

1

00:00:00,000 --> 00:00:10,160

Have you received any reports Monday on a UFO sighting in the Downey area or Lakewood

2

00:00:10,160 --> 00:00:11,160

area?

3

00:00:11,160 --> 00:00:12,160

No, sir.

4

00:00:12,160 --> 00:00:13,160

Did you see something?

5

00:00:13,160 --> 00:00:16,400

Well, my little girl and her classmates saw it and then I found, well, this was Monday

6

00:00:16,400 --> 00:00:17,400

when they saw it.

7

00:00:17,400 --> 00:00:27,040

They were playing at school and then I heard from other people who also, my mother-in-law

8

00:00:27,040 --> 00:00:31,400

who teaches, different people in her class were talking about it, but my little girl

9

00:00:31,400 --> 00:00:39,920

and her classmates came right down over their school and they were able to do their drawings

10

00:00:39,920 --> 00:00:40,920

of it.

11

00:00:40,920 --> 00:00:49,160

This was Monday around, oh, I guess around 11 o'clock, 11.30 and we're in an apartment

12

00:00:49,160 --> 00:00:55,520

complex practically right behind the school.

13

00:00:55,520 --> 00:01:07,600

On Monday, I say between 11.30 a vibration started in the apartment in which we're living.

14

00:01:07,600 --> 00:01:11,160

I don't know if it was self-taught or the rest of the units, but anyway, the apartment

15

00:01:11,160 --> 00:01:17,640

in which we're living starts to vibrate and I didn't connect it to until she told us

16

00:01:17,640 --> 00:01:23,120

of this, well, she described it and she told us that evening, Monday evening, about it.

17

00:01:23,120 --> 00:01:27,800

And I happened to think of that vibration which I couldn't account for because when it

18

00:01:27,800 --> 00:01:33,960

started, it wasn't caused by anything I could relate it to.

19

00:01:33,960 --> 00:01:41,240

Anyway, I was curious because she wasn't the first one to see it, some of her classmates

20

00:01:41,240 --> 00:01:46,960

saw it and then our little girl saw it and she said and she was able to make this drawing

21

00:01:46,960 --> 00:01:47,960

of it.

22

00:01:47,960 --> 00:01:53,440

And the stories, you know, the stories all cooperate.

23

00:01:53,440 --> 00:02:00,760

So I called the school and they asked if there was any, if the children had been talking

24

00:02:00,760 --> 00:02:06,560

about it and they said no, no, not to their knowledge, but they did talk to the girls

25

00:02:06,560 --> 00:02:08,560

that saw it.

26

00:02:08,560 --> 00:02:13,080

Okay, what kind of description did they give on this thing?

27

00:02:13,480 --> 00:02:21,840

The way, the way it was that they were playing in the schoolyard and it's the elementary school

28

00:02:21,840 --> 00:02:30,520

and the one classmate called the other children's attention to it and she said it was like a

29

00:02:30,520 --> 00:02:36,720

big silver ball and she said it was as bright as the sun, seemed to be as bright as the

30

00:02:36,720 --> 00:02:41,240

sun and it was coming and it was over the school.

31

00:02:41,320 --> 00:02:48,000

On that day, Monday, the visibility here was perfect, the sky was blue, there were no clouds

32

00:02:48,000 --> 00:02:54,160

and it was an unusually clear condition, there was no smog and she said that, she said it

33

00:02:54,160 --> 00:03:00,800

was like a big silver ball and then she said it was surrounded by rings of color and she

34

00:03:00,800 --> 00:03:07,280

said it was like trying to come down to us and she then said in the center of it there

35

00:03:07,320 --> 00:03:13,280

appeared another bright sun, she said a real bright sun in the center of it and that got

36

00:03:13,280 --> 00:03:17,720

real bright and at that point they became frightened.

37

00:03:17,720 --> 00:03:18,720

So I said how large was it?

38

00:03:18,720 --> 00:03:24,520

She said it was about as large as a street, well she meant as large as a street as wide

39

00:03:24,520 --> 00:03:31,520

I guess and we took her to the school and on the school playground like they had these

40

00:03:31,840 --> 00:03:38,840

areas more than for that on a paving for games and so forth and there's a very large circle

41

00:03:39,160 --> 00:03:45,280

and the circle must be at least 30 feet diameter and I said now as large as the circle she

42

00:03:45,280 --> 00:03:51,480

said oh yeah, she was bigger than that and she said stay there and it was watching them,

43

00:03:51,480 --> 00:03:53,240

she said it was watching them.

44

00:03:53,240 --> 00:03:54,880

So I said well what happened then?

45

00:03:54,880 --> 00:03:59,200

She said well the school bell rang and we went in and she said I looked over my shoulder

46

00:03:59,240 --> 00:04:03,920

and she said I was going to look at it again and she said it will probably come back tomorrow.

47

00:04:03,920 --> 00:04:10,920

So we questioned the other girls and the story is the same with them and it's a dangerous

48

00:04:11,120 --> 00:04:18,120

thing so my mother-in-law was at class the other day and they were talking about something

49

00:04:18,280 --> 00:04:22,920

I don't know exactly what they were talking about more of the same thing you know UFO

50

00:04:22,920 --> 00:04:28,440

sighting and so I called the police department to see if there were any reports but it was

51

00:04:28,440 --> 00:04:34,120

this was Monday night now so she said you would have to call back earlier tomorrow so

52

00:04:34,120 --> 00:04:35,360

and they gave me your number.

53

00:04:35,360 --> 00:04:41,000

So the thing that puzzles me is that the kids were able to describe this thing and oh yeah

54

00:04:41,000 --> 00:04:43,600

they were I said well now what were these rings coming out from it?

55

00:04:43,600 --> 00:04:47,840

She said well they were like the colors in the rainbow and then she said no she said they

56

00:04:47,840 --> 00:04:51,880

were colored but they weren't like the rainbow but there were two rings and they came out

57

00:04:51,960 --> 00:04:58,960

from it and I said now this bright sun that came out of the sun out of it I said was it

58

00:04:58,960 --> 00:04:59,960

still all the time?

59

00:04:59,960 --> 00:05:04,640

She said no she said when it wasn't there before there was just like a big gray area.

60

00:05:04,640 --> 00:05:11,640

So it's just an amazing thing and then this vibration that we felt in the apartment complex

61

00:05:11,720 --> 00:05:17,200

happened had to happen at the same time because I connected the two and they were at recess

62

00:05:17,280 --> 00:05:23,480

around 11, 11, 30 between 11, 11, 30 and that's when this vibration started and it only lasted

63

00:05:23,480 --> 00:05:30,480

for I would say the vibration only lasted for 10, 15 seconds at the most.

64

00:05:34,280 --> 00:05:41,280

So I think it's just something that I'm surprised that others at the school didn't see it but

65

00:05:41,280 --> 00:05:48,280

I haven't really gone over there. I was going to take the drawings that these little girls

66

00:05:49,120 --> 00:05:55,120

made and take them over and ask perhaps if someone maybe an adult teacher or someone

67

00:05:55,120 --> 00:05:57,120

else might have seen it.

68

00:05:57,120 --> 00:06:00,120

Okay did they actually see this object leave?

69

00:06:00,120 --> 00:06:01,120

Pardon?

70

00:06:01,120 --> 00:06:04,120

Did they see the object leave?

71

00:06:04,120 --> 00:06:08,120

No they all went back into the classroom.

72

00:06:08,120 --> 00:06:10,120

Oh I see.

73

00:06:10,960 --> 00:06:15,960

Yeah and she said when she looked over her shoulder it was still there.

74

00:06:15,960 --> 00:06:18,960

Okay did they give any estimates how high that thing was?

75

00:06:18,960 --> 00:06:25,960

Yeah, yeah I was trying to have her give me an idea and we were looking at some poles,

76

00:06:32,280 --> 00:06:37,800

some high poles and it would be my guess. She pointed to a really high pole and it would

77

00:06:37,800 --> 00:06:44,800

be my guess it was at least several hundred feet off the ground. But from the way she

78

00:06:48,200 --> 00:06:55,200

described it, as large as she described it, like this circle.

79

00:06:56,840 --> 00:07:03,840

Yeah, see my wife was saying that after she drew the picture we have a film can here.

80

00:07:08,200 --> 00:07:13,600

It's like a can they put film in. And I said well the funny part of it was when it did the

81

00:07:13,600 --> 00:07:18,080

drawings. I said now you draw what it looked like. So she drew her classmates on the ground

82

00:07:18,080 --> 00:07:23,440

on a separate piece of paper and the playground, lots of trees and twings. And she named each

83

00:07:23,440 --> 00:07:29,800

of her friends and then she drew on another piece of paper the round object. And she drew

84

00:07:29,800 --> 00:07:35,040

it perfectly round and around the perimeter she put these two rings that were coming out

85

00:07:35,040 --> 00:07:41,480

from it and then right in the center she drew a smaller circle which she colored yellow.

86

00:07:41,480 --> 00:07:46,400

So she was trying to, I was looking at her she didn't know I was watching her but she

87

00:07:46,400 --> 00:07:52,800

was told because she put the piece of paper that had the object on it above the piece

88

00:07:52,800 --> 00:07:59,800

of paper that had her, she and her classmates playing. And she knew she wasn't quite getting

89

00:08:00,800 --> 00:08:06,800

it the way she wanted it. So my wife put the paper on where she drew the object at right

90

00:08:07,160 --> 00:08:11,760

angles and she says yes. She says that's how it was. It was like right above us. So then

91

00:08:11,760 --> 00:08:16,240

we held up this film can and we said now was it solid looking like this? Was it metallic

92

00:08:16,240 --> 00:08:23,240

looking? And she says yes. She says it was silver and metallic looking. And so the size

93

00:08:23,440 --> 00:08:29,640

of it, if it was larger than this circle it had to be quite low because this circle ever

94

00:08:29,680 --> 00:08:36,680

said is at least 30 feet in diameter. So she gave us good a description of something that

95

00:08:38,000 --> 00:08:44,200

you could certainly ever hope for. Did they hear any sound? No I asked her and she says

96

00:08:44,200 --> 00:08:50,000

no there was no sound. But when she said when we asked if there was any sound she said there

97

00:08:50,000 --> 00:08:57,000

was no sound. That's when I remember the vibration. Okay. And so whatever that vibration was it

98

00:08:57,200 --> 00:09:04,200

was very unsettling. The vibration when it started it was very unsettling because it was

99

00:09:05,360 --> 00:09:12,360

like a high intensity vibration. This is when things went rattling. It was like a very high

100

00:09:12,360 --> 00:09:19,360

however you might describe it. Things were just like humming. Okay. And how old was she?

101

00:09:20,360 --> 00:09:27,360

She's 7. Yeah. I asked the rest of her classmates and she said well she didn't know because they

102

00:09:31,400 --> 00:09:36,400

were looking up at it but she wasn't the first one to see it. It was her friend and then

103

00:09:36,400 --> 00:09:42,000

about four of her friends were all looking up at it. She said they were looking straight

104

00:09:42,000 --> 00:09:48,760

up at it. So she put her head back and it had to be almost directly overhead. Okay. Did

105

00:09:48,840 --> 00:09:54,120

they actually see this thing descending towards them or was it stationary? I don't know. I

106

00:09:54,120 --> 00:10:00,040

don't know when this went thought. I would have to ask her that. Did she mention how

107

00:10:00,040 --> 00:10:07,040

many were in that group of children? I would say about four or five. Okay. Yeah. She noticed

108

00:10:07,080 --> 00:10:12,840

them by name because I guess they're all the same age. Okay. Do you still have those drawings?

109

00:10:12,920 --> 00:10:19,920

Well yeah. We have the drawings. They're really humorous because the way she does, the way she

110

00:10:23,320 --> 00:10:30,320

drew the children and then the object. Okay. Is there any possibility of getting those?

111

00:10:31,040 --> 00:10:36,040

Oh sure. Sure. Be happy. We'll get a letter off to you about that.

112

00:10:36,040 --> 00:10:41,720

All right sir. Well we sure appreciate this report and we're going to check into this

113

00:10:41,800 --> 00:10:47,800

right away and see if we can come up with some information on it. And the object which

114

00:10:47,800 --> 00:10:53,800

she has described or you've described to me would fit the category of what we're referred

115

00:10:53,800 --> 00:11:00,800

to as the Saturn type object, a sphere surrounded by rotating bands or colored bands right down

116

00:11:02,960 --> 00:11:09,960

through the center. And it comes to the surprise that this took place in the early days of

117

00:11:11,720 --> 00:11:18,720

this and broad daylight like this because this usually doesn't happen. But we're going

118

00:11:21,280 --> 00:11:26,280

to check into it anyway and see if we can come up with some more information and if we get

119

00:11:26,280 --> 00:11:30,280

it, we'll get back to you and let you know. Okay. Okay. Well thank you now. Thank you

120

00:11:30,280 --> 00:11:31,280

very much. Bye.
