

1

00:00:00,000 --> 00:00:07,920

A point away from me several miles, I believe, that was emanating, if you can believe it,

2

00:00:07,920 --> 00:00:14,000

was like, you know how at the old days when they had the spotlights out for the openings

3

00:00:14,000 --> 00:00:16,000

of a new theater, that sort of thing?

4

00:00:16,000 --> 00:00:17,000

Right.

5

00:00:17,000 --> 00:00:22,840

Okay, it was like a point source that was emanating several shafts of black light.

6

00:00:22,840 --> 00:00:25,280

It was like negative light.

7

00:00:25,280 --> 00:00:26,280

Okay.

8

00:00:26,280 --> 00:00:32,400

And when I first thought it was about four or five different shafts coming from a point

9

00:00:32,400 --> 00:00:38,120

source several miles away from me, and then as I got closer it resolved itself into two

10

00:00:38,120 --> 00:00:40,120

rather large ones.

11

00:00:40,120 --> 00:00:46,280

Okay, above this now, probably a thousand foot above it or more, was a really bright,

12

00:00:46,280 --> 00:00:52,680

shining white object with a central mass and sort of wings, lateral wings off to the side,

13

00:00:52,680 --> 00:00:56,240

and it was shining white, very bright.

14

00:00:56,240 --> 00:01:04,760

And my trite, as I was going to work, I approached it and as I got closer to it, it appeared

15

00:01:04,760 --> 00:01:05,760

to dissipate.

16

00:01:05,760 --> 00:01:09,960

I don't know, I just lost track of it.

17

00:01:09,960 --> 00:01:15,000

There were four other people that I worked with at the nuclear plant that saw it also

18

00:01:15,000 --> 00:01:18,640

coming in the same general direction to work.

19

00:01:18,640 --> 00:01:21,360

I'm a technician at a nuclear plant here in Eureka.

20

00:01:21,360 --> 00:01:24,040

Okay, was it daylight at this time?

21

00:01:24,040 --> 00:01:32,400

This occurred at about 740 to about 745 on my way to work towards Eureka, California.

22

00:01:32,400 --> 00:01:33,400

Okay.

23

00:01:33,400 --> 00:01:40,040

I first saw it from Alton, California, and I lost track of it at about almost two low

24

00:01:40,040 --> 00:01:41,040

lead at California.

25

00:01:41,040 --> 00:01:46,640

And there's four other people I worked with that actually saw it also.

26

00:01:46,640 --> 00:01:53,640

I wrote up a little thing here that sort of explains it after I got to work.

27

00:01:53,640 --> 00:01:57,640

It says between 0740 and 0745 approximately.

28

00:01:57,640 --> 00:02:03,840

I did see a very strange current at or about Singley Road, the South exit to US 101.

29

00:02:03,840 --> 00:02:08,240

I first noticed this physical phenomenon at Alton and it seemed to be somewhere close

30

00:02:08,240 --> 00:02:10,240

to Ferndale, California.

31

00:02:10,240 --> 00:02:16,640

They gave the appearance of a localized source which emanated columns of darkness.

32

00:02:16,640 --> 00:02:21,840

Above this phenomenon, there hovered a bright white aircraft of some sort having lateral

33

00:02:21,840 --> 00:02:22,840

wings.

34

00:02:22,840 --> 00:02:25,640

And I made a little picture of it.

35

00:02:25,640 --> 00:02:31,640

There's also, like I said, there was five of us on the way to work that saw this thing

36

00:02:31,640 --> 00:02:35,640

and they would be willing to, or several of them would be willing to, you know, catch

37

00:02:35,640 --> 00:02:37,140

and fight that attack also.

38

00:02:37,140 --> 00:02:39,640

Okay, was that bright white, stationary?

39

00:02:39,640 --> 00:02:40,640

Yes, it was.

40

00:02:40,640 --> 00:02:41,640

Okay.

41

00:02:41,640 --> 00:02:45,640

Any estimate of the degrees above the horizon at this time?

42

00:02:45,640 --> 00:02:47,640

Yeah, that's where it varies.

43

00:02:47,640 --> 00:02:54,640

Like when I saw it, a degrees above the horizon, I would probably put it at about 40 to 45

44

00:02:54,640 --> 00:02:56,640

degrees from where I saw it.

45

00:02:56,640 --> 00:02:58,640

Okay, and which direction of the sky?

46

00:02:58,640 --> 00:03:03,640

Okay, from where I first saw it, Alton, it was in a northerly direction.

47

00:03:03,640 --> 00:03:04,640

Okay.

48

00:03:04,640 --> 00:03:13,640

And that remained stationary while the shafts of light were coming down or black light were

49

00:03:13,640 --> 00:03:14,640

coming down?

50

00:03:14,640 --> 00:03:15,640

No, they weren't coming down from that crap.

51

00:03:15,640 --> 00:03:20,640

The light, the black shafts of light were coming from the ground beneath it.

52

00:03:20,640 --> 00:03:21,640

Oh, I see, okay.

53

00:03:21,640 --> 00:03:23,640

A localized source beneath it, directly beneath it.

54

00:03:23,640 --> 00:03:24,640

Okay.

55

00:03:24,640 --> 00:03:30,640

And these black shafts were going up at an oblique angle of maybe 45 degrees all over.

56

00:03:30,640 --> 00:03:32,640

In fact, they're varying angles.

57

00:03:32,640 --> 00:03:33,640

And I saw the most.

58

00:03:33,640 --> 00:03:37,640

Most everybody else saw only two shafts coming, dark shafts coming from it.

59

00:03:37,640 --> 00:03:40,640

It was like they were plastic columns.

60

00:03:40,640 --> 00:03:45,640

They were laser sharp straight through the point sources, see my?

61

00:03:45,640 --> 00:03:47,640

Right, so regular beam then.

62

00:03:47,640 --> 00:03:48,640

They were beams.

63

00:03:48,640 --> 00:03:50,640

They were like laser beams.

64

00:03:50,640 --> 00:03:56,640

They were like, if you could imagine it, plastic tubes filled with smoke because they were

65

00:03:56,640 --> 00:03:57,640

actually dark.

66

00:03:57,640 --> 00:03:59,640

They were actually blocking light that was behind them.

67

00:03:59,640 --> 00:04:00,640

Okay.

68

00:04:00,640 --> 00:04:03,640

They seem to be, they almost seem to have mass.

69

00:04:03,640 --> 00:04:04,640

Okay.

70

00:04:04,640 --> 00:04:11,640

And they're right below this shining white aircraft that I would guess maybe a thousand foot,

71

00:04:11,640 --> 00:04:14,640

1500, 2000 feet above it.

72

00:04:14,640 --> 00:04:15,640

Okay.

73

00:04:15,640 --> 00:04:18,640

And the shafts appear to sort of circle this thing?

74

00:04:18,640 --> 00:04:19,640

No, no, no.

75

00:04:19,640 --> 00:04:22,640

They were stationary shafts that were coming out of the ground.

76

00:04:22,640 --> 00:04:24,640

They were stationary.

77

00:04:24,640 --> 00:04:27,640

I thought they, not all in one direction.

78

00:04:27,640 --> 00:04:29,640

No, they were several different directions.

79

00:04:29,640 --> 00:04:30,640

Okay.

80

00:04:30,640 --> 00:04:33,640

And how long have you watched it all together?

81

00:04:33,640 --> 00:04:36,640

Probably somewhere between five and ten minutes.

82

00:04:36,640 --> 00:04:37,640

Okay.

83

00:04:37,640 --> 00:04:44,640

And then I should get closer to that white source that seems to be just the same thing.

84

00:04:44,640 --> 00:04:47,640

Well, I locked track of the white image.

85

00:04:47,640 --> 00:04:51,640

At first I thought it was a cloud, but then the more I looked at it, the more defined it

86

00:04:51,640 --> 00:04:57,640

was and more precise it was that it was an actual object that was hovering there.

87

00:04:57,640 --> 00:04:58,640

Okay.

88

00:04:58,640 --> 00:05:03,640

And that was my first guess.

89

00:05:03,640 --> 00:05:08,640

Oh, it's just a bright cloud, you know, because the sun had just come up a little earlier.

90

00:05:08,640 --> 00:05:11,640

Some of it's just up there reflecting off.

91

00:05:11,640 --> 00:05:14,640

And then, you know, it was just too precise.

92

00:05:14,640 --> 00:05:16,640

It had definition.

93

00:05:16,640 --> 00:05:23,640

I see 39 going to be 40 in a couple of months, 34 months.

94

00:05:23,640 --> 00:05:24,640

Okay.

95

00:05:24,640 --> 00:05:28,640

And the rest of these guys were in their 40s, almost 50.

96

00:05:28,640 --> 00:05:30,640

They were sober.

97

00:05:30,640 --> 00:05:32,640

Everybody agrees to what they saw?

98

00:05:32,640 --> 00:05:36,640

Well, we had a varying degrees of location.

99

00:05:36,640 --> 00:05:42,640

It seemed to have maybe moved as it, you know, we all thought it probably varying times,

100

00:05:42,640 --> 00:05:44,640

maybe about four or five minutes apiece.

101

00:05:44,640 --> 00:05:45,640

Okay.

102

00:05:45,640 --> 00:05:49,640

And it seemed to, the whole phenomenon seemed to have been moving perhaps.

103

00:05:49,640 --> 00:05:53,640

Some guys thought maybe it was even out to sea.

104

00:05:53,640 --> 00:05:54,640

Okay.

105

00:05:54,640 --> 00:05:57,640

Now, what time were you near when you first saw it?

106

00:05:57,640 --> 00:05:58,640

Alton.

107

00:05:58,640 --> 00:06:01,640

It's where Highway 36 hits US 101.

108

00:06:01,640 --> 00:06:03,640

How was that spelled?

109

00:06:03,640 --> 00:06:06,640

Alton, A-L-T-O-N.

110

00:06:06,640 --> 00:06:07,640

Okay.

111

00:06:07,640 --> 00:06:14,640

There's got to be several hundred people that saw it because the people, the one guy that came from Ferndale

112

00:06:14,640 --> 00:06:18,640

saw it very clearly from Ferndale, so there was probably a lot of sightings from Ferndale.

113

00:06:18,640 --> 00:06:23,640

I saw it from Alton, so that includes a lot of Fortuna, California, that probably saw it.

114

00:06:23,640 --> 00:06:28,640

And a bunch of people, I don't know, because when I got north of it, I tried to look back

115

00:06:28,640 --> 00:06:35,640

and I couldn't see any of it, you know, because I figured I was pretty close to it at that point at Stingley Road,

116

00:06:35,640 --> 00:06:37,640

but it seemed to have been...
