

JUST OUT OF THIS WORLD

By GEORGE EDWARDS

ON THE FACE of it, Michael Legion is just as human as the rest of us. But he claims he's from outer space.

According to Michael, he was beamed down from Orion 1,500 light years away and his mind and memory were transferred to a human baby seconds before it was born.

He also says there are a thousand other men and women on Earth from the same star constellation.

Michael, 27, manager of an American furniture factory, told his story while under deep hypnosis at the South-West Research Centre, Arizona.

Michael said when hypnotised: "My wife, Aurora, also comes

from Orion. Our task is to help saving Earth from self-destruction. There are no wars on Orion and no illnesses. We are millions of years ahead in science and technology."

Aurora said under hypnosis: "Our mission is peace. We cannot stand by and see Earth destroy itself. Many more of us will come to help."

Mr George Cogan, Director of the Research Centre told me: "After extensive scientific investigation several experts say Michael is telling the truth. It's baffling."
