

Muhammad Ali: I've Been Watching a UFO for 12 Years

Muhammad "The Greatest" Ali says he's been observing the same UFO on and off for 12 years.

"I've seen it in different spots in the sky," the former heavyweight boxing champ said. "I've probably seen it 15 times."

Ali's not only convinced that he's been watching a UFO, he's sure anyone can watch it if they follow his instructions.

"Go out about 2 in the morning on a clear night," he said. "Look for a bright, bright star. You'll see the North Star — but that's not it. You'll see something like a star just shining real bright. Watch close and you'll see it move.

"And you'll see little white objects like little white lights go off of it, circle around it, then land back on it. One will pop up from the bottom and come back. Another will pop off the left side and back. Off and on — this happens over and over.

"Sometimes the thing will shake to the left and to the right. Then it'll go up and get smaller and smaller until it disappears.

"Then it'll come back to where it was and get bigger and bigger until it's back to normal size.

"I don't know about UFOs other people have seen. But I believe in what I've seen."
