

AID TO UFO SIGHTINGS

THREE members of the Nottingham UFO Investigation Society, Mr. Les Hall, Mr. Sid Henley and Dr. Robert Morrell, met with representatives from other groups stationed in the UK at Birmingham Midland Institute at the weekend in a joint venture aimed at co operation.

Mr. Hall, secretary of NUFOIS, said afterwards: "The meeting was very successful. Some basic decisions have been taken towards co-operation with MAUFOG — Members of the Affiliated UFO Groups — who are based in Southern England over a region from Cornwall to Bristol. This means an exchange of information on UFO sightings will which aid investigation work."

During the conference Mr. Hall was approached by Miss Jenny Randles of the Northern UFO Network to lead a NUFON delegation in the setting up of a working party to look at the code of practice used in the investigation of UFOs, to see if this can be approved.

It was also proposed in principle for the setting up of a Resources Centre which, if accepted, would be housed at Meadow Lane. There would be a major library for research purposes.

Mr. Henley, the sightings co-ordinator, said: "I think the decisions taken at the meeting take us a step nearer to a UFO investigation network covering the whole of the UK."
