Armada of UFOs

Sunday

3/1/82

MORE than 100 unidentified flying objects were spotted in Spanish air space last year, a UFO watcher claimed.

And one of them was as big as an oil tanker, journalist Juan Jose Benitez said.

Benitez, from Bilbao, added that the captain of an Iberian jet liner reported getting radar signals from the giant UFO off Spain's Atlantic coast last August.

The same mystery UFO was registered by the air control tower at Las Palmas, on the Canary Islands, Benitez said.

And a dozen witnesses spotted a bright shining arrow-shaped object hovering over the sea last February — then taking off without a sound, according to Benitez.
