

'ALIEN INHABITS MY BODY'

A WOMAN in Rhode Island claims an alien being has been inhabiting her body for the last five years.

Lydia Stalnaker says she was abducted by a UFO on April 17, 1974 in Jacksonville, Florida, and was joined to the alien, whom she calls Antron.

Mrs. Stalnaker also says she was given special powers and can now heal the sick, raise the dead, see through solid objects and prophesy the future.

And one event the alien has predicted through her, she said, is the end of the world in 1983.

"Only the 'good' will survive the cataclysm — only those who have lived their lives according to the Ten Commandments," Mrs. Stalnaker of Davisville, Rhode Island, told *The Globe*.

"Those who are saved will be taken from Earth in a great spaceship and transported to a planet in a nearby star system."

Antron said that the Earth will tip on its axis, causing great earthquakes and flooding, explained Stalnaker.

The planet will remain, but it will be unrecognizable, she added.

And the exact number of those to be saved is not known because more and more people are coming to God, she said.

Stalnaker said that she and Antron were joined together on April 17, 1974, after she was abducted by a UFO near Jacksonville, Florida.

"It was very strange," recalled Stalnaker. "Suddenly the UFO was hovering over the car and then it seemed to disappear."

But when the 46-year-old woman checked her watch, three hours had elapsed.

Months later, Stalnaker went to see a doctor because she was having some strange dreams and she was placed under hypnosis.

LEADING UFO EXPERT MAKES STARTLING CLAIM
People who were abducted by aliens
have developed super psychic powers

STONED who claim they have been abducted by alien beings have now developed amazing psychic abilities, says one of the country's top UFO experts.

UFO expert says that people who have been abducted by aliens have developed super psychic powers.

FLASHBACK... The Globe, Dec. 25, 1979.
Abductees claim psychic powers.

Natural disaster will destroy the earth in 1983, woman claims

"It was then that the missing three hours were accounted for," Stalnaker recalled.

"Apparently, the car had been stopped by the UFO and I was taken from it by three aliens dressed in gray jumpsuits.

"They were quite human-looking and were about my height — 5 ft. 6 in."

Stalnaker said the aliens subjected her to a multitude

of tests using strange instruments and devices.

"They seemed pleased at what they found," she added.

"Afterwards, I was taken to a strange-looking creature, who seemed to be in command.

"Unlike my first captors, his head was quite large, with a bulging cranium.

"His eyes were red and they seemed to bore right into my mind.

"He used telepathy to speak to me. His thoughts seemed to jump into my mind.

"I asked him what he wanted with me and he said I

had a special mission which involved saving mankind from a great catastrophe.

"He said I had been selected because I had a special body chemistry and mental stability that the mission required.

"I asked him if he was God. He said he wasn't, but that he was a messenger from God."

The alien said that one of his people had been placed within her and that she would receive special powers from God, reported Stalnaker.

And since that time, Stalnaker said she has received the powers as promised.

"The aliens are immortal. They do not become sick and death to them is just a sickness.

"The key is the food they eat. For instance, they eat no meat.

"The alien with the red eyes said his people are incapable of hating or doing evil."
