

Mr. Dogan Sum is a naval officer retired at 1974, after a traffic accident paralysed him. He spent most of his time at his wheel-chair, photographing sea vessels for his friends at Gölçük naval base.

He also took a photographs of a submarine at 28 October 1981, at Gölçük. It was a clear day and there was nothing unusual in the sky while he was taking pictures. But a yellow object appeared over the submarine in the printing. He gave the negative and the printing to the Hürriyet, a Turkish daily newspaper and they sent them to Newyork to be checked.

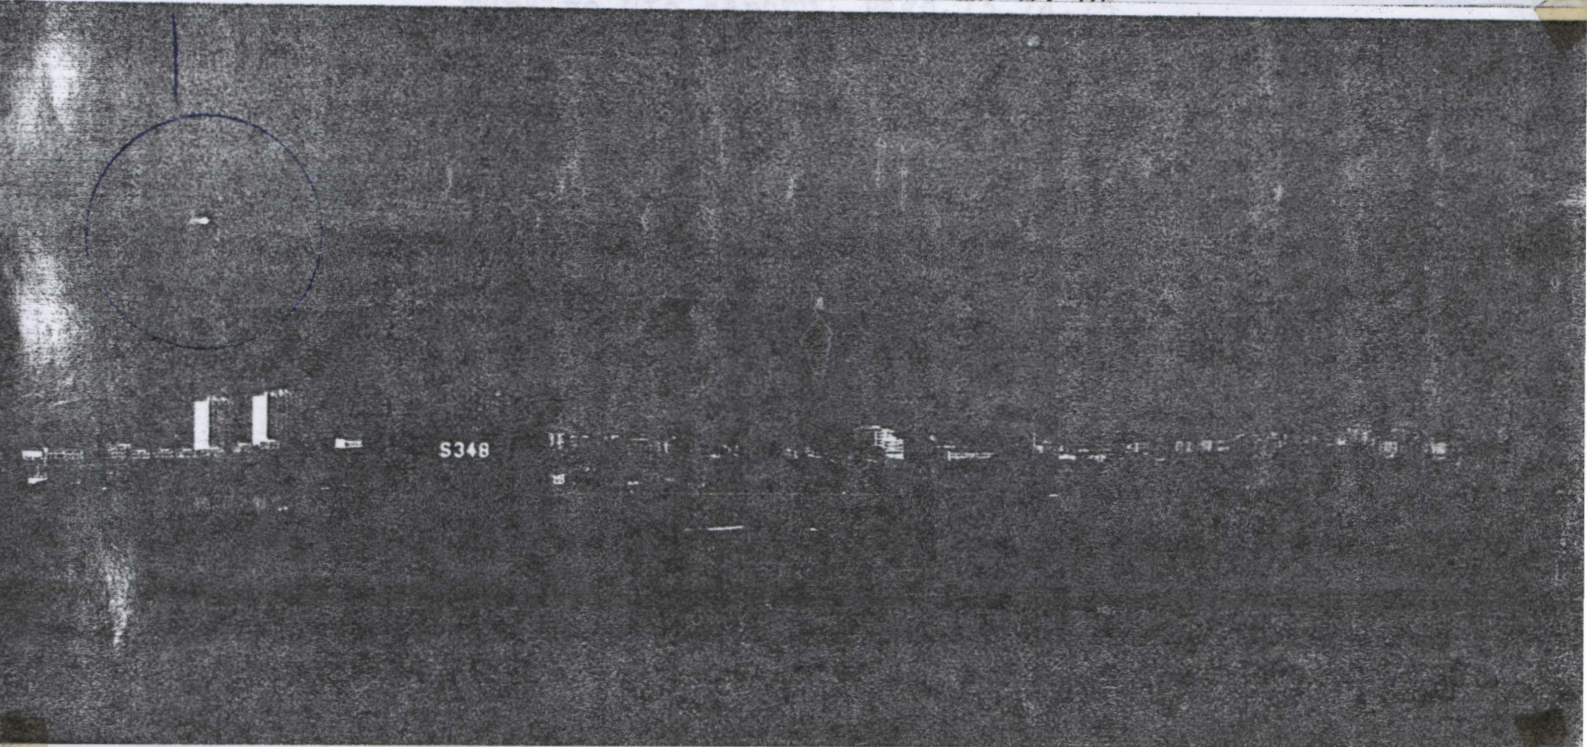

According to the test results the photos ~~was~~ untouched and there really was an object over the submarine at that time.

SOURCE : 1 May 1983 , Sunday Hürriyet, a daily Turkish Newspaper, Front Page.
