

1

00:00:00,000 --> 00:00:05,000

Do you have any report on UFOs over at Cullin?

2

00:00:05,000 --> 00:00:06,000

To Cullin?

3

00:00:06,000 --> 00:00:07,000

Yeah.

4

00:00:07,000 --> 00:00:08,000

Okay, do you have any party's name?

5

00:00:08,000 --> 00:00:09,000

No.

6

00:00:09,000 --> 00:00:10,000

Me?

7

00:00:10,000 --> 00:00:11,000

Do you have any report on this yet?

8

00:00:11,000 --> 00:00:12,000

No, we haven't.

9

00:00:12,000 --> 00:00:13,000

You're kidding.

10

00:00:13,000 --> 00:00:14,000

No.

11

00:00:14,000 --> 00:00:17,000

What kind of an object is it?

12

00:00:17,000 --> 00:00:20,000

Oh, there's a bright light up there.

13

00:00:20,000 --> 00:00:26,000

According to radar out in the corridor, it's identified at the 18 miles straight up.

14

00:00:26,000 --> 00:00:28,000

Oh, they have admitted this?

15

00:00:28,000 --> 00:00:31,000

Well, it came out over the air and now they're not admitting anything.

16

00:00:31,000 --> 00:00:33,000

Oh, first they're doing then they don't?

17

00:00:33,000 --> 00:00:35,000

Yeah, but you can see it.

18

00:00:35,000 --> 00:00:37,000

I just got to look at it.

19

00:00:37,000 --> 00:00:39,000

Is this light fairly stationary?

20

00:00:39,000 --> 00:00:40,000

Yeah.

21

00:00:40,000 --> 00:00:41,000

Uh-huh.

22

00:00:41,000 --> 00:00:42,000

Okay.

23

00:00:42,000 --> 00:00:46,000

Do you have quite a few calls on this?

24

00:00:46,000 --> 00:00:48,000

Yeah, we've had quite a few.

25

00:00:48,000 --> 00:00:51,000

Okay, we'll take a look at it.

26

00:00:51,000 --> 00:00:52,000

Okay.

27

00:00:52,000 --> 00:00:55,000

See if we can determine what it is.

28

00:00:55,000 --> 00:00:58,000

Can I get back to you later?

29

00:00:58,000 --> 00:01:00,000

Uh, what's your number?

30

00:01:00,000 --> 00:01:03,000

We can call you back.

31

00:01:03,000 --> 00:01:07,000

Okay, we'll let you know if we find out what it is.

32

00:01:07,000 --> 00:01:08,000

Thank you.

33

00:01:08,000 --> 00:01:09,000

Thank you for calling us there.

34

00:01:09,000 --> 00:01:10,000

Yeah.

35

00:01:10,000 --> 00:01:11,000

Right.

36

00:01:11,000 --> 00:01:12,000

The airport.

37

00:01:12,000 --> 00:01:13,000

Westbound.

38

00:01:13,000 --> 00:01:17,000

Yeah, it looked like it was moderate speed, I guess, probably 500 knots.

39

00:01:17,000 --> 00:01:20,000

And then it disappeared at about 10 miles east.

40

00:01:20,000 --> 00:01:26,000

And I would assume probably because it was in our cone of our blind spot over the antenna.

41

00:01:26,000 --> 00:01:31,000

I called the Air and Route Traffic Control Center at Auburn and asked them if they could see anything on

42

00:01:31,000 --> 00:01:36,000

air-heading aircraft overflying high altitude air force types and they said no.

43

00:01:36,000 --> 00:01:38,000

And then that they were aware of.

44

00:01:38,000 --> 00:01:47,000

And the McCord controller confirmed that they were still watching, but it came to a stop over Seattle.

45

00:01:47,000 --> 00:01:52,000

And, uh, of course, then...

46

00:01:52,000 --> 00:01:58,000

And so, anyway, we couldn't see an honorator anymore, so we got them looking out the window and everything.

47

00:01:58,000 --> 00:02:01,000

And that's when this object was sighted.

48

00:02:01,000 --> 00:02:02,000

I see.

49

00:02:02,000 --> 00:02:06,000

Yeah, a coincidence with, you know, with this object that we saw moving.

50

00:02:06,000 --> 00:02:07,000

Yeah, I know.

51

00:02:07,000 --> 00:02:15,000

We got a call from Pierce County Sheriff about three o'clock and they said that they had heard on the air that McCord was

52

00:02:15,000 --> 00:02:18,000

tracking something about 18 miles up.

53

00:02:18,000 --> 00:02:23,000

And then they immediately put a retraction in on that.

54

00:02:23,000 --> 00:02:25,000

And, of course, we sent out spotters right away.

55

00:02:25,000 --> 00:02:34,000

All they could see visually was the planet Jupiter, which is like a huge plate bulb up there.

56

00:02:34,000 --> 00:02:39,000

Okay, well, anyway, we've got a pilot out looking for it now.

57

00:02:39,000 --> 00:02:46,000

This flight that comes in from Eastern Washington, Eric Currier, said that he saw what looked like a light coming out of the bottom of the thing

58

00:02:46,000 --> 00:02:51,000

that was going on and off, intermittent rate.

59

00:02:51,000 --> 00:02:54,000

And now, he's looking at the same thing we're looking at.

60

00:02:54,000 --> 00:02:56,000

I don't know.

61

00:02:56,000 --> 00:02:57,000

Uh-huh.

62

00:02:57,000 --> 00:03:04,000

And there was speculation that there might be some sort of a balloon in the area on this ozone, battery, search or whatever it is.

63

00:03:04,000 --> 00:03:05,000

Oh, I see.

64

00:03:05,000 --> 00:03:12,000

But, uh, yeah, obviously what we're looking at, what we've seen here is the planet Jupiter.

65

00:03:12,000 --> 00:03:13,000

Uh-huh.

66

00:03:13,000 --> 00:03:14,000

Okay.

67

00:03:14,000 --> 00:03:23,000

And you might be interested in also knowing that Venus will be showing, just before Dawn in the eastern sky, extremely brilliant.

68

00:03:23,000 --> 00:03:28,000

So you're going to have Venus and Jupiter out there both at the same time before Dawn.

69

00:03:28,000 --> 00:03:30,000

Okay, well, real good.

70

00:03:30,000 --> 00:03:31,000

That's interesting, anyway.

71

00:03:31,000 --> 00:03:33,000

We kept us busy in a wake.

72

00:03:34,000 --> 00:03:36,000

Oh, we sure appreciate your call.

73

00:03:36,000 --> 00:03:37,000

All righty.

74

00:03:37,000 --> 00:03:38,000

Thank you.

75

00:03:38,000 --> 00:03:39,000

Yeah, right.

76

00:03:39,000 --> 00:03:40,000

Are you all located near Boinefield?

77

00:03:40,000 --> 00:03:41,000

Pardon?

78

00:03:41,000 --> 00:03:43,000

Are you all located near Boinefield?

79

00:03:43,000 --> 00:03:47,000

Uh, we're just about five miles east of Boinefield.

80

00:03:47,000 --> 00:03:55,000

Uh, is this part of the aerial phenomena research organization or is that what it is?

81

00:03:55,000 --> 00:03:57,000

It's a phenomena research.

82

00:03:58,000 --> 00:04:03,000

Well, so, uh, I guess there's nothing definite that's heard right.

83

00:04:03,000 --> 00:04:10,000

Well, what, this bright light, which is nearly overhead, is the planet Jupiter.

84

00:04:10,000 --> 00:04:11,000

Yes.

85

00:04:11,000 --> 00:04:16,000

But I understand other things have been seen also.

86

00:04:16,000 --> 00:04:19,000

Well, I heard also that they sent the plane up.

87

00:04:19,000 --> 00:04:21,000

And it was right underneath it.

88

00:04:21,000 --> 00:04:26,000

And I don't know if the pilot, you know, said anything definite, what it is or anything.

89

00:04:26,000 --> 00:04:28,000

Just checking it out.

90

00:04:28,000 --> 00:04:31,000

Because we're from Bay Sox and McCord.

91

00:04:31,000 --> 00:04:34,000

You're just wondering.

92

00:04:34,000 --> 00:04:37,000

Yeah, there's been a lot of calls.

93

00:04:37,000 --> 00:04:40,000

Yes, we've had quite a few, so we thought we'd check with you also.

94

00:04:40,000 --> 00:04:41,000

Uh-huh.

95

00:04:41,000 --> 00:04:45,000

Well, if anything new shows, why don't you let us know?

96

00:04:45,000 --> 00:04:50,000

Oh, well, you know, we're trying to find out what's going on, you know, just by our own curiosity.

97

00:04:50,000 --> 00:04:57,000

Well, in regard, have you had a lot of calls from citizens on the outside?

98

00:04:57,000 --> 00:04:59,000

No, we haven't had any calls personally.

99

00:04:59,000 --> 00:05:02,000

We just heard something from Boeing Field.

100

00:05:02,000 --> 00:05:03,000

Uh-huh.

101

00:05:03,000 --> 00:05:05,000

That's the only thing we've heard.

102

00:05:05,000 --> 00:05:12,000

Well, we've had a few from, well, quite a few actually from the Puget Sound area.

103

00:05:12,000 --> 00:05:17,000

And then a, well, about a half a dozen from the Outline areas.

104

00:05:17,000 --> 00:05:23,000

But I think what they are describing, at least just by the information that they're giving us,

105

00:05:23,000 --> 00:05:29,000

they are observing this bright light, which is almost directly overhead.

106

00:05:29,000 --> 00:05:38,000

But there could be others too, but most of these are describing stationary object.

107

00:05:38,000 --> 00:05:45,000

You know, I was once told that Washington's supposed to up in the state with the most sightings in the United States.

108

00:05:45,000 --> 00:05:49,000

Is that true or just rumor?

109

00:05:49,000 --> 00:05:51,000

No, no, it is not true.

110

00:05:51,000 --> 00:05:56,000

No, we've kept track of these things on maps for 20 years.

111

00:05:56,000 --> 00:05:59,000

Oh, Arizona's pretty heavy in Mexico.

112

00:05:59,000 --> 00:06:04,000

They've had periods where they've had very heavy activity down there.

113

00:06:04,000 --> 00:06:05,000

But it seems to fluctuate.

114

00:06:05,000 --> 00:06:11,000

The only state that really can count on coming up with a lot of reports every year is Pennsylvania.

115

00:06:11,000 --> 00:06:12,000

Huh.

116

00:06:12,000 --> 00:06:13,000

Wonder why.

117

00:06:13,000 --> 00:06:14,000

I don't know.

118

00:06:14,000 --> 00:06:16,000

I guess you knew what was going on.

119

00:06:16,000 --> 00:06:18,000

I guess so.

120

00:06:18,000 --> 00:06:21,000

Well, thanks very much.

121

00:06:21,000 --> 00:06:23,000

We'll give you a buzz.

122

00:06:23,000 --> 00:06:25,000

Where were you calling again from?

123

00:06:25,000 --> 00:06:26,000

From McCourt.

124

00:06:26,000 --> 00:06:27,000

McCourt.

125

00:06:27,000 --> 00:06:29,000

Okay, well, feel free to call anytime.

126

00:06:29,000 --> 00:06:30,000

Okay, thanks very much.

127

00:06:30,000 --> 00:06:31,000

Thank you.
