

Abducted by UFOs — 4 Times

“Oh God! There’s somebody at the door! They’ve come for me . . . I can’t resist them. Outside, there’s a huge thing, shaped like a derby hat, with red and green flashing lights . . .”

Her voice filled with fear, Barbara Schutte was recalling one of the four times she was abducted by aliens, taken aboard a spacecraft and forced to undergo painful, terrifying physical examinations.

Incredibly, the 31-year-old nurse discovered in a series of hypnotic sessions that her first abduction by strange, other-worldly beings occurred when she was only 8. The last one happened in February.

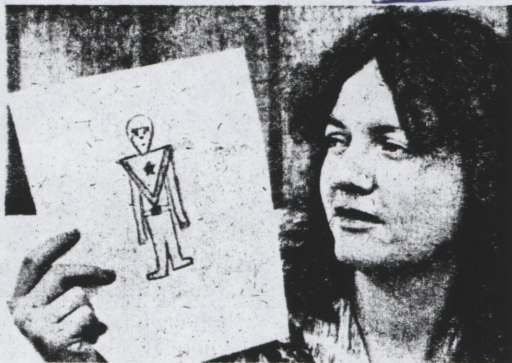

“It’s a remarkable story,” marveled Dr. R. Leo Sprinkle, a University of Wyoming psychologist and UFO expert who hypnotized and regressed Barbara five times to uncover her bizarre buried memories.

The amazing story began to unfold last September when Barbara, of Wever, Iowa, woke up dizzy and nauseated with strange bruises on her body. I couldn’t account for any of them,” she said. “They weren’t there when I went to bed.”

Tormented by a vague memory of someone holding her down and examining her mouth, Barbara consulted Dr. Sprinkle.

Under hypnosis by Dr. Sprinkle, she recalled being escorted to a small room with bright lights, lying on a soft couch and seeing her abductors. She gave this description:

“They are little, like children. They make me smile. I

don’t see any ears. They have no hair. Their eyes are black. Their mouth is like a hole . . . They have baby-soft skin, lighter than ours . . .”

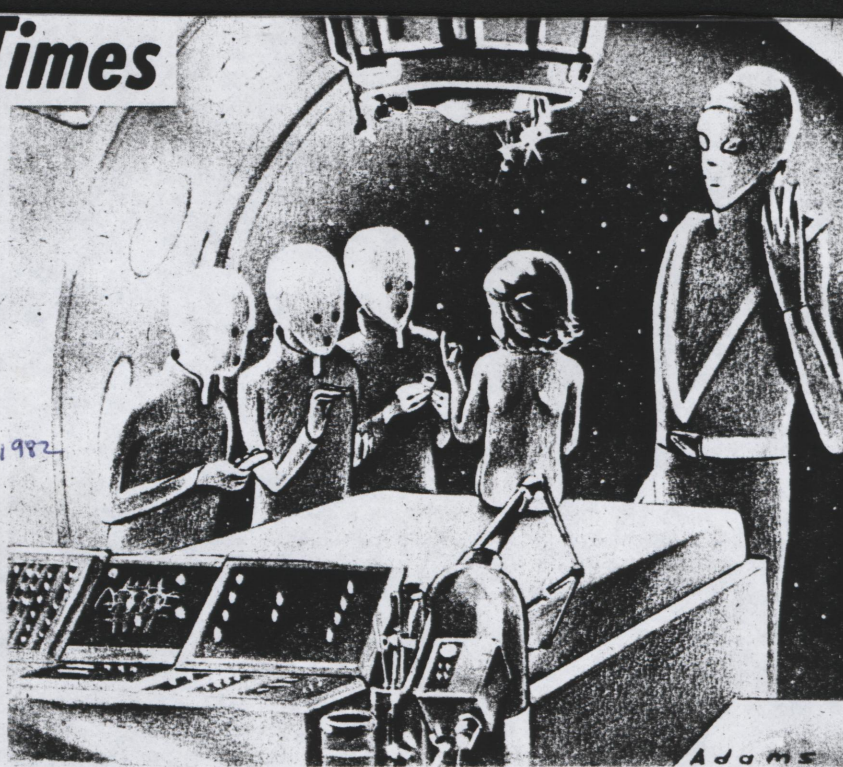

Suddenly she found herself in another room, frightened and feeling a sharp pain in her back. A tall alien, “like a soldier,” with a V-shaped de-

sign on his uniform, was with her, she said.

“His arms are long. He has no thumbs,” she remembered.

By questioning her, Dr. Sprinkle discovered this abduction took place in April 1973, when Barbara was 22. In a second hypnotic session, he asked her to recall her childhood, and incredibly, she remembered being abducted when she was only 8 years old.

In 1959, she said, she was

taken aboard a spacecraft and examined by several small aliens. She said the tall spaceman, with the V-shaped design on his uniform, was also there and acted very friendly toward her.

Her third abduction occurred last September. She recalled being in bed, hearing something outside, and feeling scared. Then she was taken outside to the derby-shaped craft with flashing lights.

“It’s as big as a house, with

a big dome and a rim around the bottom. I’m going inside, moving like I’m on a conveyor belt,” she said under hypnosis.

Then she described undergoing an examination and feeling sharp pains in her leg and head. At last the ordeal ended and Barbara woke up in her own bedroom with bruises and marks on her.

After the series of hypnotic regression sessions with Dr. Sprinkle, Barbara was getting ready to leave for home when she had a sudden compulsion to grab a pencil and paper and begin writing.

In an astonishing case of “automatic writing” — in which her hand was controlled by some invisible force — she scribbled a message from the alien with the V on his uniform. It said, in part:

“Be happy, Barbara. Success is at your doorstep. We are proud of you. You are our special host. We will guide you every step of the way.”

The alien promised to return to her, and signed his message: “Your friend from childhood, Quazgaw.”

Under hypnosis by Florida UFO expert John Blair, Barbara learned she was abducted again last February.

She recalled that she was “floated” from her home to a spacecraft, given tests by aliens and had fluid injected in her.

She awoke on her own couch with puncture marks and bruises on her left arm.

“I used to think it was silliness to claim that anybody could be taken aboard a UFO,” she told The ENQUIRER. “But now I know abductions do happen.”
