

1

00:00:00,000 --> 00:00:05,000

You called several days ago regarding something that you saw in the sky.

2

00:00:05,000 --> 00:00:06,000

Yes.

3

00:00:06,000 --> 00:00:10,000

I wonder if we could impose upon you again to get a description of that object.

4

00:00:10,000 --> 00:00:16,000

Well, we called the McCord radar and he said, what does it look like?

5

00:00:16,000 --> 00:00:17,000

And we had talked about it.

6

00:00:17,000 --> 00:00:23,000

It looked like a comet with a tail on a roller coaster and he said we were drinking and hung up.

7

00:00:23,000 --> 00:00:28,000

But this is kind of like it was, like a comet, a ball of fire with a tail.

8

00:00:28,000 --> 00:00:29,000

Uh-huh.

9

00:00:29,000 --> 00:00:35,000

It was a zig-zagging up and it would go up in the clouds and come down just like it was playing tag with something.

10

00:00:35,000 --> 00:00:38,000

And this was Monday night between 9 and 9.30.

11

00:00:38,000 --> 00:00:39,000

I see.

12

00:00:39,000 --> 00:00:44,000

But I'm kind of on a route from the airplanes.

13

00:00:44,000 --> 00:00:49,000

They have their commercial flight from McCord to SeaCac.

14

00:00:49,000 --> 00:00:51,000

It comes across at an angle.

15

00:00:51,000 --> 00:00:54,000

And I was sitting on the front porch and I had those five of us here.

16

00:00:54,000 --> 00:01:01,000

And I was sitting on the front porch talking to them and I saw this airline plane coming towards me like a light.

17

00:01:01,000 --> 00:01:03,000

And I kept watching it.

18

00:01:03,000 --> 00:01:04,000

There's nothing else to do.

19

00:01:04,000 --> 00:01:07,000

And all of a sudden it dropped and I said, oh my god, that plane's crashing.

20

00:01:07,000 --> 00:01:11,000

And we ran out to a big ball field by us and we didn't see any planes.

21

00:01:11,000 --> 00:01:12,000

We didn't see anything.

22

00:01:12,000 --> 00:01:18,000

And then we saw this object jumping up in the sky and doing all kinds of kind of tricks.

23

00:01:18,000 --> 00:01:20,000

And it was too fast for an airplane.

24

00:01:20,000 --> 00:01:25,000

It wasn't a helicopter and it wasn't anything we had ever seen before.

25

00:01:25,000 --> 00:01:31,000

And so I called a friend of mine and he gave me your number and he, why don't you see if somebody else saw the same thing.

26

00:01:31,000 --> 00:01:33,000

Okay, now you said it was doing all kinds of tricks.

27

00:01:33,000 --> 00:01:34,000

Would you describe those?

28

00:01:34,000 --> 00:01:37,000

We're kind of like a yo-yo up and down and dash and then zig.

29

00:01:37,000 --> 00:01:39,000

And just like it was playing tag with something.

30

00:01:39,000 --> 00:01:44,000

It zigged here and it zagged there and then it would go up in the clouds and we could just be kind of a red light.

31

00:01:45,000 --> 00:01:50,000

And then it would drop down real fast and it was just too fast for anything that we had ever seen.

32

00:01:50,000 --> 00:01:53,000

In other words, very constant, irregular maneuvers.

33

00:01:53,000 --> 00:01:58,000

Yeah, just zigzagging and then pretty soon, we watched it for about a half an hour.

34

00:01:58,000 --> 00:02:03,000

And then it kind of just drifted away over to the northwest.

35

00:02:03,000 --> 00:02:04,000

Yes.

36

00:02:04,000 --> 00:02:09,000

So we wondered if anything else had been reported like that or if this is what we saw.

37

00:02:10,000 --> 00:02:16,000

Well, we didn't have anything on that particular night but we have had several strange objects in the area in the past months.

38

00:02:16,000 --> 00:02:17,000

Oh, uh-huh.

39

00:02:17,000 --> 00:02:18,000

Now what color was this?

40

00:02:18,000 --> 00:02:27,000

Well, it was kind of an orange glow and while it's between us, we're in the east, between us and Mount Rainier at an angle like that.

41

00:02:27,000 --> 00:02:32,000

And from where we were, it looked like the size of a garbage can lid, you know, it was round.

42

00:02:32,000 --> 00:02:33,000

Yes.

43

00:02:33,000 --> 00:02:38,000

It appeared, but it had kind of a smoky tail to it like the vapor from a jet or something.

44

00:02:38,000 --> 00:02:39,000

Uh-huh.

45

00:02:39,000 --> 00:02:48,000

And it was an orange glow and then it had twinkle lights on it like twinkle Christmas trees or stars or something that kind of sparks flashed out of it.

46

00:02:48,000 --> 00:02:49,000

I see.

47

00:02:49,000 --> 00:02:50,000

What color was that?

48

00:02:50,000 --> 00:02:52,000

Barbie, what color was those sparks?

49

00:02:52,000 --> 00:02:58,000

Yellow kind of white sparks like stars twinkling kind of.

50

00:02:58,000 --> 00:03:01,000

Well, in your opinion, was this object under intelligent control?

51

00:03:01,000 --> 00:03:02,000

Yes, it definitely was controlled.

52

00:03:02,000 --> 00:03:03,000

I see.

53

00:03:03,000 --> 00:03:05,000

And you hear any sound at all?

54

00:03:05,000 --> 00:03:07,000

No, I think we were too far away to hear.

55

00:03:07,000 --> 00:03:09,000

Could you give me an estimate of the distance?

56

00:03:09,000 --> 00:03:12,000

Well, how far did you take Barbie?

57

00:03:12,000 --> 00:03:21,000

Like I say, we're on 42nd, east 42nd Street and we're at direct angle to Mount Rainier and I just

say halfway between whatever.

58

00:03:21,000 --> 00:03:24,000

I don't even know how far it is to Mount Rainier.

59

00:03:24,000 --> 00:03:25,000

Uh-huh.

60

00:03:25,000 --> 00:03:28,000

About 50 miles, maybe, but half of that, maybe 25 miles away.

61

00:03:28,000 --> 00:03:30,000

In other words, it was a good distance.

62

00:03:30,000 --> 00:03:31,000

Yeah, that's why I say it.

63

00:03:31,000 --> 00:03:34,000

From that distance, it peered the size of a garbage can lid.

64

00:03:34,000 --> 00:03:35,000

It was round.

65

00:03:35,000 --> 00:03:40,000

But it kept kind of getting closer, but it was just definitely being maneuvered somehow.

66

00:03:40,000 --> 00:03:44,000

I assume that this was operating under a cloud cover?

67

00:03:44,000 --> 00:03:46,000

Well, below the clouds.

68

00:03:46,000 --> 00:03:47,000

Yes.

69

00:03:47,000 --> 00:03:55,000

It was darting around and then he'd go up, he'd get whatever, would go up and stay there for a couple minutes and then drop down and start his dashing again.

70

00:03:55,000 --> 00:03:59,000

Now you say it would go up, you mean it went into the clouds and then it came back out again.

71

00:03:59,000 --> 00:04:01,000

It was just like it was playing tag with something.

72

00:04:01,000 --> 00:04:02,000

Uh-huh.

73

00:04:02,000 --> 00:04:03,000

Okay.

74

00:04:03,000 --> 00:04:11,000

But it was on the airline route when I first saw it because it looked just like a headlight on an airplane coming towards me.

75

00:04:11,000 --> 00:04:17,000

And then it just dropped, just bowed and the vapor came up behind, you know, like the jet vapor.

76

00:04:17,000 --> 00:04:20,000

And I said, my God, that airplane just is going to crash.

77

00:04:20,000 --> 00:04:23,000

Now you say it dropped, it had come down perfectly vertical?

78

00:04:23,000 --> 00:04:24,000

Very straight, just dropped.

79

00:04:24,000 --> 00:04:25,000

Just like a rock?

80

00:04:25,000 --> 00:04:26,000

Yeah, uh-huh.

81

00:04:26,000 --> 00:04:34,000

It just dropped and we all looked and then we didn't see any explosion, no fire, no nothings, so we ran out to this field so we could get a closer look to it.

82

00:04:34,000 --> 00:04:37,000

Nothing, then all of a sudden this object appears.

83

00:04:37,000 --> 00:04:38,000

I see.

84

00:04:38,000 --> 00:04:44,000

But it was definitely on the regular airline route and that's what we called McCord and he said we'd been drinking.

85

00:04:44,000 --> 00:04:47,000

But there was five of us that had seen it.

86

00:04:47,000 --> 00:04:49,000

That's very strange as they would give an answer like that.

87

00:04:49,000 --> 00:04:51,000

I thought those days were over forever.

88

00:04:51,000 --> 00:04:58,000

I did too because I'm a firm believer in UFOs but I had seen one, oh I think it was about 67.

89

00:04:58,000 --> 00:05:07,000

I lived by the reservoir and I had gotten up in the middle of the night and here's this big orange object hovering over the reservoir and I thought, see that the heck of a time for the sun?

90

00:05:07,000 --> 00:05:12,000

Just like sometimes the sun comes up, that big orange, you know, nothing, just that big orange.

91

00:05:12,000 --> 00:05:20,000

I thought, see that the heck of a time for the sun to come up and I looked at the clock and it was two o'clock in the morning and I watched it for a long time

92

00:05:20,000 --> 00:05:25,000

and then it just kind of skipped away and went over to the Pallup Valley area.

93

00:05:25,000 --> 00:05:29,000

So this is actually the second time I have seen this round object.

94

00:05:29,000 --> 00:05:31,000

Now this was on the night of the 25th?

95

00:05:31,000 --> 00:05:36,000

Yeah, that was Monday night between 9 and 9.30 and we watched it for about a half an hour.

96

00:05:36,000 --> 00:05:43,000

In the meantime I kept trying to call other people to see if they could see it but we were situated, the trees kind of hit it.

97

00:05:44,000 --> 00:05:47,000

Now what angle were you looking at?

98

00:05:47,000 --> 00:05:50,000

What angle was the object from you in this guy approximately?

99

00:05:50,000 --> 00:06:04,000

Well, it was coming southeast at us because from where we were situated, McCord and SeaTac goes at an angle over across the valley.

100

00:06:04,000 --> 00:06:07,000

So that would be what southeast kind of.

101

00:06:07,000 --> 00:06:12,000

But it was following that line and then I'm looking right straight south at it.

102

00:06:12,000 --> 00:06:19,000

So then when we went over to the field it went more east but then it still would be southeast from here.

103

00:06:19,000 --> 00:06:21,000

Right, okay.

104

00:06:21,000 --> 00:06:24,000

And how many other witnesses were there?

105

00:06:24,000 --> 00:06:30,000

Two adults and three, five children, seven of us saw it.

106

00:06:30,000 --> 00:06:34,000

The kids are 10, 11 and 12.

107

00:06:34,000 --> 00:06:46,000

The area that I'm at, probably around Mount Rainier because of the books I've been reading and things, they seem to kind of focus on Mount Rainier.

108

00:06:46,000 --> 00:06:52,000

And the area that we're at, I see a lot of things.

109

00:06:52,000 --> 00:06:56,000

Appreciate your calling and I hope we hear from you in the future if you see anything else.

110

00:06:56,000 --> 00:06:58,000

Okay, fine. And thank you for calling.

111

00:06:58,000 --> 00:06:59,000

Thank you. Bye.
