

1

00:00:00,000 --> 00:00:07,000

I do hold evidences as many people do throughout this planet, and I don't say that I hold more

2

00:00:07,000 --> 00:00:16,000

than the other individuals nor less. I hold evidences that indicate to mankind, on the

3

00:00:16,000 --> 00:00:24,000

whole, if properly submitted, that we do have an interplanetary intelligence visiting the

4

00:00:24,000 --> 00:00:30,000

Earth, a board of craft commonly called a flying saucer, or a fagantious craft, and there

5

00:00:30,000 --> 00:00:35,000

are many other shapes involved, but commonly termed a flying saucer. We have evidences

6

00:00:35,000 --> 00:00:40,000

indicating this to be a fact, and that there are strange crafts in our atmosphere that are

7

00:00:40,000 --> 00:00:46,000

interplanetary machines. None is physical, none is physical. I'm not thinking of any

8

00:00:46,000 --> 00:00:52,000

metaphysical, or shall we say, another method of land is that of it has been brought into

9

00:00:52,000 --> 00:00:58,000

the subject, inadvertently by some, and by others. I'm not thinking of that at all. We

10

00:00:58,000 --> 00:01:02,000

can discuss that in the later this evening because we have evidences in this direction

11

00:01:02,000 --> 00:01:09,000

too. The point is that we do have a physical tangible craft that is visiting this Earth,

12

00:01:09,000 --> 00:01:15,000

and I'm going to tell Mal, which something I don't normally do, is tell her my own

13

00:01:15,000 --> 00:01:21,000

opinion in one deal. Just one moment, I have no shoe in part of the word A. Is it just

14

00:01:21,000 --> 00:01:26,000

one single craft, or are you of the belief that there are many, many, many, many, many,

15

00:01:26,000 --> 00:01:33,000

very many? And I have only been involved in my particular sightings as such, and

16

00:01:33,000 --> 00:01:38,000

experiences I have only been involved in, and a few of the types. I have not seen all

17

00:01:38,000 --> 00:01:44,000

of them, but I am willing to accept some of the evidences submitted. I'm willing to

18

00:01:44,000 --> 00:01:50,000

accept if I have seen a Model A board going down the street after having arrived upon

19

00:01:50,000 --> 00:01:55,000

this planet, shall we say, I see a Model A board going down the street. I'm willing to

20

00:01:55,000 --> 00:01:59,000

accept the fact that there must be several other models around who besides Model A

21

00:01:59,000 --> 00:02:05,000

board. It's quite obvious. Because I haven't seen these craft the other man has seen,

22

00:02:05,000 --> 00:02:10,000

I'm not going to reject his tale, nor am I going to reject the validity of his sightings.

23

00:02:10,000 --> 00:02:17,000

However, the sightings that I have made, many of them, rather astounding. It shocked me

24

00:02:17,000 --> 00:02:26,000

into the belief, rather than, shall we say, just a guesstimate of what was going on. My

25

00:02:26,000 --> 00:02:33,000

guesses were pretty good way back in 1950. I felt that what I had uncovered at that time

26

00:02:33,000 --> 00:02:39,000

was very good, that I had enough proof to even carry it before the public. I've been working

27

00:02:39,000 --> 00:02:46,000

on it for a number of years before then, but I remain rather quiet. And I felt that I

28

00:02:46,000 --> 00:02:53,000

didn't have enough evidence. I had the belief and I had a feeling that something was going

29

00:02:53,000 --> 00:02:59,000

on, but I couldn't help the other people of my belief. I could only express this when

30

00:02:59,000 --> 00:03:07,000

I had proof. And when these little experiences amplify themselves through the years and then

31

00:03:07,000 --> 00:03:13,000

you become involved, we'll see the same thing that the man that you were investigating

32

00:03:13,000 --> 00:03:21,000

and seeing, it gives you this experience of being able to smell what the man is, and I

33

00:03:21,000 --> 00:03:32,000

use the term smell, it's a terminology. You're able to smell out the fraud and the phony.

34

00:03:32,000 --> 00:03:38,000

And we have a lot of them in the field. They can't be helped. An ethical topic, an ethical

35

00:03:38,000 --> 00:03:43,000

topic, a series of events that are going on today, I've found to draw everything. The

36

00:03:43,000 --> 00:03:50,000

bottom of the bucket is found to come in and cover up the field with their business information

37

00:03:50,000 --> 00:03:58,000

as it were. It makes it difficult for it. Very difficult. However, one of the outstanding

38

00:03:58,000 --> 00:04:05,000

sightings that I recall very vividly, and as I said before, I want everybody to understand

39

00:04:05,000 --> 00:04:13,000

that I do not normally, even on some very, very, in some very dire circumstances where

40

00:04:13,000 --> 00:04:21,000

I have to defend myself, I normally don't express my own personal experiences in the field.

41

00:04:21,000 --> 00:04:27,000

You lose the sight of being a reporter when you do, and when you're trying to investigate

42

00:04:27,000 --> 00:04:31,000

the other man and you're trying to compile a lot of other data, it's very difficult for

43

00:04:31,000 --> 00:04:36,000

a man to look at his own experiences other than just experiences. However, I'm going to

44

00:04:36,000 --> 00:04:42,000

tell you one tonight. I want all of you to make no comments if you wish, because there's

45

00:04:42,000 --> 00:04:47,000

some very important things that are going to bring a lot of questions up in your mind.

46

00:04:47,000 --> 00:04:53,000

So these questions will all be answered in a very few moments when I, as I would say,

47

00:04:53,000 --> 00:05:00,000

express what I have seen. And if you listen to it intently, you will understand what I

48

00:05:00,000 --> 00:05:05,000

have seen. And it won't create a whole lot of questions if you listen. But if you don't

49

00:05:05,000 --> 00:05:11,000

listen, you're going to have a whole lot of questions that are really irrelevant.

50

00:05:11,000 --> 00:05:18,000

I was driving to a flying saucer convention on the West Coast. Max Miller had put over

51

00:05:18,000 --> 00:05:26,000

the flying saucer convention, the very first one in the field, and at the Hollywood Hotel.

52

00:05:26,000 --> 00:05:32,000

And I had wanted to get to this convention probably. I would have gone on all fours.

53

00:05:32,000 --> 00:05:37,000

I couldn't afford it like every one of the other saucer researchers. It's very difficult to keep up with

54

00:05:37,000 --> 00:05:42,000

the expenses involved in this thing. But I was going to make the West Coast in that convention

55

00:05:42,000 --> 00:05:53,000

if it hurt. And I had headed out there three days prior to the convention. And I'm rather

56

00:05:53,000 --> 00:06:02,000

interested in such things as the history of man, the antiquities of man. I love such places

57

00:06:02,000 --> 00:06:08,000

as the Cooks Wellies, the Grand Canyon area, and then of course the crater out there,

58

00:06:08,000 --> 00:06:14,000

Winslow, Arizona. I had been there before, but my boy hadn't seen it. So we spent all

59

00:06:14,000 --> 00:06:21,000

of one day going through the crater talking to Dr. Ninja, whom I know, incidentally for

60

00:06:21,000 --> 00:06:27,000

anybody that wants to study a little bit about meteors and meteorites. You get a hold of

61

00:06:27,000 --> 00:06:34,000

Dr. Minnichard's books. They're very good. And the man is very objective in what he is doing.

62

00:06:34,000 --> 00:06:39,000

He, incidentally, is wondering why he can't see flying saucers because he's doing a lot of observing.

63

00:06:39,000 --> 00:06:46,000

He thinks he has to be some sort of a specialized individual to see them. But anyhow, I spent

64

00:06:46,000 --> 00:06:52,000

a lot of time with Dr. Ninja, introduced my son to him. My son is quite interested in astronomy

65

00:06:52,000 --> 00:06:58,000

and a lot of related subjects and not particularly in the interest in saucers, I might say, even though

66

00:06:58,000 --> 00:07:06,000

his dad is. And we spent two hours around there and then we filled a lot of time in

67

00:07:06,000 --> 00:07:11,000

White Staff, Arizona, the old Cooks Wellings, or rather interesting sort of Cooks Wellings

68

00:07:11,000 --> 00:07:17,000

there. These have always intrigued me. And after spending a lot of time around there, we

69

00:07:17,000 --> 00:07:23,000

took off, I'd say about 10.30 at night, we got down the needles. And needles was awful hot.

70

00:07:23,000 --> 00:07:30,000

It was really hot. And I won't give a few in temperatures. All I can say is it was extremely

71

00:07:30,000 --> 00:07:36,000

uncomfortable. And I have failed for ships in the early days at a 130, 140 degrees

72

00:07:36,000 --> 00:07:42,000

temperature down in the N.H. room and that was really hot. So what I'd say was really hot

73

00:07:42,000 --> 00:07:47,000

out there at needles, I mean it, I really felt it. We left needles California after

74

00:07:47,000 --> 00:07:53,000

gassing up and I wanted to throw the better a lot on the desert. I decided it was too hot to do so

75

00:07:53,000 --> 00:07:57,000

here. And all these desert winds blowing in in the prevailing Easterry and as they

76

00:07:57,000 --> 00:08:02,000

pushed it into the foot of the mountains there, it was just stirring around the beat.

77

00:08:02,000 --> 00:08:07,000

My voice on the sweep on the front seat of the car and I started to drive westward to get into the

78

00:08:07,000 --> 00:08:12,000

high desert country towards Barstow. And I thought I can't make the first night of the

79

00:08:12,000 --> 00:08:17,000

playing soft to convention but who gives a damn, there's two other nights to go. So I'll get into

80

00:08:17,000 --> 00:08:22,000

the L.A. when I feel like it rather than try to get through the night. As early as the

81

00:08:22,000 --> 00:08:27,000

morning was night anymore, it was the next morning, it was around 1.30 to 2 o'clock when we

82

00:08:27,000 --> 00:08:33,000

headed out across the desert. And I'd say we were out of town about 20 minutes west of

83

00:08:33,000 --> 00:08:42,000

needle California. And I had the funniest, itty-bitty sensation that something was following my car.

84

00:08:42,000 --> 00:08:47,000

Now of course some of these people in flames off the research will say, haha, these are ESP

85

00:08:47,000 --> 00:08:55,000

contacts, a telephoto contact. This, I don't say this, it took place, it couldn't possibly have been a ESP

86

00:08:55,000 --> 00:09:02,000

contact to set to my part. Because I did not pick it up in that manner, but I had this funny hunch

87

00:09:02,000 --> 00:09:08,000

that we had something following my car. And I was extremely alert, looking around throughout

88

00:09:08,000 --> 00:09:13,000

the sky, left and right and overhead, even throwing my hand out, because this is a beautiful

89

00:09:13,000 --> 00:09:20,000

country for sightings. You can see that star coverage is just like a blanket over you out there.

90

00:09:20,000 --> 00:09:25,000

It's pretty hard to pick anything up, but if there was anything at all that moved up there that was not

91

00:09:25,000 --> 00:09:32,000

normal to what we're accustomed to seeing at the moment, you would know it very quickly.

92

00:09:32,000 --> 00:09:40,000

So I'm very nervous, it's every looking around, just like the bird looking for the prey. Actually,

93

00:09:40,000 --> 00:09:46,000

I thought it was a prey at the moment. And looking behind the car, there was an elongated cloud, dark

94

00:09:46,000 --> 00:09:56,000

mass. And this persisted through a period of about 15 to 20 minutes. Yet I had, I really think about it,

95

00:09:56,000 --> 00:10:05,000

because it took me 15 minutes to wake up to the fact that here was a cloudless sky and a desert.

96

00:10:05,000 --> 00:10:11,000

What was an elongated cloud doing there by, I mean, I'm traveling 80 or 90 miles an hour, and it was

97

00:10:11,000 --> 00:10:17,000

very easily, well, what could come over the cloud doing there and cling to that close to the car.

98

00:10:17,000 --> 00:10:25,000

And suddenly when I, there was a minute that I admitted to myself that this was something unusual,

99

00:10:25,000 --> 00:10:34,000

it was a little different. And I took a rapid scan, and as my eyes went that way, there was a burst of light.

100

00:10:34,000 --> 00:10:43,000

And it was just like, well, it was frightening, for the simple reason that when this light burst, as it said, in my eyes,

101

00:10:43,000 --> 00:10:49,000

I felt that my cat is a ship landing on the desert, and it's just landing here, and his landing lights

102

00:10:49,000 --> 00:10:55,000

have flashed on right over my car, and he hit me. This is a strange feeling that you get this reaction.

103

00:10:56,000 --> 00:11:02,000

But it was a tremendous burst of light. And in this burst of light, suddenly, as my eyes, and I

104

00:11:02,000 --> 00:11:07,000

started to attention to what it was, and my eyes were accustomed to it, and I want you to understand,

105

00:11:07,000 --> 00:11:15,000

it was all momentarily, it wasn't something that would take 15 to 20 minutes, to view 15 to 20 minutes,

106

00:11:15,000 --> 00:11:21,000

as I was trying to guess what an adjustment there was, fractional. And there was a large,

107

00:11:21,000 --> 00:11:29,000

the gar-shaped craft. The elongated clouds that I saw, the dark mass, is the only thing I could suspect

108

00:11:29,000 --> 00:11:37,000

of this being, because it wasn't there anymore, and here was this beautiful bright, bluish-white light, and the gar-shaped.

109

00:11:37,000 --> 00:11:45,000

And now I'm going to give you the so-called researches, or enthusiasm, to find something to shock.

110

00:11:45,000 --> 00:11:55,000

This particular craft was the blunt-ended, a Dansky's mother-type ship, out there beyond my car,

111

00:11:55,000 --> 00:12:04,000

traveling in the same direction, and I'm doing, as I said, about 90 to 95 going west, and there was this craft

112

00:12:04,000 --> 00:12:12,000

out there, glowing, in the blunt-end, cold, hard, solid lines of a vehicle, not any spherical substance,

113

00:12:12,000 --> 00:12:19,000

but a good, clear, hard vehicle, and blended on both ends, not conducive to space travel

114

00:12:19,000 --> 00:12:27,000

or aerodynamic travel, as we know it, and in this place, like the drowdy man, because this is all in seconds,

115

00:12:27,000 --> 00:12:35,000

that I, how long he paused there, for my benefit, I'm sure, is that he paused right through the line of my reading,

116

00:12:35,000 --> 00:12:42,000

and not a formal limit, not a thing on this craft, but just beautiful, cylindrical in shape,

117

00:12:42,000 --> 00:12:50,000

and I think that I used the term beautiful, because it was, you could feel, you could feel that there was something about a craft of that type,

118

00:12:50,000 --> 00:12:56,000

hovering out there over the desert without a projection on it, not a way on it, nothing, and not a sound,

119

00:12:56,000 --> 00:13:02,000

and yet this, this glow, it lit up the desert far brighter than the lightning, and yet it had a lightning,

120

00:13:02,000 --> 00:13:11,000

and light quality, the bluish-white light, and I would judge, this is only a guess, I would judge

this thing,

121

00:13:11,000 --> 00:13:20,000

to be, to have been, approximately half a mile away from my car, and approximately half a mile in altitude,

122

00:13:20,000 --> 00:13:29,000

and it filled two thirds of my two-door, old 88, coach door, that's, that is the two-door, the larger door,

123

00:13:29,000 --> 00:13:35,000

and the, as you, it isn't the four-door, the narrow window, so for those of you that are driving cars with narrow windows,

124

00:13:35,000 --> 00:13:43,000

George, you were going to think of a smaller craft than what I have in mind, but for those of you that drive the larger windows of automobiles,

125

00:13:43,000 --> 00:13:51,000

two thirds of that left window of my car was filled with this beautiful texture, it was awe-inspiring,

126

00:13:51,000 --> 00:13:59,000

to see a craft of this nature, on the hovering over there, over the desert, literally hovering over there,

127

00:13:59,000 --> 00:14:07,000

and a few seconds, and I got this high-pitched, and then he moved off, and as he moved off, he didn't disappear,

128

00:14:07,000 --> 00:14:11,000

like some people say, oh, he disappeared, you were going to say that immediately,

129

00:14:11,000 --> 00:14:18,000

and those of you that called interpretation are going to say, oh, he disappeared, even though it was a metaphysical something,

130

00:14:18,000 --> 00:14:23,000

it's just their vanishing, math and D math, materialization and D materials, they can be moved,

131

00:14:23,000 --> 00:14:28,000

which he quickly jumped to this conclusion, the word's not, he moved off rapidly,

132

00:14:28,000 --> 00:14:33,000

in fact, four and one-half seconds from the time that he was down to the moon,

133

00:14:33,000 --> 00:14:37,000

he moved through the gradually increased speed, he just didn't start out,

134

00:14:37,000 --> 00:14:43,000

but in four and a half seconds, he was knowing that a bright star to the west, another very bright star,

135

00:14:43,000 --> 00:14:49,000

and I watched that, and you will know that you would watch something like that,

136

00:14:49,000 --> 00:14:55,000

all eyes, I'm trying to pinch my boy and co-hop him over their hands while he's on the seat,

137

00:14:55,000 --> 00:14:59,000

to wake him up, to see the sighting of the ages, it might have to make this,

138

00:14:59,000 --> 00:15:07,000

and now my personal opinion on this has always been that I could play with the guy who's craft is exciting,

139

00:15:07,000 --> 00:15:17,000

I don't know why I just have, maybe it's because I have been in the field of rocketry and aircraft for so many years,

140

00:15:17,000 --> 00:15:26,000

and I feel that there's, if the guy's been craft, it's more conducive to man's efforts in this direction, maybe so.

141

00:15:26,000 --> 00:15:33,000

However, it was the one, if the guy says craft that I had seen, it was really astounding,

142

00:15:33,000 --> 00:15:43,000

and nobody can tell me that this was an earthly vehicle, nobody can tell me that this was not something built other than on this planet,

143

00:15:43,000 --> 00:15:51,000

where I don't know, I haven't the slightest guess where he's seen from, or how many people were aboard,

144

00:15:51,000 --> 00:15:59,000

I do feel though that there were intelligence in the form of that craft, this is something that you would say will just quickly hunch,

145

00:15:59,000 --> 00:16:05,000

and it is, I have no proof that there were any intelligences out there other than my own particular height,

146

00:16:05,000 --> 00:16:13,000

that here's a craft, and it seems people, as such, or intelligence in other words, who were, he says,

147

00:16:13,000 --> 00:16:17,000

to utilize the craft of this type, that they were empirical and they said,

148

00:16:17,000 --> 00:16:21,000

what in the world do they need a craft of that type for? They didn't use any empirical,

149

00:16:21,000 --> 00:16:25,000

that means they travel, what do they need a craft of that type for?

150

00:16:25,000 --> 00:16:33,000

I'm sure that he built that craft for my specific benefit, this I am very sure of, they didn't build that for my benefit,

151

00:16:33,000 --> 00:16:42,000

nor did some, some shall we say, Teister, give me some optical illusion of some sort, this was very real.

152

00:16:42,000 --> 00:16:45,000

Now there wasn't a sound to this craft when it moved off,

153

00:16:45,000 --> 00:16:52,000

but I mean it believes that it is not utilizing normal propulsion beings, it is physically impossible, and impossible,

154

00:16:52,000 --> 00:16:57,000

I would say, to decide what the design of any craft is, unless we know it beforehand,

155

00:16:57,000 --> 00:17:03,000

other than having a fixed sound, some of the two different positions and then matching their notes.

156

00:17:03,000 --> 00:17:11,000

However, in this particular case, I would say that this craft was, intuitively, as always you give me an astronaut,

157

00:17:11,000 --> 00:17:18,000

and intuitively I would say that this was at least four and one half times the size of the Queen Mary.

158

00:17:18,000 --> 00:17:27,000

This was the very least it could have been, it could have been larger, but I don't know it's exact distance from me,

159

00:17:27,000 --> 00:17:34,000

nor do I know it's exact altitude, I don't know any of these factors, and I have nothing to be made of you at all,

160

00:17:34,000 --> 00:17:40,000

so I can say that intuitively I would guess it to be, and my guess would be very wrong,

161

00:17:40,000 --> 00:17:47,000

but I would say that it was not any smaller, any less than four and one half times the size of the Queen Mary,

162

00:17:47,000 --> 00:17:52,000

as we thought a mile long, this was me, roughly a mile long.

163

00:17:52,000 --> 00:17:58,000

Look, selling your windshield, or your, you're not the windshield, selling your side door, the car, two thirds of that,

164

00:17:58,000 --> 00:18:05,000

there's given me the immensity of this craft, it's far beyond anything that I thought could be a result on this earth.

165

00:18:05,000 --> 00:18:12,000

I have my level-one, seven-inch of the air, particular amount of protection for heavy hands from the inside like that,

166

00:18:12,000 --> 00:18:19,000

and I've grown up a world a couple of times. You said something about four and a half seconds,

167

00:18:19,000 --> 00:18:26,000

yeah, it was just an approximately four to five seconds ago, and it was never that, I'd say, it was breaded.

168

00:18:26,000 --> 00:18:35,000

Now, it seems to me that you mentioned that there was a meaning of the flying stop's international,

169

00:18:35,000 --> 00:18:41,000

that you and your son could at least be able to get two days of the convention,

170

00:18:41,000 --> 00:18:46,000

you said you were not going to force it to drive there because it's the first day.

171

00:18:46,000 --> 00:18:53,000

I'm just thinking of questions that I feel that many of the people on the party line would like to present,

172

00:18:53,000 --> 00:18:59,000

if they had the opportunity that I have tonight to, by all interviewing, by all means,

173

00:18:59,000 --> 00:19:07,000

do you feel that due to the length of this trip, it wasn't a very long trip, not for me, actually,

174

00:19:07,000 --> 00:19:11,000

and just from that from Alaska, I just covered your last trip.

175

00:19:11,000 --> 00:19:16,000

Well, I'm talking about the amount of mileage that you were trying to make in a very,

176

00:19:16,000 --> 00:19:17,000

usually, what, in Chicago?

177

00:19:17,000 --> 00:19:23,000

Yeah, I was driving from Chicago to L.A. at the time, about 20 to 300 miles, yeah, about 2,300 miles.

178

00:19:23,000 --> 00:19:32,000

Do you think there's a possibility, John, that you were hired and that this may have been a hallucination?

179

00:19:32,000 --> 00:19:35,000

Well, that's a very good question.

180

00:19:35,000 --> 00:19:37,000

It's coming from you.

181

00:19:37,000 --> 00:19:43,000

I rather the question is intense because do I look tired now?

182

00:19:43,000 --> 00:19:45,000

No, not at this.

183

00:19:45,000 --> 00:19:50,000

I've been up all night, all night, all three nights.

184

00:19:50,000 --> 00:19:54,000

I mean, the relationship again brings up the problem.

185

00:19:54,000 --> 00:19:56,000

I'm going to ask you a question, please.

186

00:19:56,000 --> 00:20:01,000

I'm not invading you, but I wasn't going to bring up the problem of understanding one man and another.

187

00:20:01,000 --> 00:20:06,000

I can stay up for a week without any sleep and get away with it and still be wide awake.

188

00:20:06,000 --> 00:20:11,000

Another man in a major statement, because another man's W.R.M. maybe looking for a fellow.

189

00:20:11,000 --> 00:20:13,000

Yeah, another man.

190

00:20:13,000 --> 00:20:19,000

Another man who's been there for 15 minutes, he had his bedtime and he's a collapsed individual.

191

00:20:19,000 --> 00:20:22,000

And I believe that's what you were trying to do, right, Brad?

192

00:20:22,000 --> 00:20:29,000

When I am in a collapsed condition, another room that I have been under a state of hallucination,

193

00:20:29,000 --> 00:20:33,000

I would say most definitely not.

194

00:20:33,000 --> 00:20:40,000

In my estimation, however, I know that there are psych-high-insist about someone saying,

195

00:20:40,000 --> 00:20:42,000

ha, ha, ha, this is me for the fire.

196

00:20:42,000 --> 00:20:44,000

This boy was really tired.

197

00:20:44,000 --> 00:20:46,000

I have driven to California, quote me.

198

00:20:46,000 --> 00:20:50,000

I have driven to California and I know you can get awful, awful tired.

199

00:20:50,000 --> 00:20:54,000

You can see a lot of strange things in the desert, brown-up black-nosed blades.

200

00:20:54,000 --> 00:20:57,000

A man talking, I was tonight before,

201

00:20:57,000 --> 00:21:02,000

and he had to see him, Allison, on talking about how many straw-on-allices he had in his analysis.

202

00:21:02,000 --> 00:21:04,000

Oh, I would have loved to have been here that night.

203

00:21:04,000 --> 00:21:05,000

I tried to call you.

204

00:21:05,000 --> 00:21:07,000

Why didn't you open up your telephone?

205

00:21:07,000 --> 00:21:08,000

I wasn't here.

206

00:21:08,000 --> 00:21:09,000

You weren't here.

207

00:21:09,000 --> 00:21:12,000

You were in New York, but open up the telephone at about this.

208

00:21:12,000 --> 00:21:15,000

There's a guy on the West Coast that does this.

209

00:21:15,000 --> 00:21:18,000

Ben Hunter has a program that's much like yourself.

210

00:21:18,000 --> 00:21:23,000

When the incident we went to talk about him, because there was a very exciting face message

211

00:21:23,000 --> 00:21:27,000

or arrangement made over that broadcast, and I want to tell the audience about it.

212

00:21:27,000 --> 00:21:32,000

But then, as the telephone opens, and at the specific hours of the morning,

213

00:21:32,000 --> 00:21:36,000

and the audience call in, and many of them call, long distance,

214

00:21:36,000 --> 00:21:39,000

and those that are the preferredness may call, collect,

215

00:21:39,000 --> 00:21:44,000

and this fellow does a terrific job on the same subject that he does.

216

00:21:44,000 --> 00:21:48,000

Well, we find that if we take Shones on as an example,

217

00:21:48,000 --> 00:21:52,000

if I took the phones here and now, we wouldn't have an interview.

218

00:21:52,000 --> 00:21:55,000

Well, that's true, but I mean, I want to express this,

219

00:21:55,000 --> 00:21:58,000

that he does have interviews much like you do,

220

00:21:58,000 --> 00:22:01,000

and then again, he has interviews with these telephone callers.

221

00:22:01,000 --> 00:22:08,000

Consequently, he's always got the live program of getting new material at all times over that telephone.

222

00:22:08,000 --> 00:22:11,000

He doesn't have to wait for them to come in, and when they come in, that makes it even better.

223

00:22:11,000 --> 00:22:13,000

From the moment that he can talk to them longer than them,

224

00:22:13,000 --> 00:22:16,000

but he holds 15, 20-minute conversations over the phone,

225

00:22:16,000 --> 00:22:21,000

and people speak of subjects unrelated to the call interpretation

226

00:22:21,000 --> 00:22:24,000

of various things in medicine and doctors,

227

00:22:24,000 --> 00:22:30,000

and he goes around there all the time, one to five every morning, with things he does.

228

00:22:30,000 --> 00:22:33,000

And these are invaluable, and of course, for a while,

229

00:22:33,000 --> 00:22:35,000

we have tried that from time to time,

230

00:22:35,000 --> 00:22:42,000

and we find that the person making the call is very much interested in the conversation,

231

00:22:42,000 --> 00:22:47,000

but the people on the party line want to get back to listening to John Otto and Carlton Hason.

232

00:22:47,000 --> 00:22:49,000

That's who's at this point.

233

00:22:49,000 --> 00:22:51,000

I'm not going to have an argument on this.

234

00:22:51,000 --> 00:22:56,000

We'll wrap that tiredness just for a moment.

235

00:22:56,000 --> 00:23:01,000

I just wondered, I've heard this statement used time and time again,

236

00:23:01,000 --> 00:23:05,000

and I think that you sort of incorporated it, not just words for words,

237

00:23:05,000 --> 00:23:09,000

and that is, you have to believe to see,

238

00:23:09,000 --> 00:23:14,000

and I'm of nature that I want to see before I believe.

239

00:23:14,000 --> 00:23:19,000

I'm not entirely in accord with that statement, that I cut the piece off from all the rest.

240

00:23:19,000 --> 00:23:20,000

In other words, what, right?

241

00:23:20,000 --> 00:23:21,000

And I hear you two statements.

242

00:23:21,000 --> 00:23:27,000

Well, the one, why do people believe to see, or can you see to believe, and then believe?

243

00:23:27,000 --> 00:23:34,000

I would say that to answer that, I haven't found that to be the case entirely.

244

00:23:34,000 --> 00:23:42,000

I have found that the people that have absolutely no concept of what's going on in this ethical topic at all,

245

00:23:42,000 --> 00:23:47,000

have seen, and that probably have probably been more astounding of the writing.

246

00:23:47,000 --> 00:23:51,000

Those people that haven't, they find this concept.

247

00:23:51,000 --> 00:23:59,000

Now, to find out whether these people, in their way of living, are any different than the others,

248

00:23:59,000 --> 00:24:03,000

I have never found any evidence indicating this at all,

249

00:24:03,000 --> 00:24:07,000

but I have found people that haven't had the slightest concept to go along with this,

250

00:24:07,000 --> 00:24:09,000

haven't had the slightest experience at all,

251

00:24:09,000 --> 00:24:14,000

haven't even been, shall we say, exposed to a newspaper article on the subject,

252

00:24:14,000 --> 00:24:20,000

and this feels pretty hard, not very good, but it is, because it seems that way,

253

00:24:20,000 --> 00:24:22,000

but then again, a lot of people wouldn't even notice that.

254

00:24:22,000 --> 00:24:25,000

Their eyes are still right through a newspaper, their rape is still alive,

255

00:24:25,000 --> 00:24:28,000

also reporting what's happening when you can think of it.

256

00:24:28,000 --> 00:24:31,000

And yet, some of these people have been subject,

257

00:24:31,000 --> 00:24:35,000

going back to the earlier days and sources, that the terminology was,

258

00:24:35,000 --> 00:24:40,000

behind sight, this is used a lot in co-interpretations, incidentally,

259

00:24:40,000 --> 00:24:47,000

behind sight of man, he, the, the, the kind of looking here in a direction for no reason at all,

260

00:24:47,000 --> 00:24:49,000

and suddenly seeing something.

261

00:24:49,000 --> 00:24:54,000

Well, these people haven't had what you could call a belief they get they saw.

262

00:24:54,000 --> 00:24:58,000

So I wouldn't say that this is, so, I wouldn't say this is,

263

00:24:58,000 --> 00:25:01,000

if you had to believe this.

264

00:25:01,000 --> 00:25:03,000

Are you a resident of California?

265

00:25:03,000 --> 00:25:04,000

I will be very shortly.

266

00:25:04,000 --> 00:25:07,000

I'm a resident of Chicago, Illinois, as the President,

267

00:25:07,000 --> 00:25:13,000

and I, because I have made my, making a permanent move to the West Coast,

268

00:25:13,000 --> 00:25:17,000

and been doing so, I'm still a resident of Chicago, though.

269

00:25:17,000 --> 00:25:21,000

Flying, Starter's, International, Unmetaphysical Group?

270

00:25:21,000 --> 00:25:23,000

Most definitely not.

271

00:25:23,000 --> 00:25:27,000

There's, some people have stated that from time to time,

272

00:25:27,000 --> 00:25:32,000

that I'm showing you at this moment a bulldozer that is turned off quarterly by Max Miller,

273

00:25:32,000 --> 00:25:36,000

applying software to International, he's called, Soft-Bird.

274

00:25:36,000 --> 00:25:43,000

And the, there's some very interesting little bits on the flying software research, as such,

275

00:25:43,000 --> 00:25:46,000

that are submitted from time to time.

276

00:25:46,000 --> 00:25:50,000

I would like to say that Max Miller is in layer zone,

277

00:25:50,000 --> 00:25:55,000

with a lot of very interesting people in, and on our planet.

278

00:25:55,000 --> 00:25:59,000

This man has a reputation, that is rather outstanding.

279

00:25:59,000 --> 00:26:03,000

People respect his evaluating ability.

280

00:26:03,000 --> 00:26:09,000

They respect him to the extent that he is given confidential information from time to time.

281

00:26:09,000 --> 00:26:13,000

I'm not trying to lead you to the need that you will find that any confidential information

282

00:26:13,000 --> 00:26:16,000

published in his book, that you won't find elsewhere.

283

00:26:16,000 --> 00:26:20,000

But I would like to tell you that he comes up with many firsts in the field.

284

00:26:20,000 --> 00:26:26,000

Many firsts, many people have thought, though that all flying software researchers or enthusiasts

285

00:26:26,000 --> 00:26:31,000

are, uh, of occult readings, and this is far from the truth.

286

00:26:31,000 --> 00:26:39,000

However, I have found, in my, my particular investigation, that many people that are interested in the topic,

287

00:26:39,000 --> 00:26:46,000

eventually start investigating the occult, or start investigating the metaphysical interpretation.

288

00:26:46,000 --> 00:26:52,000

This, I think, is, is a natural, you should, but I do not believe, and I believe this is what the FI was trying to express,

289

00:26:52,000 --> 00:26:56,000

and I didn't wish to be trite or smart at the time when I said it,

290

00:26:56,000 --> 00:27:01,000

but I do believe that this organization, uh, was trying to express, in their opinion,

291

00:27:01,000 --> 00:27:07,000

they didn't feel that occult interpretation should be considered flying software,

292

00:27:07,000 --> 00:27:12,000

and in this, I thoroughly agree, that occult, as such, as a research,

293

00:27:12,000 --> 00:27:17,000

I do believe that occult research is a very valid and a very real, uh, topic of, uh,

294

00:27:17,000 --> 00:27:21,000

discretion of investigation, and I think that men should know about it.

295

00:27:21,000 --> 00:27:27,000

I think all men that are ready should know about it, but I do not believe that it is healthy for people to say

296

00:27:27,000 --> 00:27:31,000

that you must have occult knowledge to understand flying software,

297

00:27:31,000 --> 00:27:34,000

and I don't believe it has any part of the flying software something.
