

1

00:00:00,000 --> 00:00:03,000

Let me turn on Bob.

2

00:00:03,000 --> 00:00:04,000

Alright.

3

00:00:04,000 --> 00:00:06,000

Yep, let me turn on the tape.

4

00:00:06,000 --> 00:00:08,000

As far as the new year, how does it look?

5

00:00:08,000 --> 00:00:12,000

It looks like we're starting off kind of slow and generally, what's the trend?

6

00:00:12,000 --> 00:00:15,000

Starting off very slow, everything is very quiet.

7

00:00:15,000 --> 00:00:22,000

Of course, this is a par for January of any year around the country or the Pacific Northwest.

8

00:00:23,000 --> 00:00:31,000

Now, I suppose nationally, have we noticed, are there any, look back at 74, how does it compare with years before that?

9

00:00:31,000 --> 00:00:35,000

And what is the overall national trend?

10

00:00:35,000 --> 00:00:42,000

Well, nationally for 1974, it was a very quiet year in comparison to past years.

11

00:00:42,000 --> 00:00:51,000

But it's interesting to note that for 74, the Pacific Northwest, Washington and Oregon took number one spot for the number of sightings which were reported.

12

00:00:51,000 --> 00:00:57,000

If you averaged out all the sightings we had over the past year, what would they turn out to be like?

13

00:00:57,000 --> 00:01:00,000

What is the average setting like?

14

00:01:00,000 --> 00:01:05,000

Well, the average sighting would be an object at fairly low altitude.

15

00:01:05,000 --> 00:01:16,000

Usually, the witnesses are able to give a very good description of a sharply outlined object and in many cases, describe supinecructure.

16

00:01:16,000 --> 00:01:19,000

And is there any characteristic color tone?

17

00:01:19,000 --> 00:01:25,000

The colors usually run red or orange or red and orange.

18

00:01:25,000 --> 00:01:29,000

This is a pattern for the color spectrum over the years.

19

00:01:29,000 --> 00:01:37,000

Do you think the government will, in the coming year, do much on UFO research or do you think they'll maintain the same molding of truth to its status?

20

00:01:37,000 --> 00:01:43,000

I think they're going to maintain an all quiet, say nothing attitude just let the subject come into its own.

21

00:01:43,000 --> 00:01:48,000

I don't think that we're going to see any major government or official denials in the future at all.

22

00:01:48,000 --> 00:01:52,000

I think that this subject is on its own now.

23

00:01:52,000 --> 00:01:57,000

Outstanding, yeah. It's kind of interesting.

24

00:01:57,000 --> 00:02:11,000

I don't know. I've talked to a couple of people back in Washington and the thing which they keep repeating to me is that these things don't pose any threat to national security.

25

00:02:11,000 --> 00:02:16,000

I don't know. I find that kind of interesting. You know, they've already reached that conclusion.

26

00:02:16,000 --> 00:02:20,000

Of course, they've always maintained this and all their news releases anyway.

27

00:02:20,000 --> 00:02:27,000

And just a question, what really is the whole spectrum when you speak of national security?

28

00:02:27,000 --> 00:02:33,000

Is it a military action or economic action or what?

29

00:02:33,000 --> 00:02:36,000

Yeah, it's kind of interesting.

30

00:02:36,000 --> 00:02:42,000

But I really believe that they've just completely opened the door now and they're going to let the thing come into its own.

31

00:02:42,000 --> 00:02:44,000

Do you think it will?

32

00:02:44,000 --> 00:02:50,000

If I wanted to go look for one, I mean, can you actually go look for a U.S. off?

33

00:02:50,000 --> 00:03:02,000

I spend very little time watching the sky, but there are people who do go out and if you want to go to a spot which you would be most likely to see something,

34

00:03:02,000 --> 00:03:10,000

get out into the rural areas, stay away from your cities and the suburbs.

35

00:03:10,000 --> 00:03:17,000

According to the statistics, that's where all the sightings or the majority of the sightings are being made anyway.

36

00:03:17,000 --> 00:03:25,000

Huh. Okay. And are there any parts of the outlying zone outside of Seattle,

37

00:03:25,000 --> 00:03:32,000

what would be the highest probability area to see one? You know, around here?

38

00:03:32,000 --> 00:03:39,000

Well, I couldn't make any specific suggestions on that.

39

00:03:39,000 --> 00:03:44,000

Towards the lighter part of last year, in the Homestown, he was reporting quite a bit.

40

00:03:44,000 --> 00:03:49,000

I would imagine anywhere up in that area.

41

00:03:49,000 --> 00:03:52,000

This is one of the big problems.

42

00:03:52,000 --> 00:03:59,000

They seem to concentrate activity in one particular area for a period and then everyone will rush to that area to see something.

43

00:03:59,000 --> 00:04:03,000

At that time, they've picked up their gear and gone somewhere else.

44

00:04:03,000 --> 00:04:05,000

Do they leave gear down on the ground?

45

00:04:05,000 --> 00:04:06,000

No, not really.

46

00:04:06,000 --> 00:04:10,000

They just kind of concentrate.

47

00:04:10,000 --> 00:04:16,000

Huh. I'll be darned. I wish I could figure out what the hell they were.

48

00:04:16,000 --> 00:04:20,000

Well, we're convinced they're vehicles of some kind, not of this world.

49

00:04:20,000 --> 00:04:22,000

Yeah.

50

00:04:22,000 --> 00:04:29,000

Well, obviously, unless all of these very qualified witnesses are telling a lot of big tales,

51

00:04:29,000 --> 00:04:42,000

because the type of craft that they're using and the things that they do just completely go beyond all of our laws of physics and aerodynamics.

52

00:04:42,000 --> 00:04:43,000

Yeah.

53

00:04:43,000 --> 00:04:50,000

And they've been around long enough so that the same thing that was seen 300 years ago in this country is being seen today,

54

00:04:50,000 --> 00:04:54,000

and they've really explained it away as being some new government development.

55

00:04:54,000 --> 00:04:57,000

I'm standing, Bob.

56

00:04:57,000 --> 00:04:59,000

Hold on. One sec. Right back.

57

00:04:59,000 --> 00:05:01,000

I hate to run, Bob, but I gotta get back to work.

58

00:05:01,000 --> 00:05:02,000

Okay.

59

00:05:02,000 --> 00:05:03,000

Much appreciated.

60

00:05:03,000 --> 00:05:04,000

Okay, George.

61

00:05:04,000 --> 00:05:06,000

One of these days, like I said, we'll get together and do that half of our program, too.

62

00:05:06,000 --> 00:05:07,000

Fine.

63

00:05:07,000 --> 00:05:08,000

Okay.

64

00:05:08,000 --> 00:05:09,000

Thank you.

65

00:05:09,000 --> 00:05:10,000

Bye-bye.
