Riddle of Yorkshire Triangle

A SERIES of brightly lit objects seen in the sky over North Yorkshire have been accepted as genuine "UFO sightings."

In each of the three sightings—all by police officers—photographs were taken and sent to the Ground Saucer Watch in Arizona, the world's leading authority on unidentified flying objects.

They classified them as UFO's. Of 1,400 pictures they have studied in the past 30

years, only 42 have been confirmed as UFOs.

Last night British UFO expert Mark Birdsall, whose office is in Leeds, said: "The area has become known as the Yorkshire Triangle — as big a mystery as the Bermuda Triangle.

"There is certainly something very strange going on up there."
