

1

00:00:00,000 --> 00:00:05,000

Why do you believe that flying saucers exist?

2

00:00:05,000 --> 00:00:13,000

Well, as editor of Flying Sensor Review, and through our international U.S.O. observatory,

3

00:00:13,000 --> 00:00:19,000

I see thousands of fighting reports sent to us from every country.

4

00:00:19,000 --> 00:00:23,000

Send him an ordinary man in the street who happens to have seen a flying saucer.

5

00:00:23,000 --> 00:00:27,000

That's right. Some of them very highly trained observers in the world.

6

00:00:27,000 --> 00:00:29,000

Is none of them short? They're just pretty.

7

00:00:29,000 --> 00:00:38,000

Yes, we have our wishful thinkers, and we have, as I say, our expert observers.

8

00:00:38,000 --> 00:00:41,000

Is there any evidence that does seem to be completely true?

9

00:00:41,000 --> 00:00:43,000

Yes.

10

00:00:43,000 --> 00:00:52,000

For instance, I have here a fighting report sent to us by Miss Connor of Truro Cornwall.

11

00:00:52,000 --> 00:00:57,000

Miss Connor is a highly trained woman observer.

12

00:00:57,000 --> 00:01:05,000

Her fighting took place at a Royal Observatory exercise on October the 21st last year.

13

00:01:05,000 --> 00:01:14,000

Miss Connor saw a silver oblong object high in the sky and watched it for 20 minutes.

14

00:01:14,000 --> 00:01:19,000

This object was standing still against the wind, which ruled out a balloon.

15

00:01:19,000 --> 00:01:26,000

Mr. Cringe, did I say that our flying saucers show us a perfectly possible explanation?

16

00:01:26,000 --> 00:01:32,000

They are, in fact, secret weapons used by the Russians or the Americans or even ourselves.

17

00:01:32,000 --> 00:01:36,000

No, they've been seen over every country in the world.

18

00:01:36,000 --> 00:01:45,000

No, the United States would not fly their secret weapon, sure, over the behind-the-court and countries, and by saucers.

19

00:01:45,000 --> 00:01:47,000

And why do you think there are people in them?

20

00:01:47,000 --> 00:01:59,000

Many books have been written on the subject, some of which have actually contained round-contact stories with people from outer space.

21

00:01:59,000 --> 00:02:04,000

Some of these people have even been taken for rides in flying saucers.

22

00:02:04,000 --> 00:02:07,000

Well, frankly, that sounds to me as if you've been taken for a ride.

23

00:02:07,000 --> 00:02:13,000

I simply do not believe for a second that anyone on the Earth has gone up in a flying saucer.

24

00:02:13,000 --> 00:02:21,000

Well, that is a matter of opinion. I believe, we believe, definitely, that existence for flying saucers exists.

25

00:02:21,000 --> 00:02:23,000

That is our main plan.

26

00:02:23,000 --> 00:02:26,000

And what part of outer space do you think they come from?

27

00:02:26,000 --> 00:02:35,000

Professor Hermann Ober, the guided missile expert, considers that they come from other solar systems altogether.

28

00:02:35,000 --> 00:02:39,000

They may even possibly come from all over the universe.

29

00:02:39,000 --> 00:02:44,000

Choosing for the outer people from outer space, among us on Earth at the moment.

30

00:02:44,000 --> 00:02:49,000

I have never knowing they met one, but nothing is impossible.

31

00:02:49,000 --> 00:02:54,000

Mr. Tanks, I think I would be convinced in flying saucers except for one thing.

32

00:02:54,000 --> 00:03:01,000

If they do exist, why haven't they made themselves known to us in a manner which would leave no doubt whatsoever?

33

00:03:01,000 --> 00:03:05,000

Well, would you descend the land in a snake pit?

34

00:03:05,000 --> 00:03:12,000

Well, if flying saucers are listening into us at this moment, let's assure them that we will treat the most hospitably if they arise.

35

00:03:12,000 --> 00:03:18,000

I know I'd love to see one. And as a matter of fact, we have with us two people who claim they have seen flying saucers.

36

00:03:18,000 --> 00:03:21,000

But first, it is to gather in gibbons.

37

00:03:21,000 --> 00:03:26,000

I was near-vented when I suddenly saw a bright light in the sky.

38

00:03:26,000 --> 00:03:31,000

It is much brighter than a star and caught my attention at once.

39

00:03:31,000 --> 00:03:37,000

It got larger and larger until half the size of the moon, and then it vanished.

40

00:03:37,000 --> 00:03:41,000

I've seen ten others.

41

00:03:41,000 --> 00:03:52,000

Most of these were scanners, but we believe to be our unmanned pickups for super-television sets on the larger spacecraft.

42

00:03:52,000 --> 00:03:58,000

We think they may come from Mars, Venus, or the planets of another star.

43

00:03:58,000 --> 00:04:06,000

In my researches in rapture under West Midlands, I have come across a lot of activity in the Stafford area,

44

00:04:06,000 --> 00:04:11,000

especially over the two aerodromes of Cyford and Hickson.

45

00:04:11,000 --> 00:04:19,000

And I believe that, should the spacecraft and spacemen decide to land, they will choose Stafford as their base.

46

00:04:19,000 --> 00:04:23,000

And now, Dr. Perthewilkin, an amateur astronomer,

47

00:04:23,000 --> 00:04:30,000

I did not believe in the existence of an identified flying orbiter until June 11, 1954,

48

00:04:30,000 --> 00:04:35,000

when on a flight from Charleston, West Virginia, to Atlanta, in Georgia,

49

00:04:35,000 --> 00:04:41,000

the plane was flying the height of 8,000 feet between two bunkers of tumulus clouds.

50

00:04:41,000 --> 00:04:50,000

Against the shaded one and above two of the clouds, I saw two perfectly oval, brilliant, and golden color objects,

51

00:04:50,000 --> 00:04:55,000

which are moving in the opposite direction to the clouds, but slowly.

52

00:04:55,000 --> 00:05:04,000

Then my eye was attracted to a cellar object, a slightly similar size, but which was not of a bright color.

53

00:05:04,000 --> 00:05:11,000

This suddenly accelerated from zero, and in five seconds, one is behind the mirror cloud.

54

00:05:11,000 --> 00:05:17,000

Its estimated speed must have been somewhere about 2,000 miles an hour.

55

00:05:17,000 --> 00:05:27,000

I'm convinced that they came from this earth, but I cannot identify them with any known similar or military objects.

56

00:05:27,000 --> 00:05:34,000

Even more remarkable is the experience of Mr. King, editor of Cognac Voice.

57

00:05:34,000 --> 00:05:53,000

On the 23rd of March, 1956, I had, what was to me, the great honor to be granted permission to

visit the space station, you know, a bit of this earth.

58

00:05:53,000 --> 00:06:08,000

This space station, we term the third satellite, it comes from Mars, and after being given permission, I did actually visit this space station in my etheric body.

59

00:06:08,000 --> 00:06:11,000

Your etheric body was there.

60

00:06:11,000 --> 00:06:27,000

Well, that is the subtle counterpart of the man's body, man-el, yes, as apart from the purely physical cellular structure.

61

00:06:27,000 --> 00:06:30,000

Have you seen people from outer space?

62

00:06:30,000 --> 00:06:37,000

Yes, I saw people from Mars and Venus and from other planets.

63

00:06:37,000 --> 00:06:39,000

So could you understand them?

64

00:06:39,000 --> 00:06:44,000

Well, the people from Mars, I could understand quite easily.

65

00:06:44,000 --> 00:06:55,000

They spoke to me through telepathy and they telepast the kind of pictures of what they wanted to convey.

66

00:06:55,000 --> 00:06:59,000

And might I ask, what are the women on Venus like?

67

00:06:59,000 --> 00:07:05,000

Very, very beautiful indeed, out of this world, absolutely out of this world, yes.

68

00:07:05,000 --> 00:07:10,000

These are the girls who claimed to be actual pictures of flying saucers.
