

1

00:00:00,000 --> 00:00:25,280

This evening, ladies and gentlemen, we are privileged to hear a discourse on the outstanding

2

00:00:25,280 --> 00:00:32,720

mystery of the 20th century. The subject is interplanetary spacecraft. The being who brings

3

00:00:32,720 --> 00:00:38,800

this enlightening information to you by means of sense of the name is Klaala, the one who

4

00:00:38,800 --> 00:00:49,520

so clearly described as the great pyramid on the last broadcast. Again, we are honored to

5

00:00:49,520 --> 00:01:11,440

present to you Klaala. Greetings in the light of our radiant one. I am Klaala. It has been observed

6

00:01:11,840 --> 00:01:18,080

that your people have many questions regarding those of our craft,

7

00:01:18,960 --> 00:01:29,440

seeing within your atmosphere, and those that it has been rumored exist. Let me mention my brother,

8

00:01:30,880 --> 00:01:39,760

that in the immediate vicinity of your planet, there are at the moment approximately 10 million

9

00:01:39,760 --> 00:01:48,960

of our spacecraft. Those available in this solar system would raise this figure significantly.

10

00:01:50,800 --> 00:01:57,280

In the galaxy, the figure would approach close to 200 million.

11

00:01:59,680 --> 00:02:06,560

The question must arise in your mind, out to the purposes involving so many crafts,

12

00:02:07,440 --> 00:02:18,080

and this I will attempt to elaborate upon. We of the confederation utilize various forms

13

00:02:18,080 --> 00:02:26,000

of spacecraft for many different missions and employment. We have types devoted entirely

14

00:02:26,640 --> 00:02:33,680

to survey and patrol work. We have those which are definitely concerned with construction,

15

00:02:33,840 --> 00:02:42,160

those for scientific purposes, and those for the transport of personnel and the housing of

16

00:02:42,160 --> 00:02:51,120

communications equipment. We have many millions of craft employed exclusively for the people who reside

17

00:02:51,120 --> 00:03:00,080

on various planets to carry out their daily activities, and these crafts are maintained

18

00:03:00,880 --> 00:03:09,360

by the confederation. The individuals concerned neither own them nor perform any type of,

19

00:03:09,360 --> 00:03:17,280

or you would say, maintenance upon them. They are plowed at the individual disposal

20

00:03:18,160 --> 00:03:26,960

in the times of birth until they expire. They are there to do as they wish.

21

00:03:27,200 --> 00:03:36,320

Let us examine first that type of craft so prevalent in your illustration.

22

00:03:38,400 --> 00:03:43,520

This is the craft shown having three propellances emerging from the bottom.

23

00:03:45,200 --> 00:03:51,840

These crafts, my brothers, are primarily intended for planetary survey work

24

00:03:51,840 --> 00:03:58,480

and very light gathering of supplies and transport of small groups of persons.

25

00:03:59,840 --> 00:04:06,720

They are not capable of complete interplanetary flight upon their own. For the crossing of any

26

00:04:06,720 --> 00:04:14,560

planet's magnetic field, they are transported within a larger vehicle such as a mothership.

27

00:04:15,040 --> 00:04:22,880

They can function only within a planetary body's own magnetic field. For this purpose,

28

00:04:22,880 --> 00:04:32,560

they serve automatically. Now let us examine those which were responsible for the fewer we have

29

00:04:32,560 --> 00:04:42,000

inspired of recent. Those which your Kenneth Arnold discovered while flying his craft in the

30

00:04:42,000 --> 00:04:52,320

vicinity known to you as Mount Rainier, Washington. These, the crescent shaped craft, have a definite

31

00:04:52,320 --> 00:05:01,680

mission. Their first and primary mission is the charting of those areas known as magnetic anomalies

32

00:05:02,240 --> 00:05:11,280

and fault zones upon your planet and other planets. They are actually mapping crafts of a very

33

00:05:11,280 --> 00:05:21,760

special nature. Now let us continue and examine that which is known as the triangular shaped craft

34

00:05:22,640 --> 00:05:32,080

as seen in the area known as your Rocky Mountain. These craft, my brothers, belong to the confederations

35

00:05:33,040 --> 00:05:39,360

and are extremely interesting. Their main purpose is to monitor the thought patterns

36

00:05:40,160 --> 00:05:46,320

and reactions of the people of any planet they are sent to survey.

37

00:05:49,600 --> 00:05:56,640

I now discuss that shape known as spirit. This type of craft is employed primarily

38

00:05:57,600 --> 00:06:05,520

from that known as a mothership and is used for a scientific study or the gathering of stuff.

39

00:06:06,080 --> 00:06:15,280

They handle a great deal of cargo. They are operated by remote control from a mothership.

40

00:06:17,120 --> 00:06:23,280

These crafts can also be used for the transport of individuals or small groups.

41

00:06:25,200 --> 00:06:32,320

Let us move on and examine still another type, the long cylindrical shaped craft commonly called

42

00:06:32,320 --> 00:06:41,040

by your people the mothership. The length of such a ship employed by our confederations

43

00:06:41,920 --> 00:06:50,560

is over 10 miles as figured by your terminology. They are capable of housing approximately three to

44

00:06:50,640 --> 00:07:02,880

500 of the first type craft we examined. They carry a crew of from anywhere from 1500 to 2000

45

00:07:02,880 --> 00:07:12,000

occupants. They can remain in space removed from any planetary system for a period of 10 of your

46

00:07:12,000 --> 00:07:22,160

years and be entirely self-sufficient. They are capable of interplanetary travel on a limited basis

47

00:07:23,120 --> 00:07:32,880

and can reach some of the closer star systems to your solar system. We refer to these crafts as our

48

00:07:32,880 --> 00:07:43,440

primary transportation. They are equipped to travel at speeds in excess of light. However,

49

00:07:43,440 --> 00:07:49,440

whenever these crafts are operated within several parsecs of any planetary body,

50

00:07:50,320 --> 00:07:59,760

their speed is reduced for obvious reasons. Let us examine one type of craft capable of

51

00:08:00,320 --> 00:08:06,560

covering interstellar distances. This type of craft is very similar to

52

00:08:07,360 --> 00:08:13,600

that first described except that it has a perfectly flat surface of planet's bottom.

53

00:08:15,120 --> 00:08:22,560

This type of craft is used by a very special core of our people engaged upon missions of great

54

00:08:22,560 --> 00:08:29,200

importance. These crafts are under the direct control of a local solar tribunal.

55

00:08:30,320 --> 00:08:37,600

Their primary purpose is that of scientific nature. They carry controls and types of

56

00:08:37,600 --> 00:08:46,880

instrumentation unusual aboard even most of our craft. There have also been craft

57

00:08:46,880 --> 00:08:54,560

witnessed in your atmosphere that have often been mistaken for meteors. The color is that of

58

00:08:54,560 --> 00:09:02,720

your color green. These, my brothers, are ships with only one purpose, that of neutralizing

59

00:09:03,280 --> 00:09:11,520

dangerous amounts of radioactivity in your atmosphere. They travel about your planet absorbing

60

00:09:11,520 --> 00:09:19,280

and completely neutralizing radioactivity. Upon completion of their mission, they are diffused

61

00:09:19,360 --> 00:09:25,200

into atomic size and are, as you would say, expendable.

62

00:09:28,080 --> 00:09:36,080

Let me bring to your attention at this time two types of crafts seen only once in your planet's

63

00:09:36,080 --> 00:09:44,160

history. The first type to be mentioned is that known to your people as a five-pointed

64

00:09:44,160 --> 00:09:56,000

geometric design called a star. As you all know, this configuration bears no resemblance to any

65

00:09:56,000 --> 00:10:03,520

heavenly object and just its symbology to your people has been extremely significant.

66

00:10:05,600 --> 00:10:12,800

On one occasion, its purpose in lighting your evening sky led to the discovery of a newborn babe

67

00:10:13,520 --> 00:10:21,680

cradled in a manger, the effects of which have been felt through many ages upon your planet's surface.

68

00:10:23,760 --> 00:10:29,920

Needless to say, these crafts are witnessed only on extremely special occasions.

69

00:10:31,120 --> 00:10:37,520

This perhaps would explain a rather intriguing mystery present to many of your people and will

70

00:10:37,520 --> 00:10:46,000

no doubt provoke that similar to those we wish to have provoked. Now let us examine the other.

71

00:10:47,840 --> 00:10:53,760

This type of craft, my brothers, is along the geometrical form you know of as a square.

72

00:10:55,120 --> 00:11:02,880

It is a cubular shaped craft of a size approximately 1500 miles in length and breadth and depth.

73

00:11:03,120 --> 00:11:17,760

And they're called the cities of Shang. This craft and six more, once touched upon the surface of your

74

00:11:17,760 --> 00:11:25,520

planet for evacuation purposes. They are what you would call miniature worlds within themselves,

75

00:11:26,240 --> 00:11:36,000

complete civilizations intact. Each of these crafts or cities can provide for and satisfy the

76

00:11:36,000 --> 00:11:44,800

demands of approximately 10,000 individuals and is used as a transport for carrying these

77

00:11:44,800 --> 00:11:52,960

individuals to other areas of space for definite reasons. This type of craft has been recorded

78

00:11:53,040 --> 00:12:02,000

in your history. It is described in interesting detail in one of your holy writings. The description

79

00:12:02,000 --> 00:12:10,080

is quite adequate. I believe, my brothers, that we have touched upon this subject with enough

80

00:12:10,080 --> 00:12:18,400

detail at present to satisfy many questions concerning our type of craft. To carry it further

81

00:12:19,360 --> 00:12:25,760

would perhaps prove interesting to some. But for the majority whom this little talk has been

82

00:12:25,760 --> 00:12:33,600

presented for, I believe I will heed the advice of one upon your planet who once quoted that a

83

00:12:33,600 --> 00:12:41,760

topic to be presented and enjoyed should be brief. It has been my privilege to speak.

84

00:12:42,720 --> 00:12:46,720

I'll do it, my brothers. I am Kuala.

85

00:12:58,320 --> 00:13:04,640

Thank you, Kuala. Your discussion on this mysterious subject answered many questions.

86

00:13:04,640 --> 00:13:13,600

This address was transmitted by tensor B.

87

00:13:34,640 --> 00:13:41,600

I am Kuala.

88

00:13:54,160 --> 00:14:01,040

Galaxy, the program unique portraying information and events that may affect the lives of all

89

00:14:01,040 --> 00:14:04,000

people, even you.

90

00:14:16,880 --> 00:14:24,560

Ladies and gentlemen, we are indeed privileged to speak with you again. Galaxy now presents the

91

00:14:24,560 --> 00:14:32,640

topic, methods of interplanetary and spaceship communication. The many methods of communication

92

00:14:32,640 --> 00:14:39,040

discussed at this time make one appreciate the advanced technology of our space friends.

93

00:14:40,080 --> 00:14:47,520

On this occasion, we have an unusual experience for you, our audience. This presentation takes the

94

00:14:47,520 --> 00:14:54,240

form of questions and answers wherein several different persons have the opportunity to present

95

00:14:54,240 --> 00:15:05,200

questions to a friend from another planet.

96

00:15:15,520 --> 00:15:21,520

Ladies and gentlemen, I am honored to present to you the listening audience the voice of

97

00:15:21,520 --> 00:15:32,480

Monca, an inhabitant of the planet Mars. Greetings, people of Earth. I am Monca.

98

00:15:34,560 --> 00:15:41,600

It is indeed my privilege to address all of you at this time.

99

00:15:41,680 --> 00:15:50,640

I have confronted several questions presented by your people.

100

00:15:53,600 --> 00:15:54,880

You may proceed.

101

00:15:57,600 --> 00:16:08,080

Monca, any people have inquired about the ways you people have found to communicate with the people

102

00:16:08,080 --> 00:16:15,360

of Earth? Do you care to enumerate the ways or some of the ways in which this is done?

103

00:16:17,760 --> 00:16:24,320

Regarding the various methods we have of communicating with your people,

104

00:16:26,000 --> 00:16:34,960

we face a number of unique problems. Let us say that the determining factor,

105

00:16:35,920 --> 00:16:42,960

first of all, in any communication is the method of reception employed.

106

00:16:45,440 --> 00:16:53,200

In reception, we have the methods of impressing upon the minds of various individuals,

107

00:16:54,480 --> 00:17:00,080

through both mechanical and what your people would call electronic means

108

00:17:00,160 --> 00:17:07,680

by the employment of certain fields of force that may be beamed or, shall we say,

109

00:17:08,400 --> 00:17:21,360

aimed in various directions to cover either large or small areas of certain fields of force

110

00:17:22,240 --> 00:17:34,640

that may be beamed or, shall we say, aimed in various directions

111

00:17:38,240 --> 00:17:42,640

to cover either large or small areas.

112

00:17:43,280 --> 00:17:49,920

By using these beams, we may transmit data or information.

113

00:17:51,920 --> 00:17:57,360

This information may be converted through the type of receiver you use.

114

00:17:58,640 --> 00:18:06,320

Let us say in the case of one who is adept and that which is known to your people

115

00:18:07,280 --> 00:18:14,960

as impressed writing, that the mind of the individual so employed as a receiver

116

00:18:15,760 --> 00:18:22,800

is conditioned by a choice or by the impression of an external field.

117

00:18:24,400 --> 00:18:34,000

The mind then unconsciously directs and controls the necessary muscular reactions

118

00:18:34,640 --> 00:18:46,000

to form the style of penmanship and also the characters, to form the words in the language used.

119

00:18:48,000 --> 00:18:58,800

In this manner, a complete communication may be delivered while the individual is used as such a receiver.

120

00:18:58,960 --> 00:19:10,080

In the next instance where the reception known as radio is employed,

121

00:19:12,080 --> 00:19:20,640

the communication may be delivered either directly from one of our large communication centers

122

00:19:21,600 --> 00:19:29,440

on the planet or through the relaying facilities of one of our spacecraft,

123

00:19:29,920 --> 00:19:37,280

which in turn is broadcast upon waves, electromagnetic and nature.

124

00:19:38,320 --> 00:19:46,240

These waves are then received by your ordinary means of radio communication.

125

00:19:46,800 --> 00:20:00,800

We can beam this type of reception to either a large area or it may be confined to very narrow limits.

126

00:20:02,800 --> 00:20:12,640

Another type of communication involves that known as the impressing of information

127

00:20:13,600 --> 00:20:19,040

upon what your people refer to as a beam of light.

128

00:20:20,960 --> 00:20:30,320

In this instance, there are certain types of material that display qualities that are sensitive

129

00:20:30,320 --> 00:20:34,880

to the light vibration known as infrared.

130

00:20:35,120 --> 00:20:50,160

A special receiver already known by your people is capable of receiving pulsations of infrared light

131

00:20:50,160 --> 00:20:53,120

and converting them into audible sounds.

132

00:20:53,680 --> 00:21:03,840

It may be scarfed out by some, but infrared rays of light are capable of spanning

133

00:21:03,840 --> 00:21:12,320

much greater distances than any form of communication known upon your planet.

134

00:21:12,480 --> 00:21:22,560

We have for a great period of time used this as one method and a permanent network

135

00:21:23,440 --> 00:21:34,560

of intergalactic communications. Perhaps one of the most interesting methods of communication used by us

136

00:21:34,960 --> 00:21:43,920

is that known in our terminology as a tensor beam.

137

00:21:45,680 --> 00:21:53,920

In this instance, a cone shaped field of magnetic radiation of a wavelength

138

00:21:53,920 --> 00:22:03,040

unknown to your present technology is projected by either a craft in your immediate vicinity

139

00:22:04,000 --> 00:22:08,480

or directly from one of our larger communication centers.

140

00:22:10,480 --> 00:22:18,400

This, which is called the tensor beam, consists of three types of magnetic phenomena

141

00:22:19,120 --> 00:22:25,440

occurring simultaneously. Let us call them for the sake of illustration,

142

00:22:25,840 --> 00:22:34,640

a core surrounded by two concentric tubular layers of magnetic substance.

143

00:22:37,200 --> 00:22:46,160

The central core is a type of magnetic radiation, two inches in diameter,

144

00:22:48,080 --> 00:22:53,600

which when projected acts on the brain of the receiving person.

145

00:22:55,840 --> 00:23:03,520

The inner tubular layer controls the immediate physical environment of the receiving person

146

00:23:04,640 --> 00:23:14,320

and extends exactly four inches beyond the area of the body of the person engaged and reception.

147

00:23:16,480 --> 00:23:22,720

The outer tubular layer contains what we call the return circuit.

148

00:23:23,520 --> 00:23:35,520

This picks up the emanations from the minds of the individual's present about the receiving person.

149

00:23:35,520 --> 00:23:44,000

This layer serves as a carrier for returning their thoughts to our monitors.

150

00:23:44,720 --> 00:23:54,480

Monka, how are you able to express yourself in so many different languages?

151

00:23:54,480 --> 00:24:05,280

For your further information, we have at our disposal a device which does not rely upon

152

00:24:05,280 --> 00:24:12,640

vocal translation of our language into yours, although it can be so implied.

153

00:24:14,000 --> 00:24:22,480

The method used consists of a suitable field of induction which picks up our thoughts directly.

154

00:24:24,560 --> 00:24:31,840

It then converts them into impulses suitable for transmission by tensor beam,

155

00:24:32,320 --> 00:24:40,960

which in turn are interpreted and acted upon by the mind of the receiving person.

156

00:24:44,160 --> 00:24:54,880

This device, which we call the edifon, is the machine used to translate our thoughts

157

00:24:55,680 --> 00:24:58,880

into impulses suitable for transmission.

158

00:24:59,120 --> 00:25:09,760

The translation into your language in the case of tensor beam is accomplished through the mind

159

00:25:10,480 --> 00:25:21,360

of the receiver. I might mention that the effects of tensor beam communication upon an individual

160

00:25:21,440 --> 00:25:32,240

result in several interesting factors. One factor in our communication is the sometimes

161

00:25:32,240 --> 00:25:40,640

limiting effect imposed by the scope of the receiving person's vocabulary.

162

00:25:41,600 --> 00:25:52,480

However, often entirely new concepts are implanted upon the mind of the receiving person.

163

00:25:54,640 --> 00:26:03,680

This is dependent on the degree to which the receiver is in tune with the transmitting station.

164

00:26:03,920 --> 00:26:15,760

A mechanical vocalator is used where radio or light beam is the communication method implied.

165

00:26:17,440 --> 00:26:29,280

Let us explain that the mechanical vocalator is a device which converts thoughts into our expression.

166

00:26:29,280 --> 00:26:39,920

Ronco, have your people on any occasion used the medium of a telephone for communication purposes?

167

00:26:41,440 --> 00:26:50,720

In answer to your question, this medium of communication can be utilized upon occasions.

168

00:26:51,680 --> 00:27:02,160

However, we do not favor this method. When it is so implied, the mechanics needed could result

169

00:27:02,800 --> 00:27:10,320

either in the failure of the circuits involved in the communication or in some instances

170

00:27:11,280 --> 00:27:14,560

replacement of your equipment.

171

00:27:19,440 --> 00:27:26,560

Thank you, Ronco. This enlightening communication imposed refreshing and informative.

172

00:27:27,120 --> 00:27:45,120

Ladies and gentlemen, you have just heard a recorded communication with Monica of the planet Mars.

173

00:27:46,080 --> 00:27:52,160

The questions were prepared by the staff of Galaxy for submission to Monica, our space friends.

174

00:27:53,120 --> 00:27:59,840

The questions and answers transmitted and received on this program were exchanged by Tenser B.

175

00:28:03,920 --> 00:28:08,720

This address was transmitted by Tenser B.

176

00:28:22,160 --> 00:28:28,720

In short, Tenser B can capture mobile acceptance information.

177

00:28:30,460 --> 00:28:38,660

We hope that these experiences can be solved in an opportunity that has touched 42 million children.

178

00:28:41,940 --> 00:28:47,200

After this, the energy from the planet is measured for a label of the planet's magnetic networks.

179

00:28:47,200 --> 00:28:55,200

the program unique for carrying information and events that may affect the lives of all people, even you.

180

00:29:07,200 --> 00:29:13,200

It is again our privilege, ladies and gentlemen, to present GAOXA.

181

00:29:13,200 --> 00:29:20,200

On this occasion, we find our thoughts facing a most interesting situation.

182

00:29:20,200 --> 00:29:31,200

We have been able to arrange an interview and verbal tour to one of the largest communication control centers in our solar system.

183

00:29:31,200 --> 00:29:44,200

We are privileged to have a brother from space who is known by the title of Soul Tech to guide us upon our verbal tour as well as answer many of our questions.

184

00:29:44,200 --> 00:29:54,200

Explanations of how communications are handled upon a level far beyond our understanding will be shown to us.

185

00:30:01,200 --> 00:30:07,200

Music

186

00:30:08,200 --> 00:30:15,200

Good evening, Soul Tech. We are indeed honored by having you conduct us on this visit.

187

00:30:15,200 --> 00:30:31,200

Greetings, people of Earth. It is my privilege to be with you this your evening for the little excursion to our communications center upon the planet Mars.

188

00:30:31,200 --> 00:30:40,200

I am afraid this must be accomplished in your imaginations for the moment.

189

00:30:41,200 --> 00:30:48,200

But can you visualize our entering a large dome structure?

190

00:30:48,200 --> 00:30:57,200

This structure covers an area approximately one mile square by your measurements.

191

00:30:57,200 --> 00:31:04,200

It stands approximately 275 feet tall.

192

00:31:05,200 --> 00:31:28,200

We believe on entering the structure that you will first be amazed and then confounded by the sight which your eyes behold and the fact that tear upon tear of communications equipment is present.

193

00:31:28,200 --> 00:31:37,200

Brothers, I am sure there are many questions in your mind at this point.

194

00:31:37,200 --> 00:31:45,200

Soul Tech, will you kindly explain the use of this equipment?

195

00:31:46,200 --> 00:31:59,200

At this level, my good brother of Earth, we have communications which link all of the inhabited planets of our solar system.

196

00:31:59,200 --> 00:32:14,200

Here we find dispatch centers capable of contacting all manner of craft employed by our peoples in all their regular duties and missions.

197

00:32:14,200 --> 00:32:26,200

Upon the second tear we view, we find the apparatus necessary to conduct communications of galactic nature.

198

00:32:26,200 --> 00:32:36,200

These communications do not operate over the mechanisms presently thought of and envisioned by your people.

199

00:32:36,200 --> 00:32:51,200

Had you been afforded a view of the top of this structure, you would have noticed large cube shaped structures with a type of cross hatch pattern.

200

00:32:51,200 --> 00:32:57,200

This structure emits a beam of almost invisible light.

201

00:32:57,200 --> 00:33:16,200

The very nature of this light enables us to communicate at speeds once the beam has left a planetary environment to what is commonly termed in your language the speed of light.

202

00:33:16,200 --> 00:33:23,200

Soul Tech, how long have your people been in contact with the planet Earth?

203

00:33:23,200 --> 00:33:39,200

During the last 7,000 of your years, survey craft from the galaxy have visited your planet at regular intervals.

204

00:33:39,200 --> 00:33:59,200

Our increased surveillance of your people occurred when our instruments first recorded and detected the evidence that you had finally arrived at an atomic based culture.

205

00:33:59,200 --> 00:34:12,200

At that time, several meetings were held by our people to discuss the potentialities involved in an early contact with your people.

206

00:34:12,200 --> 00:34:23,200

Our people, in forms which resemble yours very closely, were landed by our craft upon your planet.

207

00:34:23,200 --> 00:34:31,200

They were given that period of one of your years to mingle with your races.

208

00:34:31,200 --> 00:34:39,200

They were then to report back on the cultural and evolutionary states found.

209

00:34:39,200 --> 00:34:48,200

At the end of this period, these are people who were removed from your planet.

210

00:34:48,200 --> 00:34:57,200

The conclusion of our test was that the people upon your planet were not yet ready.

211

00:34:57,200 --> 00:35:06,200

Soul Tech, from your viewpoint, what has transpired in, let us say, the last 10 years?

212

00:35:07,200 --> 00:35:17,200

In your year of 1947, our craft increasing numbers were cited more often by your people.

213

00:35:17,200 --> 00:35:33,200

It was suggested to all of our people that excursions to the planet Earth were to be confined to flights of scientific or cultural objectives.

214

00:35:34,200 --> 00:35:45,200

Prior to this, great numbers of our people had paid your planet a visit and examined it for themselves.

215

00:35:45,200 --> 00:36:02,200

Our survey craft recorded innumerable impressions, received on frequencies known by our people to be emitted from the human mind.

216

00:36:04,200 --> 00:36:10,200

The thought was a belief in our presence.

217

00:36:10,200 --> 00:36:22,200

Immediately, councils were called and this new and startling information was again digested.

218

00:36:23,200 --> 00:36:35,200

And the decision arrived at was to permit certain of our craft to contact large segments of your people.

219

00:36:35,200 --> 00:36:42,200

Individuals from all walks of life were to be approached and questioned.

220

00:36:42,200 --> 00:36:48,200

If the occasion warranted, they were to be admitted aboard our craft.

221

00:36:48,200 --> 00:36:53,200

Some even taken upon short excursions.

222

00:36:53,200 --> 00:37:02,200

This procedure was followed for the next five of your years.

223

00:37:02,200 --> 00:37:17,200

The laws administered by various bodies of our people have stated that we shall be privileged to communicate with your people as often as desired.

224

00:37:17,200 --> 00:37:26,200

As the occasions arise, your people will be continually contacted by our survey craft.

225

00:37:26,200 --> 00:37:35,200

In the last seven of your years, this latest directive has been followed.

226

00:37:35,200 --> 00:37:53,200

When races of people start to consider the rights and the individual freedoms of first their nation, then their racial groups, and finally and lastly,

227

00:37:54,200 --> 00:38:11,200

the inviolable right of the individual to live life as it has been created, these people are then ready to receive our presence.

228

00:38:12,200 --> 00:38:26,200

To do so, ahead of this schedule would bring pain, not only to yourselves, but to us also.

229

00:38:26,200 --> 00:38:40,200

Pain not physical, rather mental, because truth, my brothers, is often painful.

230

00:38:40,200 --> 00:38:50,200

So Tech, does this architecture portray some of your philosophical concepts?

231

00:38:50,200 --> 00:38:58,200

In examining the foyer of this communication center upon the planet Mars,

232

00:38:58,200 --> 00:39:10,200

you, my brother, have merely witnessed one of the outstanding accomplishments of this world.

233

00:39:10,200 --> 00:39:20,200

In our conversation, you have noticed that I disposed of the communication aspect rather quickly.

234

00:39:20,200 --> 00:39:28,200

You will also notice that even your questions were guided into new channels of thought.

235

00:39:28,200 --> 00:39:43,200

It is our purpose to see if the people upon your planet, once their initial curiosity has satiated, will continue to think.

236

00:39:44,200 --> 00:39:56,200

Unfortunately, we have seen great masses of your people become enslaved by those who would do their thinking for them.

237

00:39:56,200 --> 00:40:12,200

It is painful for us to witness great and proud nations and people fall upon their knees before the presence of what is termed in your language a sovereign power.

238

00:40:14,200 --> 00:40:20,200

The greatest triumph of man is his dignity.

239

00:40:20,200 --> 00:40:36,200

The dignity of the individual will be truly appreciated when men upon your surface will acknowledge none as their superior.

240

00:40:37,200 --> 00:40:57,200

When they will realize that all forms of life and creation are truly equal, only upon different levels, also that no particular level is more commensurate with wisdom and intelligence than another.

241

00:40:58,200 --> 00:41:04,200

Thank you, Soul Tech. This discussion, I'm sure, will be long remembered.

242

00:41:05,200 --> 00:41:14,200

I have been greatly appreciative of having been able to escort you upon our little trip.

243

00:41:14,200 --> 00:41:33,200

We shall return now to your planet, the Earth, rotating slowly upon its axis, wrapped in an eternal destiny.

244

00:41:34,200 --> 00:41:40,200

Upon our arrival, what do we find?

245

00:41:40,200 --> 00:41:56,200

We look about and we notice that many years that were deaf at the beginning of this little talk are now listening quite intently.

246

00:41:57,200 --> 00:42:01,200

Stop and analyze the reason.

247

00:42:01,200 --> 00:42:05,200

You are thinking now.

248

00:42:05,200 --> 00:42:14,200

What your thoughts and conclusions finally arrived at are riddled with no consequence.

249

00:42:14,200 --> 00:42:23,200

My interest has primarily been in seeing to it that you were given an opportunity to exercise your minds.

250

00:42:24,200 --> 00:42:32,200

To you, the people of Earth, lift your heads and turn your eyes towards your heavens.

251

00:42:32,200 --> 00:42:36,200

Now I will depart.

252

00:42:36,200 --> 00:42:40,200

I am known as Soul Tech.

253

00:42:40,200 --> 00:42:45,200

Adonai, my super-archist.

254

00:42:53,200 --> 00:43:19,200

You have been listening to Galaxy, a program unique for trying information which may affect the lives of all people, even you.

255

00:43:23,200 --> 00:43:28,200

I am known as Soul Tech.

256

00:43:28,200 --> 00:43:32,200

Adonai, my super-archist.

257

00:43:32,200 --> 00:43:42,200

You have been listening to Galaxy, a program unique for trying information which may affect the lives of all people, even you.

258

00:43:42,200 --> 00:43:47,200

I am known as Soul Tech.

259

00:43:47,200 --> 00:43:52,200

Adonai, my super-archist.

260

00:43:52,200 --> 00:44:02,200

You have been listening to Galaxy, a program unique for trying information which may affect the lives of all people, even you.

261

00:44:12,200 --> 00:44:35,200

Music

262

00:44:35,200 --> 00:44:46,200

Ladies and gentlemen, it is a privilege indeed to relate to you, our listening audience, this talk, transmitted by Tinsor Bean.

263

00:44:46,200 --> 00:44:54,200

The honorable space being who will address you at this time is the head of government on the planet Mars.

264

00:44:54,200 --> 00:45:16,200

He also serves as the Martian delegate to the Solar Tribunal which convenes on the planet Saturn.

265

00:45:16,200 --> 00:45:23,200

We are honored to present our esteemed friend, Monica.

266

00:45:23,200 --> 00:45:27,200

Greetings people of Earth.

267

00:45:27,200 --> 00:45:31,200

I am Monica.

268

00:45:31,200 --> 00:45:42,200

It is my great privilege at this time to address you who would hear my words.

269

00:45:42,200 --> 00:45:55,200

The topic I would suggest this your evening is one I believe you will find most interesting.

270

00:45:55,200 --> 00:46:07,200

It deals with the planet Earth and its relationship to its neighbors, Solar and Galactic.

271

00:46:07,200 --> 00:46:26,200

In your past, it has been recorded that there have been many instances in which what you call unidentified flying objects have appeared in your sky.

272

00:46:26,200 --> 00:46:53,200

It is interesting to note, people of Earth, that we have been present viewing and observing your planet's evolutionary progress since the time that intelligent life first appeared on your surface.

273

00:46:53,200 --> 00:47:11,200

As you entered what you call your atomic age, it became necessary for us to increase the frequency of our surveillance of your planet.

274

00:47:11,200 --> 00:47:19,200

I can assure you that we have viewed your evolution through many ages.

275

00:47:20,200 --> 00:47:43,200

We immediately were informed by our monitor craft stationed within your planet's atmosphere when your atomic experiments were initiated in your year 1945.

276

00:47:43,200 --> 00:48:07,200

Upon hearing our monitor's broadcast, our survey craft immediately approached your planet to make a new estimate of the potential of your technological development.

277

00:48:08,200 --> 00:48:17,200

Since that year, numerous sightings of our craft have been made in your atmosphere.

278

00:48:17,200 --> 00:48:32,200

One of our interests lies entirely with your technological development in the field of nuclear physics.

279

00:48:33,200 --> 00:48:48,200

Nuclear detonations upon your planet's surface and in its atmosphere have effects recordable upon our planet elsewhere in the solar system.

280

00:48:49,200 --> 00:49:04,200

Whether you choose to experiment with weapons of an atomic nature is of little concern with one exception.

281

00:49:05,200 --> 00:49:26,200

We would be forced to nullify your atomic devices if the frequency of your atomic explosions increased to the point where the inherent stability of your planet is threatened.

282

00:49:27,200 --> 00:49:34,200

Such ability, I assure you exists.

283

00:49:36,200 --> 00:49:51,200

We are concerned about the possible effects that this could bring about in the relationship of other planets near to you in space.

284

00:49:52,200 --> 00:50:12,200

Atomic power, rudimentary as it is in its infant stages that you have discovered is like sting bulls of sand compared to your mightiest mountains.

285

00:50:13,200 --> 00:50:22,200

As yet your science does not know the true meaning of the word power.

286

00:50:24,200 --> 00:50:34,200

The planet Earth occupies a unique position in the solar system of solar.

287

00:50:35,200 --> 00:50:42,200

Its absence would be greatly missed.

288

00:50:42,200 --> 00:50:55,200

Should the annihilation of your entire planet be brought about by thoughtless and unknowing experiments,

289

00:50:55,200 --> 00:51:12,200

it is my sad duty to inform you people of Earth that in your past there existed between the orbit of Mars and Jupiter, a planet very similar to your own.

290

00:51:13,200 --> 00:51:34,200

This planet was destroyed by a nuclear blast brought about accidentally because of a slight miscalculation and the part of a group engaged in what is termed scientific endeavor.

291

00:51:35,200 --> 00:51:52,200

A mistake, one such as any is capable of making, but in this instance one was all that was called for.

292

00:51:53,200 --> 00:51:59,200

The result is what you call the asteroid belt.

293

00:52:00,200 --> 00:52:21,200

Your primary attempts to enter the early fringes of space, namely in attempting to contact the surface of your own satellite, your moon, I can assure you will be secured.

294

00:52:22,200 --> 00:52:43,200

However, should you attempt to progress or send what you term a reconnaissance rocket in the direction of any other planet in this solar system, such a vehicle will not return.

295

00:52:44,200 --> 00:52:58,200

Your science is already aware of sonic barriers, heat barriers, and now the ionized barrier about

your planet.

296

00:52:59,200 --> 00:53:11,200

They have yet to learn of the magnetic barrier existing at the limits of your Earth's magnetic field.

297

00:53:11,200 --> 00:53:18,200

This barrier will explain the disappearance of your craft.

298

00:53:19,200 --> 00:53:30,200

Naturally, since your moon is located within your own planet's magnetic field, you will have no difficulty reaching that body.

299

00:53:30,200 --> 00:53:43,200

Attempt to travel beyond the moon and your magnetic barrier, and I will predict the non-return of any craft.

300

00:53:44,200 --> 00:53:54,200

If you doubt my words, people of Earth, it is very, very simple for you to find out.

301

00:53:56,200 --> 00:54:04,200

Within the next six of your months, attempts will be made to reach your closest neighbors in space.

302

00:54:05,200 --> 00:54:12,200

Remember my words upon hearing the results of these trials.

303

00:54:13,200 --> 00:54:22,200

It is time, people of Earth, that truth becomes a reality to your peoples.

304

00:54:22,200 --> 00:54:31,200

You have had countless years to evolve, socially, culturally, and technically.

305

00:54:32,200 --> 00:54:43,200

You do not have the same amount of time, I'm afraid, to undo all of the mistakes made in your past.

306

00:54:45,200 --> 00:55:00,200

It will be a credit to those of your nations and peoples who come to the realization that there is no substitute for truth and honesty.

307

00:55:01,200 --> 00:55:06,200

You will not, I am afraid, be given an alternative.

308

00:55:07,200 --> 00:55:19,200

Truth and honesty within the next five of your years will become uppermost in the minds of all of your people.

309

00:55:19,200 --> 00:55:22,200

For such is not the case.

310

00:55:23,200 --> 00:55:34,200

It is readily apparent that there will be none of what is termed humanity left in existence upon the face of the planet Earth.

311

00:55:34,200 --> 00:55:46,200

Ardan, should my words be doubted, you have not long to wait.

312

00:55:48,200 --> 00:55:56,200

People of Earth, I, Manca, have delivered this address to you.

313

00:55:57,200 --> 00:56:07,200

In the hopes that there will be some who hear my words, who will heed them.

314

00:56:08,200 --> 00:56:22,200

So that one of the most beautiful planets in the solar system, and one whose civilizations and evolutions

315

00:56:23,200 --> 00:56:31,200

cultured through centuries of time, would not be lost in the near future.

316

00:56:34,200 --> 00:56:47,200

Given the opportunity, I will speak again and attempt to answer a series of questions submitted by your people.

317

00:56:47,200 --> 00:57:02,200

It is my intent and purpose, people of Earth, to see what awaits your immediate actions in the future.

318

00:57:04,200 --> 00:57:15,200

Again, I assure you, we of the Universal Confederation will not interfere.

319

00:57:17,200 --> 00:57:24,200

I am Manca. Adonai Vasu Baragas.

320

00:57:24,200 --> 00:57:53,200

Ladies and gentlemen, you have just heard a recorded communication with Manca of the planet Mars.

321

00:57:54,200 --> 00:57:59,200

This address was transmitted by Tenser-B.

322

00:58:24,200 --> 00:58:46,200

Galaxy, the program you need for crying information and events that may affect the lives of all people, even you.

323

00:58:54,200 --> 00:59:13,200

This evening, ladies and gentlemen, Galaxy presents a talk that is both fascinating and yet serious.

324

00:59:14,200 --> 00:59:25,200

This discourse, like all that have been given on this series of broadcasts, has one main objective. It is to provoke thought.

325

00:59:27,200 --> 00:59:38,200

Our esteemed space friend Manca discusses the planet known throughout our solar system as the Green Emerald, the Planet of Mystery.

326

00:59:43,200 --> 00:59:59,200

We are again privileged to present one who has become very dear to us, our Martian friend Manca.

327

00:59:59,200 --> 01:00:14,200

Greetings and the light of our radiant one. I am Manca.

328

01:00:15,200 --> 01:00:28,200

And speaking at this time, my brothers and sisters, I would speak with you about one of the little known aspects of a certain planet.

329

01:00:29,200 --> 01:00:47,200

In times far removed from this one's present, great forces and energies from sources which in your terminology could be considered divine were exercised upon this mass of substance.

330

01:00:48,200 --> 01:01:03,200

Great stirrings were felt, mighty forces were unleashed, and wave upon wave of awakening consciousness radiation, poured forth from the very ether itself.

331

01:01:04,200 --> 01:01:27,200

And this one new identity and consciousness, its position like many sister planets throughout the universe, was to then evolve through eons of time to a time when its evolution passed beyond the need of its physical existence.

332

01:01:28,200 --> 01:01:38,200

For by this time its purpose would have been served. This planet, my brothers, was located in a typical solar system.

333

01:01:40,200 --> 01:01:49,200

Races from various other sectors of space visited this one and human civilization was enacted.

334

01:01:50,200 --> 01:02:00,200

Through eons of time, man gained ever an awareness. He experienced all manner of this thing called life.

335

01:02:01,200 --> 01:02:09,200

He gained, through ages of total ignorance shall we say, into more enlightened ages.

336

01:02:10,200 --> 01:02:15,200

He discovered the principles of some of the universe's great laws.

337

01:02:16,200 --> 01:02:26,200

Through the sense perceptions available, he began to observe, to correlate data, to make assumptions.

338

01:02:27,200 --> 01:02:37,200

These findings precipitated him into an age of great learning and great enlightenment.

339

01:02:38,200 --> 01:02:51,200

But like most forms of consciousness newly realizing the potentials of great forces, poorly understood, and at his disposal, a blunder occurred.

340

01:02:52,200 --> 01:03:08,200

And man upon this one was cast back or reduced to again a more primitive state, not totally lost in awareness, but shall we say with a portion of his memory removed.

341

01:03:09,200 --> 01:03:24,200

These ones again started building for their futures with a great and mighty ideal still implanted in the intermost core of their being.

342

01:03:25,200 --> 01:03:35,200

Again, progression occurred, and this form of man, now the wiser through the gaining of much experience,

343

01:03:36,200 --> 01:03:42,200

treaded upon the path and again sought the ascending steeps of loftier heights.

344

01:03:43,200 --> 01:03:59,200

Their past ages of gradual awareness and awakening, man again sought for and obtained the essences of that known as the divine.

345

01:03:59,200 --> 01:04:06,200

This time, however, his progress was more carefully planned.

346

01:04:07,200 --> 01:04:15,200

Instead of evolving at utmost speed, his footsteps faulted sometimes along the path.

347

01:04:16,200 --> 01:04:24,200

But nonetheless, his strange were never too far removed from the goal he had envisioned as his future.

348

01:04:25,200 --> 01:04:38,200

At a specified time, a great teacher was sent to these ones to again precipitate them into an awakening experience.

349

01:04:39,200 --> 01:04:49,200

This one, having left his influence and his teachings, left your planet in a way never to be forgotten.

350

01:04:50,200 --> 01:04:57,200

And since this time, progression has occurred at a never accelerating pace.

351

01:04:58,200 --> 01:05:10,200

Now, as this one evolved, again the forms of science, technology, and the evolvement of things considered spiritual took place.

352

01:05:11,200 --> 01:05:16,200

This time, these ones discovered new forms of energy.

353

01:05:17,200 --> 01:05:21,200

They started delving into the very secrets of that called matter.

354

01:05:22,200 --> 01:05:27,200

Soon, they learned the various ways of disassembling matter itself.

355

01:05:28,200 --> 01:05:34,200

Unfortunately, these powers were not always used towards constructive ends.

356

01:05:35,200 --> 01:05:39,200

For even amongst these ones, there were those.

357

01:05:41,200 --> 01:05:53,200

There were those beings from other worlds who quietly stepped into this planet's environment, who sought after positions.

358

01:05:54,200 --> 01:06:02,200

For should evolution and progression again attempt a direction towards that which could be considered detrimental?

359

01:06:03,200 --> 01:06:13,200

These ones could exercise the great knowledge, the great teachings, the great awakenings.

360

01:06:14,200 --> 01:06:19,200

Now, we shall examine for a moment this one's two alternatives.

361

01:06:20,200 --> 01:06:24,200

Let us look first upon a progression considered correct.

362

01:06:25,200 --> 01:06:39,200

The dislook at a planet whose cultures and sciences, whose spiritual achievements reached forward and upwards, whose races knew peace and harmony,

363

01:06:40,200 --> 01:06:56,200

whose people trod the forests and hills, and whoever enjoyed the calm serenity, a pale, azure sky lined with fleecy white clouds,

364

01:06:57,200 --> 01:07:07,200

who listened to the cries of the birds, who enjoyed the delicate fabric of a forest cabinet,

365

01:07:08,200 --> 01:07:20,200

whose eyes surveyed the mighty mountain chains, whose eyes observed rolling waves of grain,

366

01:07:22,200 --> 01:07:29,200

whose eyes observed the mighty rolling and swells of oceans wide.

367

01:07:30,200 --> 01:07:34,200

This, my brothers, is one probability.

368

01:07:35,200 --> 01:07:51,200

One whose very probability could advance mankind in a short period to the learning of such truths that powers not unlike those of the gods would be theirs.

369

01:07:52,200 --> 01:08:00,200

These ones would spiral not only outwards through their neighboring systems to other stellar constellations,

370

01:08:01,200 --> 01:08:11,200

but would even discover the secrets of their own planet's internal core, and learn perhaps the most startling of all information.

371

01:08:12,200 --> 01:08:18,200

This is the probability, leading men in footsteps most desired.

372

01:08:19,200 --> 01:08:23,200

Then, my brothers, there is another probability existent.

373

01:08:24,200 --> 01:08:31,200

One where those forces at man's disposal would be turned towards the creation of havoc and destruction,

374

01:08:32,200 --> 01:08:38,200

where grief and poverty, misery and anguish would be the rewards cast upon humanity.

375

01:08:39,200 --> 01:08:49,200

A humanity which in itself would undergo these experiences for not having faced the realities ever present about them,

376

01:08:50,200 --> 01:08:56,200

whose eyes, instead of accepting that which is true, would be glazed and darned,

377

01:08:57,200 --> 01:09:06,200

whose hearts and minds having been conditioned would accept mere statements or words as flat.

378

01:09:07,200 --> 01:09:14,200

Whose very thoughts of reality were colored by the thoughts of those who told them what to think.

379

01:09:15,200 --> 01:09:20,200

Could not your hearts go out to people so blinded and enslaved,

380

01:09:21,200 --> 01:09:28,200

so comfortable in their wheels and shells of ignorance that they would not have the insight to look about them?

381

01:09:29,200 --> 01:09:31,200

It would be a great pity.

382

01:09:32,200 --> 01:09:40,200

My brothers and sisters, in our many discourses with your peoples,

383

01:09:41,200 --> 01:09:46,200

meanings have been brought forth to your awareness, for your consideration.

384

01:09:47,200 --> 01:09:54,200

They have one purpose only, to cause men upon your planet to think,

385

01:09:55,200 --> 01:10:01,200

to let them see perhaps a glimmer of that elusive thing known as truth.

386

01:10:02,200 --> 01:10:09,200

If on any occasion we have accomplished this, we have accomplished a mighty deed,

387

01:10:10,200 --> 01:10:13,200

for in all my references, my brothers and sisters,

388

01:10:14,200 --> 01:10:18,200

I have been speaking to a planet known through many many stellar systems,

389

01:10:19,200 --> 01:10:22,200

and as I believe most of you are aware,

390

01:10:23,200 --> 01:10:26,200

one known as Earth.

391

01:10:28,200 --> 01:10:32,200

Throughout all of the teachings available to your peoples,

392

01:10:33,200 --> 01:10:41,200

references have been made to great gods, a great being, perhaps people of Earth.

393

01:10:42,200 --> 01:10:45,200

You are about to witness this for yourselves.

394

01:10:45,200 --> 01:10:50,200

I, Monka, have spoken.

395

01:10:51,200 --> 01:10:54,200

May the light of our radiant one be with you,

396

01:10:55,200 --> 01:10:59,200

and may I, most humbly plead,

397

01:11:00,200 --> 01:11:06,200

you awaken before it is again too late.

398

01:11:08,200 --> 01:11:10,200

Other name, my brothers,

399

01:11:11,200 --> 01:11:14,200

may our great ones' radiance be with you.

400

01:11:15,200 --> 01:11:22,200

Our sincere thanks, Monka, for your noble effort to arouse in us

401

01:11:23,200 --> 01:11:26,200

a true appreciation of the planet on which we reside.

402

01:11:45,200 --> 01:11:47,200

Thank you.

403

01:12:15,200 --> 01:12:18,200

you
