

1

00:00:00,000 --> 00:00:12,000

Now here they come with a water and a ferry out from the little river of Christ.

2

00:00:12,000 --> 00:00:15,000

It's the man who raised it.

3

00:00:15,000 --> 00:00:18,000

It's that money for your deed, if you can.

4

00:00:18,000 --> 00:00:20,000

It's food.

5

00:00:20,000 --> 00:00:24,000

And in the robbing, fraud rates are even rolling.

6

00:00:24,000 --> 00:00:27,000

It's from wicked children's price.

7

00:00:27,000 --> 00:00:30,000

When your debt is stolen in wealth,

8

00:00:30,000 --> 00:00:33,000

but it lies on the fearsome righteously,

9

00:00:33,000 --> 00:00:35,000

works as with your desire

10

00:00:35,000 --> 00:00:38,000

and often, if you give your taste!

11

00:00:38,000 --> 00:00:40,000

Look from down,

12

00:00:40,000 --> 00:00:43,000

you hear the tear of his hell■ pendant!

13

00:00:43,000 --> 00:00:45,000

He'll kill!

14

00:00:57,000 --> 00:01:24,400

Speaking of flying saucers, Frank Edwards has just written this book called, which really

15

00:01:24,400 --> 00:01:31,400

lays it on the line, flying saucers are serious business. I have met him before. He's a fascinating

16

00:01:31,400 --> 00:01:36,400

gentleman. I welcome him now directly off his saucer. Here's Frank Edwards.

17

00:01:36,400 --> 00:02:01,400

I've been hovering over the building for quite a while, but I am from this planet.

18

00:02:02,400 --> 00:02:06,400

First question. Do you believe these flying saucers are real?

19

00:02:06,400 --> 00:02:11,400

I believe that the Air Force is quite right when they told every Air Base Commander under the American flag

20

00:02:11,400 --> 00:02:19,400

in a special order, which is printed in that book, that unidentified flying objects are a serious problem for the U.S. Air Force.

21

00:02:19,400 --> 00:02:24,400

And then it goes ahead and tells how to pick up the pieces, when to shoot at them, and how to handle them.

22

00:02:24,400 --> 00:02:25,400

How far, where are they from?

23

00:02:25,400 --> 00:02:28,400

This is the big question. Nobody knows.

24

00:02:28,400 --> 00:02:32,400

Do you believe they're from somewhere?

25

00:02:32,400 --> 00:02:40,400

Other than Earth, oh yes. I don't know of anyone who has done any substantial amount of research on this problem,

26

00:02:40,400 --> 00:02:45,400

who has ever arrived at any other conclusion. Dr. Herman Obert, the great German rocket scientist,

27

00:02:45,400 --> 00:02:53,400

Admiral Hillen Cutter, the former head of CIA, Colonel J.J. Batty III, the aviation adviser to NATO, they all say the same thing.

28

00:02:53,400 --> 00:03:02,400

These are extraterrestrial devices operated by intelligent beings of a very high order, and they are operated by intelligent beings.

29

00:03:02,400 --> 00:03:10,400

Well, that is sometimes, what do you mean, inside the devices? Some other nuclear operators, yes.

30

00:03:10,400 --> 00:03:15,400

Where would they be from? This is the big question. I wish we knew.

31

00:03:15,400 --> 00:03:18,400

Who admits that, officially?

32

00:03:18,400 --> 00:03:23,400

Admiral Hillen Cutter, the former head of CIA, Dr. Herman Obert, the great German rocket scientist.

33

00:03:23,400 --> 00:03:25,400

Why be the former head?

34

00:03:25,400 --> 00:03:27,400

I'm not the admitted it.

35

00:03:27,400 --> 00:03:29,400

Oh.

36

00:03:31,400 --> 00:03:35,400

Listen, no, I am not a disbeliever. I'm wide open.

37

00:03:39,400 --> 00:03:41,400

All right.

38

00:03:42,400 --> 00:03:57,400

The present head, let's get out of the cases. The present deputy public relations director of NASA, Al Chop, who used to be the public information officer with the Air Force.

39

00:03:57,400 --> 00:04:07,400

He's been promoted. He's gone up. And he says that we've known for years that these things were interplanetary and that they had us under surveillance.

40

00:04:07,400 --> 00:04:09,400

Are they friendly?

41

00:04:09,400 --> 00:04:19,400

In 19 years of research, I have never known of a single case where they have indicated by an overt act that they were unfriendly.

42

00:04:19,400 --> 00:04:23,400

I don't know of a single hostile act by the UFOs toward us.

43

00:04:23,400 --> 00:04:25,400

Are they unfriendly?

44

00:04:25,400 --> 00:04:32,400

Yes, we have done some things that, well, for instance, we shoot at them. And they may think this is unfriendly.

45

00:04:32,400 --> 00:04:34,400

Who shot at them?

46

00:04:34,400 --> 00:04:37,400

The Air Force has shot at them on occasion. The Navy has shot at them.

47

00:04:37,400 --> 00:04:45,400

The individuals have shot at them, or just about a month or so ago, up here in Maine, shot at one.

48

00:04:45,400 --> 00:04:48,400

And here, a couple of times, it was at 22 Magnum.

49

00:04:48,400 --> 00:04:50,400

And the bullets ricocheted off of it.

50

00:04:50,400 --> 00:04:56,400

At Kelly, Kentucky in 1952, they shot at one with a shotgun.

51

00:04:56,400 --> 00:04:59,400

And they could definitely hear it being hit.

52

00:04:59,400 --> 00:05:03,400

Incidentally, I was in Evansville when this thing happened down there.

53

00:05:03,400 --> 00:05:06,400

And I was there the next day, an interview of these people.

54

00:05:06,400 --> 00:05:13,400

This is quite a case and is one of the best documented and most famous cases in the UFO history.

55

00:05:13,400 --> 00:05:21,400

There's another example of our hostility. I guess you'd call it at Milan, Italy in October of 1954.

56

00:05:21,400 --> 00:05:28,400

One of these glowing disc-shaped things went down in an abandoned sports field in Milan out at the edge of town.

57

00:05:28,400 --> 00:05:34,400

And it was dark, and a quite a group of people gathered along there, 25 or 30, peeking at it through the fence.

58

00:05:34,400 --> 00:05:42,400

And they could see the glowing thing on the ground, and they could see some sort of creatures moving around between where they stood and the object.

59

00:05:42,400 --> 00:05:45,400

And a fellow came along with a truck loaded garbage.

60

00:05:45,400 --> 00:05:49,400

And he pulled up alongside the fence so he could stand on the truck and see better.

61

00:05:49,400 --> 00:05:53,400

And then some of these crowd that got the idea, that'd be better for them too.

62

00:05:53,400 --> 00:06:03,400

They all climbed up on the truck, and they told the Italian authorities afterward that somebody had the idea of bombarding this object and the creatures.

63

00:06:03,400 --> 00:06:07,400

And so they grabbed a lot of this garbage and let it fly with it.

64

00:06:07,400 --> 00:06:14,400

And they told the authorities that they scored several hits before the little creatures got in this thing and took off.

65

00:06:14,400 --> 00:06:22,400

Now this would be rather ironic if these things are interplanetary to travel 40 million miles and get hit in the head with a rotten orange.

66

00:06:23,400 --> 00:06:26,400

Imagine what they think of us.

67

00:06:26,400 --> 00:06:28,400

They would know what it was though, would they?

68

00:06:28,400 --> 00:06:31,400

They got hit hard enough they'd know what a fuck it was.

69

00:06:31,400 --> 00:06:34,400

Yeah, yeah, fascinating. We'll be right back.

70

00:06:52,400 --> 00:07:00,400

What Frank or all these reports, for example, that one that happened was in Michigan or Wisconsin, where they proved that it was swamp gas?

71

00:07:00,400 --> 00:07:03,400

Well, they didn't really prove it. They said that it was.

72

00:07:03,400 --> 00:07:08,400

However, the men who were authorities on swamp gas said that it definitely was not.

73

00:07:08,400 --> 00:07:11,400

The temperature was wrong, there was wind, there were many things wrong.

74

00:07:11,400 --> 00:07:16,400

They had to come up with an answer real quick, and that was the best they could do.

75

00:07:16,400 --> 00:07:18,400

And you are convinced yourself?

76

00:07:18,400 --> 00:07:20,400

How many years of research?

77

00:07:20,400 --> 00:07:23,400

Well, they listened to you in Washington?

78

00:07:23,400 --> 00:07:25,400

I hope so.

79

00:07:25,400 --> 00:07:28,400

They will on this show.

80

00:07:28,400 --> 00:07:30,400

Yes, yes.

81

00:07:30,400 --> 00:07:34,400

Have there been sightings around your home of Indianapolis?

82

00:07:34,400 --> 00:07:38,400

Yes, about two weeks ago over the Western Electric Plant there.

83

00:07:38,400 --> 00:07:45,400

This thing came down within three or four hundred feet of the plant and the guards and a lot of the people around there were out watching it.

84

00:07:45,400 --> 00:07:50,400

And they could see it quite clearly. It was, as I said, within three or four hundred feet of them.

85

00:07:50,400 --> 00:07:52,400

It was around there about fifteen minutes before it took.

86

00:07:52,400 --> 00:07:56,400

Why are there always reports that they come near electrical plants or electrical wires?

87

00:07:56,400 --> 00:08:00,400

This I don't know except that they have upon occasion caused blackouts.

88

00:08:00,400 --> 00:08:07,400

They did not cause the big blackout last winter, you know, the one up in the New England states, but they have caused others.

89

00:08:07,400 --> 00:08:09,400

This is very evident.

90

00:08:09,400 --> 00:08:10,400

I have no question about that.

91

00:08:10,400 --> 00:08:19,400

I've got a case in this book where they knocked a power plant out of business in Utah for forty-two minutes until we've got two flights of jet interceptors up there to chase the thing away.

92

00:08:19,400 --> 00:08:25,400

The great thought that they might need that electrical energy to get them back to where they came from?

93

00:08:25,400 --> 00:08:26,400

Well, this I don't know.

94

00:08:26,400 --> 00:08:30,400

Dr. Olberth and other scientists say that they operate by distorting the gravitational field.

95

00:08:30,400 --> 00:08:35,400

This will explain how they knocked out all the scientific gear in the Antarctic last July.

96

00:08:35,400 --> 00:08:36,400

Do they do that?

97

00:08:36,400 --> 00:08:37,400

They do it three times.

98

00:08:37,400 --> 00:08:40,400

July the second, July the fifth, and July the seventh.

99

00:08:40,400 --> 00:08:42,400

Do you do it so positively?

100

00:08:42,400 --> 00:08:43,400

It's hard to question you.

101

00:08:43,400 --> 00:08:45,400

Well, the scientists themselves.

102

00:08:45,400 --> 00:08:46,400

What?

103

00:08:46,400 --> 00:09:00,400

One way is to just prove the flying saucers that when they said that they took off, we just proved by the fact that Steve grabbed the waitress with a tray and trapped and had a console of flying saucers.

104

00:09:00,400 --> 00:09:05,400

And the other one, the other one.

105

00:09:05,400 --> 00:09:10,400

And the odd item in Milano, Italy with those two was that routine.

106

00:09:10,400 --> 00:09:13,400

I could have found some of them.

107

00:09:13,400 --> 00:09:16,400

He cleaned that flying saucer bit up in there, didn't he?

108

00:09:16,400 --> 00:09:20,400

Why do they feel that they will not contact us?

109

00:09:20,400 --> 00:09:22,400

Because we see them hostile to them?

110

00:09:22,400 --> 00:09:30,400

Well, I just think that the men who are authorities on this field at the time is not right yet that they are getting ready to do this.

111

00:09:30,400 --> 00:09:39,400

And it will see we've gone through about six phases of this thing in 19 years and what the military calls the over-contaction coming through here.

112

00:09:39,400 --> 00:09:43,400

Frank Edwards' book, Flying Saucers, Serious Business.

113

00:09:43,400 --> 00:09:54,400

I'd like to thank my lawyer, to Marty Allen and Steve Wauvergne, to Colton and Wilder, and both of these come back to us.

114

00:09:54,400 --> 00:09:58,400

WNYS-TV, Channel 9 in Syracuse, New York.
