LAWRENCE HAS UFO RE-THINK

SCEPTIC Lawrence Chater changed his mind when he thought he saw a UFO in Bradford's sky. The 59-year-old caretaker at Usher Lane School, Usher Lane, off Wakefield Road, noticed a slowly-moving object early yesterday evening.

"I'm not one who believes in little green men from outer space but I'm convinced there was something unusual out there," he said.

"I watched it on and off for about an hour.

"I know it was moving because I lined it up with objects on the ground and it changed direction."

Mr. Chater called the school cleaners out to look at the object which he described as a blob of light much brighter than a star.

"They could see it too," he said. "I scoffed at things like this before but I've changed my mind.

"I've seen this on a number of occasions but it seemed to attract my attention more tonight somehow."
