

UFO that set dogs barking

POLICE were last night investigating the case of the UFO that frightens dogs. *flying saucer*

Sightings of a large, bright orange unidentified flying object, floating over Heywood, Greater Manchester, were reported late last night.

Many people said their pet dogs howled in terror as it passed.

But no unusual sightings were recorded by air traffic control at Manchester Airport.

A police spokesman said: "It may have been a trick of the light, but why dogs should have been affected, I can't imagine."
