

1

00:00:00,000 --> 00:00:19,300

We were looking out our window and we were in a five story building in Berkeley and we

2

00:00:19,300 --> 00:00:23,120

were looking out our window and happened to notice these four or five luminous objects

3

00:00:23,120 --> 00:00:27,840

above the mountain and they were hanging spending for a few minutes.

4

00:00:27,840 --> 00:00:29,840

We thought maybe you were balloons or something.

5

00:00:29,840 --> 00:00:33,840

Then they started moving sound along the hill.

6

00:00:33,840 --> 00:00:40,840

About halfway between our vision was a mountain on one side and the Golden Gate Bridge on the other

7

00:00:40,840 --> 00:00:43,840

and they were about halfway between those two points.

8

00:00:43,840 --> 00:00:47,840

They started moving down the side of the mountain.

9

00:00:47,840 --> 00:00:51,840

I mean there was any air between our line of vision and the mountain.

10

00:00:51,840 --> 00:00:56,840

They came down the side of the mountain and there's Angel Island that is about the same in vicinity.

11

00:00:56,840 --> 00:01:01,840

They came down close to the water and went around Angel Island and went into the bay.

12

00:01:01,840 --> 00:01:03,840

You saw them enter the water?

13

00:01:03,840 --> 00:01:06,840

You saw them enter the water through binoculars.

14

00:01:06,840 --> 00:01:08,840

Okay.

15

00:01:08,840 --> 00:01:11,840

Now did these objects have any deep eye shape?

16

00:01:11,840 --> 00:01:16,840

The thing was they had a luminescence like they were around.

17

00:01:17,840 --> 00:01:21,840

It looked like the main center was luminescence.

18

00:01:21,840 --> 00:01:30,840

There was an un-radiance area around each side.

19

00:01:30,840 --> 00:01:39,840

For example there was a sphere of luminescence in the middle with a little protrusion on either side that wasn't glowing.

20

00:01:39,840 --> 00:01:41,840

It was like a dark area.

21

00:01:41,840 --> 00:01:50,840

Like I said there were at least four or five but there were at least four.

22

00:01:50,840 --> 00:01:52,840

They spread out.

23

00:01:52,840 --> 00:01:58,840

It seemed to me that there was one slightly larger and then there were other smaller ones.

24

00:01:58,840 --> 00:02:02,840

The largest one was the one that went down first to Angel Island.

25

00:02:02,840 --> 00:02:11,840

The other ones were still following the contour of the hill until they came down to the valley.

26

00:02:11,840 --> 00:02:17,840

Then the main ones, the one we were watching first, when we noticed first, went down into the bay

27

00:02:17,840 --> 00:02:21,840

and the other seemed to follow down into the same area behind Angel Island.

28

00:02:21,840 --> 00:02:26,840

In other words we saw one going to the bay and the other ones went out of our line of sight.

29

00:02:26,840 --> 00:02:29,840

Okay. Now let's get back to the big one.

30

00:02:29,840 --> 00:02:31,840

Any estimate of size on that?

31

00:02:31,840 --> 00:02:36,840

Well, it's hard to tell except that I would say at least 30 to 50 feet at least.

32

00:02:36,840 --> 00:02:38,840

Okay, and it was circular?

33

00:02:38,840 --> 00:02:40,840

Yeah, it was round.

34

00:02:40,840 --> 00:02:46,840

Yeah, it was circular but like I said there were gray areas on either side that were not shiny.

35

00:02:46,840 --> 00:02:48,840

I mean they didn't reflect light or something.

36

00:02:48,840 --> 00:02:51,840

And it didn't look like it was sunlight being reflected.

37

00:02:51,840 --> 00:02:58,840

It looked more like the bodies and cells were glowing, which is what struck us as unusual in the first place.

38

00:02:58,840 --> 00:03:01,840

Plains, you know, they reflect the sunlight, you know.

39

00:03:01,840 --> 00:03:03,840

Right.

40

00:03:03,840 --> 00:03:09,840

Yeah, in fact my friend says he's looking at a plane now in the same area and it's not reflecting sunlight at all.

41

00:03:09,840 --> 00:03:12,840

I mean these objects were very bright.

42

00:03:12,840 --> 00:03:17,840

It was unusual. I mean I've never seen anything quite like this.

43

00:03:17,840 --> 00:03:19,840

Okay, now how big were the small ones?

44

00:03:19,840 --> 00:03:20,840

The estimate of that.

45

00:03:20,840 --> 00:03:29,840

Oh, just slightly smaller. I would say half as, a little larger than half as big as the main body.

46

00:03:29,840 --> 00:03:32,840

Okay, now did you actually see these when they were coming in?

47

00:03:32,840 --> 00:03:38,840

No, we just saw the main one first then we saw it was like other ones appeared from behind.

48

00:03:38,840 --> 00:03:42,840

See like the other side of the mountain, there is Pacific Ocean.

49

00:03:42,840 --> 00:03:43,840

Right.

50

00:03:43,840 --> 00:03:49,840

We saw the other ones later, like we saw the main one first then the other ones came up from behind the mountain.

51

00:03:49,840 --> 00:03:55,840

And like I said, I think they were supposed to be five, but at least four altogether.

52

00:03:55,840 --> 00:03:57,840

Okay, now you were looking due west at the time.

53

00:03:57,840 --> 00:03:59,840

Due west, that's right.

54

00:03:59,840 --> 00:04:03,840

Okay, and these objects were coming west to east.

55

00:04:03,840 --> 00:04:10,840

West to east and then there, I would say a few hundred feet above the top of the ridge.

56

00:04:10,840 --> 00:04:16,840

There's like a ridge across there. They started hitting south a little ways following the top of the ridge.

57

00:04:16,840 --> 00:04:20,840

And then went down between us and the ridge. We could see them going down.

58

00:04:20,840 --> 00:04:21,840

Okay.

59

00:04:21,840 --> 00:04:24,840

Following the face.

60

00:04:24,840 --> 00:04:28,840

Okay, now where they find any kind of formation?

61

00:04:28,840 --> 00:04:35,840

When they, when we saw them all together for brief period, they were all together before they were starts going down the side of the mountain.

62

00:04:35,840 --> 00:04:37,840

They were in line.

63

00:04:37,840 --> 00:04:45,840

Like for, I guess it would be formation. Yeah, they were the main one and they were two on each side of the main one.

64

00:04:46,840 --> 00:04:47,840

Okay.

65

00:04:47,840 --> 00:04:49,840

Now what time did you spot those?

66

00:04:49,840 --> 00:04:51,840

What time was it? What time is it now?

67

00:04:51,840 --> 00:04:53,840

Uh huh.

68

00:04:53,840 --> 00:05:02,840

322 now. It was about 15, 18 minutes ago, about three o'clock, two or three minutes after three.

69

00:05:02,840 --> 00:05:03,840

Okay.

70

00:05:08,840 --> 00:05:12,840

These things didn't do any radical maneuvering or motions, did they?

71

00:05:12,840 --> 00:05:17,840

No, not anything other than they're obviously moving under their own power.

72

00:05:17,840 --> 00:05:21,840

They weren't going very fast, but they're, I mean they weren't balloons.

73

00:05:21,840 --> 00:05:26,840

You know, it's like if they were balloons, they probably just kept, continued drifting upwards and with the wind.

74

00:05:26,840 --> 00:05:31,840

But these were still coming down and the other two seemed to go down the other side.

75

00:05:31,840 --> 00:05:37,840

And the main one, like I say, came between us and Angel Island and then went into the water.

76

00:05:37,840 --> 00:05:41,840

Okay, when that thing gets the water to the ridge, quite a bit of disturbance.

77

00:05:41,840 --> 00:05:47,840

Uh, hang on a second, hey Michael, you saw him in the water, did he create any disturbance?

78

00:05:47,840 --> 00:05:49,840

No.

79

00:05:50,840 --> 00:05:54,840

No, but he says he could see the light reflected from underneath the water.

80

00:05:54,840 --> 00:05:58,840

Okay, now did anyone see the others go in?

81

00:05:58,840 --> 00:06:01,840

No, they just disappeared behind Angel Island.

82

00:06:01,840 --> 00:06:03,840

Yeah, okay.

83

00:06:04,840 --> 00:06:07,840

It's fine.

84

00:06:07,840 --> 00:06:10,840

Is that one of them right there?

85

00:06:10,840 --> 00:06:14,840

Can you see, look, look, look, is that thing on the hill there?

86

00:06:14,840 --> 00:06:19,840

Is that, it's the top, look at the top of that house over there.

87

00:06:19,840 --> 00:06:21,840

See there?

88

00:06:21,840 --> 00:06:23,840

Look through the binoculars.

89

00:06:27,840 --> 00:06:31,840

Look through the binoculars, look at, see the peak of that house?

90

00:06:31,840 --> 00:06:34,840

See there, see that light?

91

00:06:37,840 --> 00:06:39,840

I don't know.

92

00:06:39,840 --> 00:06:43,840

Okay, well, they're just gone now, I guess that, uh...

93

00:06:43,840 --> 00:06:46,840

Nobody saw anything come back up out of the water though, right?

94

00:06:46,840 --> 00:06:48,840

Uh-huh, no.

95

00:06:48,840 --> 00:06:53,840

Now what, in your estimation, would be the entire duration of the observation?

96

00:06:53,840 --> 00:06:55,840

At least 15 to 18 minutes.

97

00:06:55,840 --> 00:06:57,840

Okay.

98

00:06:58,840 --> 00:07:00,840

And just the two witnesses?

99

00:07:00,840 --> 00:07:02,840

Yes, uh-huh.

100

00:07:03,840 --> 00:07:05,840

And where did you get our number?

101

00:07:05,840 --> 00:07:07,840

Um, we got it from the Coast Guard.

102

00:07:07,840 --> 00:07:09,840

Coast Guard, okay.

103

00:07:11,840 --> 00:07:13,840

You didn't hear any sound while this was going on?

104

00:07:13,840 --> 00:07:17,840

Oh, no, no, no, it was, we were way across the bay.

105

00:07:17,840 --> 00:07:21,840

There was any sound while, you know, about the sky conditions there?

106

00:07:21,840 --> 00:07:27,840

Clear, absolutely, just sunny, slight, slight haze, you know, but, but, uh...

107

00:07:27,840 --> 00:07:29,840

It's absolutely clear of blue sky.

108

00:07:29,840 --> 00:07:33,840

Okay, did, uh, any time did you see the sunlight actually reflecting off of these things?

109

00:07:33,840 --> 00:07:39,840

Um, they had sort of a flashing quality to the luminescence.

110

00:07:39,840 --> 00:07:43,840

Like, it might have been sunlight reflecting off of an extremely bright polished surface,

111

00:07:43,840 --> 00:07:48,840

but like I say, there was another gray, uh, kind of surface that was not reflecting sunlight

112

00:07:48,840 --> 00:07:51,840

or was not giving off any light at all.

113

00:07:51,840 --> 00:07:52,840

Okay.

114

00:07:52,840 --> 00:07:57,840

And did they maintain that same color and same light effect at all times while you were watching them?

115

00:07:57,840 --> 00:07:59,840

Yeah, it was the same thing.

116

00:07:59,840 --> 00:08:01,840

Okay.

117

00:08:01,840 --> 00:08:06,840

Yeah, and when they went down close to the hills, we thought maybe we were seeing reflections of a fire or something,

118

00:08:06,840 --> 00:08:11,840

you know, like a temperature inversion or something, but, uh, I've never seen anything like that.

119

00:08:11,840 --> 00:08:16,840

You know, there was no fire in the area, as we can determine, no smoke or anything like that.

120

00:08:17,840 --> 00:08:25,840

Um, plus, like I say, they look like objects rather than just, uh, you know, light playing tricks or something.

121

00:08:25,840 --> 00:08:28,840

Right, okay. You didn't see any openings or anything?

122

00:08:28,840 --> 00:08:33,840

No, no, no, we couldn't get a clear enough view of that.

123

00:08:33,840 --> 00:08:38,840

Okay, well, we sure appreciate your reporting this. We'll check it out and if we come up with any more information,

124

00:08:38,840 --> 00:08:40,840

why we'll get back to you and let you know.

125

00:08:40,840 --> 00:08:45,840

Oh, yeah, I'd appreciate that. That'd be really great if you could tell us, you know, what you find out.

126

00:08:45,840 --> 00:08:47,840

Great. Thanks again. Okay, thank you.
