

Little gold men are coming

Michael El-Legion says he was in Arizona in 1981 when a man with gold hair and gold eyes walked up behind him and delivered a telepathic message about divine intervention to prevent nuclear war.

The 29-year-old Californian says aliens will land on Earth six weeks from now to take a billion or so people for a two-week space trip. When they all return, El-Legion says, they'll all be brighter and stronger and Earth will be a happy, advanced world.
