

1

00:00:00,000 --> 00:00:04,000

I'm calling from No Bank, South Dakota.

2

00:00:04,000 --> 00:00:05,000

Yes, sir.

3

00:00:05,000 --> 00:00:10,000

We've got a UFO sighted over our farm place and I work for the police department.

4

00:00:10,000 --> 00:00:12,000

My father's a retired state trooper.

5

00:00:12,000 --> 00:00:13,000

Yes, sir.

6

00:00:13,000 --> 00:00:14,000

And I work for a police department.

7

00:00:14,000 --> 00:00:18,000

I happen to see her a number there on a sheet of paper.

8

00:00:18,000 --> 00:00:19,000

We just saw it.

9

00:00:19,000 --> 00:00:26,000

We saw it at about, well, being in South Dakota, it was five minutes to seven when I first sighted it.

10

00:00:26,000 --> 00:00:29,000

It's now 20 minutes after seven here and it's still in sight.

11

00:00:29,000 --> 00:00:33,000

It's moving back and forth and it's one of the craziest things I've ever seen in my life.

12

00:00:33,000 --> 00:00:35,000

Okay, does this thing have a shape of any kind?

13

00:00:35,000 --> 00:00:36,000

We're watching it through the binoculars.

14

00:00:36,000 --> 00:00:40,000

Well, it appeared to be flashing, it's alternating colors.

15

00:00:40,000 --> 00:00:43,000

It's not any known aircraft because I just called the police department.

16

00:00:43,000 --> 00:00:48,000

My friend is working and if it was one of the game wardens or something watching, we'd know that.

17

00:00:48,000 --> 00:00:49,000

Right.

18

00:00:49,000 --> 00:00:50,000

Because of the information he has.

19

00:00:50,000 --> 00:00:53,000

You'll have to excuse me, I'm a little rattled right now.

20

00:00:53,000 --> 00:00:57,000

It's red and it rotates.

21

00:00:57,000 --> 00:00:59,000

It seems to be rotating red and white.

22

00:00:59,000 --> 00:01:00,000

What else, Dad?

23

00:01:00,000 --> 00:01:07,000

It appears like balls of red flame or something fly out of the sides of it.

24

00:01:07,000 --> 00:01:10,000

I don't know, just exactly how to describe it.

25

00:01:10,000 --> 00:01:16,000

It almost like a Roman candle or something at times with red objects, red balls of fire flying out.

26

00:01:16,000 --> 00:01:19,000

It's almost out of view now, but we can still see it.

27

00:01:19,000 --> 00:01:25,000

It's headed in basically south to southwest direction.

28

00:01:25,000 --> 00:01:28,000

Okay, now does this thing have any kind of a shape to it?

29

00:01:28,000 --> 00:01:36,000

Well, we have a pair of binoculars, what power are they, Dad?

30

00:01:36,000 --> 00:01:42,000

It seems like you can't really determine it because it is night here and we can't really see it.

31

00:01:42,000 --> 00:01:48,000

We've got a 6 by 15 pair of power binoculars and a 360 foot field at 1,000 yards.

32

00:01:48,000 --> 00:01:54,000

It appears that when you look at the object, the way I saw it when I first viewed it was that it was a round cylindrical object in the center,

33

00:01:54,000 --> 00:02:02,000

almost like two saucers put together bottom to bottom, I mean flat surfaces placed together.

34

00:02:02,000 --> 00:02:04,000

Then it's going down now.

35

00:02:04,000 --> 00:02:14,000

Then extending out from that, as I thought, appeared to be two arms coming down at maybe a 15 degree or 15 or 25 degree angle,

36

00:02:14,000 --> 00:02:20,000

radiating out from the main body with two white orbs stationed on each one of those.

37

00:02:20,000 --> 00:02:24,000

Okay, and this thing is flashing multiple colors?

38

00:02:24,000 --> 00:02:28,000

Yes, it's kind of a red and a white and then a blue through the binoculars.

39

00:02:28,000 --> 00:02:32,000

I don't know if I'm getting some kind of a prismatic effect or not through them.

40

00:02:32,000 --> 00:02:41,000

It appeared to sit down out in the field out here some miles away, I'd say maybe five miles away, maybe even further.

41

00:02:41,000 --> 00:02:43,000

Oh, you actually saw it descending?

42

00:02:43,000 --> 00:02:47,000

Yeah, it's down now. My parents and I are watching.

43

00:02:47,000 --> 00:02:53,000

Okay, but what size is this? Can you compare it with anything?

44

00:02:53,000 --> 00:02:58,000

It's close to Stockholm, South Dakota right now. What size to compare it to?

45

00:02:58,000 --> 00:03:10,000

Sir, I can't really give you an estimation on the size of it. I mean, it could be two feet across, it could be 150 because I really don't have any ability to gauge it against anything against the black sky.

46

00:03:10,000 --> 00:03:15,000

It's kind of overcast tonight, there's not too many stars out, so it's difficult to see.

47

00:03:15,000 --> 00:03:18,000

Okay, you say this thing is descended outside again?

48

00:03:18,000 --> 00:03:27,000

It's descended not out of sight, we can see around red object or a red spot on the ground out there between two farm places.

49

00:03:27,000 --> 00:03:28,000

Okay.

50

00:03:28,000 --> 00:03:30,000

It's descending on the ground.

51

00:03:30,000 --> 00:03:33,000

And this is moving southeast from you, right?

52

00:03:33,000 --> 00:03:36,000

Yes, sir, yeah.

53

00:03:36,000 --> 00:03:38,000

And I know we're not seeing things.

54

00:03:38,000 --> 00:03:40,000

Okay, how many witnesses you got there?

55

00:03:40,000 --> 00:03:41,000

Three.

56

00:03:41,000 --> 00:03:42,000

Okay.

57

00:03:42,000 --> 00:03:51,000

My father being a retired state trooper and my, an airplane went over the top of it. My dad said I shouldn't fail to mention that.

58

00:03:51,000 --> 00:03:52,000

Okay.

59

00:03:52,000 --> 00:03:59,000

An airplane headed west and an airplane went over the top of it. That would have been about 10 minutes after southern time.

60

00:03:59,000 --> 00:04:03,000

Okay, you feel there's a possibility that this thing was sitting on the ground before?

61

00:04:03,000 --> 00:04:04,000

It still is.

62

00:04:04,000 --> 00:04:05,000

Uh-huh.

63

00:04:05,000 --> 00:04:06,000

Okay.

64

00:04:06,000 --> 00:04:13,000

Okay, if we get on this right away and if we come up with any additional information, we'll get back to you.

65

00:04:13,000 --> 00:04:14,000

Okay.

66

00:04:14,000 --> 00:04:16,000

And if we need anything new, and that's going to be, call you back.

67

00:04:16,000 --> 00:04:20,000

Oh, yeah, I would hope you would because I sure like to know what the giant thing is.

68

00:04:20,000 --> 00:04:21,000

Okay.

69

00:04:21,000 --> 00:04:24,000

Where are you out of? Where's your headquarters at?

70

00:04:24,000 --> 00:04:25,000

Washington.

71

00:04:25,000 --> 00:04:27,000

Okay, is this with the government?

72

00:04:27,000 --> 00:04:29,000

No, it's a private scientific group.

73

00:04:29,000 --> 00:04:31,000

Okay, real fun. Well, thank you very much.

74

00:04:31,000 --> 00:04:32,000

Thank you for the call.

75

00:04:32,000 --> 00:04:33,000

You're welcome.

76

00:04:33,000 --> 00:04:35,000

What's the status on that object?

77

00:04:35,000 --> 00:04:40,000

It's gone. It's gone. We don't see it anymore.

78

00:04:40,000 --> 00:04:47,000

It went out of sight at about all 725, I'd say, just a few minutes after I hung up from talking to you.

79

00:04:47,000 --> 00:04:52,000

Funny part of it was my father and I sat down in different rooms and my mother, well, we weren't in different rooms,

80

00:04:52,000 --> 00:04:55,000

but we were in different locations in the same room and I said, draw it out.

81

00:04:55,000 --> 00:04:57,000

My dad and I both drew the same thing.

82

00:04:57,000 --> 00:04:58,000

Uh-huh.

83

00:04:58,000 --> 00:04:59,000

My mother held the one that I drew.

84

00:04:59,000 --> 00:05:01,000

We both had the same thing down.

85

00:05:01,000 --> 00:05:02,000

Oh, great.

86

00:05:02,000 --> 00:05:05,000

Now, did you actually see this thing go?

87

00:05:05,000 --> 00:05:08,000

Uh, do you mean leave as far as...

88

00:05:08,000 --> 00:05:11,000

Yeah, did it lift off and leave or did it just go out?

89

00:05:11,000 --> 00:05:13,000

No, it just, it appeared to land.

90

00:05:13,000 --> 00:05:14,000

Right.

91

00:05:14,000 --> 00:05:20,000

Most of us, about 15 miles or 10 miles, is a range of hills, so it may have gone behind them.

92

00:05:20,000 --> 00:05:23,000

We kind of thought maybe that's what happened rather than actually landing.

93

00:05:23,000 --> 00:05:25,000

It might have gone behind the hills.

94

00:05:25,000 --> 00:05:30,000

Okay, now I might understand that that thing had been sitting on the ground when you first saw it.

95

00:05:30,000 --> 00:05:33,000

No, sir, it was off the ground, I'd say about 600 feet.

96

00:05:33,000 --> 00:05:34,000

Okay.

97

00:05:34,000 --> 00:05:37,000

About how far away from you was it?

98

00:05:37,000 --> 00:05:40,000

Oh, I'd say a mile, a mile to a mile and a half.

99

00:05:40,000 --> 00:05:41,000

That's pretty close.

100

00:05:41,000 --> 00:05:43,000

What did you say, dad?

101

00:05:46,000 --> 00:05:54,000

If you have a map of South Dakota, it would be going from on a direct line between No Bank of South Dakota and Watertown of South Dakota.

102

00:05:54,000 --> 00:05:55,000

Okay, I got it.

103

00:05:55,000 --> 00:05:57,000

You could plot those two courses there.

104

00:05:57,000 --> 00:05:58,000

Right.

105

00:05:58,000 --> 00:06:05,000

I wouldn't know what the bearings are or anything, that particular locale, but that's the direction it seemed to be, assuming.

106

00:06:05,000 --> 00:06:08,000

Okay.

107

00:06:08,000 --> 00:06:09,000

Well, we'll keep working on it.

108

00:06:09,000 --> 00:06:11,000

If we get anything, we'll get back to you.

109

00:06:11,000 --> 00:06:13,000

Okay, I sure appreciate that.

110

00:06:13,000 --> 00:06:14,000

Thank you very much.

111

00:06:14,000 --> 00:06:15,000

You really do.

112

00:06:15,000 --> 00:06:16,000

Thank you for calling us back.

113

00:06:16,000 --> 00:06:17,000

Right.

114

00:06:17,000 --> 00:06:18,000

Bye.
