

1

00:00:30,000 --> 00:00:32,500

We've got a good point at the early world now.

2

00:00:32,500 --> 00:00:36,500

The problem is that just to get underneath the clouds cover and hope to meet,

3

00:00:36,500 --> 00:00:39,500

that's going to break up the next hour or two if the darkness were up first

4

00:00:39,500 --> 00:00:43,000

because we're all the clouds are going to bump into each other about that time.

5

00:00:44,000 --> 00:00:46,000

That surge is going on near Uniball.

6

00:00:46,000 --> 00:00:48,000

I used to see a dealer at the Army helicopter.

7

00:00:48,000 --> 00:00:52,500

He didn't spot a crater with fire burning around it last night after the fireball went down.

8

00:00:52,500 --> 00:00:55,500

He got their issues must have been pretty good size.

9

00:00:55,500 --> 00:00:58,500

He runs by easily before they get to ground.

10

00:00:59,000 --> 00:01:01,500

We'll have another report within the hour and maybe by that time,

11

00:01:01,500 --> 00:01:03,500

that will be at the crash site.

12

00:01:03,500 --> 00:01:06,500

The AI is at the point of time 3.2.
