planck saucer

68

00:05:35,800 --> 00:05:40,760

are, you may say, will accommodate about six people the most. Some of them don't accommodate

69

00:05:40,760 --> 00:05:41,760

that much.

70

00:05:41,760 --> 00:05:46,840

Well, the motherships, the sky-shaped type, they carry these and accommodate a crew of

71

00:05:46,840 --> 00:05:52,280

at least 50 to a couple of hundred. Where would they come from? Well, they come from

72

00:05:52,280 --> 00:05:59,560

Mars, Venus, and one other planet known now, and that we said, although there were some

73

00:05:59,560 --> 00:06:02,760

reporters that were coming from Jupiter as well.

74

00:06:02,760 --> 00:06:03,760

You say known.

75

00:06:03,760 --> 00:06:04,760

Yeah.

76

00:06:04,760 --> 00:06:10,200

Because when I made a trip around the world in 59, I've got a million reports from different

77

00:06:10,200 --> 00:06:15,440

ones, very reliable sources, even in England from the Defense Department, when I had lunch

78

00:06:15,560 --> 00:06:16,560

in with them.

79

00:06:16,560 --> 00:06:17,560

Dr. Prott, how about this?

80

00:06:17,560 --> 00:06:22,560

I was wondering what this position was on the habitability of these planets and conceivable

81

00:06:22,560 --> 00:06:28,760

that they could sustain life. There have been many ways to interpret the data which we have

82

00:06:28,760 --> 00:06:35,400

from Mars and Venus regarding the atmospheric composition of these planets, and many astronomers

83

00:06:35,400 --> 00:06:39,760

argue that there can be life and many argue that there can't be life on Mars and Venus.

84

00:06:40,080 --> 00:06:47,560

However, on most of the other planets in our solar system, I would say 99.99% of astronomers

85

00:06:47,560 --> 00:06:53,040

are definite in their views that life could not possibly exist on these planets as we

86

00:06:53,040 --> 00:06:58,680

know it here on Earth today. For example, on Jupiter and Saturn, which you just mentioned,

87

00:06:58,680 --> 00:07:04,840

the atmospheric composition of these planets is primarily composed of nothing and ammonia.

88

00:07:04,920 --> 00:07:09,920

Oxygen ammonia is not too good to breathe.

89

00:07:09,920 --> 00:07:10,920

Yeah.

90

00:07:10,920 --> 00:07:15,240

And I'd like to get back to one point which you made earlier though, in which you mentioned

91

00:07:15,240 --> 00:07:22,240

that you observed these objects because you watch for them quite frequently. We have a

92

00:07:22,840 --> 00:07:29,840

professional program you might say called Project Moonwatch, which Dr. Allen Heineck

93

00:07:30,840 --> 00:07:37,840

had it. And according to Dr. Heineck, all of the objects which his people looked for,

94

00:07:38,640 --> 00:07:43,840

all the hours that were spent making the observations, no one ever reported an unidentified planet.

95

00:07:43,840 --> 00:07:48,840

Well, I again have information on that also from the Moonwatch where they reported it,

96

00:07:48,840 --> 00:07:54,840

but it never reported to the public this thing. It's quite bleak when you get a book that

97

00:07:54,840 --> 00:08:00,840

instructs you how to do it if you're a Moonwatcher or a watcher of any kind. They tell you definitely

98

00:08:00,840 --> 00:08:05,840

to be careful and observe that and report it as best you can to try to get the size, speed

99

00:08:05,840 --> 00:08:06,840

and all of that.

100

00:08:06,840 --> 00:08:07,840

All right.

101

00:08:07,840 --> 00:08:14,840

Dr. Trott, as a theologian, what is your view of the possibility of a being coming from

102

00:08:14,840 --> 00:08:19,840

outer space to this Earth on a flying saucer type object?

103

00:08:19,840 --> 00:08:25,840

Well, I don't think there'd be any problem at this point. I don't believe that from a theological

104

00:08:25,840 --> 00:08:29,840

point of view, even from the scriptural point of view, that you can rule out the possibility

105

00:08:29,840 --> 00:08:36,840

of human beings. Somewhere else in the universe, indeed, I think it's quite probable. So that

106

00:08:36,840 --> 00:08:40,840

this doesn't give me any difficulty. And there are cues and scriptures that might shore up

107

00:08:40,840 --> 00:08:46,840

your point of view. And Ezekiel, for example, if you can pick up the spiritual which picks

108

00:08:46,840 --> 00:08:53,840

up the idea, Ezekiel saw a wheel way up in the middle of the sky. Whether this was a

109

00:08:53,840 --> 00:09:00,840

dream or whether it was a reality is something we really don't know. There isn't any problem

110

00:09:00,840 --> 00:09:08,840

at this point of view. I think our problem is, well, the problem of evidence, really,

111

00:09:08,840 --> 00:09:17,840

can you pinpoint this? And can we conceive of beings on other planets more advanced than

112

00:09:17,840 --> 00:09:25,840

the beings on our own making this kind of flight this time? And I have just to hear what the

113

00:09:25,840 --> 00:09:30,840

historian says and the physicist says. We have an interesting subject to follow you up on.

114

00:09:30,840 --> 00:09:35,840

We have an interesting subject that just came to me before I went on the strip. This is the

115

00:09:35,840 --> 00:09:44,840

article here in German and it was copied from an Italian and it is the Vatican official paper,

116

00:09:44,840 --> 00:09:51,840

the observatory of Mano published this and it says in there, the Vatican is already training

117

00:09:51,840 --> 00:09:57,840

space missionaries. And they're quite an interesting article, what they do, what they suspect

118

00:09:57,840 --> 00:10:03,840

they, so they already informed or know more about it that the preparing for the youngsters already

119

00:10:03,840 --> 00:10:09,840

that be missionaries to go on other planets in order to transmit their type of bleed to

120

00:10:09,840 --> 00:10:16,840

the people on other worlds. Mr. Adam, in your opening statement did I understand you to say

121

00:10:16,840 --> 00:10:22,840

that something about six passengers are provisioned for six passengers on the scout ship?

122

00:10:22,840 --> 00:10:28,840

On the scout ship, yeah, from two to six. How did you get the information?

123

00:10:28,840 --> 00:10:34,840

Well, the one I made a contact with the first time out in the desert and decided that light,

124

00:10:34,840 --> 00:10:39,840

which is in California yet, they were two men and I didn't get to see the other one, but the one that I

125

00:10:39,840 --> 00:10:48,840

talked to at that time on the ground, well, I've seen the other one only through reflection

126

00:10:48,840 --> 00:10:54,840

there in the ship, but there were two in that one. How did you talk to one?

127

00:10:54,840 --> 00:10:59,840

Well, I didn't talk to him like we talk here because it's pretty odd. I did talk to Ethway

128

00:10:59,840 --> 00:11:05,840

and he didn't answer me, although he seemed to understand me. So I started gestures and so forth

129

00:11:05,840 --> 00:11:10,840

and of course we all know that the thought that precious can be a post upon another person

130

00:11:10,840 --> 00:11:16,840

and so forth that they're alerted and I tried to do that because I studied that angle too

131

00:11:16,840 --> 00:11:21,840

and seemed like he understood that I anyhow got him to understand that I want to know where he was from.

132

00:11:22,840 --> 00:11:27,840

And so by gestures I pointed through the sun and then I made my first orbit and I said,

133

00:11:27,840 --> 00:11:32,840

Mercury in the second orbit, Venus in third orbit, third. I pointed to that. I did that twice.

134

00:11:32,840 --> 00:11:36,840

He finally did the same thing and stopped at the second orbit, so he gave me the answer, Venus.

135

00:11:36,840 --> 00:11:39,840

And I said Venus and he nodded his head.

136

00:11:39,840 --> 00:11:41,840

Dr. Erfman?

137

00:11:41,840 --> 00:11:50,840

Well, I remember Mr. Adamski telling about this in his book, which he wrote with Desmond Leslie.

138

00:11:50,840 --> 00:11:58,840

There were several things that surprised me there. You indicated that these people look very much like people who live on the Earth.

139

00:11:58,840 --> 00:12:06,840

That's right. They do look like it. Any one of us could be one of them. On the other hand, I don't see why a creator

140

00:12:06,840 --> 00:12:15,840

would have another geometrical pattern for human beings instead of following the normal pattern as we know ourselves.

141

00:12:15,840 --> 00:12:22,840

They may be different minds and different sizes and all of that, but I think that a creator would follow the pattern straight through.

142

00:12:22,840 --> 00:12:32,840

Well, now this surprises me a great deal. I remember reading Dick Tracy and Diet Smith, who played

a visit to the moon.

143

00:12:33,840 --> 00:12:48,840

The thing that rather intrigued me was the idea that the creator of the Dick Tracy comic strip chose to draw these people very much like people on Earth.

144

00:12:48,840 --> 00:12:59,840

What is this picture? This is a picture from Mr. Adamski's book showing the face man that Mr. Adamski says he saw.

145

00:12:59,840 --> 00:13:01,840

There's an artist with you at the time.

146

00:13:01,840 --> 00:13:03,840

Yes, and I'd sketch that picture.

147

00:13:03,840 --> 00:13:12,840

Well, now let me tell you what I feel is surprising about the fact that they would be similar in shape and size to human beings as we know them.

148

00:13:12,840 --> 00:13:21,840

I'll tell you my thoughts about Dick Tracy first if that's relevant. The moon has a very low gravitational field.

149

00:13:22,840 --> 00:13:30,840

When you examine the sort of features and why and wherefore, the people are the size they are.

150

00:13:30,840 --> 00:13:34,840

It turns out there are very good reasons why they are the size that they are.

151

00:13:34,840 --> 00:13:39,840

That they function well at this particular size and not some other size.

152

00:13:39,840 --> 00:13:48,840

For example, if we were ten times the size that we are, it would be rather difficult to get a bone structure that would support us.

153

00:13:48,840 --> 00:13:59,840

Just the sheer weight of the thing. We have to have a different way of forming bone structure out of the mineral we eat and so forth because it wouldn't have the strength to support us.

154

00:13:59,840 --> 00:14:10,840

So that the size that we are is well suited to our particular size of the Earth and the associated gravitational pull.

155

00:14:10,840 --> 00:14:16,840

Now these planets differ widely in size and gravity.

156

00:14:16,840 --> 00:14:19,840

Perhaps Dr. Clark could...

157

00:14:19,840 --> 00:14:26,840

Well, I would like to comment something on that too. Let's go back to our structure of the present day.

158

00:14:26,840 --> 00:14:31,840

I'm 73 years old. I've gone through 73 years of life here.

159

00:14:31,840 --> 00:14:41,840

And I have seen in my time when I was a kid starting out in labor, I've seen in my time men here on Earth, very heavy structure because they had to do everything by hand,

160

00:14:41,840 --> 00:14:43,840

digging ditches, plensoons and all of that.

161

00:14:43,840 --> 00:14:53,840

And since we have machines, notice our present generation is still the same design, same structure, but they're much lighter in structure and bone and everything else in nature seems to take care of that.

162

00:14:53,840 --> 00:15:00,840

I watched the Olympic trials last week and saw some very big fellows going there.

163

00:15:00,840 --> 00:15:11,840

Dr. Clark, could I address a question to you? Could you quote some figures on the relative gravitational forces on other planets?

164

00:15:11,840 --> 00:15:16,840

Well, for example, the moon, that's about 1.6 out of the Earth as far as the gravitational...

165

00:15:16,840 --> 00:15:19,840

It'd be a wonderful place to play a baseball game, wouldn't it?

166

00:15:19,840 --> 00:15:26,840

I don't have the exact figures, but I think Jupiter is about 30 times the gravitational attraction of the Earth.

167

00:15:26,840 --> 00:15:28,840

And that would seem to call for smaller people, wouldn't it?

168

00:15:28,840 --> 00:15:41,840

Well, it depends. I don't know if you need someone smaller or larger to support this heavy force which would be pulling you down towards the center of gravity on the planet.

169

00:15:41,840 --> 00:15:44,840

You may need someone with something that was larger.

170

00:15:44,840 --> 00:15:50,840

I would think smaller because, consider the amp, he can fall off the table when I hurt himself.

171

00:15:50,840 --> 00:15:56,840

In other words, you might think that the person would be spread out in this coordinate more than that coordinate.

172

00:15:56,840 --> 00:16:02,840

If he falls, I think what a boom-crushing experience that would be with 30 times the gravitational force.

173

00:16:02,840 --> 00:16:04,840

Well, certainly not flying in that area.

174

00:16:04,840 --> 00:16:06,840

Flying in saucers instead of flying in cups.

175

00:16:06,840 --> 00:16:12,840

And where do we get the answer on the gravity as being exact to begin with?

176

00:16:12,840 --> 00:16:14,840

From our instruments.

177

00:16:14,840 --> 00:16:16,840

And our instruments still need improvement.

178

00:16:16,840 --> 00:16:22,840

Let me remind you of something here just a little while back, which we sent up the second satellite up there,

179

00:16:22,840 --> 00:16:28,840

and supposed to register and bring that message back about a space and also register what's on Earth.

180

00:16:28,840 --> 00:16:33,840

Combination in order to get some kind of a measuring stick there by which we could go.

181

00:16:33,840 --> 00:16:37,840

And mind God, they registered no oxygen on Earth.

182

00:16:37,840 --> 00:16:43,840

Dr. Harrison, let's talk about the spacecraft that we have seen on this film.

183

00:16:43,840 --> 00:16:49,840

We have heard of saucers and the cigar-type objects that we saw at the beginning of the program.

184

00:16:49,840 --> 00:16:57,840

What appeared to be the movements of a fly in a rush in all directions at once.

185

00:16:57,840 --> 00:16:59,840

Is it physicist?

186

00:16:59,840 --> 00:17:01,840

What do you think it is?

187

00:17:01,840 --> 00:17:05,840

I would like to tell you the following story.

188

00:17:05,840 --> 00:17:13,840

On Labor Day weekend, I had my boat down to Smith Island, which as you know is in the lower part of Chesapeake Bay.

189

00:17:13,840 --> 00:17:23,840

And I was running across to Solomon's Island on a Sunday morning.

190

00:17:23,840 --> 00:17:32,840

And I saw an unidentified object in the sky and started to call it to a friend of mine who was sailing with me.

191

00:17:32,840 --> 00:17:39,840

And I looked a few minutes later and it was gone before I had a chance to call it to his attention.

192

00:17:39,840 --> 00:17:43,840

About an hour went by and I saw it again.

193

00:17:43,840 --> 00:17:49,840

And once again, I tried to call it to his attention but he was busy doing other things.

194

00:17:49,840 --> 00:17:53,840

The third time I succeeded in calling it to his attention so he saw it also.

195

00:17:53,840 --> 00:17:57,840

Now, at the time I didn't give a great deal of thought to it.

196

00:17:57,840 --> 00:18:00,840

I thought, well, it's something and that's the end of it.

197

00:18:00,840 --> 00:18:04,840

Something I don't know what it is but I didn't jump any hasty conclusion.

198

00:18:04,840 --> 00:18:07,840

It was just something that I didn't know what it was.

199

00:18:07,840 --> 00:18:15,840

Later on, we got over to Solomon's Island and then I had some second thoughts about it.

200

00:18:15,840 --> 00:18:23,840

The first thought was that I noticed a balloon salesman and one of them was already some kid had turned root thousand and it took off.

201

00:18:23,840 --> 00:18:26,840

So I said, well, there's a possibility.

202

00:18:26,840 --> 00:18:31,840

The other possibility, I suddenly realized that the trucks at Naval Air Base was very nearby.

203

00:18:31,840 --> 00:18:37,840

And I don't know what they were with but certainly they must use some targets of some kind.

204

00:18:37,840 --> 00:18:42,840

How is my observations different in kind than yours?

205

00:18:42,840 --> 00:18:49,840

My being sort of a natural skeptic, I started looking around for plausible reasons.

206

00:18:49,840 --> 00:18:56,840

The notion of flying saucers never occurred to me until I saw this book of yours.

207

00:18:56,840 --> 00:18:59,840

You are right.

208

00:18:59,840 --> 00:19:11,840

Prior to our big radar system that we have today, at the beginning from 46 on, you noticed they didn't have any of me and there were more sightings also seen.

209

00:19:11,840 --> 00:19:24,840

But today we have a lot of things to observe them and plus then we've got 500 pieces or more debris flying around in space that we have put up there since we started dealing with space.

210

00:19:24,840 --> 00:19:40,840

And any one of those could be reported as a flying saucer but this also could be confirmed because the Air Force follows these objects right along in order to know where they are at given time and report it, they check on it and know whether it's flying saucer or is a debris.

211

00:19:40,840 --> 00:19:43,840

Mr. Adamski, the Air Force has this.

212

00:19:43,840 --> 00:19:49,840

In fact, no unidentified flying object has given any indication of threat to the national security.

213

00:19:49,840 --> 00:20:01,840

There has been no evidence submitted or to or discovered by the Air Force that unidentified sightings represented technological developments or principles beyond the range of our present-day scientific knowledge.

214

00:20:01,840 --> 00:20:11,840

And finally, there has been nothing in the way of evidence or other data to indicate that these unidentified sightings were extraterrestrial vehicles under intelligent control.

215

00:20:11,840 --> 00:20:20,840

Well, here's the statement, the Dishya statement in January of the 9-1964 given at Winston-Salem and at the touchclips.

216

00:20:20,840 --> 00:20:28,840

So far as the Air Force, I have Mr. Benson, who is very, he was very closely connected with the branches of the government.

217

00:20:28,840 --> 00:20:30,840

He's better than he cracked the plane.

218

00:20:30,840 --> 00:20:32,840

And this, did you say what branch?

219

00:20:32,840 --> 00:20:33,840

Huh?

220

00:20:33,840 --> 00:20:34,840

Did you tell the footwork?

221

00:20:34,840 --> 00:20:44,840

Well, he's the one that also established this institution down in Winston-Salem, what they call, can't think of it, a little educational institution.

222

00:20:44,840 --> 00:20:45,840

I know it very well.

223

00:20:45,840 --> 00:20:47,840

And I just right now can't think of it.

224

00:20:47,840 --> 00:20:49,840

He is founder of that.

225

00:20:49,840 --> 00:20:50,840

But he was closely connected.

226

00:20:50,840 --> 00:20:52,840

He was in Washington most of the time.

227

00:20:52,840 --> 00:20:55,840

And it says the Air Force, I'm sorry, are concerned.

228

00:20:55,840 --> 00:20:56,840

They are not always.

229

00:20:56,840 --> 00:21:01,840

They are not foreign nation or extraterrestrial or ministered the United States.

230

00:21:01,840 --> 00:21:04,840

And down here, they go on the state here.

231

00:21:04,840 --> 00:21:13,840

It is reasonable that the USA Air Force and the US government will not go on an official record of non-identifying the conflict.

232

00:21:13,840 --> 00:21:21,840

Definitely, it could be extraterrestrial or controlled by intelligent beings or in a hostile.

233

00:21:21,840 --> 00:21:34,840

But it, against whom we have no defense, if they should choose hostility, an announcement of this would create a message here perhaps far greater than the single radio broadcast source that was 25 years ago.

234

00:21:34,840 --> 00:21:48,840

And then they go on a 25% of the Air Force and 1,000, 2,000 sources reports from a military pilot and airline pilots, general staff were said, but not even these continue correct.

235

00:21:48,840 --> 00:21:51,840

I interrupt you for a minute here.

236

00:21:51,840 --> 00:22:05,840

You mentioned just about two or three minutes ago that there were many more radar and names by which we can examine or search for these UFOs today.

237

00:22:05,840 --> 00:22:07,840

You agree to that.

238

00:22:07,840 --> 00:22:08,840

Yeah.

239

00:22:08,840 --> 00:22:19,840

And how do you count since there are more receptors or objects to receive the information for the fact that there have been fewer and fewer sightings reported since 1950s?

240

00:22:19,840 --> 00:22:23,840

I agree to that because they stay on beyond the radar screen and are commander.

241

00:22:23,840 --> 00:22:27,840

I mean, you know, and then they don't come and just fly like they did before.

242

00:22:27,840 --> 00:22:32,840

We're 500 students over at Farmington in 1952.

243

00:22:32,840 --> 00:22:34,840

They stay all day long.

244

00:22:34,840 --> 00:22:39,840

But I think our surveillance systems are probably much superior to what they were in 1953.

245

00:22:39,840 --> 00:22:42,840

And it is as far as our military is concerned.

246

00:22:42,840 --> 00:22:49,840

If there was a release what they catch today, which they could and someday they will, I think we'd all be pretty much surprised.

247

00:22:49,840 --> 00:22:52,840

And but this is the point that they want to bring here.

248

00:22:52,840 --> 00:23:00,840

Here, accurate information in size, speed, altitude, directions have not been even condemned by this.

249

00:23:00,840 --> 00:23:04,840

So now the Air Force is switching from a shotgun approach.

250

00:23:04,840 --> 00:23:06,840

See up to this time shotgun approach.

251

00:23:06,840 --> 00:23:14,840

Collecting mass of reports to attempt to get the correct measurements so scientists will have something to work with the General Sampson.

252

00:23:14,840 --> 00:23:18,840

Do you think the Air Force is taking a position in if there are flying saucers?

253

00:23:18,840 --> 00:23:20,840

Definitely.

254

00:23:20,840 --> 00:23:22,840

Dr. Clark, what do you think of this?

255

00:23:22,840 --> 00:23:24,840

Well, I don't know about this is not my thing.

256

00:23:24,840 --> 00:23:28,840

I wanted to ask a question that takes off in another tack.

257

00:23:28,840 --> 00:23:41,840

Here, the astonishing thing to me above everything else is the fact that you have seen flying saucers at hand and have talked to the inhabitants of them.

258

00:23:41,840 --> 00:23:49,840

Has this occurred with any frequency in recent years that you know of other scene experience contact?

259

00:23:49,840 --> 00:23:55,840

Yes, others have seen it in this country about four or five other people.

260

00:23:55,840 --> 00:23:58,840

There's many claims that they're not all of the parts.

261

00:23:58,840 --> 00:24:01,840

And then throughout the world is about that many too.

262

00:24:01,840 --> 00:24:07,840

In fact, the last time I was in Europe, which was a little over a year ago, I talked to John Cook too.

263

00:24:07,840 --> 00:24:11,840

And I've learned quite a bit what the Vatican knew because he even gave me a little medal.

264

00:24:11,840 --> 00:24:14,840

And I'm glad to have it now because he passed away since then.

265

00:24:14,840 --> 00:24:22,840

Dr. Clark, I meant to come to you for this question about the Air Force and apparently their revised position on flying saucers.

266

00:24:22,840 --> 00:24:24,840

What were your reactions to this?

267

00:24:24,840 --> 00:24:27,840

Well, I don't know what the latest information was.

268

00:24:27,840 --> 00:24:31,840

All I have available is what Mr. Ruppelt had in his book.

269

00:24:31,840 --> 00:24:37,840

But notice that Captain Ruppelt is concerned.

270

00:24:37,840 --> 00:24:40,840

He's concerned, you know, with the scout master, he questions there.

271

00:24:40,840 --> 00:24:42,840

What burned that grass underneath there?

272

00:24:42,840 --> 00:24:44,840

The grass all right and the roots are all burned down.

273

00:24:44,840 --> 00:24:46,840

And there are electrical chips.

274

00:24:46,840 --> 00:24:50,840

He questioned that right the last time from the scout master.

275

00:24:50,840 --> 00:24:57,840

Mr. Clarkson, I didn't do justice to your earlier question regarding the film.

276

00:24:57,840 --> 00:25:00,840

I did have some questions I was trying to work my way around.

277

00:25:00,840 --> 00:25:02,840

Please do now, sir.

278

00:25:02,840 --> 00:25:04,840

I'll have a couple of moments.

279

00:25:04,840 --> 00:25:11,840

Mr. Ransky, could you estimate how fast you think this object was traveling that way?

280

00:25:11,840 --> 00:25:13,840

This object that we saw?

281

00:25:13,840 --> 00:25:19,840

I would say at least 15,000 miles per hour, I would say, according to the way it's moving, although it made me much faster.

282

00:25:19,840 --> 00:25:21,840

Well, within our Earth's atmosphere, you think that's right?

283

00:25:21,840 --> 00:25:22,840

That's right.

284

00:25:22,840 --> 00:25:27,840

And at Earth's atmosphere, I would say, is the height and the distance basis is to be judged.

285

00:25:27,840 --> 00:25:30,840

Not correct because you wouldn't dare to measure it exactly.

286

00:25:30,840 --> 00:25:35,840

But I would say that it probably was at 5,000 to 10,000 feet.

287

00:25:35,840 --> 00:25:38,840

Well, here's something that bothers me.

288

00:25:38,840 --> 00:25:42,840

To the best of our knowledge today, you can't move an object at supersonic speed.

289

00:25:42,840 --> 00:25:48,840

This is supersonic speed we're talking about through the atmosphere without getting a sonic boom.

290

00:25:48,840 --> 00:25:51,840

Now, how do you calculate that?

291

00:25:51,840 --> 00:25:58,840

It's hard to tell whether this object produced a sonic boom or it didn't because when I saw it, it

was already moving and entered our atmosphere.

292

00:25:58,840 --> 00:26:01,840

The sonic boom would have been gone and then that territory, there's got...

293

00:26:01,840 --> 00:26:04,840

No, the sonic boom stays with an object as it moves.

294

00:26:04,840 --> 00:26:10,840

No, no, no, no. It doesn't stay because I've seen it on myself, our own jets break my sonic...

295

00:26:10,840 --> 00:26:12,840

In that territory, this can't handle them.

296

00:26:12,840 --> 00:26:14,840

Almost every day you've got it.

297

00:26:14,840 --> 00:26:19,840

They break the sonic boom and then they go on and you watch them and it would disappear, no more sound.

298

00:26:19,840 --> 00:26:27,840

Now, the sonic boom is when the particular shock wave traveling out from the outside, I know, has to be by where you happen to be standing.

299

00:26:27,840 --> 00:26:31,840

Well, gentlemen, I'm sorry, I must interrupt. Time has run out.

300

00:26:31,840 --> 00:26:35,840

I don't think we'll resolve the question of whether there's such a thing as flying saucers or not.

301

00:26:35,840 --> 00:26:39,840

We'll have to leave that up to the audience. We'll be back in just a moment.

302

00:26:39,840 --> 00:26:43,840

We would like to thank our guests for being with us tonight for this most interesting discussion.

303

00:26:43,840 --> 00:26:49,840

Our thanks to George Adamski, expert on flying saucers from Vista, California.

304

00:26:49,840 --> 00:26:54,840

Dr. Norman L. Trott, president of Wesley Theological Seminary.

305

00:26:54,840 --> 00:26:59,840

Dr. Mark Harrison, chairman of the physics department at American University.

306

00:26:59,840 --> 00:27:04,840

Dr. B. L. Clark, astronomer at the U.S. Naval Observatory.

307

00:27:04,840 --> 00:27:11,840

We hope you will be with us again when Community Dialogue discusses another topic of interest to Washington area.

308

00:27:11,840 --> 00:27:14,840

This is Harry Clarkson. Good night.

309

00:27:24,840 --> 00:27:27,840

Thank you.
