

1

00:00:00,000 --> 00:00:07,000

I'd like to report something I've just seen.

2

00:00:07,000 --> 00:00:12,000

I saw this about at least four or five minutes ago.

3

00:00:12,000 --> 00:00:17,000

Now, I looked at a super-nocular.

4

00:00:17,000 --> 00:00:20,000

How far away do you think it was from where we were?

5

00:00:20,000 --> 00:00:22,000

It was up near the cloud cover.

6

00:00:22,000 --> 00:00:24,000

It was underneath the cloud cover we have here.

7

00:00:24,000 --> 00:00:26,000

I don't know how high the cloud cover is right now.

8

00:00:26,000 --> 00:00:29,000

It was traveling fairly low.

9

00:00:29,000 --> 00:00:39,000

When it first started, it was a horizontal, kind of a bar.

10

00:00:39,000 --> 00:00:44,000

It was traveling horizontally to the horizon.

11

00:00:44,000 --> 00:00:49,000

Underneath was a bright yellow and overhead was almost a dim orange.

12

00:00:49,000 --> 00:00:52,000

It was varying between the two colors.

13

00:00:52,000 --> 00:00:57,000

It got brighter and brighter as it appeared to come closer.

14

00:00:57,000 --> 00:00:59,000

Then the flame flickered out.

15

00:00:59,000 --> 00:01:04,000

Then in place of the flame, there was an object that was completely spherical in shape.

16

00:01:04,000 --> 00:01:09,000

What appeared to me was black in color, kind of a cinder.

17

00:01:09,000 --> 00:01:17,000

It appeared to me traveling faster than a plane would travel.

18

00:01:17,000 --> 00:01:22,000

It was traveling fairly fast.

19

00:01:22,000 --> 00:01:28,000

It disappeared over the southeast and horizon, going toward Crestwell.

20

00:01:28,000 --> 00:01:31,000

Did that object appear solid?

21

00:01:31,000 --> 00:01:32,000

Yes, definitely.

22

00:01:32,000 --> 00:01:33,000

Did you hear any sound?

23

00:01:33,000 --> 00:01:34,000

Just a minute.

24

00:01:34,000 --> 00:01:35,000

What?

25

00:01:35,000 --> 00:01:36,000

Oh, yes.

26

00:01:36,000 --> 00:01:38,000

There was a little one that dropped it.

27

00:01:38,000 --> 00:01:44,000

There was the large spherical shape.

28

00:01:44,000 --> 00:01:48,000

Then it appeared that I was pretty far close to the horizon.

29

00:01:48,000 --> 00:01:50,000

It was very hazy to the cloud cover.

30

00:01:50,000 --> 00:01:58,000

It appeared that a smaller one separated from below it and became a bright color, bright white or yellow.

31

00:01:58,000 --> 00:02:02,000

It was kind of maybe an off-white and shot very fast toward the horizon.

32

00:02:02,000 --> 00:02:04,000

It was extremely fast.

33

00:02:04,000 --> 00:02:10,000

A couple seconds later, it appeared back underneath it and hovered for a while underneath it.

34

00:02:10,000 --> 00:02:12,000

Then it was gone.

35

00:02:12,000 --> 00:02:14,000

It didn't appear to shoot off in another direction.

36

00:02:14,000 --> 00:02:16,000

Maybe it went back up to the other circle shape.

37

00:02:16,000 --> 00:02:17,000

I'm not too sure.

38

00:02:17,000 --> 00:02:19,000

I think that's what it might have happened.

39

00:02:19,000 --> 00:02:23,000

When that small object moved away, was it to the east or western horizon?

40

00:02:23,000 --> 00:02:24,000

It was moving in.

41

00:02:24,000 --> 00:02:25,000

What direction was it?

42

00:02:25,000 --> 00:02:27,000

It was moving south.

43

00:02:27,000 --> 00:02:29,000

You didn't see that come back?

44

00:02:29,000 --> 00:02:31,000

I didn't see it.

45

00:02:31,000 --> 00:02:32,000

Yes, I did.

46

00:02:32,000 --> 00:02:33,000

Did you see the small one come back?

47

00:02:33,000 --> 00:02:34,000

Yes.

48

00:02:34,000 --> 00:02:35,000

It moved under the larger one?

49

00:02:35,000 --> 00:02:36,000

Yes.

50

00:02:36,000 --> 00:02:40,000

Did you see the small one go aboard the large one?

51

00:02:40,000 --> 00:02:41,000

No, I didn't.

52

00:02:41,000 --> 00:02:42,000

I can't say that for sure.

53

00:02:42,000 --> 00:02:43,000

Okay.

54

00:02:43,000 --> 00:02:44,000

That was just my observation.

55

00:02:44,000 --> 00:02:47,000

And this all took place as the object was moving southeast?

56

00:02:47,000 --> 00:02:50,000

Yes, the larger object was in continual motion.

57

00:02:50,000 --> 00:02:51,000

Okay.

58

00:02:51,000 --> 00:02:54,000

I didn't hear any sound at all.

59

00:02:54,000 --> 00:03:01,000

Can you compare the size of that object with anything that you know?

60

00:03:01,000 --> 00:03:07,000

Well, depending on how far it was, I also take consideration that it was a cloud cover over.

61

00:03:07,000 --> 00:03:12,000

And in and out of the clouds, it appeared to be mostly out of it.

62

00:03:12,000 --> 00:03:13,000

What do you think?

63

00:03:13,000 --> 00:03:17,000

Well, of a large, very large weather balloon or something like that, I'm not sure.

64

00:03:17,000 --> 00:03:18,000

Well, I don't know.

65

00:03:18,000 --> 00:03:24,000

The size that I saw, okay, it looked about the size of a pea, a little large, larger,

66

00:03:24,000 --> 00:03:30,000

and quite far away because you could tell that it was round, but you couldn't tell.

67

00:03:30,000 --> 00:03:35,000

Like if there was anything about it that might resemble a weather balloon or something, like

68

00:03:35,000 --> 00:03:37,000

if there was something underneath it or something.

69

00:03:37,000 --> 00:03:38,000

Okay.

70

00:03:38,000 --> 00:03:39,000

Except it was round.

71

00:03:39,000 --> 00:03:40,000

Uh-huh.

72

00:03:40,000 --> 00:03:48,000

And it was, everyone's thought it would go behind the light patch of clouds, you know,

73

00:03:48,000 --> 00:03:51,000

and just for maybe half a second, and then come back out.

74

00:03:51,000 --> 00:03:54,000

That's how I thought maybe it was up in the cloud cover.

75

00:03:54,000 --> 00:03:56,000

Or just below it.

76

00:03:56,000 --> 00:04:07,000

Maybe from what might, yes, would be maybe the size of a very, very large balloon.

77

00:04:07,000 --> 00:04:12,000

How long is it going to run across?

78

00:04:12,000 --> 00:04:14,000

I'm not sure.

79

00:04:14,000 --> 00:04:15,000

I really can't say.

80

00:04:15,000 --> 00:04:18,000

It appeared to be very large, but it also appeared to be very far away.

81

00:04:18,000 --> 00:04:19,000

Okay.

82

00:04:19,000 --> 00:04:25,000

Can you give me the degrees above the horizon that this thing was located?

83

00:04:25,000 --> 00:04:26,000

I'm afraid I can't.

84

00:04:26,000 --> 00:04:27,000

Okay.

85

00:04:27,000 --> 00:04:32,000

But it just, you saw, actually saw the object move out of sight?

86

00:04:32,000 --> 00:04:33,000

Yes.

87

00:04:33,000 --> 00:04:34,000

It just appeared over the horizon.

88

00:04:34,000 --> 00:04:35,000

Okay.

89

00:04:35,000 --> 00:04:38,000

How were you attracted to this to begin with?

90

00:04:38,000 --> 00:04:42,000

Um, Sheldon cries from my girlfriend's mother and her friend.

91

00:04:42,000 --> 00:04:43,000

Okay.

92

00:04:43,000 --> 00:04:49,000

You know, our friend was just leaving and their mom walked out to say goodbye to her, and they

93

00:04:49,000 --> 00:04:51,000

were watching it go across the sky.

94

00:04:51,000 --> 00:04:53,000

And said, wow, it looks like a UFO.

95

00:04:53,000 --> 00:04:58,000

So we went out to look and we saw it and I ran back and got my binoculars to look.

96

00:04:58,000 --> 00:04:59,000

Okay.

97

00:04:59,000 --> 00:05:03,000

And you figure you watched this just about five minutes?

98

00:05:03,000 --> 00:05:04,000

Yeah.

99

00:05:04,000 --> 00:05:05,000

Five minutes.

100

00:05:05,000 --> 00:05:06,000

About five minutes.

101

00:05:06,000 --> 00:05:09,000

And how many witnesses to that?

102

00:05:09,000 --> 00:05:10,000

Um, let's see.

103

00:05:10,000 --> 00:05:15,000

There were four who just saw with the naked eye and the two of us that looked through it with

104

00:05:15,000 --> 00:05:16,000

binoculars.

105

00:05:16,000 --> 00:05:17,000

Okay.

106

00:05:17,000 --> 00:05:20,000

And through binoculars, you could see the spherical shape?

107

00:05:20,000 --> 00:05:21,000

Yeah.

108

00:05:21,000 --> 00:05:22,000

Okay.

109

00:05:22,000 --> 00:05:25,000

Well, we sure appreciate this report.

110

00:05:25,000 --> 00:05:29,000

And if we get any additional information on this, we'll get back to you and let you know

111

00:05:29,000 --> 00:05:30,000

about it.

112

00:05:30,000 --> 00:05:31,000

Okay.

113

00:05:31,000 --> 00:05:32,000

Thank you.

114

00:05:32,000 --> 00:05:33,000

Thank you very much.

115

00:05:33,000 --> 00:05:34,000

Bye-bye.

116

00:05:34,000 --> 00:05:35,000

Bye.
