

1

00:00:00,000 --> 00:00:04,900

National UFO Reporting Center in Washington.

2

00:00:04,900 --> 00:00:08,280

We understand that you've had a couple good UFO settings.

3

00:00:08,280 --> 00:00:10,740

You're not too far back.

4

00:00:10,740 --> 00:00:12,580

One in November and one in December.

5

00:00:12,580 --> 00:00:17,180

I wonder if we could get a description of what you saw.

6

00:00:17,180 --> 00:00:20,980

This is the center operated by an organization known as Phenomenon Research.

7

00:00:20,980 --> 00:00:21,980

Okay.

8

00:00:21,980 --> 00:00:23,580

Any connection with the Phoenix operation?

9

00:00:23,580 --> 00:00:24,580

No, sir.

10

00:00:24,580 --> 00:00:25,580

Okay.

11

00:00:25,580 --> 00:00:27,580

I'll explain it to you.

12

00:00:27,580 --> 00:00:32,580

November the 9th, 1978, 1.34 a.m.

13

00:00:32,580 --> 00:00:40,900

The UFO appeared and I guess he was on the property hovering maybe 50 feet, 60 feet

14

00:00:40,900 --> 00:00:45,580

off the ground for maybe 20 minutes.

15

00:00:45,580 --> 00:00:49,660

Full moon, bright, real bright.

16

00:00:49,660 --> 00:00:52,140

Then he took off and he followed my tree line.

17

00:00:52,140 --> 00:01:00,540

I'd say he's about 100 yards, 150 yards, 150 yards off my window, my second floor window.

18

00:01:00,540 --> 00:01:02,020

Now you've got a picture of my place.

19

00:01:02,020 --> 00:01:09,380

It's in the center of a 250 acre within 20 minutes of Philadelphia.

20

00:01:09,380 --> 00:01:11,780

I heard no noise.

21

00:01:11,780 --> 00:01:14,140

I couldn't describe.

22

00:01:14,140 --> 00:01:18,180

I thought it looked like a cigar myself, you know, like a long tube.

23

00:01:18,180 --> 00:01:20,180

No noise.

24

00:01:20,180 --> 00:01:23,180

Then in seconds he was gone.

25

00:01:23,180 --> 00:01:27,060

His vertical takeoff is slow.

26

00:01:27,060 --> 00:01:32,180

You know, then when he moves, he moves very fast.

27

00:01:32,180 --> 00:01:40,300

But the white lights were like icicles flashing all different configurations.

28

00:01:40,300 --> 00:01:47,180

I attend a Bible class at 6.30 in the morning, that particular morning and I told a voice

29

00:01:47,180 --> 00:01:49,180

about it.

30

00:01:49,180 --> 00:01:54,180

Then, but no one else told my wife.

31

00:01:54,180 --> 00:01:57,180

Then comes December.

32

00:01:57,180 --> 00:01:59,180

Can I ask you one question on that side?

33

00:01:59,180 --> 00:02:01,180

Okay, how close were you to that?

34

00:02:01,180 --> 00:02:03,180

Oh, about 150 yards.

35

00:02:03,180 --> 00:02:05,180

Right on my property.

36

00:02:05,180 --> 00:02:08,180

But this is the amazing thing now.

37

00:02:08,180 --> 00:02:18,180

On December the 11th, Monday, 12, 48 a.m., almost the exact time is the other one.

38

00:02:18,180 --> 00:02:22,180

Which was on, this is on standard time.

39

00:02:22,180 --> 00:02:24,180

The other one's on daylight time.

40

00:02:24,180 --> 00:02:28,180

It was almost a full moon, almost.

41

00:02:28,180 --> 00:02:34,180

I saw these bright lights in my bedroom and I looked down.

42

00:02:34,180 --> 00:02:39,180

And it was only there a few minutes before the start of the vertical takeoff.

43

00:02:39,180 --> 00:02:41,180

And I was at the window.

44

00:02:41,180 --> 00:02:43,180

We had huge windows.

45

00:02:43,180 --> 00:02:52,180

I would say my bedroom windows are all good five feet wide, clear, you know.

46

00:02:52,180 --> 00:03:03,180

And I thought, well, I'll open the window this time to see if it's a helicopter or a jet helicopter.

47

00:03:03,180 --> 00:03:06,180

When I opened the window, he came right at me.

48

00:03:06,180 --> 00:03:11,180

But maybe all 50 feet higher than the roof.

49

00:03:11,180 --> 00:03:13,180

Maybe 100 feet, I don't know.

50

00:03:13,180 --> 00:03:18,180

And I thought, I saw, but there was no noise until he went by and went,

51

00:03:18,180 --> 00:03:21,180

Just like a tennis racket.

52

00:03:21,180 --> 00:03:30,180

And I thought that these people walked in sort of dark suits,

53

00:03:30,180 --> 00:03:33,180

like five or six sets of controls with a bubble.

54

00:03:33,180 --> 00:03:36,180

Because I could see now from below.

55

00:03:36,180 --> 00:03:38,180

It looked like more like a delta wing.

56

00:03:38,180 --> 00:03:44,180

But I don't know how wide, but I say at least six across at the controls.

57

00:03:44,180 --> 00:03:49,180

But I could see up from underneath because I didn't have those lights by me.

58

00:03:49,180 --> 00:03:52,180

I mean, this bubble thing was underneath or on top?

59

00:03:52,180 --> 00:03:55,180

No, the bubble thing was right.

60

00:03:55,180 --> 00:03:58,180

Do you have any estimate of size on that object?

61

00:03:58,180 --> 00:04:01,180

I don't know, 75 feet wide.

62

00:04:01,180 --> 00:04:04,180

And you did detect figures inside?

63

00:04:04,180 --> 00:04:08,180

I thought I'm all, you know, everything happened so fast.

64

00:04:08,180 --> 00:04:12,180

I thought they were in space suits, really all the same.

65

00:04:12,180 --> 00:04:19,180

And he was maybe five or six across in the control cabinet.

66

00:04:19,180 --> 00:04:21,180

I never did call a newspaper.

67

00:04:21,180 --> 00:04:23,180

I never did call anyone.

68

00:04:23,180 --> 00:04:27,180

So I read this thing in the paper, then that's when I called your man Graham

69

00:04:27,180 --> 00:04:30,180

because he was interested.

70

00:04:30,180 --> 00:04:36,180

Because I never really did believe in it myself.

71

00:04:36,180 --> 00:04:41,180

Now I'm sure they're out there.

72

00:04:41,180 --> 00:04:45,180

But that one on December 11th, that appeared strictly as a bright light to start with?

73

00:04:45,180 --> 00:04:57,180

Right. No, the lights keep sort of oscillating or jumping, dancing, dancing lights.

74

00:04:57,180 --> 00:05:01,180

And it's hard to tell what it is when you see that.

75

00:05:01,180 --> 00:05:06,180

It looked like a big delt away, but he was moving though.

76

00:05:06,180 --> 00:05:09,180

Within 150 feet he was moving.

77

00:05:09,180 --> 00:05:15,180

150, the orange he was moving, must have been moving 150 miles an hour.

78

00:05:15,180 --> 00:05:24,180

Where they pulled in, where they were hovering, was like a jungle with a lot of vines and whatnot.

79

00:05:24,180 --> 00:05:30,180

It's pretty hard to tell in the winter time here because the growth is big, you know.

80

00:05:30,180 --> 00:05:40,180

But I was wondering if I shouldn't take a test if there was radiation there.

81

00:05:40,180 --> 00:05:48,180

Because it seems like they must run with a magnet or something because there's no jet.

82

00:05:48,180 --> 00:05:55,180

There's nothing, no atomic, I wouldn't say atomic, but I imagine atomic is too big.

83

00:05:55,180 --> 00:05:59,180

But if there was the radiation there.

84

00:05:59,180 --> 00:06:02,180

And that was in the hovering position?

85

00:06:02,180 --> 00:06:04,180

Oh, he moves, he moves.

86

00:06:04,180 --> 00:06:11,180

He just sort of, when he hovers there, he sort of twists a little bit, you know.

87

00:06:11,180 --> 00:06:13,180

Like a rocking motion?

88

00:06:13,180 --> 00:06:15,180

It's a rocking motion.

89

00:06:15,180 --> 00:06:18,180

Do you have any estimate of altitude at that point?

90

00:06:18,180 --> 00:06:22,180

Yeah, I would say maybe 50, 75 feet.

91

00:06:22,180 --> 00:06:24,180

And then as he approached the house?

92

00:06:24,180 --> 00:06:28,180

Well, no, he went up, no, he stayed there.

93

00:06:28,180 --> 00:06:35,180

Then when he, this is the second time, he went up maybe 150 feet, I'm saying.

94

00:06:35,180 --> 00:06:39,180

But it's amazing how clever they are.

95

00:06:39,180 --> 00:06:47,180

Big chimneys on my house is probably 1000 feet long.

96

00:06:47,180 --> 00:06:51,180

And these chimneys are hidden up there, you know.

97

00:06:51,180 --> 00:06:55,180

But it seems to me they probably only come in here.

98

00:06:55,180 --> 00:06:58,180

When there's a cloud cover, I never did see them.

99

00:06:58,180 --> 00:07:01,180

Only on the full moon.

100

00:07:01,180 --> 00:07:03,180

You know, when it's bright.

101

00:07:03,180 --> 00:07:07,180

And I was thinking I would put over there a sensor.

102

00:07:07,180 --> 00:07:12,180

That if the bright light would appear in that section, I'd get a buzz.

103

00:07:12,180 --> 00:07:15,180

Because I could be here a number of times.

104

00:07:15,180 --> 00:07:17,180

And I could have been sleeping.

105

00:07:17,180 --> 00:07:21,180

You know, I'm half awake, I can see this bright light.

106

00:07:21,180 --> 00:07:24,180

And that's what got me up.

107

00:07:24,180 --> 00:07:26,180

My eyesight is perfect.

108

00:07:26,180 --> 00:07:29,180

I'm not excitable.

109

00:07:29,180 --> 00:07:32,180

I don't think I'd get a picture of them.

110

00:07:32,180 --> 00:07:37,180

Unless I could have like a mirror or something.

111

00:07:37,180 --> 00:07:40,180

Do you think they're ultraviolet or something?

112

00:07:40,180 --> 00:07:43,180

That is possible.

113

00:07:43,180 --> 00:07:45,180

If the light is bright enough, you could...

114

00:07:45,180 --> 00:07:46,180

Oh, it's so bright though.

115

00:07:46,180 --> 00:07:49,180

You could get a picture, don't use a flashball though.

116

00:07:49,180 --> 00:07:50,180

No.

117

00:07:50,180 --> 00:07:55,180

And I was wondering if if there's any there for a while, we should take a flashlight and go over to

them.

118

00:07:55,180 --> 00:07:59,180

In other words, after we get a picture upstairs.

119

00:07:59,180 --> 00:08:02,180

To run outside and take a flashlight.

120

00:08:02,180 --> 00:08:04,180

To try to signal, you mean?

121

00:08:04,180 --> 00:08:05,180

Yes.

122

00:08:05,180 --> 00:08:07,180

Yes, it has been done.

123

00:08:07,180 --> 00:08:10,180

But when you do, don't aim the flashlight directly at the object.

124

00:08:10,180 --> 00:08:12,180

Either to the right or left or right or down.

125

00:08:12,180 --> 00:08:13,180

Right or left or right.

126

00:08:13,180 --> 00:08:14,180

I'm pointing something at them.

127

00:08:14,180 --> 00:08:16,180

Have people tried that?

128

00:08:16,180 --> 00:08:17,180

Oh yes.

129

00:08:17,180 --> 00:08:20,180

And in several cases they have responded.

130

00:08:20,180 --> 00:08:21,180

No, kidding.

131

00:08:21,180 --> 00:08:22,180

Yes.

132

00:08:22,180 --> 00:08:24,180

I think they're friendly.

133

00:08:24,180 --> 00:08:28,180

I don't know, but they move fast.

134

00:08:28,180 --> 00:08:29,180

You know, when they...

135

00:08:29,180 --> 00:08:32,180

They're slow on the vertical.

136

00:08:32,180 --> 00:08:36,180

But when they start to plane off, they really fly.

137

00:08:36,180 --> 00:08:38,180

They're slow going up.

138

00:08:38,180 --> 00:08:39,180

Very slow going up.

139

00:08:39,180 --> 00:08:40,180

Not too fast.

140

00:08:40,180 --> 00:08:44,180

But then when they move, it's like a bullet.

141

00:08:44,180 --> 00:08:46,180

Alright sir, thank you again.

142

00:08:46,180 --> 00:08:47,180

Right on.
