## Spectating 'saucer'

A mysterious surprise "spectator" went along to the Harriers Sports ground last week.

The strange visitor was spotted by Mr Trevor Porter, of Sebright Road, Wolverley, who was at the stadium at 8.30 pm last Thursday evening to watch a local match.

According to Mr Porter's description he saw a green, black rimmed object travelling diagonally across the sky.

It was oval in shape and had a long fiery tail.

Said Mr Porter: "I was only able to see it for a few seconds, but other people at the sports ground also saw it.

"It was quite spectacular and resembled a small comet."
