

1

00:00:00,000 --> 00:00:06,000

I'm in Blueville, Indiana.

2

00:00:06,000 --> 00:00:07,000

Yes, ma'am.

3

00:00:07,000 --> 00:00:15,000

And several friends of mine and I were talking on the CB radio on Scythe Ann and we heard

4

00:00:15,000 --> 00:00:20,000

something very strange and we were wondering if you could help us out with it.

5

00:00:20,000 --> 00:00:29,000

We heard transmissions by a lady talking and she was talking from another ship.

6

00:00:29,000 --> 00:00:37,000

And she was talking to the spaceship one through six and telling them that their estimated time of arrival

7

00:00:37,000 --> 00:00:45,000

and then she realized that the channel was being monitored by someone else and told them to go to the communications channel.

8

00:00:45,000 --> 00:00:49,000

Do you know of any activity in this area?

9

00:00:49,000 --> 00:00:51,000

No ma'am.

10

00:00:51,000 --> 00:00:54,000

What time did you pick that up?

11

00:00:54,000 --> 00:01:01,000

1.15 through 2.10.

12

00:01:01,000 --> 00:01:05,000

Okay.

13

00:01:05,000 --> 00:01:07,000

And that's all there was?

14

00:01:07,000 --> 00:01:10,000

Then they broke off and they didn't have any more?

15

00:01:10,000 --> 00:01:13,000

Well, it was broken up.

16

00:01:13,000 --> 00:01:16,000

The conversations were broken up through this period of time.

17

00:01:16,000 --> 00:01:24,000

And she was talking to Starship One and I couldn't hear the other side of the conversation.

18

00:01:24,000 --> 00:01:29,000

And she told them that their estimated time of arrival would be at 1.30.

19

00:01:29,000 --> 00:01:39,000

And then she spoke to Starship Five and then Starship Six and told them that their estimated time of arrival would be at 2.30.

20

00:01:39,000 --> 00:01:42,000

Okay. Which channel were you on at this time?

21

00:01:42,000 --> 00:01:46,000

On the upper side of Six Team on Side Band.

22

00:01:46,000 --> 00:01:47,000

Okay.

23

00:01:47,000 --> 00:02:01,000

And another party that we were talking to had gone up on Side Band on 22 and heard the conversation up there and told them she said something about going down to another channel.

24

00:02:01,000 --> 00:02:05,000

Okay.

25

00:02:05,000 --> 00:02:08,000

Did you hear of anyone else discussing this?

26

00:02:08,000 --> 00:02:12,000

Anyone else on the radio?

27

00:02:12,000 --> 00:02:14,000

Right. We picked it up.

28

00:02:14,000 --> 00:02:24,000

Yeah. There's five or six of us that were talking to one another and we heard this conversation in the background and we all kind of stood by and listened to it.

29

00:02:24,000 --> 00:02:35,000

And at one time, shortly after two o'clock, we heard someone saying something about the position was three miles above Evansville.

30

00:02:35,000 --> 00:02:40,000

Now, you've been talking, have you talked on CB quite a bit?

31

00:02:40,000 --> 00:02:42,000

Yes. We've been talking for over a year.

32

00:02:42,000 --> 00:02:47,000

Okay. Now, did that sound like it might be a CB transmission?

33

00:02:47,000 --> 00:02:54,000

Yes. In a way it did because he used AM Lingo.

34

00:02:54,000 --> 00:02:58,000

She said 10-4, Starship-4.

35

00:02:58,000 --> 00:02:59,000

Uh-huh.

36

00:02:59,000 --> 00:03:07,000

And that's the only time that I heard that particular lingo when she was talking.

37

00:03:07,000 --> 00:03:10,000

Okay. Could you hear anyone answering her?

38

00:03:10,000 --> 00:03:16,000

One time, Starship-4 returned the call and it was a male voice.

39

00:03:16,000 --> 00:03:17,000

Uh-huh.

40

00:03:17,000 --> 00:03:21,000

But I couldn't hear what he was saying. I just felt it was a male voice.

41

00:03:21,000 --> 00:03:23,000

Okay.

42

00:03:24,000 --> 00:03:27,000

Okay. What did you get her number?

43

00:03:27,000 --> 00:03:33,000

Um, I got her from the airport, um, um, the tower in Evansville.

44

00:03:33,000 --> 00:03:34,000

Okay.

45

00:03:34,000 --> 00:03:41,000

Well, I'll tell you, if we get any other information on this, we'll get back to you and let you know.

46

00:03:41,000 --> 00:03:42,000

Okay.

47

00:03:42,000 --> 00:03:50,000

We'll check on some of the official agencies and see if they've picked up anything and if we come up with anything, we'll get back to you.

48

00:03:50,000 --> 00:04:02,000

Okay. Now one of the positions of the fellow that we're talking on the radio, one of the positions is in Kentucky, about two miles south of the Ohio River.

49

00:04:02,000 --> 00:04:03,000

Uh-huh.

50

00:04:03,000 --> 00:04:13,000

And one of the positions of another boy was in Tennessee, Indiana, which is about 16 miles northeast of where I am.

51

00:04:13,000 --> 00:04:19,000

And another one is kind of southwest from me a few miles.

52

00:04:19,000 --> 00:04:30,000

And the fourth, fifth one was up in, um, up on Folsomville Road, which is, um, just north of Booneville.

53

00:04:30,000 --> 00:04:35,000

Um, I'd say he was maybe, oh, three or four miles out of town.

54

00:04:35,000 --> 00:04:38,000

I'm not sure how far it is, but two of them have been.

55

00:04:38,000 --> 00:04:40,000

Now I have a ground plane on my radio.

56

00:04:40,000 --> 00:04:41,000

Uh-huh.

57

00:04:41,000 --> 00:04:44,000

And I could hear the transmissions very clearly.

58

00:04:44,000 --> 00:04:51,000

I didn't pick up much, um, um, that there wasn't too much, you know, power.

59

00:04:51,000 --> 00:04:52,000

Yes.

60

00:04:52,000 --> 00:04:56,000

But the transmission was clear enough where I could understand it.

61

00:04:56,000 --> 00:05:05,000

Now two of them have a set of beams and one boy had his beams turned to the north and he was north of where I am.

62

00:05:05,000 --> 00:05:11,000

And the other person is kind of southwest from me and he had his beams turned another direction.

63

00:05:11,000 --> 00:05:15,000

And, um, both of them could hear the transmissions clear also.

64

00:05:15,000 --> 00:05:23,000

And, uh, kind of unusual, you know, if you had your beams turned two different directions, you would pick up the same, uh, transmission.

65

00:05:23,000 --> 00:05:26,000

Would this be an indication it could have been coming from the sky?

66

00:05:26,000 --> 00:05:27,000

Yes.

67

00:05:27,000 --> 00:05:29,000

Uh-huh. Okay.

68

00:05:29,000 --> 00:05:32,000

Okay, if we get any more on it, we'll get back to you and let you know.

69

00:05:32,000 --> 00:05:33,000

Okay, so I could.

70

00:05:33,000 --> 00:05:34,000

Thank you again.

71

00:05:35,000 --> 00:05:36,000

Thank you.
