

1

00:00:00,000 --> 00:00:04,000

By the way, what office is this?

2

00:00:04,000 --> 00:00:06,000

Is this a government office or?

3

00:00:06,000 --> 00:00:10,000

No sir, it's a private small group of scientists and laymen.

4

00:00:10,000 --> 00:00:12,000

Alright, are you associated with APRO?

5

00:00:12,000 --> 00:00:16,000

No sir, we do cooperate but we're not affiliated in any way.

6

00:00:16,000 --> 00:00:28,000

Alright, well, I was in Tucson here about three weeks ago and I talked to Eli Doherty.

7

00:00:28,000 --> 00:00:44,000

He's the office man with APRO and I told him of the situation that I had made observations on some duck in a meadow in a duck lake property that I'm trying to bring back.

8

00:00:44,000 --> 00:00:48,000

I'm a manager of a group of men that are interested in this.

9

00:00:48,000 --> 00:01:02,000

We had a landing but evidently a hovering here around the middle of May and it was just as if you took a donut cutter and punched down on it.

10

00:01:02,000 --> 00:01:10,000

The four and about four and a half feet in the center, a little further on the far side was standing upright.

11

00:01:10,000 --> 00:01:14,000

This is very fragile grass, swamp grass, what they call sweet grass.

12

00:01:14,000 --> 00:01:30,000

It's about four and a half feet high and even the beard stayed up but everything from that edge in a rim out about ten feet or a diameter of, it would be ten and ten plus four or five would be a diameter of about,

13

00:01:30,000 --> 00:01:32,000

outside diameter about twenty five feet.

14

00:01:32,000 --> 00:01:46,000

That ten foot ring outside the donut hole, outside the standing grass of four and a half feet was punched down, flattened, completely flat in a clockwise motion.

15

00:01:46,000 --> 00:01:54,000

About four or about seventy feet from there was another one further out in the meadow, out in the meadow.

16

00:01:54,000 --> 00:02:04,000

It was round but it wasn't as clearly delineated as the one right up next to the bank where I was making my sighting.

17

00:02:04,000 --> 00:02:12,000

I went down there without taking my poor rights so therefore I didn't take the important picture.

18

00:02:12,000 --> 00:02:24,000

But before I left on my vacation I went down there and took a look at it and this is the phenomena that I reported to Dorothy when I was in Tucson.

19

00:02:24,000 --> 00:02:28,000

I went up to the office and talked to her for about an hour.

20

00:02:28,000 --> 00:02:38,000

From the inner circle, inner portion it was left standing, the grass even with its beards of seeds was left standing.

21

00:02:38,000 --> 00:02:50,000

From that edge outward the growth progressively, there was no growth right next to the grass, new grass growth right next to the perimeter of the intercor.

22

00:02:50,000 --> 00:02:59,000

But the growth of grass constantly got higher away from that inner cut.

23

00:02:59,000 --> 00:03:06,000

The ten feet out it was just that if you took a slant line there you could see the new grass growing up higher and higher until the finally got to the edge.

24

00:03:06,000 --> 00:03:21,000

Now when I saw it yesterday I took a picture of it yesterday because Dorothy asked me to get some grass in different places which I have a plot marked out where I picked this grass up.

25

00:03:21,000 --> 00:03:34,000

I got three grasses at each plot, five different positions, one in the center, three going out to the ten foot spot and one on the outside of it.

26

00:03:34,000 --> 00:03:38,000

He said they have a botanist who would like to run some checks on it.

27

00:03:38,000 --> 00:03:41,000

So I'm sending that down to him tomorrow.

28

00:03:41,000 --> 00:03:50,000

But in between the times of working at the Death Lake I went down to the wayside tavern and had a cool beer.

29

00:03:50,000 --> 00:03:58,000

And as he felt it came in, it runs a mobile station down there on the highway next to the...

30

00:03:58,000 --> 00:04:03,000

This is by the way just on the county line between Mobile County and Columbia County on this land.

31

00:04:03,000 --> 00:04:10,000

And he told me that, by the name of it he was talking an awful lot about observations he's been seeing.

32

00:04:10,000 --> 00:04:19,000

Now I looked him up and it took a little while to get him to talk in his confidence because everybody looks at him like he's crazy.

33

00:04:19,000 --> 00:04:25,000

But he tells me that he has practically nightly observations there right now.

34

00:04:25,000 --> 00:04:35,000

He saw what he thought was a phenomenon last night with the revolving red light standing still.

35

00:04:35,000 --> 00:04:46,000

And he got on his CB and he talked from Scappuz to Woodland Washington to another CB'er.

36

00:04:46,000 --> 00:04:49,000

And they both were on the CB and observed the same optic.

37

00:04:49,000 --> 00:04:54,000

They had a triangulation. I don't know who the guy was in Washington.

38

00:04:54,000 --> 00:04:57,000

But he and his wife had seen him.

39

00:04:57,000 --> 00:05:01,000

His wife and he had seen him separately and also the youth.

40

00:05:01,000 --> 00:05:05,000

Their boy who was about 24 or 25 had seen him.

41

00:05:05,000 --> 00:05:12,000

And of course what I was interested in is had anybody seen anything down there where our hovering was.

42

00:05:12,000 --> 00:05:15,000

And of course this is the only thing I could dig up.

43

00:05:15,000 --> 00:05:18,000

But he says that you can come over there almost any night and see him.

44

00:05:18,000 --> 00:05:21,000

Matter of fact he invited me back tonight to take a look if I wanted to.

45

00:05:21,000 --> 00:05:23,000

Now are these moving objects?

46

00:05:23,000 --> 00:05:25,000

Yes he says that he's run the whole gauntlet.

47

00:05:25,000 --> 00:05:33,000

He's got the one where the tube comes down and he says it retracts.

48

00:05:33,000 --> 00:05:35,000

When they turn that light off it's a light tube.

49

00:05:35,000 --> 00:05:40,000

But he said when they turn it off he says you can see it retract into the optic.

50

00:05:40,000 --> 00:05:47,000

And he's also got the one about big enough that he has seen 10 of them dislodge from it.

51

00:05:47,000 --> 00:05:50,000

They go out some of them fly back in and fly back out.

52

00:05:50,000 --> 00:05:53,000

But he's counted as many as 10 of them come out of it.

53

00:05:53,000 --> 00:05:57,000

And then he's got the with glasses.

54

00:05:57,000 --> 00:05:58,000

He's seen them in his clothes.

55

00:05:58,000 --> 00:06:05,000

He's given us, or any of them he told me is what has always been reported.

56

00:06:05,000 --> 00:06:10,000

Interesting about this probe light, or the light that went down,

57

00:06:10,000 --> 00:06:14,000

claims it went down into the river, Columbia River, or thereabouts.

58

00:06:14,000 --> 00:06:19,000

But he said that you could actually see the light being retracted.

59

00:06:19,000 --> 00:06:21,000

It's just like a tube.

60

00:06:21,000 --> 00:06:23,000

That's quite common.

61

00:06:23,000 --> 00:06:26,000

You can see it being retracted.

62

00:06:26,000 --> 00:06:30,000

But anyway they're having a huffle-buffle down in that area.

63

00:06:30,000 --> 00:06:35,000

I stopped at, when I was in Scalp who someone on into St. Helens,

64

00:06:35,000 --> 00:06:41,000

went into the county sheriff's office and asked one of the deputy sheriffs a direct question.

65

00:06:41,000 --> 00:06:44,000

If any of them, any UFOs been reported.

66

00:06:44,000 --> 00:06:45,000

And he says no.

67

00:06:45,000 --> 00:06:46,000

And I said thank you.

68

00:06:46,000 --> 00:06:47,000

And I walked out.

69

00:06:47,000 --> 00:06:49,000

So I stopped the state police.

70

00:06:49,000 --> 00:06:53,000

And I asked the girls there in the office and they said no nothing has been reported.

71

00:06:53,000 --> 00:06:57,000

And I was telling them about my, my grass situation.

72

00:06:57,000 --> 00:07:00,000

Of course I'm interested in the fact that something's going to be around there.

73

00:07:00,000 --> 00:07:03,000

Am I going to have any ducks to shoot at this year?

74

00:07:03,000 --> 00:07:04,000

Yes.

75

00:07:04,000 --> 00:07:08,000

And they said nothing had been reported.

76

00:07:08,000 --> 00:07:13,000

But they pulled out a car out of their circular file and wrote down your name

77

00:07:13,000 --> 00:07:19,000

and their UFO reporting center, gave me your phone number and your post-mortar box and stuff like that.

78

00:07:19,000 --> 00:07:20,000

Oh great.

79

00:07:20,000 --> 00:07:21,000

So I have that.

80

00:07:21,000 --> 00:07:28,000

And I tried to get a hold of Carol Watson who I know is associated with APRO here in Oregon someplace.

81

00:07:28,000 --> 00:07:30,000

He's down in Medford.

82

00:07:30,000 --> 00:07:36,000

So I can't call APRO here in Oregon so I did the next best thing called you.

83

00:07:36,000 --> 00:07:38,000

Well I'm sure glad you did.

84

00:07:38,000 --> 00:07:42,000

It sounds like there would be worth the trip down there.

85

00:07:42,000 --> 00:07:45,000

Well it sounds to me like they're flapping around quite a bit.

86

00:07:45,000 --> 00:07:46,000

He said come on back tonight.

87

00:07:46,000 --> 00:07:48,000

He said bring a good pair of glasses.

88

00:07:48,000 --> 00:07:50,000

He says you'll see them.

89

00:07:50,000 --> 00:07:51,000

Oh that's great.

90

00:07:51,000 --> 00:07:53,000

We'll have to contact that gentleman.

91

00:07:53,000 --> 00:07:55,000

Well you've got all the boats on him.

92

00:07:55,000 --> 00:07:56,000

Yes sir.

93

00:07:56,000 --> 00:08:02,000

And he's at the point right now where what he has said nobody believes him so he's trying to keep his mouth shut.

94

00:08:02,000 --> 00:08:06,000

And I told him that this will probably get in touch with him probably even tonight.

95

00:08:06,000 --> 00:08:09,000

Because I thought of Shady Co. Roy.

96

00:08:09,000 --> 00:08:10,000

And I'd never heard of it.

97

00:08:10,000 --> 00:08:12,000

I thought it was born and raised in Oregon.

98

00:08:12,000 --> 00:08:19,000

I thought well if that's in Salem like I thought it was why Watson would be coming up tonight to make an investigation.

99

00:08:20,000 --> 00:08:23,000

But she's all on your hands now.

100

00:08:27,000 --> 00:08:32,000

Are you the bunch that started up here a few years ago and is publishing a paper?

101

00:08:32,000 --> 00:08:33,000

Yes.

102

00:08:33,000 --> 00:08:35,000

I read of you.

103

00:08:35,000 --> 00:08:36,000

I read of you.

104

00:08:36,000 --> 00:08:40,000

We originally started out with the name aerial phenomena research group.

105

00:08:40,000 --> 00:08:41,000

I know of you.

106

00:08:41,000 --> 00:08:42,000

I know of you.

107

00:08:42,000 --> 00:08:45,000

You put out a very fine publication at one time if I remember right.

108

00:08:45,000 --> 00:08:46,000

Right.

109

00:08:46,000 --> 00:08:47,000

We were pretty proud of that.

110

00:08:47,000 --> 00:08:48,000

Yeah.

111

00:08:48,000 --> 00:08:49,000

Well I went the other way.

112

00:08:49,000 --> 00:08:52,000

I joined Carol and Jim Lawrence's group.

113

00:08:52,000 --> 00:08:53,000

It's a fine organization.

114

00:08:53,000 --> 00:08:56,000

I'm a member of APRO.

115

00:08:56,000 --> 00:08:57,000

Yes.

116

00:08:57,000 --> 00:09:01,000

We've met both of those people and they're doing a beautiful job.

117

00:09:01,000 --> 00:09:05,000

You put out a nice very fine objective book here.

118

00:09:05,000 --> 00:09:06,000

It's not so long ago.

119

00:09:06,000 --> 00:09:09,000

I suppose you read it by now.

120

00:09:09,000 --> 00:09:10,000

Yes.

121

00:09:10,000 --> 00:09:12,000

I think I have read all of their books.

122

00:09:12,000 --> 00:09:16,000

This is just published I think in February.

123

00:09:16,000 --> 00:09:17,000

That's about all I can give you.

124

00:09:17,000 --> 00:09:20,000

Well sir we sure appreciate it very much.

125

00:09:20,000 --> 00:09:21,000

Very own from here.

126

00:09:21,000 --> 00:09:24,000

There's not even a flap of quite a bit down here now.

127

00:09:24,000 --> 00:09:25,000

Okay.

128

00:09:25,000 --> 00:09:27,000

Can we feel free to get back to you at any time?

129

00:09:27,000 --> 00:09:28,000

No, no.

130

00:09:28,000 --> 00:09:29,000

Anytime.

131

00:09:29,000 --> 00:09:30,000

Great.

132

00:09:30,000 --> 00:09:35,000

If I have, if there's any report on this graph that I'm sending down, why, and I get

133

00:09:35,000 --> 00:09:38,000

anything, I'll be glad to hand it over to you.

134

00:09:38,000 --> 00:09:40,000

Now we get a lot of calls from the greater Portland area.

135

00:09:40,000 --> 00:09:42,000

Do you follow up on any investigations?

136

00:09:42,000 --> 00:09:44,000

No, I'm not a trained investigator.

137

00:09:44,000 --> 00:09:45,000

I have knowledge.

138

00:09:45,000 --> 00:09:49,000

It's probably, I have a considerable amount of knowledge, but it's probably best that

139

00:09:49,000 --> 00:09:55,000

I don't because I've never reported and I don't think, I don't think basically I could

140

00:09:55,000 --> 00:09:59,000

be objecting as I should be.

141

00:09:59,000 --> 00:10:00,000

Okay.

142

00:10:00,000 --> 00:10:06,000

But in something like this I feel like it certainly gets something started.

143

00:10:06,000 --> 00:10:07,000

Okay.

144

00:10:07,000 --> 00:10:10,000

Well, thank you once again for letting us know about this.

145

00:10:10,000 --> 00:10:11,000

Righto.

146

00:10:11,000 --> 00:10:13,000

And we'll probably be talking to you later.

147

00:10:13,000 --> 00:10:14,000

Anytime.

148

00:10:14,000 --> 00:10:15,000

Thank you very much.

149

00:10:15,000 --> 00:10:16,000

Right.

150

00:10:16,000 --> 00:10:17,000

Bye.

151

00:10:17,000 --> 00:10:18,000

Bye.
