

1

00:00:00,000 --> 00:00:04,000

UFO reporting center.

2

00:00:04,000 --> 00:00:08,000

Yes, I'm calling from the state of Michigan.

3

00:00:08,000 --> 00:00:12,000

On 2, 4, 93, approximately between the hours of

4

00:00:12,000 --> 00:00:16,000

5.30 a.m. and 7.30 a.m., we had

5

00:00:16,000 --> 00:00:20,000

some Star Wars activity of some sort going on over the state capital of

6

00:00:20,000 --> 00:00:24,000

Lansing, Michigan. My boss also witnesses as we're

7

00:00:24,000 --> 00:00:28,000

driving down the road in our vehicles and all of them, the objects were

8

00:00:28,000 --> 00:00:32,000

shaped in sizes. One was triangular shaped in the back of it.

9

00:00:32,000 --> 00:00:36,000

It was kind of convex and it had double roles

10

00:00:36,000 --> 00:00:40,000

of lighting on it. And it had two almost like car headlights

11

00:00:40,000 --> 00:00:44,000

on the front with a red light on the bottom of it that was not flashing or continually

12

00:00:44,000 --> 00:00:48,000

flashing at all. It just stayed continuous red. And then the other smaller objects

13

00:00:48,000 --> 00:00:52,000

were round cylindrical shaped, kind of hanging down like

14

00:00:52,000 --> 00:00:56,000

in suspension as would be these hot air balloons or something like that.

15

00:00:56,000 --> 00:01:00,000

With extremely bright white lights on them,

16

00:01:00,000 --> 00:01:04,000

two of the triangular shaped objects were heading west bound.

17

00:01:04,000 --> 00:01:08,000

One of them turned back heading east and disappeared in the eastern horizon.

18

00:01:08,000 --> 00:01:12,000

But in the meantime, it shot back something in the direction of these other two

19

00:01:12,000 --> 00:01:16,000

suspended objects hanging over Lansing and it had come down like a

20

00:01:16,000 --> 00:01:20,000

burning trail of an object that was shot

21

00:01:20,000 --> 00:01:24,000

and left a little disintegrating trail behind it. And then the one

22

00:01:24,000 --> 00:01:28,000

smaller cylindrical shaped round objects that was there

23

00:01:28,000 --> 00:01:32,000

scouted towards the north, just scouted real fast up towards

24

00:01:32,000 --> 00:01:36,000

the other object hanging there. The object that was a little bit farther to the north

25

00:01:36,000 --> 00:01:40,000

then shot something out which went across the top of the trees and disintegrated

26

00:01:40,000 --> 00:01:44,000

across the top of the trees. And of course as it got closer

27

00:01:44,000 --> 00:01:48,000

to the ground and left that little burning trail, but it wasn't something that was

28

00:01:48,000 --> 00:01:52,000

real high up in the air. These were maybe suspended 200-300 feet above the ground.

29

00:01:52,000 --> 00:01:56,000

So I said to him, I said, there's some funky stuff going on

30

00:01:56,000 --> 00:02:00,000

over here. Maybe we should report this. Did any of that

31

00:02:00,000 --> 00:02:04,000

occur during the daylight hours? Well, 7 o'clock it started

32

00:02:04,000 --> 00:02:08,000

getting light out. So this was just before dawn and the girl that was with us in the

33

00:02:08,000 --> 00:02:12,000

car that was sleeping, she heard us talking and saying stuff about it. But

34

00:02:12,000 --> 00:02:16,000

the phenomenal speed of these objects and etc. was what

35

00:02:16,000 --> 00:02:20,000

amazed me. And I've seen things in the past before. Back in

36

00:02:20,000 --> 00:02:24,000

1978 I stood out here out in Marne, Michigan, which is located just

37

00:02:24,000 --> 00:02:28,000

outside of Grand Rapids, for an hour and watched some object

38

00:02:28,000 --> 00:02:32,000

really phenomenally high in the sky. And I thought, well it could be a satellite.

39

00:02:32,000 --> 00:02:36,000

But approximately every 7 minutes it circled the globe

40

00:02:36,000 --> 00:02:40,000

heading from south to north. And then from

41

00:02:40,000 --> 00:02:44,000

that point it came back from the north to the south.

42

00:02:44,000 --> 00:02:48,000

There was a cloud covering and behind that cloud covering was an extreme

43

00:02:48,000 --> 00:02:52,000

bound of light flashing. It was just like the heat lightning you see sometimes in clouds.

44

00:02:52,000 --> 00:02:56,000

But this happened to be like in late November when it's extremely cold out.

45

00:02:56,000 --> 00:03:00,000

And the object shot back to the north at that point and it again

46

00:03:00,000 --> 00:03:04,000

circled the globe. And I waited. It was approximately every 5 to 7 minutes. And I thought

47

00:03:04,000 --> 00:03:08,000

there's nothing I know on Earth that goes that fast. Okay, now how many

48

00:03:08,000 --> 00:03:12,000

triangles were there? There was 3 of them. 2 of them were heading

49

00:03:12,000 --> 00:03:16,000

westbound. And the other one I think went to the south side of the

50

00:03:16,000 --> 00:03:20,000

we call it the I-96 interstate expressway here in Michigan.

51

00:03:20,000 --> 00:03:24,000

Okay. And these other objects there was, I tried to get a

52

00:03:24,000 --> 00:03:28,000

signpost. The closest signpost I could find was the one when we were entering

53

00:03:28,000 --> 00:03:32,000

Water Township. Okay.

54

00:03:32,000 --> 00:03:36,000

And that was, I thought I better grab that one. But I started witnessing these things. It was

55

00:03:36,000 --> 00:03:40,000

like 5 minutes to 6 and I continued to watch these items.

56

00:03:40,000 --> 00:03:44,000

And then the triangular ones that disappeared to the west.

57

00:03:44,000 --> 00:03:48,000

And as I said, the one turned around and it came back and it went over the

58

00:03:48,000 --> 00:03:52,000

area of Lansing there and it headed eastbound. And my boss and I watched. It was going

59

00:03:52,000 --> 00:03:56,000

so fast that you could just only virtually see a little pinprick

60

00:03:56,000 --> 00:04:00,000

of the red light that was on the bottom of it at a certain point and it was gone.

61

00:04:00,000 --> 00:04:04,000

But it did leave, it was almost like maybe

62

00:04:04,000 --> 00:04:08,000

30 seconds after it went to a pinprick that object or whatever it shot

63

00:04:08,000 --> 00:04:12,000

out came back and headed towards those other two objects suspended over in Lansing.

64

00:04:12,000 --> 00:04:16,000

And those may very well have been helicopters or something that they had for traffic control

65

00:04:16,000 --> 00:04:20,000

or something there during the day too. But I doubt it.

66

00:04:20,000 --> 00:04:24,000

How many of the spears were there? These little, they looked like what they

67

00:04:24,000 --> 00:04:28,000

were, it was like miniature flying saucers but they had something hanging down

68

00:04:28,000 --> 00:04:32,000

underneath them which contained this bright light. Extremely bright

69

00:04:32,000 --> 00:04:36,000

light. I've never seen a light that bright even at the Silver Dome.

70

00:04:36,000 --> 00:04:40,000

And it hung down suspended and below that, yeah, it was the solid red light,

71

00:04:40,000 --> 00:04:44,000

the big red light that just hung there, not flashing or anything.

72

00:04:44,000 --> 00:04:48,000

And there was two of those objects, one of those was a little bit farther,

73

00:04:48,000 --> 00:04:52,000

well actually there was three, there was three objects like that also, but one of them kind of

74

00:04:52,000 --> 00:04:56,000

went farther to the east and I didn't see where that one headed so I thought maybe that one went to the south

75

00:04:56,000 --> 00:05:00,000

of the expressway. But I was concerned with just keeping my eyes on the ones that were in front of me

76

00:05:00,000 --> 00:05:04,000

because you know with something like that you always think, oh well maybe this is happening, maybe

77

00:05:04,000 --> 00:05:08,000

it's not real. Maybe I'm still dreaming but...

78

00:05:08,000 --> 00:05:12,000

or let me put it this way, were the triangles large or small?

79

00:05:12,000 --> 00:05:16,000

They were large, they were larger than

80

00:05:16,000 --> 00:05:20,000

our piper planes, they were quite large.

81

00:05:20,000 --> 00:05:24,000

If I would say, if you got them on the ground, I would say that they might be

82

00:05:24,000 --> 00:05:28,000

anywhere from 150 maybe to 200 feet

83

00:05:28,000 --> 00:05:32,000

at least. Now

84

00:05:32,000 --> 00:05:36,000

all of those objects moved, is that correct? All of the objects moved

85

00:05:36,000 --> 00:05:40,000

the cylindrical ones that were hanging there, I call them cylindrical but they were

86

00:05:40,000 --> 00:05:44,000

something with something like, look like cages hanging down below them with the

87

00:05:44,000 --> 00:05:48,000

bright light. And those objects I thought would remain stationary but of course

88

00:05:48,000 --> 00:05:52,000

something like that, that close to the ground, had to be planted there by something so it had to

89

00:05:52,000 --> 00:05:56,000

have been moved into place. Those objects

90

00:05:56,000 --> 00:06:00,000

when the one, when that item

91

00:06:00,000 --> 00:06:04,000

or object, a triangular one headed to the east and shot back that

92

00:06:04,000 --> 00:06:08,000

whatever it was that shot back, the one closest

93

00:06:08,000 --> 00:06:12,000

to the expressway, scooted to the north towards the other one so that they may have ended up

94

00:06:12,000 --> 00:06:16,000

maybe only just a couple hundred yards apart and while it was scooting to the north

95

00:06:16,000 --> 00:06:20,000

after that, got shot at like that, the one at the north side

96

00:06:20,000 --> 00:06:24,000

shot something out, aimed towards whatever that object was that took off

97

00:06:24,000 --> 00:06:28,000

in the sky to the east. But I mean by then that thing was already, that was

98

00:06:28,000 --> 00:06:32,000

gone in the horizon, that was already long gone. Okay, now did any of the

99

00:06:32,000 --> 00:06:36,000

triangles or the spears maneuver sharply?

100

00:06:36,000 --> 00:06:40,000

The only one that scooted sharply was the one

101

00:06:40,000 --> 00:06:44,000

that was suspended and that could have very well been a helicopter but it just shot straight to the north

102

00:06:44,000 --> 00:06:48,000

towards that other one that was suspended so that could have been a helicopter.

103

00:06:48,000 --> 00:06:52,000

But the other ones, I didn't see them turn at the west

104

00:06:52,000 --> 00:06:56,000

but for an object that was flying that low and not going that

105

00:06:56,000 --> 00:07:00,000

fast and for the great width and height of it

106

00:07:00,000 --> 00:07:04,000

we thought that those objects were just more or less floating up there too until I looked

107

00:07:04,000 --> 00:07:08,000

at my boss and I said, you know, I don't think I've ever recalled seeing anything in our

108

00:07:08,000 --> 00:07:12,000

air journals about any objects like this before.

109

00:07:12,000 --> 00:07:16,000

That one disappeared into the west because of the rate we were traveling

110

00:07:16,000 --> 00:07:20,000

eastbound and then when it approached and came back again

111

00:07:20,000 --> 00:07:24,000

it had to be going at a phenomenal rate to reach the distance that it did in the short of time

112

00:07:24,000 --> 00:07:28,000

as it did when it swung back and came back that way.

113

00:07:28,000 --> 00:07:32,000

And I saw that one, you could see the outline, the gray shape of the outline

114

00:07:32,000 --> 00:07:36,000

on that one and you could see the double roll lights on the back side of it when it was going away from you.

115

00:07:36,000 --> 00:07:40,000

The ironic thing is I had a real weird feeling that

116

00:07:40,000 --> 00:07:44,000

this object could have reversed itself and gone in any direction that it wanted to.

117

00:07:44,000 --> 00:07:48,000

That it could have gone forward or back in the same manner

118

00:07:48,000 --> 00:07:52,000

that, you know, like a car backs up.

119

00:07:52,000 --> 00:07:56,000

Now at any time did you see the small spears merge with

120

00:07:56,000 --> 00:08:00,000

the light that was being launched from the triangles?

121

00:08:00,000 --> 00:08:04,000

Okay, when that triangle, the one that I saw heading to the east,

122

00:08:04,000 --> 00:08:08,000

mounted higher into the sky as it was first leaving, there was little teeny

123

00:08:08,000 --> 00:08:12,000

10 pricks of light around it. I thought, well maybe there's somebody

124

00:08:12,000 --> 00:08:16,000

firing at it or maybe it's just something in the atmosphere

125

00:08:16,000 --> 00:08:20,000

that, you know, like a combustible gas or something being released from it that's just setting off

126

00:08:20,000 --> 00:08:24,000

those little shooting objects. But it looked like there were little teeny

127

00:08:24,000 --> 00:08:28,000

bubbles of light around it there. It was just flashing on and off consistently,

128

00:08:28,000 --> 00:08:32,000

right immediately around it and it was right at that point that it

129

00:08:32,000 --> 00:08:36,000

suddenly just took off to the east and disappeared.

130

00:08:36,000 --> 00:08:40,000

So it was kind of weird. It was kind of interesting.

131

00:08:40,000 --> 00:08:44,000

And where did you get our number? I called through

132

00:08:44,000 --> 00:08:48,000

the government agency. They started with the defense department

133

00:08:48,000 --> 00:08:52,000

and I got a number here, a 1-800 number and through that one

134

00:08:52,000 --> 00:08:56,000

I was told by the operator, the center of UFO studies and research

135

00:08:56,000 --> 00:09:00,000

in Chicago and then he also looked up another number which was yours,

136

00:09:00,000 --> 00:09:04,000

National UFO Reporting Center in Washington. He was trying to get me NASA.

137

00:09:04,000 --> 00:09:08,000

He couldn't find NASA's number and I don't have it. Do you have that?

138

00:09:08,000 --> 00:09:12,000

No, but they would have given you our number anyway. Okay, that'll work.

139

00:09:12,000 --> 00:09:16,000

Do you want your name held confidential over this? It doesn't matter.

140

00:09:16,000 --> 00:09:20,000

Now, what city were you near when this started? Oh gosh,

141

00:09:20,000 --> 00:09:24,000

the township was what we were entering and we were down by the state capital of Lansing

142

00:09:24,000 --> 00:09:28,000

and this was all more or less taking place right within the boundaries of that Lansing area.

143

00:09:28,000 --> 00:09:32,000

Oh, yes. Once we passed the Grand River Avenue exit

144

00:09:32,000 --> 00:09:36,000

and started swinging to the south because the highway kind of bends around to the south of the city there and all,

145

00:09:36,000 --> 00:09:40,000

I just figured that the low one suspended there might have just been

146

00:09:40,000 --> 00:09:44,000

those helicopters, you know, but even helicopters move.

147

00:09:44,000 --> 00:09:48,000

You know, and they're not, I've never seen lights that bright on anything like that.

148

00:09:48,000 --> 00:09:52,000

At first I thought it was some of those towers that people have, you know, the

149

00:09:52,000 --> 00:09:56,000

shortwave towers where they put them bright lights.

150

00:09:56,000 --> 00:10:00,000

I've never seen lights that bright and they weren't moving. They were just suspended.

151

00:10:00,000 --> 00:10:04,000

They weren't moving, which is, you know, kind of a weird

152

00:10:04,000 --> 00:10:08,000

situation. That's why I thought they were just towers. You know, that's why I got

153

00:10:08,000 --> 00:10:12,000

the impression that they were like cylindrical and they had the metal hanging down.

154

00:10:12,000 --> 00:10:16,000

Whatever that was attached to, it had the bright light was coming from like

155

00:10:16,000 --> 00:10:20,000

the center part of it. It looked just like it was some kind of a

156

00:10:20,000 --> 00:10:24,000

cage of sorts. So, wow, I thought it was interesting and I'm going to

157

00:10:24,000 --> 00:10:28,000

keep my eyes peeled. But everybody in the car said, well, you know, this goes on all the time.

158

00:10:28,000 --> 00:10:32,000

You just got to stay up between three and five in the morning and I just don't have that on occasion before, but

159

00:10:32,000 --> 00:10:36,000

oh. Okay, thanks again. Alrighty.
