

Armada of UFOs

MORE than 100 unidentified flying objects were spotted in Spanish air space last year, a UFO watcher claimed yesterday.

And one of them was as big as an oil tanker, journalist Juan Jose Benitez said.

Benitez, from Bilbao, added that the captain of an Iberian jet liner reported getting radar signals from the giant UFO off Spain's Atlantic coast last August.

And a dozen witnesses spotted a bright shining arrow-shaped object hovering over the sea last February — then taking off without a sound, according to Benitez.
