

1

00:00:00,000 --> 00:00:07,000

I wanted to ask Mr. Edwards, what's it that we all enjoyed very much listening to on TV

2

00:00:07,000 --> 00:00:09,000

when I was younger?

3

00:00:09,000 --> 00:00:12,000

Why do they always have to add that?

4

00:00:12,000 --> 00:00:18,000

I know that I got a letter the other day from a guy who wanted to bring his grandson to meet me,

5

00:00:18,000 --> 00:00:23,000

and they developed that the grandpa used to listen to me in Pittsburgh when he was a boy.

6

00:00:23,000 --> 00:00:29,000

Greatest, the greatest saddest man, you've hurt this man deeply, but go ahead with your question.

7

00:00:29,000 --> 00:00:31,000

Sorry about that.

8

00:00:31,000 --> 00:00:33,000

I'm grieving now.

9

00:00:33,000 --> 00:00:42,000

What I wanted to ask is, do you believe that the Air Force will take off their restrictions,

10

00:00:42,000 --> 00:00:44,000

and why do they keep holding them now?

11

00:00:44,000 --> 00:00:49,000

I mean, people are getting more enlightened, they're not getting hysterical,

12

00:00:49,000 --> 00:00:52,000

they work back when Orson Wells was doing all these things,

13

00:00:52,000 --> 00:00:55,000

so I'd like to take the restrictions off.

14

00:00:55,000 --> 00:01:00,000

Well, let me put this in his proper perspective here.

15

00:01:00,000 --> 00:01:08,000

The Air Force did not impose the restrictions, they were imposed on the Air Force from some higher source.

16

00:01:08,000 --> 00:01:11,000

My guess would be the National Security Council.

17

00:01:11,000 --> 00:01:16,000

So the Air Force cannot remove the restrictions which were imposed upon it,

18

00:01:16,000 --> 00:01:22,000

but I think they would gladly, you know, probability, they would gladly tell the public the truth.

19

00:01:22,000 --> 00:01:26,000

They were permitted to, but they can only go so far.

20

00:01:26,000 --> 00:01:33,000

And that's what I do in my book, is to tell the public what the Air Force is not permitted to tell them.

21

00:01:33,000 --> 00:01:39,000

And I don't think the Air Force can make any change until the change is made for it,

22

00:01:39,000 --> 00:01:42,000

although I feel that they probably would like to make it.

23

00:01:42,000 --> 00:01:47,000

I see. And on one more question like that, is your book going to come out and pay for that?

24

00:01:47,000 --> 00:01:54,000

Eventually, yes. I really don't know when, but Van Vooks bought the paperback rights to it,

25

00:01:54,000 --> 00:01:58,000

and I really don't know when it will come out in paperbacks.

26

00:01:58,000 --> 00:02:01,000

Because I've got a paperback budget, so I'll wait and see what it's like.

27

00:02:01,000 --> 00:02:04,000

It follows as the paperbacks.

28

00:02:04,000 --> 00:02:10,000

It follows as the night shall follow the day that all books will come out in paperbacks.

29

00:02:10,000 --> 00:02:11,000

Thank you.

30

00:02:11,000 --> 00:02:12,000

Thank you for calling.

31

00:02:12,000 --> 00:02:13,000

Hello.

32

00:02:13,000 --> 00:02:14,000

Hello.

33

00:02:14,000 --> 00:02:15,000

Yes, sir.

34

00:02:15,000 --> 00:02:16,000

Mr. Targush?

35

00:02:16,000 --> 00:02:17,000

Yes, sir.

36

00:02:17,000 --> 00:02:18,000

I can hardly hear you.

37

00:02:18,000 --> 00:02:19,000

Well, I hear you beautifully.

38

00:02:19,000 --> 00:02:20,000

All right. Thank you.

39

00:02:20,000 --> 00:02:23,000

I would like to know for me as a gentleman there, please,

40

00:02:23,000 --> 00:02:30,000

what's your opinion would be of the author of the Anatomy of a Phenomenon by Jacques Barou?

41

00:02:30,000 --> 00:02:33,000

Yes, he treats it from the standpoint of an astronomer.

42

00:02:33,000 --> 00:02:37,000

There are some aspects of it with which he is obviously unfamiliar.

43

00:02:37,000 --> 00:02:44,000

But the research that he did was good, and his treatment of the subject is logical and very intelligent,

44

00:02:44,000 --> 00:02:47,000

as it should be from the man of his caliber.

45

00:02:47,000 --> 00:02:50,000

In your experiences and your studies and your research on it,

46

00:02:50,000 --> 00:02:54,000

what is the idea of the Phenomenon incident?

47

00:02:54,000 --> 00:03:00,000

I have no opinions on that at all.

48

00:03:00,000 --> 00:03:02,000

The first place, I'm not familiar with it.

49

00:03:02,000 --> 00:03:12,000

I regarded it as a, and for what I think it is, some sort of a religious, curious religious story.

50

00:03:12,000 --> 00:03:17,000

And I have never formed any opinions or conclusions on it.

51

00:03:17,000 --> 00:03:22,000

I saw a book somewhere, and I don't know whose book it was not, may have been Valais,

52

00:03:22,000 --> 00:03:28,000

which treated the Fatima incident as though it might be involved with UFOs.

53

00:03:28,000 --> 00:03:32,000

But on the basis of what I know of it, I doubt that,

54

00:03:32,000 --> 00:03:36,000

and I certainly don't know enough about it to arrive at the same conclusion.

55

00:03:36,000 --> 00:03:37,000

Let's put it that way.

56

00:03:37,000 --> 00:03:38,000

Thank you very much.

57

00:03:38,000 --> 00:03:39,000

Thank you, Bruce Moley.

58

00:03:39,000 --> 00:03:40,000

Thank you.

59

00:03:40,000 --> 00:03:45,000

I'm a long distance call, and let's move to our telephone and see what this party wants to know

60

00:03:45,000 --> 00:03:46,000

or wants to tell us.

61

00:03:46,000 --> 00:03:47,000

Hello?

62

00:03:47,000 --> 00:03:48,000

Hello.

63

00:03:48,000 --> 00:03:49,000

Yes, Ben?

64

00:03:49,000 --> 00:03:53,000

I was wondering, since Mr. English and Ms. Genette are associated with my parents,

65

00:03:53,000 --> 00:04:00,000

I have a publication from the United States in which there is a statement that on December 4th,

66

00:04:00,000 --> 00:04:02,000

and from Anne Huguet,

67

00:04:02,000 --> 00:04:06,000

Gemini 7 Astronauts Report, Bogey at 10 o'clock.

68

00:04:06,000 --> 00:04:10,000

Now, did they actually see something?

69

00:04:10,000 --> 00:04:11,000

Who were the astronauts?

70

00:04:11,000 --> 00:04:12,000

I don't know.

71

00:04:12,000 --> 00:04:13,000

It's not mentioned.

72

00:04:13,000 --> 00:04:15,000

I think this was Boorman.

73

00:04:15,000 --> 00:04:17,000

I believe this was the Boorman case.

74

00:04:17,000 --> 00:04:19,000

He was one of the astronauts.

75

00:04:19,000 --> 00:04:25,000

In that case, they tried to assure him from the base station that he was looking at a booster rocket.

76

00:04:25,000 --> 00:04:26,000

He said, right, you are.

77

00:04:26,000 --> 00:04:31,000

I see the booster rocket in one direction, but this Bogey is in another.

78

00:04:31,000 --> 00:04:36,000

And he said, Bogey is definitely not a booster rocket, nor a satellite.

79

00:04:36,000 --> 00:04:40,000

He said, this is a football-shaped or egg-shaped thing.

80

00:04:40,000 --> 00:04:44,000

It's yellowish, orange in color and very bright.

81

00:04:44,000 --> 00:04:51,000

Now, if that description was accurate, then it would also fit the description of the object

82

00:04:51,000 --> 00:04:58,000

which was photographed by Major McGivott when he was up there with Major White.

83

00:04:58,000 --> 00:05:03,000

And they saw three of these things in one orbit, and he made an excellent picture of one

84

00:05:03,000 --> 00:05:09,000

which was circling their capsule and leaving a vapor trail behind it, which shows clearly in the picture.

85

00:05:09,000 --> 00:05:13,000

I got the picture from NASA, and I have it in my book.

86

00:05:13,000 --> 00:05:14,000

Circling their capsule?

87

00:05:14,000 --> 00:05:15,000

Yes.

88

00:05:15,000 --> 00:05:18,000

Didn't Scott Carpenter also have an hallucination?

89

00:05:18,000 --> 00:05:24,000

I don't know whether Carpenter did or not, but I know that Major Gordon Cooper was the first one.

90

00:05:24,000 --> 00:05:28,000

And then, Gordon was the next one.

91

00:05:28,000 --> 00:05:30,000

And then, White and McGivott.

92

00:05:30,000 --> 00:05:35,000

And then, more recently, Collins and Young.

93

00:05:35,000 --> 00:05:41,000

And while they were describing the two that were pacing them, they were cut off the radio.

94

00:05:41,000 --> 00:05:45,000

This, of course, saying, kept the...

95

00:05:45,000 --> 00:05:48,000

I was interested in greatly his comment on that.

96

00:05:48,000 --> 00:05:52,000

He said, well, Collins and Young were cut off, so they couldn't describe it anymore.

97

00:05:52,000 --> 00:05:55,000

And the newsman couldn't hear it, but he said, don't worry, boys.

98

00:05:55,000 --> 00:05:58,000

The Air Force would have told you it was swamp gas.

99

00:05:58,000 --> 00:06:05,000

It was always interesting how that'll tell you that no such object can be recorded as a UFO on radar.

100

00:06:05,000 --> 00:06:11,000

And you have thousands and thousands of other boys, I mean thousands and scenes of other boys.

101

00:06:11,000 --> 00:06:16,000

Well, the only statement of that type, to my knowledge, CDS special,

102

00:06:16,000 --> 00:06:22,000

was made on that thing and what they did there, they edited the rest of the statement out

103

00:06:22,000 --> 00:06:27,000

off of the tape by the authority who made it to create the...

104

00:06:27,000 --> 00:06:30,000

to change the entire meeting of what the man said.

105

00:06:30,000 --> 00:06:36,000

Now, before you said that one of these objects was recorded in, was it McGivott's study?

106

00:06:36,000 --> 00:06:39,000

Was there going the capsule?

107

00:06:39,000 --> 00:06:44,000

I was going to say that there are literally thousands of pieces of hardware up there.

108

00:06:44,000 --> 00:06:49,000

No. All of which are known to NORAD and are plotted and NORAD knows where they are and what they are.

109

00:06:49,000 --> 00:06:53,000

Even the glove all the time. Even the glove that was lost.

110

00:06:53,000 --> 00:06:55,000

They can plot.

111

00:06:55,000 --> 00:06:57,000

Okay, that puts me down. How about you, Mary?

112

00:06:57,000 --> 00:07:05,000

That was really interesting. I've been having a burning battle with someone and that might help.

113

00:07:05,000 --> 00:07:10,000

I'll try to get along with your husband.

114

00:07:10,000 --> 00:07:13,000

I'm afraid he is quite a skeptic.

115

00:07:13,000 --> 00:07:18,000

Well, let me point out to you that this is a field where the only skeptics are the uninformed.

116

00:07:18,000 --> 00:07:21,000

You may quote me to him and they'll get you up.

117

00:07:21,000 --> 00:07:23,000

I will use that.

118

00:07:23,000 --> 00:07:29,000

I actually have an article that I have picked up. I don't know whether you are familiar with it.

119

00:07:29,000 --> 00:07:37,000

It was in August 29th, the Cleveland press about Mr. Heineck, Dr. Heineck.

120

00:07:37,000 --> 00:07:39,000

Yes.

121

00:07:39,000 --> 00:07:51,000

It charges that the American science or scientists has demonstrated a form of provincialism in failing to tackle one of the great mysteries of the 20th century.

122

00:07:51,000 --> 00:08:09,000

And he warned that the attitudes of modern scientists toward UFOs, terrible, those of the evidence for meteorites reported 150 years ago when science ridiculed the notion that stones excel from the sky.

123

00:08:09,000 --> 00:08:14,000

Oh, yes, that was all the classic blue blues of science.

124

00:08:14,000 --> 00:08:26,000

Even when some noted scientists saw these things fall, they assured these noted scientists that they were nuts, that there could be no stones falling from the sky because there were no stones in the sky.

125

00:08:26,000 --> 00:08:28,000

Are you speaking of tectites?

126

00:08:28,000 --> 00:08:30,000

No, no, no. Talking of meteorites.

127

00:08:30,000 --> 00:08:31,000

Meteorites.

128

00:08:31,000 --> 00:08:41,000

In 1805, before they even admitted that the things existed, although many eminent scientists had been present when they had fallen.

129

00:08:41,000 --> 00:08:48,000

But to science, orthodox science would not accept it because it was contrary to their belief.

130

00:08:48,000 --> 00:08:51,000

There couldn't be any stones falling because there were none up there.

131

00:08:51,000 --> 00:08:55,000

There can't be any UFOs coming down because there are none out there.

132

00:08:55,000 --> 00:08:57,000

It's very simple.

133

00:08:57,000 --> 00:09:02,000

What your opinion was of this article? Has he had a change of heart?

134

00:09:02,000 --> 00:09:08,000

No, let me point out to you that Dr. Heineck is a very fine gentleman.

135

00:09:08,000 --> 00:09:23,000

And Dr. Heineck, as an employee of the Air Force, has to make some statements with which he may not be in full accord, such as the notorious swamp gas statement that he had to hand out up in Michigan last spring.

136

00:09:23,000 --> 00:09:30,000

He was, according to some statements he made in the presence of some network newsmen who passed him on to me.

137

00:09:30,000 --> 00:09:34,000

He was not at all in accord with that statement.

138

00:09:34,000 --> 00:09:38,000

But Heineck is a very intelligent man. He's a very honest man.

139

00:09:38,000 --> 00:09:52,000

And I think, in view of some things that he said, including the statement that you're quoting, that he would like to see this whole thing thrown open to real research and real discussion and real disclosure.

140

00:09:52,000 --> 00:09:54,000

He can be of help. I'll tell you that.

141

00:09:54,000 --> 00:09:56,000

It does clear up my doubt.

142

00:09:56,000 --> 00:09:58,000

You're the best man I had yet.

143

00:09:58,000 --> 00:10:01,000

Yes, that's right. And thank you very much for following.

144

00:10:01,000 --> 00:10:02,000

You're very much welcome.

145

00:10:02,000 --> 00:10:03,000

Hello.

146

00:10:03,000 --> 00:10:04,000

Hello, Mr. Douglass.

147

00:10:04,000 --> 00:10:05,000

Yes, sir.

148

00:10:05,000 --> 00:10:11,000

I would like to ask Mr. Maher for your other gentlemen.

149

00:10:11,000 --> 00:10:12,000

That's my good one.

150

00:10:12,000 --> 00:10:13,000

Mr. Edwards.

151

00:10:13,000 --> 00:10:14,000

Uh-huh.

152

00:10:14,000 --> 00:10:33,000

It's supposedly, though, I suppose I've been answered already, but I was wondering about this curious loss of film and the fogging of a film on the last two Germany shots, whether this had to do with the fighting or not.

153

00:10:33,000 --> 00:10:45,000

In other words, in a civil fight, today's shots, they said the last two films were lost or one was fogged and one was lost, inadvertently.

154

00:10:45,000 --> 00:10:47,000

Arila, are you in film?

155

00:10:47,000 --> 00:10:48,000

I'm not in film.

156

00:10:48,000 --> 00:10:54,000

I'm in a relationship with that. I know frequently the contactees will conveniently lose a film. I heard that once.

157

00:10:54,000 --> 00:10:56,000

You better explain to this gentleman who the contactees are.

158

00:10:56,000 --> 00:11:07,000

The contactees are the people who claim they've been communicating with creatures from outer space, et cetera. But as far as this is concerned, I really don't know. I couldn't answer you. I'm sorry.

159

00:11:07,000 --> 00:11:14,000

Well, no. I mean, on the, I know they had to walk in space with Commander White.

160

00:11:14,000 --> 00:11:31,000

But, like on today's TV program, they were saying that two films were lost or one was lost and one shot and one was badly fogged at the age they couldn't show it.

161

00:11:31,000 --> 00:11:48,000

Well, I'll tell you, so many things could cause that. And particularly, the normal radiation out there in space would have a tendency to fog film unless the camera was, had some kind of protection around it, probably a lead sheet.

162

00:11:48,000 --> 00:11:58,000

So I don't think that either Earl or I would be in a position to comment on that because it could be due to so many things other than UFO activity.

163

00:11:58,000 --> 00:12:06,000

Well, what I was driving at, maybe they were busy photographing other things.

164

00:12:06,000 --> 00:12:12,000

Yeah, that could be. They don't want to show the pictures anybody, so they said we didn't get it.

165

00:12:12,000 --> 00:12:30,000

Well, we were charging at the loss of communication. And I was noticing today they said on a couple of counts where they didn't have too much talk between the ground, or at least it wasn't broadcast between the ground and the space caps.

166

00:12:30,000 --> 00:12:34,000

Well, I think that would be sort of a supposition.

167

00:12:34,000 --> 00:12:36,000

I'm sure more facts were, were gathered.

168

00:12:36,000 --> 00:12:46,000

Years ago I had the pleasure of meeting Joe Walker and I showed him some things that had been printed in Europe and then had been translated for him and sent them out to his home.

169

00:12:46,000 --> 00:12:56,000

Joe's the man who did that X-15 flight faster than a human in a plane, you know, and then unfortunately just very recently was killed. He was a great guy.

170

00:12:56,000 --> 00:13:17,000

And I had an interesting letter I received from him later. But while he was up near Seattle, Washington one time, he lectured and was highly criticized for it by NASA because he had spoken of the film that was taken through the gun camera, the pictures that were taken through the gun camera.

171

00:13:17,000 --> 00:13:27,000

And this country shushed it pretty quickly, but in Europe they played it up pretty fast because apparently there's some reporters there that picked it up and then put in the European papers.

172

00:13:27,000 --> 00:13:30,000

Will it be clear that he was followed by some objects?

173

00:13:30,000 --> 00:13:37,000

Well, he actually himself didn't see them, but usually it was a rear view, a rear view movie camera.

174

00:13:37,000 --> 00:13:47,000

And it photographed these objects coming up in back of the tail of his X-15 rocket plane. And there were, I believe, five of them. I've got the story there in the book.

175

00:13:47,000 --> 00:13:54,000

And they flew an echelon formation behind his plane. And the official explanation was that these were ice flakes.

176

00:13:54,000 --> 00:14:07,000

Well, now educated ice flakes are something new in the field of aerial phenomena, especially

educated ice flakes that can fly in formation behind a plane that's going 25 or 30, or 500 miles an hour.

177

00:14:07,000 --> 00:14:09,000

And were they supposedly approaching the plane?

178

00:14:09,000 --> 00:14:16,000

They kept their distance and they maneuvered with it. In other words, they followed the same maneuvers.

179

00:14:16,000 --> 00:14:21,000

The oxygen and ice flakes don't maneuver like these did.

180

00:14:22,000 --> 00:14:26,000

Mr. Gurgler, there is one other thing that's curious to me because,

181

00:14:26,000 --> 00:14:27,000

Who was it for?

182

00:14:27,000 --> 00:14:40,000

You were saying how on this one, a count back in the early 20s, or rather going back, which is,

it's not in the 1800s,

183

00:14:40,000 --> 00:14:46,000

where this rather cumbersome object was cited.

184

00:14:46,000 --> 00:15:01,000

And then going all the way back to the 20s, and these people said that they saw this object and they disappeared between that period of time, between the 40s.

185

00:15:01,000 --> 00:15:02,000

Right.

186

00:15:02,000 --> 00:15:10,000

In other words, they were just attempting to contact or reply to space or whatever they were doing.

187

00:15:10,000 --> 00:15:21,000

But I can't understand the speed of development between back in the 20s and the 20 years.

188

00:15:21,000 --> 00:15:22,000

You mean in the 20 year period?

189

00:15:22,000 --> 00:15:23,000

What?

190

00:15:23,000 --> 00:15:29,000

You mean you think we're crediting them with too much technological improvement in the 20 year period?

191

00:15:29,000 --> 00:15:39,000

Well, I can't, when I balance this, that's an account against accounts way back in the biblical times.

192

00:15:39,000 --> 00:15:40,000

Yeah.

193

00:15:40,000 --> 00:15:41,000

That was cited.

194

00:15:41,000 --> 00:15:42,000

This is what's confusing me.

195

00:15:42,000 --> 00:15:51,000

In other words, some of those accounts, as though they were more advanced then, than they were during this period, during the 20s.

196

00:15:51,000 --> 00:15:53,000

Well, no, I don't think so.

197

00:15:53,000 --> 00:15:59,000

And you must remember that technological development can sometimes come very fast.

198

00:15:59,000 --> 00:16:06,000

Don't forget now that eight years ago, we could not get a four pound satellite off the launching pad.

199

00:16:06,000 --> 00:16:07,000

Eight years ago.

200

00:16:07,000 --> 00:16:09,000

And look what we're doing now.

201

00:16:09,000 --> 00:16:11,000

We put one of those 8,200 pounds.

202

00:16:11,000 --> 00:16:12,000

Yeah.

203

00:16:12,000 --> 00:16:16,000

And eight years ago, we couldn't get that more pounder off the pad down there.

204

00:16:16,000 --> 00:16:19,000

Look what we've done in eight years.

205

00:16:19,000 --> 00:16:23,000

Look what we'll be doing if we continue at this rate.

206

00:16:23,000 --> 00:16:26,000

Look what we'll be doing in eight more years.

207

00:16:26,000 --> 00:16:36,000

And I don't think it's inconceivable at all that someone else could have made the same or even more

impressive gains in ten or ten years.

208

00:16:36,000 --> 00:16:39,000

In ten or fifteen or twenty years.

209

00:16:39,000 --> 00:16:41,000

Can I ask one question?

210

00:16:41,000 --> 00:16:42,000

Yes, sir.

211

00:16:42,000 --> 00:16:50,000

Now, as a gentleman, like a conductor, whether it's these crafts are possibly our inner solar or inner stellar.

212

00:16:50,000 --> 00:16:59,000

Dr. Herman O'Bart, the great German rocket scientist, said at the end of his investigation of these things for the West German government,

213

00:16:59,000 --> 00:17:03,000

and he made the statement in October of 54 at Innsbruck.

214

00:17:03,000 --> 00:17:13,000

He said that he and his scientific colleagues who had worked on that commission had come to the unanimous opinion that these things did not originate in our solar system,

215

00:17:13,000 --> 00:17:17,000

but that they had been coming here for a very long time.

216

00:17:17,000 --> 00:17:28,000

And I think that that's about as good a guess as anybody has made yet in all the military men and scientists within whom I'm associated are of O'Bart's opinion.

217

00:17:28,000 --> 00:17:30,000

And they share the same view.

218

00:17:30,000 --> 00:17:38,000

They don't know where these things come from, but they've obviously been coming here sporadically at least for a long time.

219

00:17:38,000 --> 00:17:39,000

Okay.

220

00:17:39,000 --> 00:17:40,000

Alright, so thank you.

221

00:17:40,000 --> 00:17:42,000

Hello, Mr. German.

222

00:17:42,000 --> 00:17:43,000

Yes, sir.

223

00:17:43,000 --> 00:17:48,000

Concerning the phenomenon of the USOs, UFOs, it's a...

224

00:17:48,000 --> 00:17:50,000

Did you turn your video down, sir?

225

00:17:50,000 --> 00:17:51,000

Yes.

226

00:17:51,000 --> 00:17:52,000

Could you please, thank you.

227

00:17:52,000 --> 00:18:04,000

I have an attention that's due to my observations that possibly from the numerous sightings I've seen over or heard of over the Great Lakes region and the Great Plains area,

228

00:18:04,000 --> 00:18:17,000

these sightings, the UFOs have a tendency to be seen in an area where there's a lot of sand and a lot of pure or fresh water.

229

00:18:17,000 --> 00:18:20,000

Now, is there any information coming?

230

00:18:20,000 --> 00:18:27,000

Hello. You're referring to the seeming preponderance of the sightings in the past in the Southwest?

231

00:18:27,000 --> 00:18:30,000

That's right. Here and also around the Great Lakes region here.

232

00:18:30,000 --> 00:18:39,000

Well, I'll tell you, I think that the real reason these things are seen more frequently in, say, the Midwest and the Great Plains states in the Southwest,

233

00:18:39,000 --> 00:18:44,000

they're seen more frequently in those areas because of viewing conditions. The seeing conditions are better.

234

00:18:44,000 --> 00:18:54,000

They're around big cities, say, New York City. One thing you've got a lot of haze, another thing you've got a lot of light in the viewing conditions are poor.

235

00:18:54,000 --> 00:19:04,000

And I don't know that there's any reason to believe that these things have any affinity for either fresh water or sand,

236

00:19:04,000 --> 00:19:10,000

but they do have a tendency to be seen better where the viewing conditions for us are better.

237

00:19:10,000 --> 00:19:20,000

Also, wasn't there, well, some years ago, in the late 40s and in the 50s, when there was some atomic testing going on in the Southwest,

238

00:19:20,000 --> 00:19:26,000

wouldn't this have been a valid reason for their being a preponderance of the South?

239

00:19:26,000 --> 00:19:35,000

Well, they did visit the White Sands Sordo area and they also did visit Hanford soon after we got started there.

240

00:19:35,000 --> 00:19:46,000

And they, as it may be pure coincidence, but they appeared in numbers one year after man fired his first atomic device.

241

00:19:46,000 --> 00:19:56,000

Now, whether they came as a result of the tremendous disturbance and the radiation sent out by those devices, no one can say at this point.

242

00:19:56,000 --> 00:19:57,000

Well, that is Josh, you're there.

243

00:19:57,000 --> 00:19:58,000

Yes.

244

00:19:58,000 --> 00:20:00,000

Let me stop you right there because that's an interesting point.

245

00:20:00,000 --> 00:20:05,000

What is one light year away from the area?

246

00:20:05,000 --> 00:20:07,000

Six trillion miles of light year.

247

00:20:07,000 --> 00:20:09,000

Six trillion miles.

248

00:20:09,000 --> 00:20:12,000

I just thought I'd mention it.

249

00:20:12,000 --> 00:20:16,000

You might be somebody sitting out there six trillion miles waiting.

250

00:20:16,000 --> 00:20:21,000

Oh, what I was also wondering, you know, there's so much of research being done now,

251

00:20:21,000 --> 00:20:31,000

that technical advancements that have been made with silicon is a type of making transistor circuits and so forth.

252

00:20:31,000 --> 00:20:39,000

I just wanted to possibly agree that these UFOs were using the sands as a source of energy or something of this nature.

253

00:20:39,000 --> 00:20:43,000

And I guess there's really no evidence of this today.

254

00:20:43,000 --> 00:20:59,000

Well, Dr. Ulpert and other scientists who expressed themselves on the possible means of propulsion used by these crafts have all been unanimous in stating that in their opinion they propel themselves by distorting the gravitational field.

255

00:20:59,000 --> 00:21:04,000

This would be in conflagration with Einstein's unified field theory.

256

00:21:04,000 --> 00:21:13,000

And this is also probably the reason we are spending hundreds of millions of dollars trying to find

out what gravity is and how to use it.

257

00:21:13,000 --> 00:21:18,000

And if we ever find this out, our space travel problems will be largely solved.

258

00:21:18,000 --> 00:21:26,000

And these multi-million dollar firecrackers that we use to get off of Cape Kennedy will be relegated to the field of the ox cart.

259

00:21:26,000 --> 00:21:32,000

Now, you talk about this, anti-gravity research. How close do you think we are to that?

260

00:21:32,000 --> 00:21:39,000

Ulpert said that by 1970 men would be going to the moon in electrically propelled devices.

261

00:21:39,000 --> 00:21:47,000

They asked him if he meant ion propulsion. He said, no, I do not. I mean electrically propelled.

262

00:21:47,000 --> 00:21:56,000

So I presume that Ulpert, who made that statement just after he left five years in Huntsville, Alabama at the Redstone Arsenal,

263

00:21:56,000 --> 00:22:01,000

would have imagined that he made that on the basis of information that he gained there.

264

00:22:01,000 --> 00:22:08,000

You know, man has now certainly countered the problem with G-forces.

265

00:22:08,000 --> 00:22:17,000

And in the whole larger picture of space travel, which has to include gravitational freedoms, ultimately,

266

00:22:17,000 --> 00:22:23,000

according to everything I've heard, it must be that we are simply doing the groundwork now,

267

00:22:23,000 --> 00:22:28,000

the experimental work that is required to find out what the human reaction is to travel.

268

00:22:28,000 --> 00:22:36,000

Once this gravity problem is overcome, it would seem to me that a lot of questions that we have about the rapid acceleration potential

269

00:22:36,000 --> 00:22:44,000

of so-called unidentified flying objects, the weird patterns that it chooses to fly, the sudden changes of direction,

270

00:22:44,000 --> 00:22:47,000

all of these things are explainable through gravity.

271

00:22:47,000 --> 00:22:54,000

Yes, through the distortion of the gravitational field. If we could do that, as these things apparently do it,

272

00:22:54,000 --> 00:22:59,000

then we'd find that many of the problems that we have now would be no longer in existence.

273

00:22:59,000 --> 00:23:03,000

I sometimes think that I've come very, very close to it on this program,

274

00:23:03,000 --> 00:23:08,000

as much as I've been up in the air so many times on this program, seeing me without any help.

275

00:23:08,000 --> 00:23:16,000

Do you hover? Have you noticed how it would be? You hover, no worry, I go up, and then suddenly reverse the field and come crashing back down again.

276

00:23:16,000 --> 00:23:18,000

Thank you for calling, sir.

277

00:23:18,000 --> 00:23:27,000

Don't you believe, gentlemen, that our president has a responsibility to the American public if there is more than just

278

00:23:27,000 --> 00:23:37,000

conversation concerning unidentified flying objects? It's my opinion that he would have a great responsibility in this area.

279

00:23:38,000 --> 00:23:50,000

So I have to conclude that it evidently isn't quite as far-reaching or serious thing, as you gentlemen seem to propose,

280

00:23:50,000 --> 00:23:54,000

with the lack of this information coming.

281

00:23:54,000 --> 00:24:02,000

Well, wait a minute. Right in keeping with what you're saying, the president would also have an obligation to carry out the policies

282

00:24:02,000 --> 00:24:07,000

which his predecessors had agreed on with the National Safety Council.

283

00:24:07,000 --> 00:24:14,000

And if he carried out those policies and maintained the secrecy, if they advocate, he would be doing his job.

284

00:24:14,000 --> 00:24:17,000

Well, that's exactly what's happening.

285

00:24:17,000 --> 00:24:22,000

Well, the State National Safety Council, I don't declare it as a national security council.

286

00:24:22,000 --> 00:24:23,000

Oh, my God.

287

00:24:23,000 --> 00:24:25,000

Yeah, and they wasn't taking a car.

288

00:24:25,000 --> 00:24:29,000

You had me zoo you up again.

289

00:24:29,000 --> 00:24:36,000

And it was President Eisenhower who said that he wanted everything that was not classified to be released to the public.

290

00:24:36,000 --> 00:24:41,000

And they said, yes, Mr. President, and immediately he wanted to classify.

291

00:24:41,000 --> 00:24:44,000

Nobody classified everything in connection with these things.

292

00:24:44,000 --> 00:24:48,000

Well, then are you suggesting that he's derelict in his responsibility?

293

00:24:48,000 --> 00:24:59,000

Not at all. I'm suggesting that he is carrying out his obligations in conformity with the policies which the president has agreed upon with the National Security Council.

294

00:24:59,000 --> 00:25:01,000

Yes, that old lead exercised an army.

295

00:25:01,000 --> 00:25:03,000

Well, it was before him, really.

296

00:25:03,000 --> 00:25:11,000

I think you'd have to stretch your imaginations in the elastic limit to produce anything political out of this discussion tonight.

297

00:25:11,000 --> 00:25:19,000

I don't think neither Mr. Admirter, Mr. Neff, have any interest in criticizing the president or any particular interest in criticizing the Air Force.

298

00:25:19,000 --> 00:25:24,000

I would suggest that there's nothing political involved here at all, but simply a matter of policy.

299

00:25:24,000 --> 00:25:32,000

And no one is very clear on where that policy was originated or just why it has been perpetuated if indeed it is a policy.

300

00:25:32,000 --> 00:25:40,000

Well, I think they have actually, Alan, to some degree made a joke out of some Air Force pronouncements.

301

00:25:40,000 --> 00:25:43,000

I don't know if you want to refer to that as criticism or not.

302

00:25:43,000 --> 00:25:48,000

Frankly, I don't intend to be informed on this matter at all.

303

00:25:48,000 --> 00:26:01,000

And it's just what I thought is a logical question that our president, if this is such a grave issue, I would feel would have a very definite responsibility to inform the American public.

304

00:26:01,000 --> 00:26:05,000

Let me say this. I've been close to this subject for 20 years.

305

00:26:05,000 --> 00:26:11,000

And I know that the Air Force was given this assignment, it's a very difficult assignment.

306

00:26:11,000 --> 00:26:21,000

And as I said earlier in the program, I think they have done a good job with a very difficult assignment within the restrictions which were placed on them.

307

00:26:21,000 --> 00:26:24,000

And these restrictions were placed from the very top.

308

00:26:24,000 --> 00:26:28,000

They cover not only the Air Force, but all the military.

309

00:26:28,000 --> 00:26:34,000

So they had to originate somewhere around or in the National Security Council.

310

00:26:34,000 --> 00:26:43,000

And if the National Security Council thinks that this should be done in a certain way, you may be sure that the president will cooperate fully with that conclusion.

311

00:26:43,000 --> 00:26:47,000

And I think that's what's happened. I don't think there's anything political about it.

312

00:26:47,000 --> 00:26:49,000

I don't think there is.

313

00:26:49,000 --> 00:26:51,000

I haven't suggested that there is.

314

00:26:51,000 --> 00:26:52,000

No, no, that's right.

315

00:26:52,000 --> 00:26:53,000

I haven't suggested that there is.

316

00:26:53,000 --> 00:26:55,000

That's right. And I agree with you.

317

00:26:55,000 --> 00:27:08,000

I think that that answers your question that he is simply regardless of who the president is, he is simply concurring in the policy which was set up and set up at a very high level.

318

00:27:08,000 --> 00:27:14,000

And I think that answers your question because I think that that really is why it's done the way it's done.

319

00:27:14,000 --> 00:27:18,000

Yes, well, it does, Frank, but you did make one statement.

320

00:27:18,000 --> 00:27:23,000

I thought it was rather funny. You thought it would be impossible for three men to spend \$10 million.

321

00:27:23,000 --> 00:27:27,000

Well, I don't think you looked over the poverty program.

322

00:27:27,000 --> 00:27:31,000

But I think that's quite a few millions spent.

323

00:27:31,000 --> 00:27:35,000

Of course, one of these guys was a sergeant. Would they let them spend that kind of money?

324

00:27:35,000 --> 00:27:36,000

I don't know.

325

00:27:36,000 --> 00:27:37,000

I don't think so.

326

00:27:37,000 --> 00:27:44,000

It's amazing to me how we have come really from intergalactic travel to the poverty program that we have.

327

00:27:44,000 --> 00:27:46,000

Oh, well, Alan, you know what? The year is far in the day, you know?

328

00:27:46,000 --> 00:27:48,000

Yes, and it's been quite a day.

329

00:27:48,000 --> 00:27:50,000

Thank you very much for calling.

330

00:27:50,000 --> 00:27:53,000

Alan, I travel faster than light, you know?

331

00:27:53,000 --> 00:27:55,000

Yes, and logic, perhaps.

332

00:27:55,000 --> 00:28:04,000

Talking tonight with Frank Edwards is an experience for me because Mr. Edwards, along with Earl Ness tonight,

333

00:28:04,000 --> 00:28:12,000

certainly articulates the situation beautifully and tells us the great many things that concern them

334

00:28:12,000 --> 00:28:15,000

and the great many things which remain unanswered.

335

00:28:15,000 --> 00:28:25,000

The fact that these answers seem, and these questions seem to want answers is something I don't think any of us can really ignore.

336

00:28:25,000 --> 00:28:31,000

Let me say that while I have never seen what could be described as an unidentified flying object,

337

00:28:31,000 --> 00:28:34,000

I also don't spend very much time looking for them.

338

00:28:34,000 --> 00:28:44,000

I have not put in the years of research and study and careful sifting of facts and of analysis that Frank has put in, that Earl Ness has put in.

339

00:28:44,000 --> 00:28:49,000

And therefore, my position is that I choose to sit and listen.

340

00:28:49,000 --> 00:28:51,000

I think it would be a mistake for any of us not to.

341

00:28:51,000 --> 00:28:59,000

But also, I also think that there is an odd kind of put down that we have had in programs in the past.

342

00:28:59,000 --> 00:29:01,000

And that doesn't happen tonight.

343

00:29:01,000 --> 00:29:07,000

It's a strange kind of a put down, Frank, on this kind of discussion from certain kinds of people.

344

00:29:07,000 --> 00:29:08,000

Do you run across this at all?

345

00:29:08,000 --> 00:29:10,000

Yes, yes.

346

00:29:10,000 --> 00:29:16,000

As I told that lady a while ago, this is a field where the only skeptics are the uninformed.

347

00:29:16,000 --> 00:29:20,000

And the more uninformed they are, the more skeptical they are.

348

00:29:20,000 --> 00:29:26,000

But after you have done any reasonable measure of research in this field,

349

00:29:26,000 --> 00:29:38,000

you become aware that there is a great deal more to it than you would think from reading the

various official statements without dismissing these things as luminous flying ants and so forth.

350

00:29:38,000 --> 00:29:48,000

And after you have seen one yourself there, there is no question in your mind that you have seen something very unusual.

351

00:29:48,000 --> 00:29:53,000

You know, actually the swamp gas thing may have been a hope to people like yourself.

352

00:29:53,000 --> 00:29:59,000

Because I think it turned off a great many people in the swamp gas theory, Professor.

353

00:29:59,000 --> 00:30:01,000

Oh, sure, sure.

354

00:30:01,000 --> 00:30:09,000

That did more to discredit the Air Force as a source of information on this subject.

355

00:30:09,000 --> 00:30:22,000

And I had a feeling that perhaps they did it deliberately because I've had a feeling from statements that were made to me by some prominent people in the Air Force in recent years,

356

00:30:22,000 --> 00:30:28,000

that they would like to be rid of this thing, that they would like to get out from under this and turn it over to somebody else.

357

00:30:28,000 --> 00:30:30,000

It's not a military problem.

358

00:30:30,000 --> 00:30:40,000

There's no hostility from these things as Dr. Heineken, Dr. Carl Sagan and others said to the Congressional Investigations Committee earlier this year.

359

00:30:40,000 --> 00:30:46,000

This is a purely scientific problem and should be dealt with on that basis.

360

00:30:46,000 --> 00:30:56,000

And I think that the Air Force may have done a few things like the swamp gas story and some of the others to get itself out of the business,

361

00:30:56,000 --> 00:31:02,000

to get back into its own field of endeavor and turn this thing over to somebody else. Hello.

362

00:31:02,000 --> 00:31:04,000

Yes, sir? Yes, sir.

363

00:31:04,000 --> 00:31:06,000

This is Roger Schrack in Mansfield, Ohio.

364

00:31:06,000 --> 00:31:07,000

Yes, sir.

365

00:31:07,000 --> 00:31:17,000

And I've been listening to your discussions and I thought maybe Mr. Edwards would want to comment on the author Raymond Bernard that built the Hollow Earth.

366

00:31:17,000 --> 00:31:27,000

Well, I'm not sure what he said, but perhaps these UFOs weren't necessarily in a planetary and I was wondering if maybe he had that in mind when he made that statement.

367

00:31:27,000 --> 00:31:33,000

Well, I'm going to hang on that question breathlessly because I'm dying to know what Frank Edward says too.

368

00:31:33,000 --> 00:31:49,000

Well, I didn't exactly have Mr. Bernard or the Hollow Earth book in mind when I made that statement. However, I'm glad you asked the question because in one of the earlier editions of his book Bernard started off by saying,

369

00:31:49,000 --> 00:31:59,000

my good friend Frank Edwards, I never saw or heard of the man until he wrote this book. The theory of the Hollow Earth is a very, very old one.

370

00:31:59,000 --> 00:32:11,000

In this country it got started with a man named John Sims who was a farmer in Ohio and he was a captain in the army during the War of 1812.

371

00:32:11,000 --> 00:32:24,000

And Captain Sims got hit over the head with a musket butt and he was never the same after that. He couldn't remember which way to lead his men toward the enemy and he sometimes led them in the wrong direction.

372

00:32:24,000 --> 00:32:38,000

And so they sent Captain Sims home and he sat on the courthouse lawn and whittled out hollow wooden balls which he told other spitting little fellows around there were models of the Hollow Earth.

373

00:32:38,000 --> 00:32:51,000

He also pestered members of Congress and scientists for years with letters urging them to finance an expedition to the North Pole, which he would lead, of course, Captain Sims.

374

00:32:51,000 --> 00:32:57,000

And he would lead it and to find the hole where people were going in and out of the Hollow Earth.

375

00:32:57,000 --> 00:33:10,000

The theory is old and I think that Sims' condition, due to that blow on the head, probably accounted for his enthusiasm for it.

376

00:33:10,000 --> 00:33:17,000

I have always felt that the theory of a Hollow Earth would only appeal to people with hollow heads.

377

00:33:17,000 --> 00:33:19,000

I think that was pretty clearly.

378

00:33:19,000 --> 00:33:27,000

Yeah, when you say that we're not expecting them to be able to come out with an Hollow Earth, there's no ideal word to it.

379

00:33:27,000 --> 00:33:28,000

It's all just fiction.

380

00:33:28,000 --> 00:33:30,000

Yes, that's right.

381

00:33:30,000 --> 00:33:36,000

Because I grant you that Hollow Earth, that's an Hollow Earth, did not fly into any Hollow Earth.

382

00:33:36,000 --> 00:33:38,000

I just, I'll recall it now.

383

00:33:38,000 --> 00:33:39,000

Thank you for calling.

384

00:33:39,000 --> 00:33:40,000

Okay.

385

00:33:40,000 --> 00:33:41,000

Thank you, sir.

386

00:33:41,000 --> 00:33:46,000

I'm glad the point came up because it's one of the things that bugs me.

387

00:33:46,000 --> 00:33:51,000

I read about this book in magazines advertised in a number of different publications.

388

00:33:51,000 --> 00:33:53,000

That's the output that sells that book.

389

00:33:53,000 --> 00:33:59,000

It has a mail drop up there in the hall of this building that they list as their headquarters.

390

00:33:59,000 --> 00:34:03,000

And they have a kid that goes around there a couple times a day and picks up the mail.

391

00:34:03,000 --> 00:34:04,000

And that's the publishing company.

392

00:34:04,000 --> 00:34:05,000

And they're selling the books.

393

00:34:05,000 --> 00:34:06,000

Oh, they sure are.

394

00:34:06,000 --> 00:34:10,000

Well, I put down the whole Hollow Earth thing.

395

00:34:10,000 --> 00:34:14,000

And apparently it's not just one book available.

396

00:34:14,000 --> 00:34:15,000

Oh, no.

397

00:34:15,000 --> 00:34:18,000

He's got a dozen books and all about that same caliber.

398

00:34:18,000 --> 00:34:19,000

Yeah.

399

00:34:19,000 --> 00:34:22,000

There is just one little thing I would like to read.

400

00:34:22,000 --> 00:34:24,000

Why have the authors permission to quote?

401

00:34:24,000 --> 00:34:27,000

Well, please, Bill, you've got to quote from that great book, Flying The Sousers.

402

00:34:27,000 --> 00:34:28,000

That's a great book.

403

00:34:28,000 --> 00:34:30,000

Oh, it's also a serious business.

404

00:34:30,000 --> 00:34:35,000

Which, incidentally, doesn't need much help from me because it's number seven on the bestselling list.

405

00:34:35,000 --> 00:34:36,000

Six now?

406

00:34:36,000 --> 00:34:37,000

Six, yes.

407

00:34:37,000 --> 00:34:38,000

It's coming up.

408

00:34:38,000 --> 00:34:41,000

The bestsellers list of nonfiction.

409

00:34:41,000 --> 00:34:43,000

And that means it's doing pretty well.

410

00:34:43,000 --> 00:34:46,000

I think it's deservedly so, too, because it's written so well.

411

00:34:46,000 --> 00:34:51,000

But there's something here that really I think you ought to know about.

412

00:34:51,000 --> 00:34:54,000

It's one of the most significant parts of the book.

413

00:34:54,000 --> 00:34:57,000

It comes right up at the beginning, almost on page 18.

414

00:34:57,000 --> 00:35:06,000

And this is the story of a book called The Book of Desire, which is a chronicle of ancient India.

415

00:35:06,000 --> 00:35:12,000

A translation of which I understand, like, you were able to obtain through the revolution.

416

00:35:12,000 --> 00:35:16,000

Yes, this fellow was a doctor at the Georgetown College.

417

00:35:16,000 --> 00:35:18,000

Because I know for your mind.

418

00:35:18,000 --> 00:35:23,000

The book is a combination of legend and Frank Wright's passed down through the ages before men were able to write,

419

00:35:23,000 --> 00:35:28,000

and finally gathered in a manuscript formed by the ancient scholars who preserved them for us.

420

00:35:28,000 --> 00:35:33,000

They tell of a small group of beings who came to Earth many thousands of years ago in a metal craft,

421

00:35:33,000 --> 00:35:37,000

which first went around the Earth several times before landing.

422

00:35:37,000 --> 00:35:43,000

These beings, as the book lived to themselves, and were revered by the humans among whom they had settled.

423

00:35:43,000 --> 00:35:47,000

But each, eventually, differences arose among them, and they divided their numbers,

424

00:35:47,000 --> 00:35:51,000

several of the men and women, and some children settling in another city,

425

00:35:51,000 --> 00:35:55,000

where they were promptly installed as rulers by the Austric and Populus.

426

00:35:55,000 --> 00:36:01,000

Separation did not bring peace to these people, and finally their anger reached a point where the ruler of the original city

427

00:36:01,000 --> 00:36:08,000

took with him a small number of his warriors, and they rose into the air in a huge, shiny metal vessel.

428

00:36:08,000 --> 00:36:16,000

While there were many leagues from the city of their enemies, they launched a great, shining lance that rode on a beam of light.

429

00:36:16,000 --> 00:36:22,000

It burst apart in the city of their enemies with a great ball of flame that shot up to the heavens, almost to the stars.

430

00:36:22,000 --> 00:36:29,000

All those in the city were horribly burned, and even those who were not in the city, but nearby, were burned also.

431

00:36:29,000 --> 00:36:33,000

Those who looked upon the lance and the ball of fire were blinded forever afterward.

432

00:36:33,000 --> 00:36:37,000

Those who entered the city on foot became ill and died.

433

00:36:37,000 --> 00:36:42,000

Even the dust of the city was poisoned, as were the rivers that flowed through it.

434

00:36:42,000 --> 00:36:47,000

Men dared not go near it, and it gradually crumbled into dust and was forgotten by men.

435

00:36:47,000 --> 00:36:53,000

When the leaders saw what he had done to his own people, he retired to his palace and refused to see anyone.

436

00:36:53,000 --> 00:36:58,000

There he gathered about him those of his warriors who were named, and their wives, and their children,

437

00:36:58,000 --> 00:37:05,000

and they entered into their vessels and rose one by one into the sky and sailed away, nor did they return.

438

00:37:05,000 --> 00:37:11,000

You think about that and read Frank's account as a peon afterward.

439

00:37:11,000 --> 00:37:21,000

You see how close that comes to rocketry, to nuclear destruction, and this ages and ages ago in an ancient Indian culture.

440

00:37:21,000 --> 00:37:25,000

It's estimated that that was about 6,000 years before Christ.

441

00:37:25,000 --> 00:37:29,000

Frank Edwards, thank you very much for giving us something to think about tonight.

442

00:37:29,000 --> 00:37:33,000

I would like to wish you the very best of luck with your book, Shaky and the Owl.

443

00:37:33,000 --> 00:37:35,000

I'm really glad to see you.

444

00:37:35,000 --> 00:37:36,000

Thank you, sir.

445

00:37:36,000 --> 00:37:40,000

Now, I would just like to leave the audience with a thought, if I may.

446

00:37:40,000 --> 00:37:48,000

I hope the horse can be forgiven in his tendency to fantasize, but I find this final observation in the book that we just made irresistible.

447

00:37:48,000 --> 00:37:54,000

Wouldn't it be wild and exquisitely ironic if after all the sophistication of the 20th century,

448

00:37:54,000 --> 00:37:58,000

after all the goddess' death theories and all the successful space shots,

449

00:37:58,000 --> 00:38:04,000

after all the advanced research into LSD and all the hipping up of mankind on DNA and RNA,

450

00:38:04,000 --> 00:38:09,000

it turned out that this planet really did host extraterrestrial visitors ages ago.

451

00:38:09,000 --> 00:38:15,000

What if it turned out that through UFOs lies our contact with some valid or tangible kind of heaven,

452

00:38:15,000 --> 00:38:18,000

a reachable before death kind of heaven?

453

00:38:18,000 --> 00:38:27,000

What if it turned out that some of our most ancient teachings and tellings were simply forms of UFO reports told in the non-technological terms of another age?

454

00:38:27,000 --> 00:38:36,000

Or go one step further, supposing the heaven that was told to people here on Earth by these

allegedly extraterrestrial travelers

455

00:38:36,000 --> 00:38:44,000

turned out to be not so good after all, and the heaven that we think of in our minds is really the heaven right here on Earth.

456

00:38:44,000 --> 00:38:48,000

What strange and wonderful things we can encounter in the future and look forward to.
