

1

00:00:00,000 --> 00:00:10,000

Galaxy, the program you need for training information and events that may affect the lives of all

2

00:00:10,000 --> 00:00:20,000

people, even you.

3

00:00:20,000 --> 00:00:31,000

We intend to launch vehicles capable of leaving the Earth in force and progressing outward into space.

4

00:00:31,000 --> 00:00:36,000

To first, it is understood, our satellite, the Moon.

5

00:00:36,000 --> 00:00:49,000

And then, if our attempts are successful, to the planets within our solar system, such as Venus, Mars, and Jupiter.

6

00:00:50,000 --> 00:01:13,000

Mankind has admitted to the Israeliness to accept the greatest challenge ever presented in the exploration of outer space.

7

00:01:14,000 --> 00:01:23,000

We are informed by our authority that certain types of life exist on many planets within our solar system.

8

00:01:23,000 --> 00:01:31,000

This does not mean, however, that the general thought prevails that human life, such as our own, exists.

9

00:01:31,000 --> 00:01:43,000

The reference is made, primarily, to forms of plant life and certain moles of the bacterial nature.

10

00:01:43,000 --> 00:01:56,000

It has been man's dream since the beginning of time, of engaging into the evening heavens to present those little pinpoints of light sparkling in the vast distance.

11

00:01:56,000 --> 00:02:18,000

Now, in our time, this age-old dream of man appears close to culmination.

12

00:02:18,000 --> 00:02:28,000

What do we expect to find upon our Moon, or upon our journeys to Mars or Venus, who can tell until we finally arrive?

13

00:02:28,000 --> 00:02:41,000

As much as known, certain conditions upon these two planets indicate that perhaps it is possible for some form of human life and intelligence to exist.

14

00:02:41,000 --> 00:02:45,000

And these planetary environments?

15

00:02:45,000 --> 00:03:03,000

Therefore, the members of our first exploratory craft to succeed in reaching these points will no doubt be anxiously awaited upon their return to relay to the people of our world what they have seen and found.

16

00:03:03,000 --> 00:03:19,000

Perhaps what they shall report will be a little or no consequence, and then again perhaps they shall report the presence of intelligent life of human beings identical to ourselves.

17

00:03:19,000 --> 00:03:23,000

What under these circumstances would we do?

18

00:03:23,000 --> 00:03:27,000

All manner of questions come to our minds.

19

00:03:27,000 --> 00:03:29,000

What would these people be like?

20

00:03:29,000 --> 00:03:32,000

Do they consume food the same as we do?

21

00:03:32,000 --> 00:03:35,000

Do they have families and children?

22

00:03:35,000 --> 00:03:39,000

Do they occupy themselves in forms of employment?

23

00:03:39,000 --> 00:03:43,000

Do they have time for leisure?

24

00:03:43,000 --> 00:03:49,000

Do they have any concept whatsoever of what we call religion?

25

00:03:49,000 --> 00:03:54,000

And if so, do they believe in a God such as we?

26

00:04:00,000 --> 00:04:07,000

How many of you have ever stopped and asked these questions of yourself?

27

00:04:07,000 --> 00:04:17,000

What would I do if I were a crew member on board such a craft and these were the conditions we found upon arrival?

28

00:04:17,000 --> 00:04:22,000

How would I react to another form of intelligent life?

29

00:04:23,000 --> 00:04:25,000

How would I react?

30

00:04:25,000 --> 00:04:26,000

Who can tell?

31

00:04:26,000 --> 00:04:31,000

Except those individuals so confronted with such a situation.

32

00:04:31,000 --> 00:04:58,000

This brings to our minds a thought of whether or not we, the inhabitants of the planet Earth, are alone in this infinitely large universe of which we are perhaps merely an insignificant little spot or segment.

33

00:04:59,000 --> 00:05:09,000

We have read upon occasions as our various new services have reported, the strange objects have appeared in our sky.

34

00:05:09,000 --> 00:05:21,000

Sometimes it is true we have mistakenly thought these objects to be a form of intelligence of the operated craft from an inhabited planet, somewhere in space.

35

00:05:21,000 --> 00:05:28,000

Sometimes perhaps we may not have been mistaken.

36

00:05:28,000 --> 00:05:47,000

Due to the sheer enormity and thought of the many accumulated sightings of these strange objects in our skies, not only our government but other governments throughout our world have decided that they are worthy of investigation.

37

00:05:47,000 --> 00:06:09,000

From the year 1947, when a tremendous number of these sightings were made, down to the present, so many of these objects have been observed that no one of a sane and intelligent mind can longer state that there is not something strange existing in the skies above our planet.

38

00:06:10,000 --> 00:06:27,000

It makes no real difference at this moment whether these be intelligently operated space shifts from other planets in our solar system or elsewhere or whether they be some form of perhaps astronomical or meteorological phenomena.

39

00:06:27,000 --> 00:06:35,000

The mere fact remains that something definitely unusual is occurring in our skies.

40

00:06:39,000 --> 00:07:03,000

For a moment, let us consider what the possible implications would be if this were a form of intelligence manning some type of craft capable of traveling the vastness of space and approaching our planet.

41

00:07:03,000 --> 00:07:09,000

What possible reason could be behind such a visit?

42

00:07:09,000 --> 00:07:23,000

At the opening of this program, all of you heard the most awesome and terrifying sound ever to fall upon human ears, the sound of an atomic bomb exploding.

43

00:07:23,000 --> 00:07:35,000

It is well known to our science that each of these explosions release untold millions of radioactively charged particles into our atmosphere.

44

00:07:35,000 --> 00:07:40,000

And who can tell how much farther into space?

45

00:07:40,000 --> 00:07:48,000

Let us assume for an instant that there is intelligence, say, on the planet Mars.

46

00:07:48,000 --> 00:08:10,000

Assume that these intelligents, enrolling the subtle arrival of this strange form of radiation coming from space, from the direction of a neighboring planet, might be curious enough to investigate, such as many of us will sometimes drive around the block to investigate some occurrence which arouses our curiosity.

47

00:08:10,000 --> 00:08:35,000

Might not dispose one explanation of their presence? The presence of the unidentified flying objects, or more commonly, the flying saucers?

48

00:08:35,000 --> 00:08:45,000

It would certainly be indicative to any form of intelligent life that here was a neighboring planet worthy of observation.

49

00:08:45,000 --> 00:08:57,000

It is well known, through our own experience, that many, many hundreds of years of toil, heartbreak, and struggle preceded our entry into the atomic age.

50

00:08:57,000 --> 00:09:10,000

It is true that we do not know at this time all the possible ramifications involved in our use of atomic energy for either constructive or destructive purposes.

51

00:09:11,000 --> 00:09:20,000

We are so much in the position of beaming our way along at our corridor after the sudden discharge of our electric light.

52

00:09:20,000 --> 00:09:27,000

Yet, at the far end of the hallway, through an open door, we detect a glimmer of light.

53

00:09:27,000 --> 00:09:35,000

And so we stumble on, perhaps injuring ourselves and giving vent rather freely to our feelings.

54

00:09:36,000 --> 00:09:40,000

We manage to reach the end of the corridor and the light.

55

00:09:40,000 --> 00:09:51,000

With the opening of this portal and our emergence into the light, we find that once again, we can take a new look at our frightening situation.

56

00:09:51,000 --> 00:09:56,000

We are no longer fumbling. Now we understand.

57

00:09:57,000 --> 00:10:03,000

Perhaps, my friends, we are in that category in our present day.

58

00:10:03,000 --> 00:10:21,000

To the minds of thinking men and women who are the inhabitants of this power planet, would it be too great a shock to comprehend that in the fastest of space there could be other forms of intelligence or life?

59

00:10:22,000 --> 00:10:29,000

It would indeed be equipped to ourselves and our country and our race if we could accept these things.

60

00:10:29,000 --> 00:10:34,000

For someday, friends, this could be a possibility.

61

00:10:34,000 --> 00:10:40,000

We would then have to reenact the drama of the past few minutes in reality.

62

00:10:52,000 --> 00:10:57,000

We have assumed a lot of things in our talk.

63

00:10:57,000 --> 00:11:12,000

The existence of intelligences in our solar system, our universe, the existence of what is commonly known as flying saucers.

64

00:11:12,000 --> 00:11:19,000

Along with many other things, we have assumed that a degree of curiosity is present, not only in ourselves,

65

00:11:19,000 --> 00:11:23,000

but perhaps in the minds of those on other planets.

66

00:11:27,000 --> 00:11:31,000

Let us ponder on these thoughts for the present.

67

00:11:31,000 --> 00:11:46,000

Next week, the galaxy will present the topic, Methods of Interplanetary Communications.

68

00:11:46,000 --> 00:11:52,000

That broadcast will contain information given directly by a space being.

69

00:11:53,000 --> 00:12:00,000

For those interested, may we suggest that you have recording facilities set up to record the program.

70

00:12:04,000 --> 00:12:07,000

I'm Anaya Basu Baragas.

71

00:12:22,000 --> 00:12:47,000

You have sent us into Galaxy, a program unique for trying information which may affect the lives of all people, even you.

72

00:12:52,000 --> 00:12:54,000

Thank you.

73

00:13:22,000 --> 00:13:24,000

Thank you.

74

00:13:53,000 --> 00:14:04,000

This evening, ladies and gentlemen, is a privilege indeed to present one who is new to you, our radio audience.

75

00:14:04,000 --> 00:14:11,000

This great being is in charge of the record archive of this galaxy.

76

00:14:11,000 --> 00:14:19,000

In other words, he is the keeper of the record of all events taking place in our galaxy.

77

00:14:20,000 --> 00:14:23,000

His name is Hatton.

78

00:14:23,000 --> 00:14:29,000

This being resides on the planet by the same name, Hatton.

79

00:14:29,000 --> 00:14:34,000

His talk is titled, Co-Pile of Man.

80

00:14:34,000 --> 00:14:51,000

We are now honored to present to you, Hatton.

81

00:14:51,000 --> 00:14:59,000

Greetings, old children of the light. I am Hatton.

82

00:15:00,000 --> 00:15:16,000

It is my great privilege to speak at this time on a subject which I would like to call, A Profile of Man.

83

00:15:17,000 --> 00:15:31,000

In the beginning of all creation, first came a thought form from our supreme one, or creator.

84

00:15:31,000 --> 00:15:42,000

This form spread through the cosmos and burst with a shining reality into being.

85

00:15:43,000 --> 00:15:51,000

From this came all that is and ever will be.

86

00:15:51,000 --> 00:16:02,000

A thought clothed in love and beauty bearing the essence of all consciousness.

87

00:16:02,000 --> 00:16:17,000

From the beginning of that known as time to that which is understood to be eternity.

88

00:16:17,000 --> 00:16:31,000

This thought manifesting in all planes of vibration, sweeping in ever expanding cycles of consciousness awareness,

89

00:16:31,000 --> 00:16:37,000

permeated the fabric of that known as matter.

90

00:16:37,000 --> 00:16:50,000

And though life had its beginnings, not all consciousness started at the same level of beginning.

91

00:16:50,000 --> 00:17:04,000

Many subdivisions, many groups of a kind, raised its glittering spirals of consciousness upwards and outwards.

92

00:17:04,000 --> 00:17:19,000

In an ever ascending spiral and amidst these various forms of creation, there came that known as man.

93

00:17:19,000 --> 00:17:30,000

Man unenlightened, groping about in a mist, but ever feeling an underlying pulse.

94

00:17:30,000 --> 00:17:43,000

A deep current or surge of that finer thread linking him back through all time and space to his creator.

95

00:17:44,000 --> 00:17:58,000

Man sitting forth, wandering through the mists of eternity, reaching ever upwards and outwards.

96

00:17:58,000 --> 00:18:08,000

And gradually sensing the light permeating all that is about him and reacting to those subtle nuances.

97

00:18:09,000 --> 00:18:21,000

His expressions and experience began to filter into his consciousness.

98

00:18:21,000 --> 00:18:37,000

Throughout all time and all planets, throughout all universes, that which is man is common in thought, in shape, in essence.

99

00:18:39,000 --> 00:18:43,000

A thing of beauty.

100

00:18:43,000 --> 00:18:58,000

And now we see man, traversing the corridors and pathways up through time, evolving and experiencing.

101

00:18:59,000 --> 00:19:14,000

Our creator, in all awareness, gave that part of his creation, known as man, that known as woman.

102

00:19:14,000 --> 00:19:24,000

Woman, the higher intuitive and inspirational counterpart of man, his opposite polarity.

103

00:19:25,000 --> 00:19:31,000

So that expression might evolve on a balanced basis.

104

00:19:31,000 --> 00:19:43,000

One phase feeling the positiveness of masculinity, the other, the heartfulness of femininity.

105

00:19:43,000 --> 00:19:58,000

For like all forms of creation, man must be a balanced creation, growing and experiencing in a way for ordained.

106

00:19:58,000 --> 00:20:08,000

So that in his path, greater events of magnitude may confront him for his observation.

107

00:20:09,000 --> 00:20:21,000

Now let us look upon man in his prison state, in his position upon your planet, the earth.

108

00:20:21,000 --> 00:20:32,000

We see a man who is slightly confused, knowing the touches of great joys and harmonies at one instant,

109

00:20:32,000 --> 00:20:38,000

and of frustration and bitterness at another.

110

00:20:38,000 --> 00:20:48,000

Yet if we look closely, if we look beneath the veneer that his civilization has clothed him in,

111

00:20:48,000 --> 00:20:54,000

if we look within that known as his heart,

112

00:20:54,000 --> 00:21:02,000

we see a tiny silver thread which glows with an ever increasing brilliance.

113

00:21:02,000 --> 00:21:13,000

For man, regardless of his nature, of his outlook, regardless of his beliefs,

114

00:21:13,000 --> 00:21:22,000

can never separate himself from his cosmic destiny.

115

00:21:22,000 --> 00:21:26,000

He may deviate from the path.

116

00:21:26,000 --> 00:21:41,000

He may branch off the path he knows is his, but his journeys are never allowed to stretch too far afield.

117

00:21:41,000 --> 00:21:51,000

There comes a time in every experience of this relationship called life

118

00:21:51,000 --> 00:21:59,000

when this that is called man looks inward.

119

00:21:59,000 --> 00:22:06,000

When he finds dissatisfactions present in his outward environment,

120

00:22:06,000 --> 00:22:18,000

and when he looks within, he cannot help but see that which is cloaking from the outside.

121

00:22:18,000 --> 00:22:28,000

Instead, he sees an essence, a reality that truly is.

122

00:22:28,000 --> 00:22:41,000

He sees beauty and light and grandeur and omnipotence.

123

00:22:41,000 --> 00:22:45,000

And now we look forward.

124

00:22:45,000 --> 00:22:53,000

We look forward to that which man will become in the eons stretching before him.

125

00:22:53,000 --> 00:23:02,000

We see truly a man liberated, experiencing that thing called freedom,

126

00:23:02,000 --> 00:23:11,000

and knowing and awareness with all that is, sensing this thing called love.

127

00:23:11,000 --> 00:23:21,000

His cycles of existence no longer known as life become cycles of being.

128

00:23:21,000 --> 00:23:30,000

He transcends all that is known of physical matter and enters into those regions

129

00:23:30,000 --> 00:23:35,000

known only to those who inhabit them.

130

00:23:35,000 --> 00:23:43,000

And again, he becomes a God within a God.

131

00:23:43,000 --> 00:23:54,000

A thing of majesty, a ray of light, charging his way through interwoven universes,

132

00:23:54,000 --> 00:24:04,000

and bringing his particles to one planet after another.

133

00:24:04,000 --> 00:24:14,000

There, my brothers and sisters, we shall leave this creation called man.

134

00:24:14,000 --> 00:24:20,000

May our infinite ones light be with all of you.

135

00:24:20,000 --> 00:24:27,000

And I have been of some service.

136

00:24:27,000 --> 00:24:34,000

Adonai Vasu Brakas.

137

00:24:34,000 --> 00:24:42,000

I am Atam.

138

00:24:42,000 --> 00:24:49,000

Our humble thanks to you, Atam.

139

00:24:49,000 --> 00:24:56,000

Your thoughts give us a new insight on the great human family.

140

00:24:56,000 --> 00:25:07,000

This address was transmitted by Tenser Bean.

141

00:25:07,000 --> 00:25:12,000

Tenser Bean

142

00:25:12,000 --> 00:25:17,000

Tenser Bean

143

00:25:17,000 --> 00:25:22,000

Tenser Bean

144

00:25:22,000 --> 00:25:27,000

Tenser Bean

145

00:25:27,000 --> 00:25:32,000

Tenser Bean

146

00:25:32,000 --> 00:25:37,000

Tenser Bean

147

00:25:37,000 --> 00:25:41,000

Tenser Bean

148

00:25:41,000 --> 00:25:59,000

Galaxy, the program unique for trying information and events that may affect the lives of all people, even you.

149

00:25:59,000 --> 00:26:09,000

This evening, ladies and gentlemen, we are privileged to hear a talk on one of the oldest mysteries in the memory of man on this planet.

150

00:26:09,000 --> 00:26:18,000

This talk transmitted by Tenser Bean is given by one whose home is outside our solar system.

151

00:26:18,000 --> 00:26:23,000

The subject discussed on this occasion is the Great Pyramid.

152

00:26:23,000 --> 00:26:33,000

The speaker is known as Kla-La.

153

00:26:33,000 --> 00:26:39,000

It is an honor to present at this time, Kla-La.

154

00:26:39,000 --> 00:26:44,000

Greetings and the light of our infinite ones.

155

00:26:44,000 --> 00:26:48,000

I am Kla-La.

156

00:26:48,000 --> 00:26:58,000

In speaking at this time, we deal with the subject of your Great Pyramid.

157

00:26:58,000 --> 00:27:15,000

In the beginning, approximately 45,600 years before your Christ, the galactic survey ships of the Confederation

158

00:27:15,000 --> 00:27:25,000

were to establish an outpost and beacon upon your planet Earth.

159

00:27:25,000 --> 00:27:38,000

The crews from the third planet of Aldebaran approached your planet and started construction

160

00:27:38,000 --> 00:27:47,000

on what is known in your day as your Great Pyramid.

161

00:27:47,000 --> 00:28:02,000

Huge black selfie substance granite were quarried from the heart of a continent and brought by their craft to their present location.

162

00:28:02,000 --> 00:28:14,000

Huge disrays cut and sliced and shaped these blocks to infinite dimensions.

163

00:28:14,000 --> 00:28:30,000

The tribes at this time were frightened, thinking of the crafting of their heavens, remnants of some fable gods descending to the Earth.

164

00:28:31,000 --> 00:28:40,000

And we felt it would not be necessary to discourage this.

165

00:28:40,000 --> 00:28:50,000

In that outpost known as your Great Pyramid were laid generators totaling millions of watts energy,

166

00:28:50,000 --> 00:28:59,000

sending out beams and guideways for our craft, for navigational purposes.

167

00:28:59,000 --> 00:29:07,000

Noticing the tremendous impact that this structure had upon the native populace,

168

00:29:07,000 --> 00:29:15,000

it was felt that some sederary functions could be included.

169

00:29:15,000 --> 00:29:27,000

Also, at that time, it was felt desirable to place observation teams of our people upon your planet

170

00:29:27,000 --> 00:29:39,000

to check the rates of progress of various races, to help in establishing more even distribution.

171

00:29:39,000 --> 00:29:56,000

This is where your scientific circles find evidence of many types of flour and fauna scattered throughout all portions of your globe.

172

00:29:56,000 --> 00:30:07,000

Our people, certain fores and their mighty starships, regularly visited your planet.

173

00:30:07,000 --> 00:30:17,000

Seeing the needs of cultures yet to be born, certain influences were thought to be in order.

174

00:30:17,000 --> 00:30:23,000

These were placed again in the pyramid.

175

00:30:24,000 --> 00:30:35,000

A shaft directly below the subterranean chamber at a level of 243 feet was sank.

176

00:30:35,000 --> 00:30:46,000

And there the mightiest generators of a race, over a million of your years old, were installed,

177

00:30:46,000 --> 00:30:53,000

and which my brothers function even to this day.

178

00:30:53,000 --> 00:30:58,000

These performed two-fold purposes.

179

00:30:58,000 --> 00:31:09,000

One, they helped eliminate an alarming degree of axial excursion present at your north and south poles.

180

00:31:09,000 --> 00:31:18,000

Secondly, they provided more temperate climates throughout many portions of your world,

181

00:31:18,000 --> 00:31:28,000

which were still recovering from a rather staggering day-fuel age.

182

00:31:28,000 --> 00:31:37,000

Much later, one known to your scientists as P.O.P.S. or Q.Q.

183

00:31:37,000 --> 00:31:44,000

puzzling at this spectacle which our pyramid presented,

184

00:31:44,000 --> 00:31:53,000

decided that such a monument should at least be established more in an apparent sense than it was.

185

00:31:53,000 --> 00:31:58,000

Thousands of the native population were set to work,

186

00:31:58,000 --> 00:32:06,000

and slabs and blocks of pure lime were built up around our primary efforts,

187

00:32:06,000 --> 00:32:11,000

providing a more textured surface.

188

00:32:11,000 --> 00:32:18,000

Not knowing what the peculiar metal at that time was at the running of the top,

189

00:32:18,000 --> 00:32:29,000

they decided to let it shine for it, for it could be seen by travelers many miles away.

190

00:32:29,000 --> 00:32:36,000

This is where your ancient Grecian writer thought it to be a fact,

191

00:32:36,000 --> 00:32:46,000

but Q.Q. was the one who erected the pyramid.

192

00:32:46,000 --> 00:32:55,000

Unknown to many people, regular crews of our people manned to the equipment.

193

00:32:55,000 --> 00:33:04,000

For the original intent of that area known as the Queens Chamber

194

00:33:04,000 --> 00:33:10,000

was primarily an interstellar communication room.

195

00:33:10,000 --> 00:33:19,000

The area known as the Queens Chamber was later installed by our people

196

00:33:19,000 --> 00:33:27,000

for healing various physical elements common to your peoples.

197

00:33:27,000 --> 00:33:37,000

Our people, under the guise of their local priests of the time,

198

00:33:37,000 --> 00:33:46,000

had tasted treatments which were thought by many to be miracles.

199

00:33:46,000 --> 00:33:57,000

In this, we found an expedient way of lending some aid where possible.

200

00:33:57,000 --> 00:34:07,000

At all times, the mighty throb of hidden generators below the base of this monument

201

00:34:07,000 --> 00:34:15,000

were continually throwing radiant beams of energy out into the heavens of our universe

202

00:34:15,000 --> 00:34:19,000

to guide our many craft.

203

00:34:19,000 --> 00:34:27,000

Later, eight more pyramids were constructed bringing the turtle to nine,

204

00:34:27,000 --> 00:34:35,000

stretching a distance of 63 miles along the western bank of the Nile.

205

00:34:35,000 --> 00:34:43,000

It has always puzzled your peoples as to the exact dimensions of our pyramid.

206

00:34:43,000 --> 00:34:49,000

I shall now give you the exact dimensions as initially constructed.

207

00:34:49,000 --> 00:35:01,000

If these do not agree today, it is because of alterations of earlier races and farrows to the main structure.

208

00:35:01,000 --> 00:35:09,000

The base of our pyramid was 765 feet square.

209

00:35:09,000 --> 00:35:15,000

The total height was 486 feet.

210

00:35:15,000 --> 00:35:24,000

The entranceway was located exactly 54 feet above the base on the north side

211

00:35:24,000 --> 00:35:33,000

and constructed in such a manner that the light of your pearl star

212

00:35:33,000 --> 00:35:47,000

would forever shine down the entire length of its 324 foot corridor to the subterranean chambers.

213

00:35:47,000 --> 00:35:59,000

Eight feet, my brothers, none of your more infant races could possibly have engineered.

214

00:35:59,000 --> 00:36:07,000

This is also the direction of your two mighty magic world tour.

215

00:36:07,000 --> 00:36:17,000

The reason this was constructed so was to keep the pearl star centered

216

00:36:17,000 --> 00:36:28,000

and thus alleviate any further axial explosions of your planet.

217

00:36:28,000 --> 00:36:33,000

243 feet below the base rests.

218

00:36:33,000 --> 00:36:39,000

We seen here as scientists would forever marvel upon.

219

00:36:39,000 --> 00:36:46,000

The area of our entranceway was 9 square feet,

220

00:36:46,000 --> 00:36:55,000

ending in a subterranean chamber from which another passageway extending 63 feet

221

00:36:55,000 --> 00:37:02,000

ended in a blank wall, blank for a purpose.

222

00:37:02,000 --> 00:37:13,000

For 9 feet farther, we disclosed the subterranean generators.

223

00:37:13,000 --> 00:37:19,000

72 feet above the base in the queen's chamber,

224

00:37:19,000 --> 00:37:29,000

consisting of the 1134 square feet of area and 9 feet again above the queen's chamber,

225

00:37:29,000 --> 00:37:35,000

rests the present communication facilities.

226

00:37:35,000 --> 00:37:47,000

9 feet below the king's chamber, while those machines once installed a higher level.

227

00:37:48,000 --> 00:38:01,000

There are also three more areas unknown to your present science within this structure.

228

00:38:01,000 --> 00:38:09,000

You will notice, my brothers, that of all figures I have mentioned,

229

00:38:09,000 --> 00:38:14,000

there are all multiples of the numeral 9.

230

00:38:14,000 --> 00:38:24,000

The reason for this being, that 9 is the key to the mathematical science dealing with magnetics.

231

00:38:24,000 --> 00:38:31,000

You may bear this in mind.

232

00:38:31,000 --> 00:38:39,000

We welcome you, my brothers.

233

00:38:39,000 --> 00:38:45,000

It has been my privilege to speak.

234

00:38:45,000 --> 00:38:55,000

I am Clara Adonai Vassu Vargas.

235

00:39:09,000 --> 00:39:24,000

Thank you, Clara, for this enlightening discourse on the aged mystery.

236

00:39:24,000 --> 00:39:41,000

The preceding talk was transmitted by tensor B.

237

00:39:41,000 --> 00:39:51,000

Next week, at the same time, a discussion on an equally interesting, but much newer mystery will be presented.

238

00:39:51,000 --> 00:39:56,000

The subject is interplanetary spacecraft.

239

00:39:56,000 --> 00:40:13,000

Again, maybe suggest that you have your recording facilities set up for that occasion.

240

00:40:13,000 --> 00:40:27,000

You have been listening to Galaxy, the program unique for trying information and events that may affect the lives of all people, even you.

241

00:40:27,000 --> 00:40:51,000

Galaxy, the program unique for trying information and events that may affect the lives of all people, even you.

242

00:40:51,000 --> 00:41:00,000

Ladies and gentlemen, we gladly present a discourse given directly to you by another outstanding space being.

243

00:41:00,000 --> 00:41:08,000

This scientist, whose name is Valerian, will discuss a subject about which you will hear much as mine passes.

244

00:41:08,000 --> 00:41:17,000

His subject is magnetics.

245

00:41:17,000 --> 00:41:27,000

Friends of the radio audience, it is an honor indeed to introduce to you at this time Valerian.

246

00:41:27,000 --> 00:41:34,000

Greetings people of Earth. I am Valerian.

247

00:41:34,000 --> 00:41:40,000

It is my great privilege to address all of you at this time.

248

00:41:40,000 --> 00:41:46,000

An extremely interesting and noteworthy subject.

249

00:41:46,000 --> 00:41:52,000

One, it is true that is little known to your people.

250

00:41:52,000 --> 00:41:58,000

The topic of the phenomena of magnetics.

251

00:41:58,000 --> 00:42:03,000

Again, your early education.

252

00:42:03,000 --> 00:42:22,000

You've all been exposed to a concept which states that certain laws are known as to the reactions of magnetic phenomena.

253

00:42:22,000 --> 00:42:30,000

Let's look first of all at the tinniest substance or particle of matter.

254

00:42:30,000 --> 00:42:36,000

What is known in your terminology as an atom.

255

00:42:36,000 --> 00:42:52,000

Whether you would see a central nucleus or, let us call it a core, surrounded by a number of whirling,

256

00:42:52,000 --> 00:43:03,000

electrically charged particles known by various names, electrons and so forth.

257

00:43:03,000 --> 00:43:19,000

In their course about the central pointer core, they are maintained in an exact orbit and at an unvarying speed.

258

00:43:19,000 --> 00:43:23,000

How is this possible?

259

00:43:23,000 --> 00:43:34,000

The forces propel these particles in their circular orbits and maintain a constant speed.

260

00:43:34,000 --> 00:43:42,000

It defies the laws of all of your popular classics of physics.

261

00:43:42,000 --> 00:43:49,000

For the law of friction does not apply.

262

00:43:49,000 --> 00:43:55,000

Where is the friction?

263

00:43:55,000 --> 00:44:01,000

There is none, obviously.

264

00:44:01,000 --> 00:44:12,000

Therefore there must be an air in a certain mode of thinking dealing with this certainly basic science

265

00:44:12,000 --> 00:44:20,000

upon which a great many of your sciences are predicated.

266

00:44:20,000 --> 00:44:25,000

Let us examine it closely.

267

00:44:25,000 --> 00:44:34,000

An atom is very similar in every respect to a solar system,

268

00:44:34,000 --> 00:44:38,000

consisting of a sun as its nucleus.

269

00:44:38,000 --> 00:44:45,000

They plant it in their orbits about it as electrons.

270

00:44:45,000 --> 00:44:51,000

Again, what keeps things going?

271

00:44:51,000 --> 00:44:58,000

No one knows it is true upon your surface.

272

00:44:58,000 --> 00:45:07,000

Let us look at this whole subject in a rather simple way.

273

00:45:07,000 --> 00:45:14,000

We have a core of a definite atomic weight and size,

274

00:45:14,000 --> 00:45:19,000

possessed of certain properties unknown,

275

00:45:19,000 --> 00:45:32,000

which distinctly influence the neighboring particles of electrons or planets whichever way we speak.

276

00:45:32,000 --> 00:45:42,000

This central core does exert an influence for if we remove it, we no longer have an atom.

277

00:45:42,000 --> 00:45:53,000

We have a number of charged particles flying off in all directions through space,

278

00:45:53,000 --> 00:46:03,000

until they arrive at some attractive point, recreate with other elements,

279

00:46:03,000 --> 00:46:12,000

and again form new and more stable particles.

280

00:46:12,000 --> 00:46:29,000

An atom or a solar system, all operating upon one of the littlest known laws of all, the law of magnetics.

281

00:46:29,000 --> 00:46:38,000

All of us know that without magnetism there is no electricity.

282

00:46:38,000 --> 00:46:45,000

Without electricity we have no civilization.

283

00:46:45,000 --> 00:46:51,000

That includes you people of Earth.

284

00:46:51,000 --> 00:47:01,000

What unique property does magnetism have which makes it so distinct?

285

00:47:01,000 --> 00:47:08,000

Think for a moment.

286

00:47:08,000 --> 00:47:15,000

It is a force, a force endowed with a power and a talent,

287

00:47:15,000 --> 00:47:21,000

such as no other force perhaps existing in our universe.

288

00:47:21,000 --> 00:47:23,000

Why is this?

289

00:47:23,000 --> 00:47:26,000

How could it be?

290

00:47:26,000 --> 00:47:31,000

Why does it deny all known laws?

291

00:47:31,000 --> 00:47:34,000

It is simple.

292

00:47:34,000 --> 00:47:43,000

It defies all known laws because it is a law unto itself.

293

00:47:43,000 --> 00:47:50,000

A law existing and upon which other laws are formulated.

294

00:47:50,000 --> 00:47:52,000

We know effects.

295

00:47:52,000 --> 00:47:55,000

We do not know causes.

296

00:47:55,000 --> 00:47:58,000

You believe in space travel.

297

00:47:58,000 --> 00:48:09,000

Shortly your civilization will attempt to reach your moon and then your other neighboring planets.

298

00:48:09,000 --> 00:48:12,000

They shall reach their moon.

299

00:48:12,000 --> 00:48:17,000

They shall never reach their accompanying planets.

300

00:48:17,000 --> 00:48:29,000

A very basic laws involved of which your scientists and your experimental craft will soon become aware of.

301

00:48:29,000 --> 00:48:36,000

I would offer some advice.

302

00:48:36,000 --> 00:48:42,000

Do not study the effects of magnetics.

303

00:48:42,000 --> 00:48:46,000

Study magnetics.

304

00:48:46,000 --> 00:48:50,000

Study your little atoms.

305

00:48:50,000 --> 00:48:58,000

Sprinkle your little iron filings upon sheets of paper and look at the pattern they describe.

306

00:48:58,000 --> 00:49:01,000

You observe a field of force.

307

00:49:01,000 --> 00:49:10,000

For the filings arrange themselves into simple geometrical configurations.

308

00:49:10,000 --> 00:49:19,000

There my brothers and sisters you have the secret.

309

00:49:19,000 --> 00:49:26,000

Do not overlook the fact that you are merely staring at

310

00:49:26,000 --> 00:49:34,000

a geometrical configuration.

311

00:49:34,000 --> 00:49:37,000

Perhaps that is the key.

312

00:49:37,000 --> 00:49:41,000

It might be what looking into.

313

00:49:41,000 --> 00:49:47,000

It would only require a certain percentage of your time and thought.

314

00:49:47,000 --> 00:50:03,000

Or do I detect that there are a great many upon your planet incapable of intelligent thought?

315

00:50:03,000 --> 00:50:13,000

Again, do too many fail to see the forest because of the trees?

316

00:50:13,000 --> 00:50:19,000

Look closely my brothers.

317

00:50:19,000 --> 00:50:35,000

The little iron filings sprinkled upon the sheet of paper exist in one frame of reference.

318

00:50:35,000 --> 00:50:39,000

Strange is it not?

319

00:50:39,000 --> 00:50:46,000

The planetary system has a vertical axis.

320

00:50:46,000 --> 00:51:00,000

It has a horizontal axis also only in circular form called in your terminology an equator.

321

00:51:00,000 --> 00:51:07,000

We have yet another axis.

322

00:51:07,000 --> 00:51:26,000

Magnetic phenomena my brothers and sisters consists of a force which permeates all matter including the atom.

323

00:51:26,000 --> 00:51:32,000

You have not two forces but three.

324

00:51:32,000 --> 00:51:40,000

Two at right angles to one another and a third.

325

00:51:40,000 --> 00:51:48,000

There is only one possible axis it could assume.

326

00:51:48,000 --> 00:52:00,000

Instead of thinking in three dimensions you can solve this very simply.

327

00:52:00,000 --> 00:52:08,000

For the clue is located in the second dimension.

328

00:52:08,000 --> 00:52:17,000

The answer is in three.

329

00:52:17,000 --> 00:52:29,000

You might study this simple little problem for people of Earth.

330

00:52:29,000 --> 00:52:42,000

You are going to learn about magnetics very shortly.

331

00:52:42,000 --> 00:52:53,000

I should contribute more upon this subject in your very near future.

332

00:52:53,000 --> 00:53:01,000

I thank you for allowing my personal privilege of addressing you.

333

00:53:01,000 --> 00:53:12,000

I trust I have not gone too far into your forest.

334

00:53:12,000 --> 00:53:21,000

I am Blarion, atonée Vassu Vargas.

335

00:53:31,000 --> 00:53:42,000

Thank you Valera. We sincerely hope that you will discuss this little known but interesting subject further in the near future.

336

00:53:42,000 --> 00:53:51,000

The preceding address was transmitted by Tensubi.

337

00:54:32,000 --> 00:54:49,000

Ladies and gentlemen, in our past three broadcasts we have discussed many interesting phases and forms of information which have caused all of us to think mightily.

338

00:54:49,000 --> 00:54:53,000

Our horizons have extended already.

339

00:54:53,000 --> 00:55:05,000

This evening I would discuss some phases of one life upon our planet to whom we all owe an eternal

debt of gratitude.

340

00:55:05,000 --> 00:55:14,000

Perhaps we wonder where the spark of motivating consciousness of this one dwells in our time.

341

00:55:14,000 --> 00:55:28,000

I would speak of a man known as Nikola Tesla. This one was born of unborn parents in a rather unheard of and remote location of one of our European countries.

342

00:55:28,000 --> 00:55:39,000

To a rather tumultuous childhood, this one developed and studied in the finest universities and scientific institutions of his day.

343

00:55:39,000 --> 00:55:54,000

This is an honor for me to receive as a life that was blessed with great insight and intuition, examining and toyed with an infant source of power known to you today as alternating current.

344

00:55:54,000 --> 00:56:04,000

For, my friends, Nikola Tesla was the father of our modern electricity and power distribution systems.

345

00:56:09,000 --> 00:56:19,000

However, this man had many more scientific achievements to his credit than this one.

346

00:56:19,000 --> 00:56:29,000

Although the importance and the magnitude of this accomplishment would have satisfied most men as an achievement for a lifetime.

347

00:56:29,000 --> 00:56:34,000

Tesla told the little-known mysteries of his newfound power.

348

00:56:34,000 --> 00:56:42,000

He experimented day and night in laboratories equipped by the most influential men of his time.

349

00:56:42,000 --> 00:56:51,000

The achievements on record and credit to this man would fill many, many pages of our books.

350

00:56:51,000 --> 00:57:07,000

The number of patents issued alone exceeded the number of 400, and yet, my friends, perhaps the most gifted scientific intellect of our time is practically unknown.

351

00:57:07,000 --> 00:57:10,000

Let us give some thought to the reason for this.

352

00:57:11,000 --> 00:57:23,000

Among the many discoveries and workable ideas of Mr. Tesla were inventions which would bring what we call war to a very abrupt and sudden end.

353

00:57:23,000 --> 00:57:37,000

He had discovered also a means of supplying electrical energy using the very earth itself as a conductor, power to light our homes that have been received by merely connecting to an antenna

354

00:57:37,000 --> 00:57:41,000

and to a conductor placed in the earth.

355

00:57:41,000 --> 00:57:49,000

There would have been no huge towers carrying energy across our countries or wires best running our living areas.

356

00:57:49,000 --> 00:58:02,000

There would have been power available in such magnitude that would have eliminated the necessity of calling upon the bulk of our natural resources for its generation.

357

00:58:02,000 --> 00:58:10,000

How did this one man accomplish so much? Why were these proven achievements left unheard of?

358

00:58:10,000 --> 00:58:14,000

This, my friends, will be up to you to determine.

359

00:58:14,000 --> 00:58:23,000

For truly a study of this one's life will pose questions to keep your minds well occupied for many of your evenings.

360

00:58:33,000 --> 00:58:43,000

We all know that today we derive electrical energy in the latest possible manner of production by the use of controlled atomic reactions.

361

00:58:43,000 --> 00:58:47,000

True, this is not the prime source at the moment.

362

00:58:47,000 --> 00:58:52,000

Both has been applied experimentally and is proving itself.

363

00:58:52,000 --> 00:59:02,000

However, we have only delved into those things that Mr. Tesla knew of in our early 1900s.

364

00:59:02,000 --> 00:59:10,000

This is difficult to believe. I suggest that you study the biographies of this man.

365

00:59:11,000 --> 00:59:20,000

Let us assume, my friends, that our primitive man had never seen a flash of what we call lightning.

366

00:59:20,000 --> 00:59:26,000

That one of our illustrious forefathers had not decided to dangle a key upon a kite's chain.

367

00:59:26,000 --> 00:59:32,000

Today, we would have been without this indispensable aid to our life.

368

00:59:32,000 --> 00:59:40,000

What other methods of electrical generation were known prior to the discovery of better modern electricity?

369

00:59:40,000 --> 00:59:49,000

Think for a moment. Should I make the statement that electricity, as such, was known prior to the times of Egypt?

370

00:59:49,000 --> 00:59:53,000

You would perhaps think that I am making a misstatement.

371

00:59:53,000 --> 01:00:00,000

Have any in our audience ever heard of a lodestone of the properties it exhibits?

372

01:00:00,000 --> 01:00:07,000

If you know that the discoverer of our country, mounted at a lodestone upon a floating piece of wood,

373

01:00:07,000 --> 01:00:14,000

contained in a small bowl upon his ship, to use for navigational purposes,

374

01:00:14,000 --> 01:00:19,000

by following the course so described by this crude form of promise,

375

01:00:19,000 --> 01:00:28,000

he established the knowledge of the existence of a continent far across the seas from that known as Europe.

376

01:00:28,000 --> 01:00:38,000

Let us go back to the lodestone. Let us examine it more manually. What properties does it exhibit?

377

01:00:38,000 --> 01:00:43,000

The answer is apparent immediately. That known as magnetism.

378

01:00:50,000 --> 01:01:03,000

Grand, to this day the finest scientific minds in our world do not have an adequate description of the term magnetism.

379

01:01:03,000 --> 01:01:14,000

No mind has yet comprehended what is magnetism. All they can derive is its effect, the way it behaves in environment.

380

01:01:14,000 --> 01:01:22,000

They know how to produce it artificially, but to tell us what it is that actually no one can state.

381

01:01:22,000 --> 01:01:30,000

Why is it that the very heart of, again, an electrical system is not known?

382

01:01:30,000 --> 01:01:39,000

Why is it that we use an entire technology which is ever be workable upon an unknown quantity?

383

01:01:44,000 --> 01:01:55,000

Let us ask ourselves these questions. Let us ask ourselves what use does the ancient snake of this material known as a lodestone?

384

01:01:55,000 --> 01:02:04,000

The very name itself gives us an adequate meaning. The definition of load may be found in any of our dictionary.

385

01:02:05,000 --> 01:02:14,000

Let us examine now in an effort to find the possible use of the earliest forms of magnetism in our planet's history.

386

01:02:14,000 --> 01:02:23,000

I mentioned a few moments ago that was known before the time of ancient. It was known before the time of ancient Babylon.

387

01:02:23,000 --> 01:02:29,000

In fact, it was known before the time of the end of all. This is difficult to believe.

388

01:02:29,000 --> 01:02:43,000

We find in the writings of our ancient philosophers and records of history references made to a

race of people existing upon a continent located between the Americas and Europe.

389

01:02:43,000 --> 01:02:49,000

This was known 11,000 years ago as the continent of Atlantis.

390

01:02:49,000 --> 01:02:57,000

I may not you say, perhaps in the minds of some, but my friends, look into your histories.

391

01:02:57,000 --> 01:03:07,000

Examine the numerous accounts of this continent in the writings of former to all the tons of all nations through the examination of legends.

392

01:03:07,000 --> 01:03:19,000

Through research that is known carried out by our scientific institutions of this day, there is strong evidence to support the continent of Atlantis.

393

01:03:19,000 --> 01:03:37,000

Why do I use the term Atlantis or even bring it into our discussion when I should be talking about power? Why, my friend?

394

01:03:37,000 --> 01:03:50,000

Here is where power so tremendous in scope that we could scarcely conceive of it even in our present day was used as a common, everyday commodity.

395

01:03:50,000 --> 01:03:58,000

Difficult to believe? Again, examine the writings. Let us search back through our histories.

396

01:03:58,000 --> 01:04:20,000

We will find that many, many authorities to support my word. Power used such as we have not even dreamed in this our present day. Power which could lift mighty aircraft from the surface of our earth.

397

01:04:20,000 --> 01:04:30,000

Difficult to believe? Perhaps, but again, note the mysterious migrations of early races upon the face of our earth.

398

01:04:30,000 --> 01:04:39,000

With such tentative and fabulous theories as shells and bridges existing over the mightiest oceans known to man.

399

01:04:39,000 --> 01:04:55,000

Allowing these races access from one continent to another, and we say the theory of Atlantis is ridiculous, I ask you, is not a now walkway several miles wide across the Pacific Ocean as ridiculous as any we can conceive?

400

01:04:55,000 --> 01:05:05,000

And yet, this is a theory advanced by our authorities to explain this movement of early races across the face of the earth.

401

01:05:06,000 --> 01:05:23,000

How much suffering it would have been, knowing of the Atlantean aircraft to establish colonies in various segments of the earth's surface? How much more satisfactory the answers would have been? Why do we make during this, who can say?

402

01:05:23,000 --> 01:05:49,000

I would strongly suggest that those of you who hear my words, investigate these things for yourselves. There is more than abundant reference materials available in our institutions of learning, available in our library, where you merely have never taken time to think, to investigate.

403

01:05:53,000 --> 01:06:06,000

It is the above purpose of this program to create in the minds of our listeners the desire to examine these concepts and to think for themselves, to provoke thought.

404

01:06:06,000 --> 01:06:35,000

What happened to the Atlanteans? What happened to their marvelous civilization? That question we will use as a topic for a talk in the future where we will more adequately deal with the history, so intriguing that not even imminent contact with the planet Mars would, as we have a way of stating it, hold the channel in comparison.

405

01:06:35,000 --> 01:06:51,000

We live, my friends, upon an amazing sphere in our universe. We depreciatingly speak of this town of ours, and yet it contains secrets enough to hold the attention of men for eternities upon end.

406

01:06:51,000 --> 01:07:09,000

We take pride in our heritage, descending to us from the noble evidence of our forebearers, yet in this all modern day, we ignore the results of these mighty accomplishments. Again, we ponder on these thoughts for a while.

407

01:07:10,000 --> 01:07:28,000

Next week, we will present one of the most interesting space personalities ever to be introduced to a radio audience. The subject to be discussed will be treated by a space scientist who might be the very image of Nikola Tesla.

408

01:07:29,000 --> 01:07:42,000

We suggest to our listening audience that those interested have adequate recording facilities set up for this event. It will be outstanding.

409

01:07:43,000 --> 01:07:52,000

All communications should be addressed to Galaxy in care of this station.

410

01:07:53,000 --> 01:08:09,000

You have been listening to Galaxy, the program unique for trade events and information which may affect the lives of all people, even you.

411

01:08:39,000 --> 01:08:48,000

Thank you for watching.
