Woman injured in vicious UFO attack

Pretty Denise Bishop will spend the rest of her life trying to forget the unimaginable horror of a vicious UFO attack.

Paralyzed, her mind screaming a silent prayer for help, the young woman was hit by a strange ray which pinned her against the door of her house like a living laboratory specimen.

"I had never believed in UFOs or starships before," the vivacious 23-year-old accounting clerk told The NEWS. "But there it was . . . a UFO, hovering over the garden. And when I tried to go into the house, it shot at me.

"An eerie lime-green ray beamed out of the spaceship and zapped my hand on the doorknob. I was absolutely helpless.

"It was like some horrifying nightmare and I kept hoping that I would wake up safe in my own bed. But it wasn't a dream. It was real. I still have a scar where the green ray struck my hand."

Denise's skin-crawling ordeal unfolded late one night only a few weeks ago as she walked up the steps of the bungalow on Weston Mill Hill where she lives.

"I had taken a taxi home that night and I remember it was about 11:15," she recalled. "Just as I reached the door, I looked out toward the garden. That's when I saw it — a UFO

was just hanging there. It was a massive ship with a rounded top and flashing pink, purple and white lights. But the colored lights weren't vivid. They were softer, like pastel shades.

"The body of the spaceship was greyish, metallic color, but I don't know what it was made of.

"It didn't make a whisper of a sound, either. It just hovered silently in the moonlit sky."

For moments that seemed an eternity, Denise stood by the door, her eyes riveted on the giant UFO that seemed near enough to touch, her mind mesmerized by the rhythmic blinking of its multi-colored lights.

Finally, she managed to pull herself back to reality and made a desperate lunge for the door.

"As I grabbed the doorknob, a lime-green beam came down from the spaceship and zapped my hand. I couldn't move a muscle.

"Then, as suddenly as it

came, the beam went back inside the spaceship and I could move again.

"Then the ship started to move upward, still not making any sound."

Denise dashed inside the house and told her 18-year-old sister Kerry.

Within minutes after the spaceship vanished into the dark void of space, a burn-like mark appeared on her hand from the beam.

"Now I believe in UFOs. But the encounters people have are so strange that it makes you think twice about talking about it. You don't want people to think you're insane."
