

1

00:00:00,000 --> 00:00:07,000

I'm Bob Grebel of Phenomenal Research in Seattle, and I wonder if we can impose upon you again

2

00:00:07,000 --> 00:00:10,000

to get a description of the object you saw in the night of the 13th.

3

00:00:10,000 --> 00:00:14,000

Oh, right! Okay, so that was last Friday, right?

4

00:00:14,000 --> 00:00:25,000

Uh, okay. The best way for me to describe it, the original orange light that I saw was cone shaped and tilted.

5

00:00:25,000 --> 00:00:33,000

And while I turned the lights off to make sure it wasn't a reflection, and I went back to the center window,

6

00:00:33,000 --> 00:00:38,000

and I thought, well, somebody in West Seattle must be having some kind of a light show.

7

00:00:38,000 --> 00:00:44,000

So, while I was dialing, trying to get through the king to find out, you know, if anything was going on,

8

00:00:44,000 --> 00:00:49,000

I looked out again and I saw another orange light.

9

00:00:49,000 --> 00:00:59,000

This one, the shape was more flat, same sort of an orange tone like you'd see on a bright sunset.

10

00:00:59,000 --> 00:01:12,000

And the bright tip of this orange light, the flatter one on the bottom, was touching the round cone of the previous orange light.

11

00:01:12,000 --> 00:01:18,000

And I blinked and I shook my head and flashed the lights and, you know, went through all sorts of hurrah here.

12

00:01:18,000 --> 00:01:24,000

And so then the line, while I was doing this, I was trying to get through the king and the line was busy, so I called again.

13

00:01:24,000 --> 00:01:27,000

I went in my phone cord to kind of show it so I have to leave the window.

14

00:01:27,000 --> 00:01:34,000

So I strained my neck and dragged the phone as far as I could while I was dialing, and in this short period of time,

15

00:01:34,000 --> 00:01:37,000

the one on the bottom had shrunk.

16

00:01:37,000 --> 00:01:43,000

And then when I got through on king, they said, well, call the newsroom. So they gave me another number.

17

00:01:43,000 --> 00:01:50,000

I went back to the window again. The bottom one was gone and the original cone, which was tilted, was now straight up and down.

18

00:01:50,000 --> 00:01:52,000

That's right.

19

00:01:52,000 --> 00:02:01,000

Then I got through to king and I went through my spiel asking about, you know, was West Seattle or approximately that area having any kind of a

20

00:02:01,000 --> 00:02:09,000

grand opening or, you know, to have spotlights or kind of a West Seattle arts festival or anything that we have any reason to have any,

21

00:02:09,000 --> 00:02:15,000

having anything to do with spotlights in the sky or anything. And the guy kind of laughed at me. He said, no, you know, and so by this time,

22

00:02:15,000 --> 00:02:19,000

I spoke back and it was gone. Everything was gone.

23

00:02:19,000 --> 00:02:26,000

So he said that I should call, you know, the UFO because they were interested in this sort of thing.

24

00:02:26,000 --> 00:02:35,000

And I thought, well, gee, you know, I thought, well, if somebody else has reported seeing these orange lights, then it will give me some peace of mind.

25

00:02:35,000 --> 00:02:44,000

And I was at the wood de-island. I asked people up there on wood de-island if anybody saw anything and so far, I'm the only one that seems to have seen these orange lights.

26

00:02:44,000 --> 00:02:50,000

And I'm getting her, you know, I'm getting her rassed by my friends. You're seeing things now that you're over 30, you know.

27

00:02:50,000 --> 00:02:57,000

You know, rather than over 30 kids, you know, this is just the beginning. Samillity sets in and then rickets, you know.

28

00:02:57,000 --> 00:03:08,000

But it was really spooky. My cottage faces east, west. And I would say, you know, 90% of the time that I'm home,

29

00:03:08,000 --> 00:03:16,000

I have one I have on the television set and the rest of the time I'm watching the lake and the sailboats and the planes take off and land and all this kind of stuff.

30

00:03:16,000 --> 00:03:22,000

So I know when I see reflections and I know when it's light, some planes and this sort of thing.

31

00:03:22,000 --> 00:03:28,000

And this was the most unusual sighting of light formations that I've ever seen.

32

00:03:28,000 --> 00:03:35,000

It had no form really as such. You know, I didn't see any round object or creature shape or anything else.

33

00:03:35,000 --> 00:03:45,000

It was just kind of like a cone shape. And the other one, like I say, it was even less descriptive other than just a squaudy rectangular type light.

34

00:03:45,000 --> 00:03:55,000

Yes. So, you know, that's about as descriptive as I can be for, you know, I don't think the whole thing lasted over about 8 to 10 minutes maximum time.

35

00:03:55,000 --> 00:04:02,000

Now you said that the first object was tilted when you first saw it. Right. Do you have any idea what degree of tilt?

36

00:04:02,000 --> 00:04:14,000

Well, I'm looking at my hand. Okay. If you were to have your hand palm facing left and top side of

hand facing right, you know, with fingers straight up.

37

00:04:14,000 --> 00:04:29,000

Okay. If you were to turn your hand at an angle of like about 11 o'clock, about 11 o'clock or five minutes to five, which is, you know, about five minutes to five angle.

38

00:04:29,000 --> 00:04:34,000

That's about a 50 degree, 55 degree.

39

00:04:34,000 --> 00:04:38,000

Yeah. And then the last time I saw it, it was basically straight up and down.

40

00:04:38,000 --> 00:04:43,000

Uh-huh. That had changed its shape, didn't it? The last time you saw it?

41

00:04:43,000 --> 00:04:48,000

Uh, yeah.

42

00:04:48,000 --> 00:05:06,000

Well, let me think about that seriously. The things that went through my mind when I saw the two of them intersected would be, if you were to draw the old fashioned kind of a balloon that they filmed

around the world in 80 days type thing.

43

00:05:06,000 --> 00:05:07,000

Yes.

44

00:05:07,000 --> 00:05:23,000

If you were to take the band that goes across the bottom and to take the same cone shape and take and draw that around the top right side of the balloon and then black out the rest, that would be about the formation that I, that it formed.

45

00:05:23,000 --> 00:05:30,000

And I thought, well, now maybe that's what it was. Maybe it was somebody in a balloon and the lights were on just that part of it.

46

00:05:30,000 --> 00:05:38,000

And then like I said, when the bottom light disappeared and that little orange stream was still left, I kind of decided that couldn't be it.

47

00:05:38,000 --> 00:05:47,000

But as far as the actual changing shape that I'm not too clear on, it would, it seemed to me it would kind of pooch that a little more on the left and straighter on the right hand side.

48

00:05:47,000 --> 00:05:49,000

The apex was down.

49

00:05:49,000 --> 00:05:50,000

Right.

50

00:05:50,000 --> 00:05:52,000

How about colored lights? Anything like that?

51

00:05:52,000 --> 00:05:59,000

No. It was just a solid go, kind of a solid reddish orange color that you'd have in a sunset.

52

00:05:59,000 --> 00:06:02,000

More orange than red.

53

00:06:02,000 --> 00:06:17,000

Well, you might be interested in knowing that that same night, a lady in Ballard reported approximately 11.30, 5 to 6 moving rectangular shaped light objects.

54

00:06:17,000 --> 00:06:18,000

I'll be done.

55

00:06:18,000 --> 00:06:20,000

Hmm, good.

56

00:06:20,000 --> 00:06:26,000

These were traveling from north to south at the time that she saw them, so they may be associated with what you saw.

57

00:06:26,000 --> 00:06:36,000

Yeah, because this would have had your band with those watching the 11 o'clock news on King and Ray McMackin was given the sport.

58

00:06:36,000 --> 00:06:42,000

So it had to be the first time I saw it till the time that I finally got through.

59

00:06:42,000 --> 00:06:52,000

It would have been about from 10 after you're 11 to 20 after 11, approximately right in there that I saw it somewhere within that time period.

60

00:06:52,000 --> 00:06:53,000

Okay.

61

00:06:53,000 --> 00:07:00,000

But, you know, I've really gotten quite the wrapping in the last few days, you know.

62

00:07:00,000 --> 00:07:07,000

Anytime I say something about having a lapse of memory or something, I'll say, do you remember talking to someone, or do you remember the conversation or something?

63

00:07:07,000 --> 00:07:18,000

And maybe one of those days, you know, when the husband kind of tunes the wife out, you know, I have these same instances with my family where, you know, you've heard the same thing over, so you kind of tune them out.

64

00:07:18,000 --> 00:07:24,000

They say, well, you know, this is just another sign you wrote with 30, you're going down the hill, and I've really gotten quite the wrapping.

65

00:07:24,000 --> 00:07:29,000

And, well, the birds are talking to you, it's probably like when you saw those orange lights, right?

66

00:07:29,000 --> 00:07:39,000

You know, so I give them, oh, please, somebody, somebody please tell me that they saw him too, so I don't think I'm losing my mind.

67

00:07:39,000 --> 00:07:42,000

But he saw five or six.

68

00:07:42,000 --> 00:07:44,000

Hmm.

69

00:07:44,000 --> 00:07:45,000

I'll be darned.

70

00:07:45,000 --> 00:07:52,000

Well, it looked like, you know, like I say in the general vicinity of West Seattle from where I was sitting.

71

00:07:52,000 --> 00:07:53,000

Yes.

72

00:07:53,000 --> 00:08:02,000

Because I looked basically at Mercer Island right about where the shopping center area, the business district of Mercer Island is.

73

00:08:02,000 --> 00:08:03,000

I see.

74

00:08:03,000 --> 00:08:11,000

And it was just, you know, basically, just what would look above that, but I knew, you know, that I had to be further, further towards the mountains.

75

00:08:11,000 --> 00:08:17,000

Now, in the event you should see anything again in the future, we'd like to hear from you, but we have a new number I think you should have.

76

00:08:17,000 --> 00:08:22,000

Oh, okay, just one second here. Where's my pencil? My dog's laying on it. Just a second.

77

00:08:22,000 --> 00:08:33,000

I will write this down in my little brown book that I have on my personal of all times, because, you know, I can't, I don't know if I'm a believer or not a believer.

78

00:08:33,000 --> 00:08:38,000

You know, there are a lot of phenomenons that have not been explained.

79

00:08:38,000 --> 00:08:44,000

And God said He created the heavens and the earth, but like the thing we say in our family, there's no place in the Bible.

80

00:08:44,000 --> 00:08:48,000

He doesn't say that He couldn't have created another system someplace else.

81

00:08:48,000 --> 00:08:49,000

Right.

82

00:08:49,000 --> 00:08:59,000

And so there is a reason to have a questioning mind and consider that it's within the realm of possibility.

83

00:08:59,000 --> 00:09:00,000

Right.

84

00:09:00,000 --> 00:09:13,000

So I will definitely keep this number and if I can, if I see anything similar to this that I

recognize as being, you know, not a reflection of a city light from the standard or airplane light to an annual, definitely call.

85

00:09:13,000 --> 00:09:16,000

Finally, appreciate your calling and feel free to call anytime.

86

00:09:16,000 --> 00:09:19,000

Great. And thank you for reassuring me that somebody else did see it.

87

00:09:19,000 --> 00:09:20,000

Okay.

88

00:09:20,000 --> 00:09:21,000

Thank you very much.

89

00:09:21,000 --> 00:09:22,000

Bye-bye.
