PSSST : The Air Force has got the bodies of a dozen 3ft. tall extra-terrestrials recovered from crashed space ships. This intelligence comes from Citizens Against UFO Secrecy, which has gone to court in Washington to demand that the Government hand them over. The suit, to which the Justice Department has 60 days to respond, claims the group has possession of a recently declassified document detailing how the Air Force removed 'three bodies of human shape but only 3ft. tall, dressed in metallic cloth of very fine texture' from several flying saucers downed in New Mexico in 1950.
