UFO pictures 'not of planes'

PROBABLE brightly lit objects above the North Yorkshire moors are definitely not aircraft. That is the judgment of the world's leading authority on unidentified flying objects, the prestigious Ground Saucer Watch in Arizona, America. The pictures were

taken by a senior police officer from the North Yorkshire force last November.

Several other sightings have been made in the same area since 1981 — all by policemen.

The incidents have become the big mystery at the Electric Triangle.

TERRY: Big bust

Love nests for f

THE Government is being asked to spend £40,000 to set up special love nests for falcons. Colonies of the rare, protected peregrine falcon have been discovered in disused tin mines.
