# Release UFO files demand

## CAMPAIGN HEADS FOR A CLOSE ENCOUNTER

By Chris Hewett

A CAMPAIGN is gaining force for the release of top-secret Government files on unidentified flying objects and other close encounters.

A growing number of people want to see the evidence.

Many of the incidents took place in the West.

The Aetherius Society, an international organisation which investigates sightings of flying saucers and other UFOs, believes Governments of both leading parties have concealed information.

### Truth

On April 23, the society will hold a public meeting in Bristol when UFO experts will talk about their experiences and reveal some of the mysteries.

Dr Richard Lawrence, European secretary of the society, said: "It is disgraceful that serious questions of international importance asked by members of the House of Lords should be treated in such a fatuous manner by both parties.

"The society is a non-political organisation dedicated to imparting the truth about UFOs and other subjects.

"We intend to do this despite the lies and white-washing of world governments for so many years."

The meeting will be held in 300 Gloucester Road, starting at 8pm.
