NIGHT JOURNEYS in UFOLOGY

HOTLINE CASES

The Gribble *NUFORC* Collection consists of dozens of reel to reel tapes, each containing 12 hours of recordings, hundreds of cassettes and thousands of pages of documentation. However, Bob would record calls and not enter them into the Call Log, or Case Files, which is normal across the human spectrum. These witness reports he referred to as his *Hotline* cases. Unfortunately, some of the recordings have no date given and in some cases, even the year.
