ON the face of it, Michael Legion is just as human as the rest of us. But he claims he's from outer space.

According to Michael he was beamed down from Orion, 1,500 light years away and his mind and memory were transferred to a human baby seconds before it was born.

He also says there are a thousand other men and women on Earth from the same star.

Michael, 27, manager of an American furniture factory, told his story while under deep hypnosis at the South-West Research Centre, Arizona.

Mission

And scientist John McQuiston, an authority on lie-detection, said: "Stress tests of Michael's voice on the tapes prove beyond doubt that he didn't lie."

Michael said when hypnotised: "My wife, Aurora, also comes from Orion. Our task is to help save Earth from self-destruction."

Aurora said under hypnosis: "Our mission is peace. We cannot stand by and see Earth destroy itself. Many more of us will come to help."
