**Light relief
over UFO**

A UFO, sighted by five police officers over Dumfries in South-west Scotland at the weekend, may have been the effect of Post Office engineers working on a transmitting station.

The object was reported to have been seen hovering to the north-west of the town shortly after 1 a.m. on Saturday. But it has been disclosed that engineers were working that night at a nearby transmitting tower, and had switched on lights which may have caused the UFO effect.
