

# QUICK-DRAW KIDS TRACK A UFO

**A**N amazing UFO sighting by more than 200 people is being investigated.

Among those who spotted the "flying saucer" along a 40-mile stretch of South Wales coastline were two policemen, a class of schoolchildren and a football team.

The sighting—over a one-hour period—is one of the best-witnessed ever.

First to spot the hazy, triangular-shaped craft were 22 pupils at Cardin's Eglwys Wen primary school.

## Good view

They told their teacher, Helen Williams, who was astounded when the children later produced near-identical drawings.

Twenty miles west, at Llantwit Major, football coach Joe Toland and a team of boys also got a good view of the UFO.

And at Swansea, detectives Mike Troake and

Spotters—Jonathan Hutchins, 7, and sister Lyndsay, 5

By STEVE BAILEY

Gethin Humphreys could hardly believe their eyes when the craft glided slowly overhead.

Sgt Troake, 42, said last week: "I'm used to seeing

aircraft in the sky but this was massive—much bigger than a plane.

"There was a large main cluster of lights at the front, shaped a bit like a Zeppelin, followed by a triangular group of lights.

"They were moving gracefully across the sky about

1,000 ft up." The two officers did not enter an official report for fear of ridicule from sceptical colleagues.

Ian Mrygold, of the UFO Research Association, said: "Simple lights in the sky are easy to explain away.

"But this was a gigantic solid structure."
