

1

00:00:00,000 --> 00:00:07,000

The first call came into the Everett Police Department approximately 1825, well, that

2

00:00:07,000 --> 00:00:09,000

would be 625 this evening.

3

00:00:09,000 --> 00:00:11,000

Okay, someone there.

4

00:00:11,000 --> 00:00:13,000

Everett Police.

5

00:00:13,000 --> 00:00:14,000

Right.

6

00:00:14,000 --> 00:00:22,000

Someone there, well, a friend of Pete Pierce, how are these, why can't I do that, isn't

7

00:00:22,000 --> 00:00:23,000

they?

8

00:00:23,000 --> 00:00:26,000

Jerry called the Seattle Flight Center.

9

00:00:26,000 --> 00:00:31,000

Okay, when he called the Seattle Flight Center, they had already seen where they were seeing

10

00:00:31,000 --> 00:00:33,000

the object at the time.

11

00:00:33,000 --> 00:00:38,000

Seattle Flight Center at the same time was in touch with Highbrass in Washington, D.C.

12

00:00:47,000 --> 00:00:50,000

They called the Seattle Flight Center and they were in touch.

13

00:00:50,000 --> 00:00:51,000

They?

14

00:00:51,000 --> 00:00:52,000

They had the object on her observation.

15

00:00:52,000 --> 00:00:53,000

They did.

16

00:00:53,000 --> 00:00:54,000

They did at the time.

17

00:00:54,000 --> 00:00:59,000

I don't know if they had it exactly at that time, but when the object was reported, a

18

00:00:59,000 --> 00:01:02,000

call was made to Seattle Flight Center.

19

00:01:02,000 --> 00:01:07,000

They claimed Seattle Flight Center said that they were, they saw it or they were in the

20

00:01:07,000 --> 00:01:12,000

process of seeing it and they were in touch with Washington, D.C.

21

00:01:12,000 --> 00:01:18,000

The object was seen as far as Alberta, Canada, was seen as far east of Spokane, another city

22

00:01:18,000 --> 00:01:20,000

across the state.

23

00:01:20,000 --> 00:01:24,000

I don't think I'm going to put that out.

24

00:01:24,000 --> 00:01:26,000

It was seen as far north.

25

00:01:26,000 --> 00:01:29,000

Well, as far north as Alberta, Canada.

26

00:01:29,000 --> 00:01:30,000

Alberta.

27

00:01:30,000 --> 00:01:35,000

It was seen as far east as Spokane.

28

00:01:45,000 --> 00:01:46,000

Spokane.

29

00:01:46,000 --> 00:01:47,000

Okay.

30

00:01:47,000 --> 00:01:52,000

Spokane, I'll tell you he called Tain's Field and he was notified that Tain's Field had

31

00:01:52,000 --> 00:01:55,000

the object under observation for three minutes.

32

00:02:11,000 --> 00:02:14,000

He then called the Whitby Island Naval Station.

33

00:02:15,000 --> 00:02:18,000

Talk to whoever he talked to there.

34

00:02:18,000 --> 00:02:23,000

They said they had the object under observation for approximately five minutes.

35

00:02:29,000 --> 00:02:32,000

A helicopter pilot also saw the object.

36

00:02:32,000 --> 00:02:36,000

He estimated the object at between three to five thousand feet.

37

00:02:36,000 --> 00:02:38,000

Is this the NAS?

38

00:02:38,000 --> 00:02:40,000

I think so.

39

00:02:41,000 --> 00:02:43,000

The general description.

40

00:02:45,000 --> 00:02:47,000

Three to five thousand?

41

00:02:47,000 --> 00:02:49,000

Yeah, and there's a big problem there.

42

00:02:49,000 --> 00:02:50,000

Okay.

43

00:02:52,000 --> 00:02:53,000

Visual.

44

00:02:53,000 --> 00:02:54,000

Visual.

45

00:02:54,000 --> 00:02:55,000

Visual, that's right.

46

00:02:57,000 --> 00:03:04,000

Okay, now the object was described as being very bright orange giving off sparks and flames,

47

00:03:04,000 --> 00:03:06,000

just like the other one last year.

48

00:03:06,000 --> 00:03:07,000

Right, or...

49

00:03:11,000 --> 00:03:13,000

Okay, New York is coming.

50

00:03:15,000 --> 00:03:17,000

Giving off sparks and flames.

51

00:03:17,000 --> 00:03:18,000

Okay.

52

00:03:19,000 --> 00:03:24,000

Now as I understand it, Whitby Island tried to get the object on radar and nothing showed.

53

00:03:26,000 --> 00:03:27,000

No radar.

54

00:03:29,000 --> 00:03:34,000

The object had a flat trajectory travelling west east.

55

00:03:41,000 --> 00:03:48,000

According to witnesses, the objects, they followed the objects intermittently through the cloud layer that was twirling around.

56

00:03:48,000 --> 00:03:54,000

And the last thing they saw was the object looked like it just exploded or just broken to pieces.

57

00:04:04,000 --> 00:04:05,000

Okay, uh...

58

00:04:05,000 --> 00:04:06,000

Was there any audible sound?

59

00:04:06,000 --> 00:04:08,000

No sound recorded.

60

00:04:08,000 --> 00:04:13,000

Although hundreds and hundreds of witnesses on basis.

61

00:04:16,000 --> 00:04:18,000

Coast guard set also finding it.

62

00:04:18,000 --> 00:04:22,000

And that's all he said about that after the...

63

00:04:23,000 --> 00:04:24,000

Coast guard.

64

00:04:33,000 --> 00:04:39,000

They said they don't know how many witnesses there are except that they've been getting calls and people on the basis know there's a lot of witnesses on the basis.

65

00:04:39,000 --> 00:04:44,000

This is coming in to... you're speaking of calls in the Stalby County Radio Central.

66

00:04:44,000 --> 00:04:46,000

All over, through all the...

67

00:04:46,000 --> 00:04:48,000

And you're saying it from Canada down.

68

00:04:48,000 --> 00:04:49,000

Yeah.

69

00:04:49,000 --> 00:04:50,000

Okay.

70

00:04:53,000 --> 00:04:58,000

That's the preliminary that he got in what was it, 20 minutes.

71

00:05:01,000 --> 00:05:02,000

Okay.

72

00:05:02,000 --> 00:05:06,000

He's gonna check further. He wanted to know if I could check this out and I told him indeed.

73

00:05:06,000 --> 00:05:08,000

I tried to check them out.

74

00:05:08,000 --> 00:05:10,000

I told him something and I believe this.

75

00:05:10,000 --> 00:05:13,000

It seems that these fireball type sightings...

76

00:05:13,000 --> 00:05:14,000

Yeah.

77

00:05:14,000 --> 00:05:15,000

...always...

78

00:05:16,000 --> 00:05:18,000

...are followed by a flap.

79

00:05:18,000 --> 00:05:19,000

Yeah.

80

00:05:19,000 --> 00:05:25,000

And I told him to watch it. You know, I think that made the indicative of a flap. I told him.

81

00:05:25,000 --> 00:05:30,000

There's more to an activist thing that seems like to save us five minutes.

82

00:05:30,000 --> 00:05:32,000

Yeah. Well, see, there's a problem.

83

00:05:32,000 --> 00:05:38,000

The estimate is very too soon for an object to be seen for three or five minutes.

84

00:05:38,000 --> 00:05:42,000

And the witness said it was traveling very slow.

85

00:05:42,000 --> 00:05:43,000

Yeah.

86

00:05:43,000 --> 00:05:51,000

It would have either had to be really high and extremely huge or very low or medium, you know,

87

00:05:51,000 --> 00:05:54,000

three to five thousand feet and going slow.

88

00:05:54,000 --> 00:05:57,000

And it ain't no goddamn bull-eyed.

89

00:05:59,000 --> 00:06:02,000

So that's it. He's gonna call me tomorrow night.

90

00:06:02,000 --> 00:06:05,000

There may be some witnesses down here who...

91

00:06:05,000 --> 00:06:08,000

At the Seattle Police Center who may want to talk.

92

00:06:08,000 --> 00:06:12,000

And I'm gonna go down and do some investigations on that.

93

00:06:12,000 --> 00:06:16,000

And he's gonna do some more checking tonight. He'll either call me tomorrow,

94

00:06:16,000 --> 00:06:20,000

but when he comes here on Sunday, he may have most of the report all typed up.

95

00:06:20,000 --> 00:06:23,000

He's calling Heineck off on that.

96

00:06:23,000 --> 00:06:24,000

Okay.

97

00:06:24,000 --> 00:06:25,000

And that's it.

98

00:06:25,000 --> 00:06:26,000

Very good.

99

00:06:26,000 --> 00:06:27,000

Okay. We'll see you later.

100

00:06:27,000 --> 00:06:28,000

Right.

101

00:06:28,000 --> 00:06:29,000

Bye.
