

Mike is out of this world

By GEORGE EDWARDS
ON THE FACE of it,
Michael Legion is
just as human as the
rest of us. But he
claims he's from
outer space.

According to
Michael, he was
beamed down from
Orion, 1,500 light
years away and his
mind and memory
were transferred to a
human baby seconds
before it was born.

He also says there
are a thousand other
men and women on
Earth from the same
star constellation.

Michael, 27, mana-
ger of an American
furniture factory, told
his story while under
deep hypnosis at the
South-west Research
Centre, Arizona.

Task

And scientist John
McQuiston, an author-
ity on lie-detection,
said: "Stress tests of
Michael's voice on the
tapes prove beyond
doubt that he didn't
lie."

Michael said when
hypnotised: "My wife,
Aurora, also comes
from Orion. Our task
is to help save Earth
from self-destruction."

Mr George Cogan,
Director of the Re-
search Centre told me:
"After extensive
scientific investigation
several experts say
Michael is telling the
truth. It's baffling."
