

1

00:00:00,000 --> 00:00:07,000

I wonder if I could get a rundown on that little experience you had the night of the

2

00:00:07,000 --> 00:00:08,000

14th.

3

00:00:08,000 --> 00:00:09,000

Yeah, okay.

4

00:00:09,000 --> 00:00:10,000

Did you get old and do?

5

00:00:10,000 --> 00:00:11,000

No, I couldn't get through the office.

6

00:00:11,000 --> 00:00:16,000

The phone was busy and I tried to get a number from him to make a rundown.

7

00:00:16,000 --> 00:00:17,000

Oh, yeah.

8

00:00:17,000 --> 00:00:18,000

Okay.

9

00:00:18,000 --> 00:00:26,000

Well, we were flying along at about four nine hundred feet between Bainbridge, Ralland

10

00:00:26,000 --> 00:00:27,000

and Seattle.

11

00:00:27,000 --> 00:00:28,000

Yes.

12

00:00:28,000 --> 00:00:35,000

And I was about to look for a million people's outskirts.

13

00:00:35,000 --> 00:00:44,000

And all of them were going to see me, right there coming down from the sky.

14

00:00:44,000 --> 00:00:50,000

And it looked like, you know, on a flight path you might see what it looked like.

15

00:00:50,000 --> 00:00:54,000

It had come out of K-12 from heading through, you know, Seattle.

16

00:00:54,000 --> 00:00:55,000

Yeah.

17

00:00:55,000 --> 00:00:58,000

It had a long, flaming tail.

18

00:00:58,000 --> 00:01:01,000

You know, like a jet or something, you know?

19

00:01:01,000 --> 00:01:02,000

Yeah.

20

00:01:02,000 --> 00:01:03,000

Okay.

21

00:01:03,000 --> 00:01:09,000

And it proceeded along this and heading towards Seattle.

22

00:01:09,000 --> 00:01:16,000

And we noticed that first old Galilee right before he was down in between the two.

23

00:01:16,000 --> 00:01:20,000

And we both lost a little couple.

24

00:01:20,000 --> 00:01:27,000

And I told people at King County Tower on the William and notified them that I'd seen

25

00:01:27,000 --> 00:01:30,000

it right in my little room.

26

00:01:30,000 --> 00:01:40,000

It seemed to have a body to, you know, on the hill on that island.

27

00:01:40,000 --> 00:01:42,000

And I don't know.

28

00:01:42,000 --> 00:01:43,000

It's a long...

29

00:01:43,000 --> 00:01:44,000

Yeah.

30

00:01:44,000 --> 00:01:47,000

A long roll in front and then, you know, with the full behind it.

31

00:01:47,000 --> 00:01:48,000

Yeah.

32

00:01:48,000 --> 00:01:49,000

Right.

33

00:01:49,000 --> 00:01:56,000

And it was a long roll in front of me.

34

00:01:56,000 --> 00:02:05,000

And I told people at King County Tower, you know, it was a long roll in front of me.

35

00:02:05,000 --> 00:02:13,000

And I told them, you know, it was a long roll in front of me.

36

00:02:13,000 --> 00:02:18,000

Well, if you think it's in Case 30, I can tell you that, definitely.

37

00:02:18,000 --> 00:02:23,000

So King County Tower would have my kind of location on the island.

38

00:02:23,000 --> 00:02:26,000

It would both be court all kinds of locations.

39

00:02:26,000 --> 00:02:31,000

And when I talked to them, I told them that they didn't touch the property authority.

40

00:02:31,000 --> 00:02:32,000

Yeah.

41

00:02:32,000 --> 00:02:33,000

You know?

42

00:02:33,000 --> 00:02:40,000

So, if you probably contacted the F.A.R.O., they would have that on them.

43

00:02:40,000 --> 00:02:47,000

And they would have that on them.

44

00:02:47,000 --> 00:02:56,000

And they would have that on them.

45

00:02:56,000 --> 00:03:03,000

So, the tower was hitting a long roll in front of me.

46

00:03:03,000 --> 00:03:08,000

It was a little higher than it was.

47

00:03:08,000 --> 00:03:13,000

A little higher than it was.

48

00:03:13,000 --> 00:03:18,000

A little higher than it was.

49

00:03:18,000 --> 00:03:25,000

And a little bit of fear, like it was, you know, closed.

50

00:03:25,000 --> 00:03:31,000

And I feel that the tower was really low, the approach, and I'm aware of that.

51

00:03:31,000 --> 00:03:33,000

Well, now, we had another call.

52

00:03:33,000 --> 00:03:37,000

I thought to the end of today, we had another call from the party living on Queen Anne Hill.

53

00:03:37,000 --> 00:03:39,000

We were overlooking the water.

54

00:03:39,000 --> 00:03:43,000

And he was watching the news between 6 and 6.30.

55

00:03:43,000 --> 00:03:45,000

He couldn't get in point at the exact time.

56

00:03:45,000 --> 00:03:51,000

And he invited this thing, coming down the town, almost to south, north to south.

57

00:03:51,000 --> 00:03:59,000

And he could have got almost the breath of Seattle, the west of Seattle, the sea guard,

58

00:03:59,000 --> 00:04:04,000

and just think of it as being the 90 degrees, and then just get a heat.

59

00:04:04,000 --> 00:04:07,000

Well, and I could have been very close.

60

00:04:07,000 --> 00:04:14,000

I go through that work road on a friendly coast that's been heading towards the outskirts of Kingston area.

61

00:04:14,000 --> 00:04:18,000

And heading towards the ballot area would be on kind of a friendly coast.

62

00:04:18,000 --> 00:04:22,000

But when we were through it, there was no law setting over the way down.

63

00:04:22,000 --> 00:04:26,000

We found out it was, well, the matter was fine.

64

00:04:26,000 --> 00:04:27,000

Yeah.

65

00:04:27,000 --> 00:04:30,000

But we could see the derailment of the fighting was.

66

00:04:30,000 --> 00:04:34,000

It was an annual first thought, and we were just going south.

67

00:04:34,000 --> 00:04:36,000

Uh, found blue.

68

00:04:36,000 --> 00:04:38,000

Yeah.

69

00:04:38,000 --> 00:04:40,000

Yeah.

70

00:04:40,000 --> 00:04:42,000

That was good solid, middle.

71

00:04:42,000 --> 00:04:43,000

Mm-hmm.

72

00:04:43,000 --> 00:04:45,000

Middle for you, Mark.

73

00:04:49,000 --> 00:04:52,000

You didn't hear any other air traffic on that?

74

00:04:52,000 --> 00:04:53,000

No.

75

00:04:53,000 --> 00:04:55,000

I even asked for a power and a kind of a station.

76

00:04:55,000 --> 00:05:00,000

If anybody else had heard of it, it was a really, other air traffic than the other time.

77

00:05:00,000 --> 00:05:05,000

And in fact, it's kind of hard to see, you know, a lot of different.

78

00:05:05,000 --> 00:05:07,000

And people are not really well, though.

79

00:05:07,000 --> 00:05:09,000

I think that was worse.

80

00:05:09,000 --> 00:05:12,000

More of a thing, I think, than the other thing, that was a little bit worse.

81

00:05:12,000 --> 00:05:14,000

Yeah, but worse.

82

00:05:14,000 --> 00:05:16,000

Yeah.

83

00:05:16,000 --> 00:05:17,000

I don't know.

84

00:05:17,000 --> 00:05:19,000

I think I'm a little bit worried about anything that matter, right?

85

00:05:19,000 --> 00:05:20,000

No.

86

00:05:20,000 --> 00:05:27,000

Well, the, uh, the conflict here, we've, we know we've got two different outskirts

87

00:05:27,000 --> 00:05:30,000

for that night, and possibly, yours could be a third.

88

00:05:30,000 --> 00:05:31,000

Oh.

89

00:05:31,000 --> 00:05:36,000

And, uh, we're kind of pinning it down exactly.

90

00:05:36,000 --> 00:05:39,000

It gets these kind of exacting conditions.

91

00:05:39,000 --> 00:05:41,000

It gets the geeks up, I'll go put them together.

92

00:05:41,000 --> 00:05:43,000

But we know there's two different outskirts.

93

00:05:43,000 --> 00:05:55,000

One would mean about, uh, running about 625 in the 90s range, almost in a great line from,

94

00:05:55,000 --> 00:06:04,000

uh, northwest up to Vancouver Island and on into the southeast, or southeast over to the Grand Clouie area.

95

00:06:04,000 --> 00:06:05,000

Oh, yeah.

96

00:06:05,000 --> 00:06:09,000

Then we have your sighting, which is much slower altitude.

97

00:06:09,000 --> 00:06:10,000

Yeah.

98

00:06:10,000 --> 00:06:16,000

And then there was a third one, which, uh, involved the so-called impact area down around, uh,

99

00:06:16,000 --> 00:06:18,000

Central Radiant Agilus.

100

00:06:18,000 --> 00:06:19,000

Yeah.

101

00:06:19,000 --> 00:06:26,000

Well, the route, the route from the community, they've bumped off at times, you know, I don't know anything about.

102

00:06:26,000 --> 00:06:32,000

Well, it ain't me a large bull-eyed, which is really a large piece of junk, broke and it can explode.

103

00:06:32,000 --> 00:06:33,000

Right.

104

00:06:33,000 --> 00:06:40,000

But, uh, usually what they do, while they're a third from miles, I mean, the flash is just fantastic.

105

00:06:40,000 --> 00:06:41,000

Yeah.

106

00:06:41,000 --> 00:06:47,000

So, I doubt that's, that's what we're dealing with, and of course, uh, they usually only last

107

00:06:47,000 --> 00:06:50,000

two or three seconds, maybe five seconds, so.

108

00:06:50,000 --> 00:06:51,000

Oh, I see.

109

00:06:51,000 --> 00:06:53,000

Well, we'll talk about the ground again, man.

110

00:06:53,000 --> 00:06:54,000

Yeah.

111

00:06:54,000 --> 00:06:56,000

And I thought it was quite a nice, you know, alacrity.

112

00:06:56,000 --> 00:07:06,000

And, uh, we were, um, uh, we were walking, and walking for the next three or four minutes.

113

00:07:06,000 --> 00:07:10,000

But, well, I would say you could really turn the point to go outside.

114

00:07:10,000 --> 00:07:14,000

You could turn back and turn it down, or actually turn back to, you know, up or low, kind of,

115

00:07:14,000 --> 00:07:17,000

go in the field, or something, kind of, in the field, man.

116

00:07:17,000 --> 00:07:20,000

And, uh, we'll both return to that bull-eyed again.

117

00:07:20,000 --> 00:07:21,000

Yeah.

118

00:07:21,000 --> 00:07:25,000

Would you, is this not equal to traveling in the horizontal trajectory?

119

00:07:25,000 --> 00:07:35,000

Yeah, kind of, uh, well, no, I don't know, I'd say you were at 1200 feet, and kind of looked like

120

00:07:35,000 --> 00:07:41,000

you were holding down towards the water, put towards the tower there, and then, poof, it just was done.

121

00:07:41,000 --> 00:07:45,000

But I could see that, at least I thought, I didn't take the credit.

122

00:07:45,000 --> 00:07:46,000

Yeah.

123

00:07:46,000 --> 00:07:51,000

Okay, now if we send you a short questionnaire, would you have time to fill it out?

124

00:07:51,000 --> 00:07:52,000

Cool.

125

00:07:52,000 --> 00:07:53,000

Thank you very much.

126

00:07:53,000 --> 00:07:54,000

Thank you.

127

00:07:54,000 --> 00:07:55,000

Goodbye.
