

1

00:00:00,000 --> 00:00:05,000

Around three o'clock at night there's about four or five of them out and they're like

2

00:00:05,000 --> 00:00:07,000

in different corners.

3

00:00:07,000 --> 00:00:13,000

And we just, we watch them with binoculars and a lower powered microscope and stuff and

4

00:00:13,000 --> 00:00:15,000

they're just blinking red and blue and white lights.

5

00:00:15,000 --> 00:00:17,000

Are they on the move?

6

00:00:17,000 --> 00:00:23,000

Well, one time they're like up on the left hand corner and then about like about ten seconds

7

00:00:23,000 --> 00:00:26,000

later they're all over the other side of the sky.

8

00:00:26,000 --> 00:00:29,000

I don't have it actually seen them moving but they do move.

9

00:00:29,000 --> 00:00:30,000

Uh huh.

10

00:00:30,000 --> 00:00:31,000

They're pretty high up?

11

00:00:31,000 --> 00:00:32,000

Yeah, really high up.

12

00:00:32,000 --> 00:00:36,000

But we've gotten binoculars and things out to look at them and all we can make out is

13

00:00:36,000 --> 00:00:37,000

just the flashing colors.

14

00:00:37,000 --> 00:00:38,000

I see.

15

00:00:38,000 --> 00:00:39,000

And they don't, they're not moving at all.

16

00:00:39,000 --> 00:00:43,000

It's not airplanes and nothing, they're too high up and they're not, they're not moving

17

00:00:43,000 --> 00:00:46,000

at all in one minute and then about ten minutes later all we're crossing the other side of the

18

00:00:46,000 --> 00:00:47,000

sky.

19

00:00:47,000 --> 00:00:50,000

I see well then that's moving pretty good clip anyway.

20

00:00:50,000 --> 00:00:52,000

Yeah, that's what we figure out.

21

00:00:52,000 --> 00:00:56,000

But a lot of guys, see I work midnight shift from, you know, twelve at night to seven in

22

00:00:56,000 --> 00:00:58,000

the morning and we see them all the time.

23

00:00:58,000 --> 00:00:59,000

I see.

24

00:00:59,000 --> 00:01:02,000

I see them all the time anyway and the guys I work with do too.

25

00:01:02,000 --> 00:01:06,000

And like they, like I said, you know, we brought binoculars and stuff and got a better look

26

00:01:06,000 --> 00:01:09,000

at them, you know, but make out the colors real good.

27

00:01:09,000 --> 00:01:10,000

Right.

28

00:01:10,000 --> 00:01:12,000

But nothing has seen a low altitude?

29

00:01:12,000 --> 00:01:14,000

No, nothing has low altitude yet.

30

00:01:14,000 --> 00:01:16,000

Okay, could we get your name?

31

00:01:16,000 --> 00:01:19,000

Yeah, but don't send nobody out here trying to say I'm nuts or anything.

32

00:01:19,000 --> 00:01:20,000

Oh no.

33

00:01:20,000 --> 00:01:24,000

The reason why, you know, I got interested, I just made a listen to the radio and they

34

00:01:24,000 --> 00:01:26,000

said that the Maryville police been spotting them and everything.

35

00:01:26,000 --> 00:01:29,000

I called the police all the time and I see them and I know they've seen them because

36

00:01:29,000 --> 00:01:32,000

I see them and like one time I told them this morning, I told them go out there and

37

00:01:32,000 --> 00:01:35,000

look and he saw them himself and come back in, you know, we were talking.

38

00:01:35,000 --> 00:01:36,000

Right.

39

00:01:36,000 --> 00:01:39,000

But I, like I said, they're seeing them too.

40

00:01:39,000 --> 00:01:42,000

Well, we sure appreciate your letting us know about this and if we get any more on it,

41

00:01:42,000 --> 00:01:44,000

we'll get back to you and let you know.

42

00:01:44,000 --> 00:01:45,000

All right, I appreciate it.

43

00:01:45,000 --> 00:01:46,000

Thank you very much.

44

00:01:46,000 --> 00:01:47,000

Sure.

45

00:01:47,000 --> 00:01:48,000

All right.

46

00:01:48,000 --> 00:01:50,000

Hey, you guys open 24 hours or what?

47

00:01:50,000 --> 00:01:51,000

Around the clock.

48

00:01:51,000 --> 00:01:53,000

You want me to call you sometime when I see them out?

49

00:01:53,000 --> 00:01:54,000

Anytime, yes sir.

50

00:01:54,000 --> 00:01:57,000

I don't know what you see from where you're at.

51

00:01:57,000 --> 00:01:58,000

Pardon?

52

00:01:58,000 --> 00:02:01,000

I said I don't know if you can see them from where you're at, but where we're at we can

53

00:02:01,000 --> 00:02:02,000

see them.

54

00:02:02,000 --> 00:02:05,000

But there's nothing, they're never close enough to really get a good look at.

55

00:02:05,000 --> 00:02:06,000

They're really up there.

56

00:02:06,000 --> 00:02:07,000

Yeah.

57

00:02:07,000 --> 00:02:10,000

Well, what we're really interested in too is if you hear of any close approaches where

58

00:02:10,000 --> 00:02:12,000

they come down close to the ground.

59

00:02:12,000 --> 00:02:16,000

Well, I believe they'll keep my eye open.

60

00:02:16,000 --> 00:02:19,000

But what I'm seeing is I'm not the only one seeing them.

61

00:02:19,000 --> 00:02:23,000

There's a lot of people, it's a nice shift from the flight line to see them, you know.

62

00:02:23,000 --> 00:02:26,000

Everybody's trying to pass them off as whether balloons and everything.

63

00:02:26,000 --> 00:02:28,000

I've checked into that and they said negative.

64

00:02:28,000 --> 00:02:32,000

But I don't believe in whether balloons anyway because like I say, one time we'll be sitting

65

00:02:32,000 --> 00:02:35,000

out by our section and they'll be way up the left hand side.

66

00:02:35,000 --> 00:02:39,000

It's kind of the next minute, they'll be too off to the right hand side, you know.

67

00:02:39,000 --> 00:02:40,000

Right.

68

00:02:40,000 --> 00:02:42,000

So I don't believe that stuff.

69

00:02:42,000 --> 00:02:44,000

That's a pretty good distance to travel.

70

00:02:44,000 --> 00:02:45,000

Very quick.

71

00:02:45,000 --> 00:02:46,000

You bet it is.
