

1

00:00:00,000 --> 00:00:07,000

Well, there's myself and at least 20, 25 other people.

2

00:00:07,000 --> 00:00:09,000

These were all members of the cutter?

3

00:00:09,000 --> 00:00:10,000

Yeah.

4

00:00:10,000 --> 00:00:11,000

Okay.

5

00:00:11,000 --> 00:00:12,000

And we're all the fan tail.

6

00:00:12,000 --> 00:00:15,000

I don't know how many other people stopped, but there's just people around there.

7

00:00:15,000 --> 00:00:22,000

And I looked up over Queen Anne and there was a plane, one large jet liner, not the jumbled jet,

8

00:00:22,000 --> 00:00:25,000

but the next to it, and 727.

9

00:00:25,000 --> 00:00:26,000

Yeah.

10

00:00:26,000 --> 00:00:29,000

And I was making a slight turn to the right, really slight,

11

00:00:29,000 --> 00:00:31,000

like it's going to take a long time to make this arc.

12

00:00:31,000 --> 00:00:36,000

Anyway, I just noticed that all of a sudden it seemed like it was there,

13

00:00:36,000 --> 00:00:40,000

was a shiny object near the tail and I pointed it out to everybody.

14

00:00:40,000 --> 00:00:43,000

And I looked at it and it says, well, maybe it's a refueling plane.

15

00:00:43,000 --> 00:00:48,000

And I said, no, because refueling planes are turbo prop jobs.

16

00:00:48,000 --> 00:00:52,000

And the other thing, really had no dimension that I could see,

17

00:00:52,000 --> 00:00:53,000

except it was shiny.

18

00:00:53,000 --> 00:00:57,000

It was very, very small in comparison to the plane.

19

00:00:57,000 --> 00:01:02,000

And anyway, it followed the tail of this plane for a long time,

20

00:01:02,000 --> 00:01:06,000

like about two, three minutes.

21

00:01:06,000 --> 00:01:09,000

And then it traveled underneath the belly of the plane

22

00:01:09,000 --> 00:01:15,000

and it flew up to the cockpit on the right side near the nose.

23

00:01:15,000 --> 00:01:20,000

And it stayed there for another 45 seconds or so.

24

00:01:20,000 --> 00:01:23,000

And then it flew off into the clouds and that was it.

25

00:01:23,000 --> 00:01:25,000

Well, there weren't any clouds, it just flew off.

26

00:01:25,000 --> 00:01:27,000

Just disappeared from sight.

27

00:01:27,000 --> 00:01:28,000

Yeah.

28

00:01:28,000 --> 00:01:29,000

Okay.

29

00:01:29,000 --> 00:01:31,000

Okay, there was no clouds that day.

30

00:01:31,000 --> 00:01:38,000

The sun was behind us and there's no problem with visibility.

31

00:01:38,000 --> 00:01:40,000

Okay.

32

00:01:40,000 --> 00:01:44,000

And you were in Elliott Bay or in the sound?

33

00:01:44,000 --> 00:01:46,000

We were, do you know where Pier 91 is?

34

00:01:46,000 --> 00:01:47,000

Yes.

35

00:01:47,000 --> 00:01:50,000

Okay, we were just pulling in between the two buildings.

36

00:01:50,000 --> 00:01:51,000

Okay.

37

00:01:51,000 --> 00:01:56,000

Then you were right on almost on the main land there.

38

00:01:56,000 --> 00:01:58,000

And it was really easy to see and I asked her,

39

00:01:58,000 --> 00:02:00,000

what do you think it is?

40

00:02:00,000 --> 00:02:04,000

And this is, well, I can't say it was probably a trainer or something like this,

41

00:02:04,000 --> 00:02:05,000

small plane.

42

00:02:05,000 --> 00:02:07,000

I said, planes don't do that.

43

00:02:07,000 --> 00:02:11,000

And it was funny, but of all the 25 guys that were there,

44

00:02:11,000 --> 00:02:16,000

no one seemed to want to admit that it could be a UFO or flying saucer.

45

00:02:16,000 --> 00:02:17,000

But everyone there saw it.

46

00:02:17,000 --> 00:02:18,000

Yeah.

47

00:02:18,000 --> 00:02:22,000

Now, the object itself, how did it appear to you?

48

00:02:22,000 --> 00:02:25,000

That's really hard to say because the sun was reflecting off of it.

49

00:02:25,000 --> 00:02:26,000

Oh, I see.

50

00:02:26,000 --> 00:02:27,000

The sun was reflecting off the plane.

51

00:02:27,000 --> 00:02:30,000

The plane was big enough to where you had an outline of it.

52

00:02:30,000 --> 00:02:33,000

I couldn't see who, whether it was Northwest Orient or anything,

53

00:02:33,000 --> 00:02:35,000

because I couldn't see the tail.

54

00:02:35,000 --> 00:02:37,000

It was all reflecting light.

55

00:02:37,000 --> 00:02:38,000

That was a 747?

56

00:02:38,000 --> 00:02:39,000

Yeah.

57

00:02:39,000 --> 00:02:40,000

Okay.

58

00:02:40,000 --> 00:02:41,000

727, excuse me.

59

00:02:41,000 --> 00:02:42,000

727, okay.

60

00:02:42,000 --> 00:02:45,000

The whole thing next to it had to be metallic,

61

00:02:45,000 --> 00:02:47,000

and it was shining just the same as the plane was.

62

00:02:47,000 --> 00:02:49,000

Did it have any definite shape that you could see?

63

00:02:49,000 --> 00:02:51,000

No, I wish I could have.

64

00:02:51,000 --> 00:02:52,000

We didn't have binoculars.

65

00:02:52,000 --> 00:02:55,000

We've got super powerful binoculars on the boat.

66

00:02:55,000 --> 00:02:58,000

And I thought of running up there, but we were at mooring stations,

67

00:02:58,000 --> 00:02:59,000

and I couldn't do that.

68

00:02:59,000 --> 00:03:00,000

Yes.

69

00:03:00,000 --> 00:03:01,000

So.

70

00:03:01,000 --> 00:03:06,000

Could we get your name?

71

00:03:06,000 --> 00:03:08,000

Okay, it's David.

72

00:03:08,000 --> 00:03:10,000

That's the question.

73

00:03:10,000 --> 00:03:14,000

Okay, I was watching or listening to OK 102 and a half this morning,

74

00:03:14,000 --> 00:03:16,000

and this is, I called up and mentioned this,

75

00:03:16,000 --> 00:03:19,000

and the guys they wanted me to report this thing.

76

00:03:19,000 --> 00:03:20,000

Yes.

77

00:03:20,000 --> 00:03:21,000

But was that you?

78

00:03:21,000 --> 00:03:22,000

Yes.

79

00:03:22,000 --> 00:03:23,000

Oh, okay.

80

00:03:23,000 --> 00:03:27,000

Anyway, you mentioned that the film that the astronauts had taken

81

00:03:27,000 --> 00:03:34,000

on the moon showed UFOs or UAOs taking off from the surface of the moon.

82

00:03:34,000 --> 00:03:35,000

Right.

83

00:03:35,000 --> 00:03:38,000

How come Japan got it, and the rest of the world knows about it,

84

00:03:38,000 --> 00:03:40,000

but they don't tell the American people?

85

00:03:40,000 --> 00:03:43,000

That's a question we're trying to find out.

86

00:03:43,000 --> 00:03:49,000

We've sent letters to NASA trying to get a copy of this strip in as much as they got it over there,

87

00:03:49,000 --> 00:03:51,000

but we haven't heard a thing from them.

88

00:03:51,000 --> 00:03:52,000

Have you guys got some time to talk?

89

00:03:52,000 --> 00:03:53,000

Sure.

90

00:03:53,000 --> 00:03:54,000

A little bit?

91

00:03:54,000 --> 00:03:59,000

Okay, last five years since 1970, I've been sailing around quite a bit.

92

00:03:59,000 --> 00:04:07,000

And before I came close to sighting any UAOs, I was not a skeptical.

93

00:04:07,000 --> 00:04:13,000

I believed there was other life, another planet that just had to be, we can't be the only one.

94

00:04:13,000 --> 00:04:16,000

But I'd never seen anything, and I never disbelieved it.

95

00:04:16,000 --> 00:04:17,000

I never believed it.

96

00:04:17,000 --> 00:04:25,000

But all the times I've sailed around out in the ocean, I've only once seen what could be a UAO.

97

00:04:25,000 --> 00:04:28,000

And I was wondering, how come they aren't that common?

98

00:04:28,000 --> 00:04:33,000

I mean, you'd think that the hour no one would see them, more or less.

99

00:04:33,000 --> 00:04:35,000

More common at sea, you mean?

100

00:04:35,000 --> 00:04:36,000

Or everywhere?

101

00:04:36,000 --> 00:04:43,000

Yeah, well, out in the wide blue ocean, where there's no inhabitants, they'd be free to come and go.

102

00:04:43,000 --> 00:04:45,000

And I haven't seen them.

103

00:04:45,000 --> 00:04:47,000

I really look.

104

00:04:47,000 --> 00:04:48,000

I don't know.

105

00:04:48,000 --> 00:04:54,000

That's a real good question, because my son was in the Navy for four years and spent probably three years of that at sea,

106

00:04:54,000 --> 00:04:56,000

and he didn't see anything either.

107

00:04:56,000 --> 00:05:05,000

And I would assume that they just don't find, or that their purpose for being down at low altitude,

108

00:05:05,000 --> 00:05:11,000

obviously has nothing to do with any business over the large bodies of water.

109

00:05:11,000 --> 00:05:21,000

Well, yeah, because the one I saw was over the Bering Sea, well, it seemed to be up in the stars.

110

00:05:21,000 --> 00:05:26,000

But this thing took our 90-degree angle and went up towards Orion.

111

00:05:26,000 --> 00:05:28,000

That's the only thing I'd ever seen.

112

00:05:28,000 --> 00:05:31,000

It was strange, but then there's no definite shape to it either, so far away.
